 — Mr. James E., patients at Moorfields Hospital, 339; ophthalmoscopic appearances after embolism of central artery, 518; peculiar changes at yellow spot, 964
Adeno-sarcoma of testis with secondary growths in viscera, 768
Adulteration of quinine, 215; of wines, 470; of pepper, 543; of mustard, 635; in the County Down, 683
Advertisements by professional men, 88, 190, 391, 441, 545, 1101, 1211
Ady, Mr. J. C., native midwifery in Rangoon, 106
Ædiles, London, 1104
Age, Old, Dr. Charcot's Lectures on Diseases of, *rev.*, 915
Ague and phthisis, 216
Air, analysis of, 750; entrance of into veins, Mr. F. Treves on, 1278
Albany, Duchess of, accouchement of, 424
Albumen, Dr. F. W. Favy on ferrocyanic pellets as test for, 308, 324; tests for, 356, 460, 526, 749; Dr. G. Johnson on picric acid as test for, 504, 515, 514, 858; Dr. C. H. Ralfe on, 661; Dr. G. Oliver on tests for, 765
Albuminuria complicating tuberculosis, 208; chloral in, 235; and Bright's disease, 593
Albuminuric retinitis of pregnancy, Dr. Emrys-Jones on, 712; Dr. Ryerson on, 1116
Alcohol, report of Committee of Harveian Society on mortality referable to, 97, 162; letters on, 278; discussion on, 360; poisoning by, 173; or milk in treatment of insanity, 371; and non-intoxicating drinks, 139, 288, 490, 493; from smoke, 793
Alexander, Mr. A., obituary notice of, 848
 — Dr. W., the cause of vertigo, 956
Alhambra, cases from fire at the, 107
Allatt, Dr. O. J. R., obituary notice of, 1045
Allbutt, Mr. H. A., tricycles for medical practitioners, 1263
 — Dr. T. C., pulse-tracings in nephritis, 1007
Allen, Messrs. James and Son, steam draft kettle, 290
Allinson, Mr. T. R., a vegetarian's experience, 441; vegetarian cookery, 600
Almonds, poisoning by volatile oil of, 217, 335
Althaus, Dr. J., nocturnal enuresis treated by voltaic alternatives, 104; risks of massage, 1223
Aluminium probes, 1283
Amateur prescribing, 124
Ambulance, a country, 1210
 — lectures in Aberdeen, 269, 327, 633
 — service in Aberdeen, proposed, 528
 — service for Hyde Park, 873, 1048
 — service in Liverpool, 1195
America, medical journals in, 68
Amputation, the coat-sleeve, 683, 740
 — at hip for necrosis of femur, 156; method of, 314, 369; for sarcoma of femur, 813
 — at shoulder-joint, 530
Amyl, nitrite and of nitroglycerine in asthma, Dr. A. Sheen on, 811; nitrite of in uræmic asthma, Dr. T. Sanctuary on, 956; Mr. J. Ringwood on, 1064; Dr. S. C. Smith on, 1115
Anæmia, pernicious, 719; Dr. Ransome and Dr. Mules on a case of, 1112; functional cardiac murmurs of, Dr. W. Russell on, 1053; Dr. Byrom Bramwell on, 1213, 1274
Anæsthesia, difficulty of producing, 89
Anæsthetics in certain operations, 316; deaths from,

Mr. W. E. Williams on, 350, 881; Dr. E. H. Jacob on, 353, 481; letters on, 481, 482; Mr. G. H. Patterson on, 510; Mr. G. W. Isaac on, 662; Mr. J. H. L. Macintyre on, 1001; use of during labour, Dr. T. D. Savill on, 903; letter on, 994. See Chloroform and Ether
Anæsthetic apparatus, Junker's, 821, 871, 917, 921, 969
Analysis, discrepancies in, 474
Anatomy, Pathological, Dr. Delafield's Studies in, *rev.*, 258; Gray's, *rev.*, 626; Surgical, Mr. J. McLachlan's Handbook of, *rev.*, 1074
Anderson, Dr. McCall, treatment of pulmonary consumption, 114; peliosis rheumatica, 1103
Andrew, Dr. B., extraction of senile cataract in its capsule, 41
Aneurysm of aorta, abdominal, 359
 — of aorta, thoracic, dissecting, 17; ligature of right subclavian and central artery for, 311; involving innominate artery, 312; cases of, 359, 718, 912, 966; double, 360
 — of axillary artery, ligature of subclavian for, 671
 — of carotid artery, external, ligature of carotid artery for, 311
 — of femoral artery, ruptured, ligature of external iliac artery for, 818
 — of innominate artery, 357
 — of popliteal artery on both sides, Dr. S. Gordon on ligature of femoral arteries for, 661; treated by Eschsch's bandage, 689; Mr. T. Holmes on ligature of femoral artery in, 1106; treated by digital compression, Mr. A. E. Barker on, 1279
 — in young persons, 946, 1050
Angove, Mr. E. S., trismus treated with chloral and bromide of potassium, 662
Aniline dyes, Mr. H. A. Reewes on fixing of, 450
 — sulphate of in chorea, 1101
Animals, rickets in, 15; medicine as practised by, 261, 545; diseases of bones in, 359, 379; communicability of syphilis to, 728
Ankle, inflammation around, 32; chronic disease of, 461, 1121
Ankylosis of hip treated by section of femur, 155; treatment of, 1068
Anophthalmia, unilateral, 253
Anthrax, cases of, 459, 473, 527; Dr. Koch on inoculation in, *rev.*, 870
Antiseptic, carbonic acid as an, 287
 — ointment, colourless, 162
 — treatment of pulmonary disease, 517, 962
 — trocar, 464
Antisepsis in fevers and exanthemata, 255
Antivaccinists on Dr. Buchanan's report, 541; at Halifax, 1012
Antivivisection in Scotland, 174; fair play of, 728
Antrum of Highmore, papilloma of, 115
Anus, Dr. A. S. Myrtle on neglected affections of, 1061
Aorta, abdominal, aneurysm of, 359; thrombosis of, 415
 — thoracic, dissecting aneurysm of, 17; ligature of subclavian and carotid arteries for aneurysm of, 311; aneurysm of involving innominate artery, 312; specimens of aneurysm of, 359, 718, 912, 966; double aneurysm of, 360
Apomorphia as an emetic, Mr. John Brown on, 907
Apothecaries' Hall of Ireland, statistics of examinations, 835; the Medical Act Amendment Bill, 1068, 1247
Apothecaries' Society of London, pass lists, 35, 86, 136, 188, 233, 286, 337, 387, 439, 543, 597, 647, 697, 746, 796, 848, 894, 943, 1046, 1098, 1158, 1209, 1260, 1312; statistics of examination, 835; removal of from recognised authorities in Medical Act Amendment Bill, 873, 1151
Appeals, 37, 138, 288, 338, 598, 649, 798, 850, 898, 945
Apprenticeship, 340
Aroher, Mr. R. S., Cases of Enteric Fever Complicated by Biliary Calculi, *rev.*, 419
Arledge, Dr. J. T., pernicious anæmia, 719; acute pneumonitis and its treatment, 1285
Arm, Mr. J. H. Crisp on gangrene of, 562
Armies, British and French, Surgeon-General Longmore on Sanitary Contrasts of, in Crimean War,

rec., 1127; Mr. R. Rawlinson on hygiene of, 1276, 1295

Army, British, principal medical officer in Egypt, 35, 134; the hospital corps, 63, 540; home and foreign service, 33; hospital practice in Egypt, 120; in Egypt, health of, 134, 231, 321, 433; deaths, 131, 185, 279, 540, 1043; Lord Wolseley on issue of spirit ratios to, 169; organisation of medical department, letters on, 185, 437, 540, 742, 936, 1012, 1258; promotions and appointments, etc., 185, 383, 540, 1043, 1258; Dr. Corban's suggestions as to sanitation, 230; committee on organisation of medical service, 279, 463, 1009, 1015, 1033, 1090; successful candidates at examinations, 333, 463; new pattern belt and pouch for surgeons, 333; examinations, 333; new water-bottle and water-cart, 436; remarks on medical organisation, 463; the *Army and Navy Gazette* on the medical department, 445; vaccination in the, 533; Irish students at medical examinations, 641, 742, 936, 967, 1042; new assistant professor of pathology at Netley, 642; hospital corps entertainment in Belfast, 663; opening of session of medical school, 692; revaccination in, 692; return from Medical Department to General Medical Council, 835; presentation of medals to hospital corps in Egypt, 845; Sir T. G. Logan, 936; recommendations of committee on medical service, 1033; Sir W. Mac Cormac on hospital management in the field, 1039; proceedings in Parliament respecting publication of report of Committee, 1045; analysis of report of Committee, 1037, 1147; routine in medical administration, 1094; the Medical Department of and the war in Egypt, proceedings in Parliament regarding, 1157, 1159, 1203, 1204, 1205, 1311; purchase of hospital supplies by medical officers, 1307

 Myles, Mr. E. H., sick headache and astigmatism, 237; causes of increase of cancer, 1314
 Myoma of uterus, 418; of uterus, becoming sarcomatous, 459
 Myopia in schools, 952, 1012
 Myrtle, Dr. A. S., neglected affections of the anus, 1051
 Myxœdema, symptoms of in a child, 110; after wound of neck, 224; Dr. T. Oliver on, 502; after hæmorrhage, Mr. T. R. H. Clunn on, 663; cases of, 669, 713
 N.
 Nævus of rectum fatal from hæmorrhage, 717
 Nails, Mr. H. A. Smith on psoriasis of, 405; of toes, hypertrophy of, 911
 Nance, Mr. H. G., presentation to, 1282
 Naphthalin in Medicine and Agriculture, Dr. E. Fischer on, *rev.*, 419
 Naphthol, pomade of, 597
 Napier, Dr. A. D. L., medical provident society, 688; occipito-posterior presentation, 906
 Narcotics, sale of by druggists, 828
 Nash, Dr. J. P., dipsonania, 750
 Naso-pharyngeal tumours, 868
 Navy, medical survey of officers, 35; Greenwich Hospital pensions, *ib.*; appointments, 134, 185, 439; successful candidates at examinations, 455; medical officers of, and the Egyptian war gratuity, 712, 987; returns to General Medical Council, 835
 Neale, Dr., chemical lung, 190, 235; feeding of infants, 591
 — Mr. W. H., etiology of scurvy, 410
 Neck, myxœdema following wound of, 221; Dr. D. A. Charles on gunshot wound of, 611; symmetrical fatty tumour of, 623; malignant tumour of, 1182
 Necropsy, warts after, 289
 Needle, surgical, with spring eye, 81
 Needle-holder, new, 1282
 Nephrectomy, cases of, 17, 123, 669, 1104, 1226
 Nephritis of pregnancy affecting vision, Mr. P. Salter on, 356
 Nephrolithotomy, cases of, 315, 1069
 Nephrotomy, case of, 216
 Nerve, facial, stretching of for convulsive tic, 1122
 — fifth, morphea in region of, 361
 — median, deformity after injury of, 1070
 — phrenic, function of, 335
 — sixth, paralysis of with choriform movements of face, 113
 — sympathetic, vaso-dilator function of, 213
 — third, paralysis of with cerebral symptoms, 113
 — ulnar, Mr. H. W. Page on secondary section of, 1233
 Nerve, parastation and Hysteria, Dr. W. S. Playfair on Systematic Treatment of, *rev.*, 1233
 Nerve-stretching, local temperature after, 571; therapeutic value of, 966
 Nervous influence, Dr. C. F. Hutchinson on, 407
 — subject, high temperature in a, 1007
 — system, Dr. A. H. Bennett on diseases of, 318; Dr. McKendrick on physiological discovery in relation to, 965, 1058, 1108; influence of in production of disease of blood-vessels, 1131
 Nettleship, Mr. E., morphea in region of fifth nerve, 961
 Neumann, Dr., communicability of syphilis to lower animals, 728
 Neuralgia, facial, neurotomy for, 911
 Neuritis, optic, in intracranial disease, cause of, 968; pathology of, 1007
 Neville, Dr., fetal deformities, 309; breaking down of umbilical cord, *ib.*
 Nevitt, Mr. J. G., new form of intra-uterine pessary, 84

- New Forest, sanitary report of, 1096
 Newman, Dr. D., fixation of floating kidney, 831
 — Dr. W., medical provident society, 274
 Newton Abbot, sanitary report of, 1096
 Nice, the medical profession in, 34; and its Climate, Dr. A. Baréty on, *rev.*, 519
 Nicholson, Dr. J. F., itching in uterus, 89
 Nipped in the bud, 468
 Nitric acid, poisoning by, 976
 Niven, Dr. T., typhoid fever, 817
 Nix, Dr. E. J., a warning, 897
 Nixon, Mr. F. A., removal of maxillary tumour by dental engine, 1297
 Nook, Mr., charge against, 123, 265
 Nodules, subcutaneous, in a syphilitic subject, 867; rheumatic, 624, 888
 Noise as a nuisance, 371
 Norton, Mr. A. T., organic stricture of rectum, 512
 Nose, thickening of septum of, 256
 Note-taking and collective investigation, 688
 Nottingham, notification of infectious diseases at, 643, 645, 693, 744, 884, 1094; death-rate in, 937
 Nurse, Mr. W. E. C., notification of infectious disease, 1259
 Nuisance, noise as a, 371; an intolerable, 897
 Nunm, Mr. T. W., Cancer of the Breast, *rev.*, 19
 Nurseries, day in Manchester, 1092
 Nurses, female, in naval hospitals, 278; Glasgow Training Home for, 375; Egyptian war medal for, 833; sick, provident system for, 573; lectures to, 826, 1239
 Nursing at King's College Hospital, 34; Dr. Cullingworth's Manual of, *rev.*, 1129
 — Home, Coltishall, report of, 230
 — Institute, Swansea and South Wales, first meeting, 467
 Nystagmus infantilis, 1066
- O.
 Oates, Mr. J. P., tracheas, 331
 Obituary, Dr. J. A. Wilson, 25; Dr. F. R. Irwin, 30; Dr. J. G. Linn, 75; Mr. A. Davison, 85; Dr. R. Elliot, *ib.*; Dr. G. Gregory, 86; Surgeon-General J. Gibbons, 134; Dr. F. K. Fox, 136; Dr. J. F. Meigs, 196; Dr. T. C. Shinkwin, 175; Dr. G. M. Beard, 263; Dr. T. Watkins Williams, 335; Dr. T. Martin, 376; Mr. A. Paull, 386; Mr. H. C. Gill, 387; Dr. G. M. Bacon, 437; M. Bertillon, 471; Mr. J. L. Paterson, 490; Mr. F. Goodchild, *ib.*; Mr. J. J. Hill, 542; Dr. von Bruns, 571; Mr. P. De la Rue, 677; Dr. James Reid, 697; Mr. R. W. Isbell, *ib.*; Dr. J. Palfrey, 728; Mr. H. Manby, *ib.*; Dr. H. Steele, 746; Mr. A. Milne, *ib.*; Dr. W. H. Van Buren, 780; Dr. William Farr, 783; Dr. J. K. Burt, 793; Mr. A. Alexander, 848; Dr. T. B. Barton, 878; Surgeon-General J. L. Holloway, 894; Mr. T. Hicks, 895; Dr. W. Steele, 926; Mr. W. E. Tuke, 941; Mr. B. Willis Richardson, *ib.*; Dr. R. Druitt, 973; Mr. M. L. Jones, 988; Mr. Hugh Lloyd, *ib.*; Dr. James Young, 1018; Mr. P. Brendon, 1045; Mr. T. W. Cattell, *ib.*; Dr. C. J. R. Allatt, *ib.*; Dr. William Chambers, 1085; Mr. J. F. F. West, 1097; Dr. S. Gilmore, 1196
 Observatory on Ben Nevis, 430, 1085
 Obstetrics, Dr. R. Barnes's Synoptical Guide to Study of, *rev.*, 820
 Ocean-cure for phthisis, 267; Dr. J. C. Thorowgood on, 310

- Shuttleworth, Dr. G. E., homes for imbeciles, 339, 390
- Sick-Rooms, Mrs. Leslie Stephens's Notes from, *rev.*, 317
- Sierra, Señor Don Manuel, military medical journal-ism, 83

Sieveking, Mr. Herbert, the hospital at Cairo, 82, 1170
 Signalmen, sleepy, 471
 Sight, of children in schools, 829; short, among boys in Greenwich Hospital School, Fleet-Surgeon Hadlow on, 952; remarks on, 1012
 Silcock, Dr. A. Q., aneurysm of abdominal aorta, 359; tubercular ulceration of pelvic and abdominal organs, 774
 Silk, Dr., optic neuritis, 1007
 Silvester, Dr. H. R., gold medalion of Royal Humane Society presented to, 167
 Simon, Dr., treatment of ringworm, 720
 Simpson, Mr. John, presentation to, 797
 — Dr. W. J., notification of infectious diseases in Aberdeen, 644; the germ-theory of disease, 815
 Sims, Dr. J. Marion, treatment of syphilis, 418
 Sinclair, Dr., chronic oöphoritis, 868
 Sincock, Mr. J. B., medical provident society, 37, 434, 639, 983
 Skin, and hair, sudden change in colour of, 670
 Skinner, Mr. E., retroversion of gravid uterus, 115
 Skoda, the late Professor, memorial of, 921
 Skull, ulceration of, 254; recovery from fracture of base of, 417; and bladder, tumour of, 621; trephining in fractures of, 729, 767; sponge-grafting after trephining for fracture of, 767; fracture of with conjugate deviation of eyes, 817; Mr. Joseph Bell on Loss of Memory following Injuries of, *rev.*, 820; tumour of base of, 868; congenital syphilis of, 869; malformation of with congenital absence of clavicles, 909; Mr. W. Stokes on excision of large tumour from base of, 1114
 Slaughter-houses, proposed regulation of, 48, 491
 Sleeplessness, treatment of, 1102
 Small-pox, in Staffordshire, 67, 823, 467, 571, 677; at New Cathcart, 130; at Nottingham, 167; at Glenamaddy, 221, in London, 471; at Leeds, 779; in Belfast, 1139; in the Hackney Union Infirmary, 1229; influence of hospitals for, 58; reports of hospitals, 593; death-rate among children as influenced by vaccination, 628; effect of vaccination on, 922, 1215, 1240; recent epidemic of, *ib.*; ignorance of and indifference to vaccination, 1095
 Smith, Mr. Alder, gastrotomy for intestinal obstruction, 999
 — Surgeon-General C. M., death of, 893
 — Mr. E. Noble, lateral curvature of spine, 68; treatment of lateral curvature by perforated felt-jacket, 455; lameness from abnormal conditions of feet, 1111, 1168
 — Mr. Herbert A., psoriasis of the nails, 405; moist hands, 1314
 — Dr. Heywood, and Barnes, Dr. F., report of British Lying-in Hospital, 52; sacral teratoma, 158; Porro's operation, 158
 — Mr. J. M., medical practice abroad, 88
 — Mr. P. Gordon, hospitals for infectious diseases, 159
 — Mr. Priestley, growth of the crystalline lens, 112; eserine in glaucoma, 566; impaired vision, 720; new registering perimeter, 964
 — Dr. R. Angus, development of living germs in water, 26; new test for organisms in water, 913
 — Dr. R. C., detection of bacilli of phthisis in breath, 105; bacillus tuberculosis in abscess near anus, 1282
 — Dr. R. Shingleton, morbid anatomy and pathology of diabetes, 657
 — Mr. S. W., medical provident society, 933
 — Dr. Solomon C., treatment of increased arterial tension, 198; pulse-breath and pulsatile respiration, 511; effect of paralysis of palate on articulation, 1008; nitrite of amyl in uræmic asthma, 1115
 — Dr. Walter, unilateral paralysis of soft palate, 18; polyposis of vocal cord, 1284
 — Dr. W. A., chronic empyema treated by drainage, 964
 — Dr. W. Tonge, incubation of scarlet fever, 150
 Smoke, prevention of, 172, 265, 290, 325, 326, 339, 828; Official Reports of Abatement Committee, *rev.*, 672; alcohol from, 723; working of Acts regarding, 923
 Smoking of cigarettes and paper, 233, 289, 390
 Smyly, Dr. W. J., abortion for hæmorrhage, 518; sudden change in colour of hair and skin, 670
 Smyth, Dr. W., treatment of spermatorrhœa, 600
 Snakes, poisonous, 472
 Snell, Mr. S., actual cautery in treatment of corneal ulceration, 9, 1008; extraction of cataract by a shallow lower flap, 44; scarring of infant's face from injuries at birth, 416; ingrowing eyelashes treated by electrolysis, 1008
 Society, Aberdeen University Temperance, *conversazione*, 474
 — Anthropological, of Paris, legacy to, 779
 — of Arts, Albert medal of, 1238

Society, Birmingham Natural History, sociological section of, 825
 — Charity Organisation, and London tenement houses, 783
 — of Chemists and Druggists, special meeting, 311
 — Clinical, of London, child presenting symptoms of myxœdema, 110; enormous enlargement of lower lip, *ib.*; transpatellar excision of knee, *ib.*; annual meeting, 1286; Dr. A. Clarke address on clinical investigation, 191, 239, 365; infective power of scarlet fever during pre-eruptive stage, 207; notes on meetings, 217, 976, 1134; committee on spina bifida, 266; superiosteal amputation at hip-joint, 314; successful nephro-lithotomy, *ib.*, 315; tests for albumen in urine, *ib.*; supposed hydrophobia treated by chloral, 413; pseudo-hyperphoric paralysis, 414; fracture of radius and dislocation of ulna at wrist, 514; acute necrosis of orbital plate of frontal bone, *ib.*; picric acid as a test for albumen and sugar in urine, 515; osteitis deformans, 666; excision of right carpus, *ib.*; contused wound of thigh and leg in child, *ib.*; tetanus, 667; removal of pin from larynx, 770; erythematous eruption in enteric fever, 771; lateral curvature of spine, 772; tabetic arthropathy involving tarsal bones of both feet, *ib.*; living specimens, 772, 961, 1068; lepra tuberculosa, 886, 1122; removal of large portion of upper lip, 886; tacheitic symmetrical gangrene, *ib.*; subcutaneous nodules in syphilis, 867; rheumatism cutaneous, subcutaneous, and periosteal nodules, 868; test for sugar in urine, 960; cerebral abscess, meningitis, on pyæmia originating in disease of ear, *ib.*; morpha in region of fifth nerve, 961; nystagmus infantilis, 1068; excision of small globe, *ib.*; ulceration of pylorus, 1067; sebaceous or dermoid cyst of tongue, *ib.*; stretching the facial nerve for convulsive tic, *ib.*; spondylitis deformans, 1123; epithelioma in old cicatrices, *ib.*; nodes from congenital syphilis, 1124; infantile hemiplegia with unusual reflex phenomena, *ib.*
 — Epidemiological: influence of small-pox hospitals, 58; hospitals for infectious diseases, 159; the Delhi or oriental sore, 718; phthisis, bronchitis, and pneumonia as epidemic diseases, 774; mortality among women and children of European soldiers in India, 962
 — Harveian, of London: officers and council, 47; report on mortality referable to alcohol, 97, 162, 360; annual meeting, and *conversazione*, 170; pleuro-pneumonia, 255; treatment of fevers and exanthemata by antiseptics, *ib.*; congenital talipes, 460; treatment of *post partum* hæmorrhage, *ib.*; excision of upper jaw, 624; lupus, *ib.*; suspected hystero-epilepsy, *ib.*; congenital dislocation of radii, 773; tubercular ulceration of pelvic and abdominal organs, 774; peculiar disturbance of capillary circulation, *ib.*; antiseptics in midwifery, *ib.*; gastro-intestinal catarrh simulating typhoid fever, 961; hectic stimulating relapse in typhoid fever, 992; brain with dilated ventricular cavity, *ib.*; respirators and antiseptic inhalations, *ib.*; solution of vesical and renal calculi, 1006; treatment of catarrhal deafness in children, *ib.*
 — Health, Edinburgh, annual meeting, 529
 — Hunterian, office and council, 369
 — Medical, of Cambridge: communicability of phthisis, 415; thrombosis of abdominal aorta and celiac axis, *ib.*; election of officers, 869; diabetes treated with codæia, *ib.*; new method of treating chronic glaucoma, *ib.*; congenital syphilis of calvarium, *ib.*; the late Dr. Bacon, 964; treasurer, *ib.*; chronic empyema treated by drainage, *ib.*; paralysis of extremities following sore-throat, 965; unusual tumour of breast, *ib.*; new clamp for treatment of hæmorrhoids, 1182; antelexion of uterus, *ib.*; polyposis of uterus, *ib.*; necrosis of orbit, *ib.*; malignant tumour of neck, *ib.*; cystic growth in axilla, 1183
 — Medical, of Cardiff, office-bearers, 214
 — Medical, of London: intestinal obstruction from volvulus of ileum, 114; abdominal pulsations, *ib.*; acute tuberculosis complicated by albuminuria, 268; officers and council, 469; cold douche in delirium tremens, 460; poisoning by citrate of caffeine, 517; antiseptic treatment of pulmonary disease, *ib.*
 — Medical, of Manchester: officers and council, 168; recoveries from fractures of base of skull, 417; nodose malformation of hair, *ib.*; letter during attack of cerebral hæmorrhage, *ib.*; cardiac lesion with purpura, *ib.*; tubercle-bacillus, 418; typhoid fever at Newton Heath, *ib.*; treatment of phthisis by iodoform, 817; fracture of skull with conjugate deviation of eyes, *ib.*; muscular atrophy, *ib.*; typhoid fever, *ib.*; removal of scapula, *ib.*; acute atrophy of liver, 818; ruptured femoral aneurysm, *ib.*; progressive pernicious anemia, *ib.*; rupture of brachial plexus, 868; naso-pharyngeal tumour, *ib.*; tumour growing from base of skull, *ib.*; effects of electric light on eye, *ib.*; chronic oöphoritis, *ib.*; excision of elbow, 1069; cystinuria, *ib.*; nephrolithotomy, *ib.*; rare forms of muscular atrophy, *ib.*; treatment of chronic ovarian disease, 1070.—Microscopical Section: Weigert's method of staining nerve-tissues, 114; cirrhosis of liver in child, *ib.*; papilloma of antrum, 115; sarcoma of forearm, *ib.*; officers, 287; methods of staining tissues and organisms, 721; bacilli exhaled by phthisical patients, *ib.*; placental polyposis, *ib.*; angiomata, *ib.*
 Society, Medical, Midland: primary lateral sclerosis of spinal cord, 368; dislocation of lens, *ib.*; ovarian cysts, *ib.*; operative treatment in intestinal obstruction, *ib.*; exophthalmos and optic neuritis, *ib.*; knee-joint, *ib.*; sarcoma, *ib.*; specimens of renal disease, *ib.*; eserine in glaucoma, *ib.*; chronic inflammation of joints, *ib.*; talipes, 669; nephrectomy, *ib.*; osteitis of tibia and fibula, *ib.*; hæmorrhage from tonsil, *ib.*; ligation of common carotid artery, *ib.*; myxœdema, *ib.*; trephining in injury of head, *ib.*; pulse in disease, of heart, *ib.*; impaired vision, 720; radical cure of hernia, *ib.*; tumour of bladder, *ib.*; fracture of patella, *ib.*; ulcerative endocarditis, *ib.*; calculus passed by urethra in a female, *ib.*; treatment of ringworm, *ib.*; control of hæmorrhage in operations at hip-joint, *ib.*; atrophied ovaries, 811; hysterical paraplegia, *ib.*; hypertrophy of toe-nails, *ib.*; double placenta, *ib.*; empyema, paracetesis, *ib.*; phosphatic calculus from a child, *ib.*; parochias medical relief, *ib.*; hypertrophic polyposis of cervix, *ib.*; ovarian cyst, *ib.*; necrosis of patella, *ib.*; oval riotomy trocar, *ib.*; amputation of tongue by scissors, *ib.*; hydatis of uterus, *ib.*; neurectomy for facial neuralgia, *ib.*
 — Medical, of Southampton, presentation to Mr. Dayman, 1097
 — Medical, of Ulster: infantile diarrhœa, 415; sympathetic ophthalmia, 416; scleroderma, 914; purpura, *ib.*
 — Medical, of York: tracheotomy in croup, 417; plaster-of-Paris in surgery, *ib.*
 — of Medical Officers of Health: illegal occupation of cellar-dwellings, 160; tubercle-bacillus, *ib.*; diarrhœa at Clapton, 257; hospitals for infectious diseases, 721; tenement-dwellings, 965; small-pox in Hackney Union Infirmary, 1229
 — Medical Provident: letters on, 37, 139, 227, 274, 331, 378, 434, 535, 592, 639, 686, 739, 781, 890, 933, 985, 1035, 1092, 1255, 1308; lists of letters of adhesion, 274, 332, 379, 435, 481, 536, 593, 640, 688, 740, 791, 890; meeting of Birmingham and Midland Counties Branch, 431; resolution of Committee of Council on, 789; of South Wales and Monmouthshire Branch, 932; proceedings of West Somerset Branch, 983; of Lancashire and Cheshire Branch, 1253; contributions to preliminary expenses, 966, 1033, 1092, 1255, 1306; memorandum regarding, 1150
 — Medical Union: first annual meeting, 218; deputation on Medical Act Amendment Bill, 1151
 — Medico-Chirurgical, of Edinburgh: Transactions of, *rev.*, 916
 — Medico-Chirurgical, of Glasgow: the Medical Act Amendment Bill, 785
 — Medico-Chirurgical, Leeds and West Riding: autolaryngoscope, 208; electric throat-lamp, *ib.*; hydatis of liver treated by incision, *ib.*; removal of pedicled growths from knee, *ib.*; abscess of brain in relation to disease of ear, *ib.*; freezing microtome, 417; pathological specimens, *ib.*; treatment of carbuncle by scraping, *ib.*; value of circumcision, *ib.*; spina bifida, 719; osteotomy for badly united Pott's fracture, 720; dental engines, *ib.*; enteric fever, 36; epileptiform seizures apparently due to masturbation, *ib.*; diagnosis of scarlet fever, *ib.*; pulse-tracings in nephritis, 1007; optic neuritis, *ib.*; high temperature in a nervous subject, *ib.*; value of treatment in catarrhal deafness, *ib.*; effect of paralysis of palate on articulation, 1008; actual cautery in ulceration of cornea, *ib.*; ingrowing eyelashes treated by electrolysis, *ib.*; treatment of sac in herniotomy, *ib.*; annual report, 1012; officers and council, 1013

Urine, nocturnal incontinence of, Dr. J. Althaus on voltaic alternatives in, 104; treatment of prostatic retention of, 133, 829; portable tests for albumen in, 324; picro-indigo test for albumen and sugar in, Dr. G. Johnson on, 504, 515, 526, 614; Dr. Ralfe on, 661; Dr. G. Oliver on tests for albumen in, 785; Dr. Ralfe on peptones in, 905; detection of sugar in, 978

Urinary test-case, pocket, 871

Urticaria pigmentosa, 1179

Uterus, Mr. B. Keith on removal of fibroid tumours from, 10, 55; directions of contraction of, 15; fibroid tumours removed by abdominal section, 15, 623; Mr. Spanton on removal of appendages of, 105; gravid, retroversion of, 115; insanity and disease of, 123; laryngoscopic mirror in examination of, 139; antelexion of, 158, 1182, 1229; removal of appendages of, 169, 719; forcible removal of, 389; Dr. L. Cane on, 453; malignant polypus of, 416; myoma of, 418, 459; Dr. E. Holland on treatment of cancer of with Chian turpentine, 560; Dr. A. W. Edis on reposition of old invagination of, 561; Dr. A. Courty on Diseases of, *rev.*, 567; and bladder, prolapse of, 621; hydatids of, 718, 911; hernia of fibro-myoma of, 773; Mr. W. Bain on peculiar symptom associated with retroversion of, 860; cystic degeneration of fibroid tumour of, 1005; behaviour of, in puerperal eclampsia, 1007; myxomatous degeneration of fibroid of, 1229

— cervix of, microscopic sections of cancer, 15; pregnancy and labour complicated with cancer of, 16; epithelioma of, removed during pregnancy, 362; dilatation of, 426

V.

Vaccination, charges, 90; action of Leicester guardians regarding, 153, 320; compulsory, in Switzerland, 170; successful grants for, 231, 643, 653, 740, 1284; proposed inquiry into, 231, 315, 832; alleged death from, 283, 333, 1013, 1081, 1254; Dr. T. Dutton on a case of, 356; statistics of at Newcastle Hospital, 382; letters on, 388, 487, 748, 1156; in eczema, 390; prosecution in consequence of death after, 438; and erysipelas, 442; with calf-

lymph, Dr. G. B. Longstaff on case of, 454; saving of life by, 468; proceedings in Parliament regarding, 538, 872, 891, 1097, 1202, 1204, 1256; number of punctures in, 487, 544, 699, 1101, 1161, 1263; influence of on death-rate from small-pox, 628, 1134; of army recruits, 692; compulsory, in India, 796, 891; Dr. W. A. Hardaway on Essentials of, *rev.*, 968; Mr. T. M. Dolan on Place and Power of, *rev.*, *ib.*; in Ireland, 1086; indifference to, 1095; prosecutions for, 1157; by flea-bite, 1161; official self-sacrifice in research on, 1187, 1202; Mr. E. Hart on influence of in regard to small-pox, 1215; remarks on debate in Parliament, 1237

Vaccination, animal, Government stations for, 525; precautions regarding, 972; alleged death from, 1045, 1080; results of, 1297

Vacher, Mr. F., period of incubation in measles, 511

Vacuolation, cerebral, 959

Vagina, cicatricial occlusion of, 209; labour complicated by cicatricial occlusion of, Dr. J. A. Mansell Moullin on, 309; Mr. G. Padley on, 455; labour with atresia of, 773

Van Buren, Dr. W. H., death of, 780

Varicella, gangrenous, Mr. Warrington Haward on, 904

Varicocele, Mr. W. D. Spanton on treatment of, 53; Mr. W. S. Robertson on, 205; letters on, 390

Varix and varicocele at the Greenwich Hospital School, 1101

Vawdrey, Mr. T. G., the medical provident society, 1092

Vegetarian, experience of, 441, 492; cookery, 493, 600; supper, 974

Veins, Mr. F. Treves on entrance of air into, 1278

Vena cava inferior, occlusion of, 721

Venerue Diseases, Mr. B. Hill and Mr. A. Cooper's Manual of, *rev.*, 1286

Venesection. See Blood-letting

Ventilation of Metropolitan Railway. See Railway; of churches, a plea for, 799

Verbasum. See Mullein

Verneuil, M., myxedema, 224

Vertebra, fifth cervical, dislocation of, 699

Vertigo, epileptic, 575; Dr. E. Woakes on, 801, 1117; Dr. W. Alexander on cause of, 956

Vertue, Mr. F. H., stoves, 189

Veterinary science, management of, 1131

Vicarage of Bromsgrove, 66

Vieta, Dr., phthisis and ague, 216

Vines, Mr. H. J. K., extra-uterine gestation, 355

Viscera, Dr. W. J. Mickle on transposition of, 955

Vision, nephritis of pregnancy affecting, Mr. F. Salter on, 356; impaired, 720

Vital Statistics, Dr. Grützer on History of, *rev.*, 723

Vitelline duct, persistent, obstruction of intestines by, 255

Vivisection, discussion on in Manchester, 262; the Bill for abolition of, 691, 694, 696; report of inspectors, 1194; letter on, 1315

Vocal cord, polypus of, 1284

Voltaic alternatives in nocturnal enuresis, Dr. J. Althaus on, 114

Volunteer medical corps, 692, 792, 936, 1256

— medical service, letters on, 1258

— review at Brighton, medical arrangements for, 630

— surgeons, and attendance on officers, 893; proposed meeting of in Liverpool, 1155

Volvulus, intestinal obstruction from, 114

Vragas, Dr. W. von, a question of treatment, 238

Vulsellum-forceps, axis-traction, 773

Vulva, acute gangrene of, 1229

Vulvo-vaginitis in a child, 331

W.

Wacker, Dr., larvæ of flies in human intestine, 573

Wadsworth, Dr., scleroderma, 914

Wahl, Dr. E. von, resection of intestine, 1015

Wakes, Irish, 538

Wales, Prince of, visit to Herbert Hospital, 133

ASSOCIATION INTELLIGENCE.

COMMITTEE OF COUNCIL.

NOTICE OF QUARTERLY MEETINGS FOR 1883: ELECTION OF MEMBERS.

MEETINGS of the Committee of Council will be held on Wednesday, January 17th, April 11th, July 11th, and October 17th. Gentlemen desirous of becoming members must send in their forms of application for election to the General Secretary not later than 21 days before each meeting, viz., December 26th, March 21st, May 21st, September 26th, in accordance with the regulation for the election of members passed at the meeting of the Committee of Council of October 12th, 1881.

FRANCIS FOWKE, *General Secretary*.

November 9th, 1882.

COMMITTEE OF COUNCIL.

NOTICE OF MEETING.

A MEETING of the Committee of Council will be held in the Council Room of Exeter Hall, Strand, London, on Wednesday, the 17th day of January next, at two o'clock in the afternoon.

FRANCIS FOWKE, *General Secretary*.

161A, Strand, December 21st, 1882.

COLLECTIVE INVESTIGATION OF DISEASE.

CARDS and explanatory memoranda for the inquiries concerning Acute Pneumonia, Chorea, and Acute Rheumatism, can be had by application to the Honorary Secretaries of the Local Committees appointed by the Branches, or to the Secretary of the Collective Investigation Committee. Of these diseases, each member of the Association is earnestly requested to record at least *one ordinary case* coming under observation during the year.

Inquiries concerning Diphtheria and Syphilis have been prepared, and can be had on application by those willing to contribute information on these subjects. There are two cards on Diphtheria, one containing clinical, the other etiological inquiries, together with an explanatory memorandum. One of these cards is intended to serve as a guide to the systematic examination of a house or district for sanitary purposes. There are also two sets of inquiries concerning Syphilis, one for acquired, the other for inherited, disease. These are accompanied by an explanatory memorandum giving information concerning the most recently observed symptoms of the inherited disease.

All of these inquiries will be continued during the present year, 1883.

The list of the returns already received is unavoidably postponed till next week, on account of pressure on the space of the JOURNAL for this week.

F. A. MAHOMED, Secretary to the Committee.

12, St. Thomas's Street, S.E.

BRANCH MEETINGS TO BE HELD.

SOUTH-WESTERN BRANCH.—The next quarterly meeting will be held, at 2.30 P.M., on Thursday, January 11th, 1883, in the Board-room of the Devon and Exeter Hospital, Exeter. Members intending to make communications or show specimens are requested to give notice to S. REES PHILLIPS, M.D., Honorary Secretary, Wonford House, Exeter.

BIRMINGHAM AND MIDLAND COUNTIES BRANCH.—The fourth ordinary meeting of the session will be held in the Medical Institute, Edmund Street, on Thursday, January 11th. The chair will be taken by the President, Dr. Dewes, at 3 P.M. *Business:* Election of members. To consider the circular and questions from Committee of Council, and to pass such resolutions on the subject as the meeting may determine. *Notices of Motions:* Mr. Hugh Ker will move, and Dr. Fowler Bodington will second, the following resolution: "That, in the opinion of this Branch, no change in the laws which regulate the election of Members of the Council will be satisfactory, which does not provide for the election, by the Branches, of one or more representatives from each Branch, in proportion to the numbers of its members." Mr. Ganguee will move, and Mr. Sawyer will second, the following resolution: "That this Branch is not satisfied with its present method of representation in the Committee of Council, and is of opinion that the principle of direct representation, which the British Medical Association insists upon in the constitution of the General Medical Council under a reformed Medical Act, should be applied to the government of the British Medical Association."—E. RICKARDS, M.B., 14, Newhall Street; A. H. CARTER, M.D., 51, Newhall Street, Honorary Secretaries.—January 4th, 1883.

WORCESTERSHIRE AND HEREFORDSHIRE BRANCH.—The first meeting of the session will be held in the Board-room, Worcester Infirmary, on Monday, January 8th, at 4.30 P.M. *Business:* Ballot. To discuss the question of the representation of Branches on the Committee of Council. Discussion on Collective Investigation of Disease. Dr. Strange will give details of some interesting cases.—GEORGE W. CROWE, M.D., Honorary Secretary

METROPOLITAN COUNTIES BRANCH.—A general meeting of this Branch will be held in the Theatre of the Royal School of Mines, Jermyn Street, W., on Wednesday, January 17th, at 8 P.M. Sir James Paget and Sir William Gull will address the meeting on the Collective Investigation of Disease; and resolutions in connection with the subject will be proposed.—ALEXANDER HENRY, M.D., W. Chapman Grigg, M.D., Honorary Secretaries.—132, Highbury Hill, N., January 3rd, 1883.

BIRMINGHAM AND MIDLAND COUNTIES BRANCH.

The third meeting of the session was held on December 14th; Dr. BALTHAZAR FOSTER in the chair. The members and visitors present numbered seventy-five. Among those present were: Mr. Macnamara and Dr. Mahomed (London); Dr. Strange, Dr. Crowe, and Dr. Stallard (Worcester); Dr. Totherick, Dr. Malet, and Mr. Manby (Wolverhampton); Mr. Baker (Derby); Dr. Thursfield (Leamington); Dr. Nason (Nuneaton); Dr. Pike (Malvern); Dr. Lynes (Coventry); Dr. E. Underhill (Dudley); Mr. H. L. Browne (West Bromwich); Dr. Heale (Warwick); Dr. Ker (Halesowen); Dr. Smith (Redditch); Dr. Atkinson (Kenilworth); Dr. Phillips (Walsall); Dr. Hart (Harborne).

Communications.—The following communications were read:

1. Dr. Malins, Dr. Hickinbotham, and Dr. Edgington showed specimens of Ovarian Cysts which they had removed.
2. Dr. Thursfield showed a specimen of a Round-celled Sarcoma.
3. Mr. Bartleet showed a case of Periarticular Inflammation of the Ankle-joint in a child. The disorder was the result of manipulation by a bone-setter after a sprain, and much simulated arthritis of the ankle-joint, from the fact that the entire capsule of the joint and the sheaths of the tendons all round were affected.
4. Mr. Webb (Coleshill) showed a modification of Sir James Simpson's Axis-traction Forceps.
5. Mr. Bennett May showed a man on whom he had performed the operation of Nephrolithotomy.
6. Mr. Lloyd Owen showed a patient with Sarcoma of the Iris.

COLLECTIVE INVESTIGATION OF DISEASE.

DR. FOSTER said that he had, with extreme regret, to announce that Professor Humphry was unable to be present, as he had intended, being detained at Cambridge, in consequence of indisposition. It was a great disappointment to the meeting to miss an address from Professor Humphry on Collective Investigation; and he (Dr. Foster) felt that it was an attempt to play *Hamlet* with the part of *Hamlet* left out. He trusted, however, that by the kindly help of Mr. C. Macnamara and Dr. Mahomed, the subject would be fully laid before the Branch. After referring to previous efforts made by the Association to create a spirit of co-operation among the members in carrying out therapeutical and pathological inquiries, he pointed out that the presidential address at the Cambridge meeting in 1880 was the origin of the present movement for the collective investigation of disease. The previous attempts had failed from defective organisation, and from the inability of the Association formerly to make any considerable grant of money. This was now all changed; a very complete organisation, with Dr. Mahomed as Secretary, had been created, and the Association had voted ample funds. Under these favourable circumstances, much might be expected from the present scheme, if individual members would do their part. Certain subjects had been selected for investigation; and, on these, any experience, however slight it might seem to the observer, was valuable. The Collective Investigation of Disease Committee aimed at gathering together the fleeting experience of individual members, and, by analysing it and comparing it with that of many other observers, to give it a scientific value. A more fruitful or a more important work could hardly be imagined. It aimed at gathering together a multitude of facts from many sources for the elucidation of certain obscure problems. Every member could help; and he hoped the Birmingham and Midland Counties Branch would do a good share in thus advancing our knowledge of the causes, relations, and treatment of disease.

MR. C. MACNAMARA addressed the meeting, and said: It is about four years now since I commenced to take an active part in the work of the British Medical Association, in connection with the subject of medical education. That was my object in first joining the Committee of Council; but, as I have come to learn something of the work of the Association, I feel more convinced that it is capable of effecting a real improvement in the status and position of our profession. Doctors proverbially disagree. Anything, therefore, which brings us together, which leads us to know one another and work for the common good, must be useful. Consequently, when I received a kind invitation from

Dr. Foster yesterday, asking me to come here to-day, I felt it not only a pleasure, but a duty, to accept his hospitality. I remarked just now that I joined the Committee of Council mainly to advance, if possible, the cause of medical education; and what is the movement we have met here to consider to-day, but a matter of education? It is largely to enable us to educate ourselves that the Investigation Committee is established. It is in the hopes of making each one of us contribute our individual efforts to advance the knowledge of the whole body, that the movement has been set on foot by Professor Humphry and others. It is not, in fact, until we are engaged on work of this kind, that we discover how much we have to learn, or that we set about acquiring the knowledge necessary to enable us to keep up to the standard of the day. It is for this reason, I say, this is an educational work. We were told by our President at Worcester that men write far too much now-a-days; but this is an old cry. Juvenal said the same thing; he thought the world was being deluged with books; nevertheless, we none of us seem to feel the burden. The truth is, a vast amount of what is published is misdirected energy; it is the outcome of men's ideas frequently based on a certain substrata of facts, but mixed with a vast deal of fancy. And so these ideas are no sooner propounded than they are attacked by some one holding different views, and the battle of words then goes on, and the world is full of folios containing little more than arguments for and against, which often all are very far from being near the truth. The medical literature of this country is full of this kind of work, and what we now honestly desire is to turn from the subjective to the inductive method of research; to attempt to collect a vast number of well ascertained facts, and from these facts to endeavour to build up cautiously, step by step, knowledge which, because it is the truth, will bear to stand the assaults of those who may attempt to oppose its teaching. We ask for facts, and not for opinions.

We propose, for instance, to gain sound information as to the effects of syphilis in the civil population of the kingdom. If we can acquire that knowledge, depend upon it the time will not be far distant before we shall see our way to apply remedial measures to its alleviation. A work of this kind can only be carried out by means of the combined efforts of the general practitioners scattered throughout the kingdom. You can trace the life-history of the disease in a manner which no one else can possibly do. For instance, a young man comes to consult you suffering from a primary sore. You probably know something of the man's family, very likely have attended one or both of his parents. You order your patient mercury, and he seems to be cured, perhaps leaves his home, and you hear nothing more of him for several years; then he returns, suffering from a complication of disease, and dies. Or this patient may have married, and has a family. Do his wife and children suffer from the effects of the disease for which you have treated him? If not, how long did he take mercury, and what form of it? And here a most interesting series of questions arises, which you alone can solve by means of your united efforts. How far does a rheumatic, scrofulous, or gouty diathesis influence the course of syphilis, especially in the children of those who suffer from these affections? The diseases we have to treat are very largely due to a combination of hereditary and other causes; and it is only possible to trace out these causes, and the relation they bear to one another, by means of a large number of facts such as we urge you to give us. I need hardly dwell on the subject of the great importance of an investigation of this kind upon the welfare of our fellow-creatures. I refer especially to the subject of syphilis, because I happen to be the chairman of the subcommittee appointed to preside over this branch of our investigations. I will not dwell upon the memorandum we have drawn up, explaining the series of questions bearing upon this subject; whatever merits it possesses is due to my valued friend and colleague, Dr. T. Barlow. But I think you may rest assured that, if you will only supply us with facts, that they will be turned to the best advantage; and, when I mention that our committee consists of Messrs. Jonathan Hutchinson, H. Lee, Berkeley Hill, H. Butlin, and J. W. Palmer, together with Drs. I. Barlow and Stephen Mackenzie, I think you may be assured that any efforts you may make to help us will not be thrown away. Lastly, let me repeat that, in making these returns, you will be called upon to think over subjects which many of you may have allowed to slip from your notice for years. Depend upon it, if you take part in these investigations into disease, while giving invaluable information, you will do much to brush up your own knowledge; so that, in proportion to the help you afford in carrying on this great work to a successful termination, you will receive back quite as much as you give; and, at the same time, aid in what, to my mind, is one of the most eminently useful movements yet initiated by the profession, and for which we are so largely indebted to Professor Humphry.

Dr. MAHOMED read a paper on Medical Life-Histories, which was published in last week's JOURNAL.

Dr. SAUNDBY said, that there was every reason to believe that this Branch, at any rate, would not fail to co-operate in the work. He had met with a very hearty response from the members of the local committee, and had already received a satisfactory number of cards duly filled up. These had been forwarded to Dr. Mahomed, and he complained that they had not been acknowledged, as promised, in the JOURNAL. He would suggest that it was very desirable to do this without delay; because, 1, it announced the fact that work was actually being done, and the knowledge of this was a great incentive to others to work; and, 2, it afforded proper encouragement to members who had shown zeal in the work, and promoted a healthy spirit of emulation. He thought the present cards erred by asking information on too many points, and he was glad to notice that the committee had selected for investigation the single question of the contagiousness of phthisis; but as the profession generally was not very well posted up in the nature of the rather rare evidence that supported this view, he thought it would be well to supply some information on the matter. A member of the local committee had asked him to say that the cards became soiled when carried in the pocket, and, therefore, should have no printing on the outside.

Mr. KER (Halesowen), speaking as a representative of general practitioners in this district, had very little doubt that the filling up of the cards issued by the local investigation committee would be actively carried out by the members, though at first the results would probably be small. Alluding to the remarks made by Mr. Macnamara, he said that there could be little doubt that they would themselves learn a great deal by the steady recording of facts observed at the bedside; and that, at the same time, their patients would benefit by the increased attention paid to their cases. They would thus be amply rewarded for the time spent by the increased knowledge they would gain, and the gratitude their poorer patients would show for the extra attention paid to them. Much good had occurred from the constant reporting of cases admitted into some of the large hospitals. This being so, might we not look for splendid results from so largely extended a field of observation, and from such an increased number of workers as one might hope to obtain among the members of the British Medical Association? He believed that much enthusiasm might be excited in this matter by each member of the Committee considering himself a sort of centre in his particular district, and urging his fellow-practitioners to help in the movement. He intended, with this object in view, to institute occasional meetings at his own house; he should do all he could to help on the movement, and also to induce his professional brethren around him to do the same.

Professor HAYCRAFT urged the necessity of medical co-operation. In his own case, he had often to ask the help of medical friends in investigations which he was at present carrying on, and which would fall through but for their kind assistance. Were enough public spirit evinced, and sufficient facts collected, he felt sure that these would produce their full value in the hands of those whose duty it was to sift them. He was very rejoiced that the secretaryship was in the hands of his friend Dr. Mahomed, whose acquaintance with exact scientific methods, and the means of applying them, no one who was acquainted with the sphygmograph, and with Dr. Mahomed's work on urea and Bright's disease, would doubt.

Dr. CARTER explained the details of the organisation for collective investigation, with a view of showing the completeness of the arrangements which had been made. He went on to say that too much must not be expected at first. These matters always took time to develop fully; but if every member present would at least interest himself in the subject, and occasionally contribute information, ultimate success was certain.

Dr. RICKARDS thought that the cards already issued went too much into detail, especially those on diphtheria; they were too elaborate, that busy men, feeling that they could not fill them up satisfactorily, would hesitate to fill them up incompletely. To answer some of the questions, inquiries, which would be inconvenient, would have to be made. He hoped the Committee would consider whether better results would not be obtained if future cards were not quite so exhaustive.

Dr. MAHOMED, in his reply, stated that there were no fewer than fifty-three committees at work all over the United Kingdom, and that if each committee gave only ten returns on each subject, a minimum below which they could scarcely fall, no fewer than 530 replies would be given to the questions for which answers were sought. He thanked Dr. Sandby for his suggestion that the returns obtained should be announced at frequent intervals in the JOURNAL. He explained that at pre-

sent these returns were in the hands of the local secretaries, and that it was proposed to call them all in by the end of the year; after this, more frequent announcements should be made. In reply to Dr. Rickards, he explained that the diphtheria cards were necessarily long on account of the complexity of the subject. Several epidemics of diphtheria had been traced to milk, and in some cases other articles of diet were suspected; it was, therefore, necessary to take note of the source of articles of food, that any community of supply of any article among infected persons might be recognised. These cards were not for general distribution, and the sanitary cards would be placed chiefly in the hands of medical officers of health. Thanking Professor Haycraft and Dr. Carter for their suggestions for combined observations between those in charge of patients, and those more skilled in scientific methods both chemical and instrumental, Dr. Mahomed stated that a most important suggestion had been made by Dr. Thompson of Croydon, that skilled pathologists should be appointed in the various great centres of the country whose services should be at the disposal of practitioners who wished to obtain *post mortem* examinations of their patients; that in each case a certain fee and travelling expenses might be paid for the services rendered. This proposition awaited further consideration, it would no doubt greatly facilitate such examinations and prove of very great service in our collective inquiries. In conclusion, Dr. Mahomed impressed upon the members present that incompletely filled cards were often as valuable as others; that they should not omit to send cards because they were unable to furnish all the details asked for. Thus it mattered little about the symptoms present during an attack of rheumatism or chorea, or the condition of the heart at the time of observation, if the observer could give details of the preceding illnesses and minor ailments of the patient, for these were the points on which information was most wanted.

A vote of thanks to Mr. Macnamara and Dr. Mahomed for their addresses was proposed by Dr. STRANGE, and seconded by Mr. GAMGEE, and carried unanimously.

CORRESPONDENCE.

THE NURSING AT KING'S COLLEGE HOSPITAL.

SIR—It is barely eight years ago since more than half the Committee, with probably the most competent secretary a hospital ever had, were sacrificed, and very many of the most influential of the governors of King's College Hospital were offended. At this cost, the sisters of St. John's House were enabled to control the nursing and the management of this excellent charity. At that time, there was a balance at the bankers of £2,440, and the invested property amounted to nearly £40,000. Many cautious friends of the hospital urged in vain that the price paid for the doubtful blessing of an *imperium in imperio* was beyond the possible value received. To-day, there is a deficiency in the current account of £9,500, whilst the invested funds of King's College Hospital are almost entirely exhausted. This state of affairs is bad enough; but it must further be recorded that the rule of the sisters has proved so intolerable, that, at a recent meeting of the Committee, it was decided to give the authorities at St. John's House notice that, unless a definite change were made, the Committee would be compelled to cancel the agreement, and undertake the nursing themselves. Much as we may regret it, we need hardly be surprised at such a result, and can only wonder the staff have so long submitted to so undesirable a system.—I am, &c.,

ADMINISTRATOR EXPERS.

BATH AND THE BATH MINERAL WATERS.

SIR,—Puffing is not my forte; and even if it were, I should not attempt to puff that which, upon careful and personal observation, speaks so regally for itself. A circular has been, I know, only recently sent to numbers of the medical profession both at home and abroad, setting forth the value of the mineral springs of Bath; statistics prove their value. I need not, therefore touch on that point, my only object being to testify from personal inspection to the many improvements and additions made to the various baths, and the good accommodation provided at the Mineral Water Hospital for those poor suffering people, so many almost motionless from rheumatism. Any thing more perfect, or calculated to relieve and give comfort to suffering humanity it is difficult to conceive. There are baths in various localities adapted to the means of all classes, but all possessing the same properties. One thing is, I think, still

wanting, and to which I would venture to draw the attention of the profession of Bath, as well as the public at large. I allude to the necessity of a self-supporting hospital, a system which would give a certain class above the poor the means of availing themselves of the baths and waters. How often have we all met with numbers of that class, and to whom we have advised a trial of these springs, how often, alas! met by the reply, "How can I afford it?" Why should not Bath have its self-supporting Mineral Water Hospital, as Ventnor, Bournemouth, etc., have their self-supporting Consumptive and Sanitarian Institutions? At the annual meeting of our Association held in Bath, under the presidency of our ever to be regretted friend, Dr. Wilbraham Falconer, a full description of the springs, etc., was given in his address, and must have impressed all his hearers; but since that period many valuable improvements in the accommodation have been made. I can only say that seeing is believing, and if any doubt my observations, let them go and see for themselves. Independently of the medical aspect, there is, for those fond of antiquarian and archaeological pursuits, now going on a most interesting excavation of a large Roman bath, and which was evidently used by a large population. No doubt, I think, can exist but that there was a considerable Roman settlement, probably a large village or town, of which the bath alluded to formed a part; the discovery of Roman pavements in different directions, and some distance from the bath, tends to this conclusion. The bath must have been most luxurious, being supplied by the same warm springs as those now existing, which have so beneficial and desirable an influence upon certain classes of disease.

Trusting that I have not trespassed too much upon your space, I am, sir, yours faithfully,

B. BARROW.

Southlands, Ryde, December 18th, 1882.

THE MEDICAL PROFESSION IN NICE.

SIR—I have recently seen in print, both in medical and non-medical journals, the statement that:

"The French doctors in Nice are, it appears, up in arms against their English and other foreign brethren established in that favourite health resort, etc."

Now, as this gives a very incorrect notion of what has actually occurred, I beg leave, with your permission, to explain the real state of the case.

There exists in France a Mutual Provident Medical Society, or, to give it its proper name, "Association Générale de prévoyance de protection et de secours mutuels pour tous les médecins de France," which has branches through the whole country, and at Nice, as elsewhere. In addition to its functions as a provident society, giving help to distressed members of the medical profession and their families, it occupies itself with all questions concerning the interests of the profession in its relations with the public.

Accordingly, at the last general meeting, four important papers were read, which were published in the annual report, or "Annuaire":—

1. How best to reconcile the duty of the accoucheur, which obliges him to give notice of the birth of a child, with shielding the reputation of the mother when that child is illegitimate.

2. On the duty of the doctor with reference to testamentary dispositions in his favour.

3. On the degree in which the State should have the right to compel a doctor to take part in a medico-legal investigation.

4. On the regulations with reference to the interment of prematurely born children.

A question certainly of no less importance than these was that which occupied the attention of the Nice branch of the Society, namely:—

"How best to deal, in the interests alike of the public and the profession, not with their English and other foreign brethren, but with a set of men, many of them having no qualification to practise in any country, a sort of Bedouins, a kind of medical pirates, who, in defiance of the law, come to a place during the season, advertise themselves as doctors, and, after a stay of a few months, go to exercise their trade elsewhere."

Against these people the law provides a remedy as it does in England, but it has been laxly administered. The Medical Provident Society considered how best to insure its more effectual exercise.

The law requires that every medical practitioner shall, on settling in a place, take or send his diploma, or other qualification recognised by the French law, to the office of the Prefect for verification, and to have it there registered.

The best means of enforcing the law, was the question before the

meeting; and in the resolutions they adopted, I, who was present, and am a member of the Society, most cordially concur.

I will just add that there are three ways open to anyone who desires to practice medicine in France:—

1.—To undergo all the required examinations, and to take the degree of Doctor of Medicine, for which anyone holding a *bond fide* English qualification is eligible.

2.—To pass the minor examinations as *Officier de Santé*, which grade qualifies only for practice in one department of the country, but which authorisation, on complying with some formalities and passing a very simple additional examination, would be transferred to another department in the event of change of residence. A large number of foreign practitioners in France hold only the qualification of *Officier de Santé*, but are not on that account in the least looked down upon by their French colleagues. The reputation which a man brings with him from his own country, is the standard by which he is judged.

3.—To have the direct authorisation of the Minister of Public Instruction, which is now very rarely given, and which I owed to the fact of my having some years ago received the exceptional honour of being nominated a foreign correspondent of the National Academy of Medicine of Paris.

Compelled to pass my winters at Nice, I should make but a poor return for the kindness with which I have been received by my French colleagues, if I did not give a true version of the incorrect statement which has been widely circulated, and which certainly could not have originated with any real member of the medical profession.

I will merely add that in what passed at the meeting there was no question of any English practitioner—I am, sir, yours faithfully,
Nice, December 27th, 1882. CHARLES WEST, M.D.

MILITARY AND NAVAL MEDICAL SERVICES.

DEPUTY Surgeon-General J. Irvine, M.D., A.M.D., head of the sanitary and statistical branch on the headquarters' staff, will, we understand, succeed Surgeon-General Sir J. A. Hanbury, K.C.B., as principal medical officer to the army of occupation in Egypt, with the local and temporary rank of Surgeon-General. Deputy Surgeon-General Irvine will be succeeded at the War Office by Deputy Surgeon-General J. A. Marston, who has been recently promoted for his services during the late campaign, and who for some years held the junior appointment on the staff at head-quarters.

THE form of the report of the medical survey held on naval officers invalidated from foreign stations, has been revised, and all surveys are to be reported in an amended form. In future, the surveying officers are not to express an opinion as to the disability being attributable to the service, but are to state in full the causes of the disability. Should their lordships consider that the disability is not attributable to the service, or should the reasons for sending the officer home be in other respects unsatisfactory, the officer will be required to defray one-third of the expense of the passage.

THE Greenwich Hospital pension of £50 a year, vacant by the death of Retired Deputy Inspector-General of Hospitals and Fleets, Alexander Cross, on December 3rd, has been awarded to Retired Deputy Inspector-General of Hospitals and Fleets, Andrew Murray, from that date.

PUBLIC HEALTH

AND

POOR-LAW MEDICAL SERVICES.

SCHOOL-CERTIFICATES.

SIR,—In my letter, which you kindly replied to in the *JOURNAL* of November 18th, I am afraid I have not made myself quite clear. I do not refer to pauper children only, but to all classes.

When any child, under a certain age, does not attend school, the School Attendance Committee (composed of guardians), as a School Board authority, demand a certificate from the parent, under threat of proceedings at law. In many cases, the parent cannot pay for this certificate; and, in any case, does the law compel them to obtain one? and are the School Board authorities legally entitled to pay for it if they do? I give at least twenty each week, and I do not get pay for more than one or two, and that not always.

I will be glad to have your valuable opinion on the matter.—I am, sir, yours faithfully,
DISTRICT MEDICAL OFFICER.

. We have made inquiries into this matter, but cannot find that there is any general rule on the subject. Undoubtedly, such a certificate is required by law, but whether the School Board could defray the cost, is a question which, according to the dictum of the Local Government Board, "must depend upon the actual facts of each case."

OVERCROWDING OF WORKHOUSES.

In urban districts, the need for extension of workhouse accommodation usually keeps pace with increase of population. When guardians resist, and prevent such necessary extension, their course is extravagant rather than economical, for overcrowding is inevitable, especially in the winter months; and overfilled wards bring difficulties and dangers, and often diseases, which can only be overcome by increased expenditure.

We are glad that at last something is to be done to remove the overcrowding which has so long existed in the union workhouse at Dudley. After being repeatedly discussed by the guardians, the subject has been brought before Parliament, and it has been taken up by the Local Government Board. The Report of Mr. Longe, the Government inspector, which was made public last week, puts the question so urgently, that further delay in finding an adequate remedy is impossible. The inspector records that the beds in the wards for imbeciles are so closely placed, that they actually touch each other. He properly asserts that such a state of things is neither creditable nor even decent, and he very justly tells the guardians that the condition of their workhouse has "become a public scandal."

It appears that, when the present Dudley Workhouse was built, the population of the union was thirty thousand less than it is now. In the face of an immediate necessity for a considerable outlay, possibly the Dudley guardians might profitably follow the example of their neighbours in Birmingham, by sending their pauper infants to cottage homes in the country, and so gaining room for more adults in their workhouse wards. Some years ago, the Birmingham guardians had to deal with a difficulty similar to that which now exists in Dudley. They relieved the pressure upon their workhouse by establishing an extensive series of cottage homes at Marston Green, in a rural district some miles from their town. This experiment has proved an unqualified success. It has effectually remedied the pressure it was designed to relieve, and it has obviated the necessity for a large extension of accommodation at the workhouse.

Pauper children, removed from a workhouse in town to cottages in the country, benefit physically and morally from their improved surroundings, and they acquire occupations and habits which tend, in no small degree, to raise them above pauperism.

MEDICAL NEWS.

UNIVERSITY OF LONDON.—B.S. Examination, 1882. Examination for Honours. Surgery.

First Class.

Walters, Frederick Rufenacht (Scholarship and Gold Medal), St. Thomas's Hospital.

Sutton, Samuel Walter (Gold Medal), St. Thomas's Hospital.

Second Class.

Scharlieb, Mary Ann Dacombe, Madras Medical College, London School of Medicine, and Royal Free Hospital.

Buxton, Dudley Wilmet, University College.

APOTHECARIES' HALL.—The following gentlemen passed their Examination in the Science and Practice of Medicine, and received certificates to practise, on Thursday, December 28th, 1882.

Baber, John James Yarrow, 122, Brompton Road, S.W.

Beaumont, Albert William, 2, Delamere Crescent.

Cock, Frederick William, 1, Westbourne Park Terrace.

David, Evan Thomas, Upton Road, Downham Road.

Hitchcock, Alfred John, St. Helen's, Jersey.

Hunter, Mitchell, Marghera, County Derry.

Sarzana, Ettore, High Street, Kensington.

Smith, Henry Strode, Axbridge, Somerset.

Tilly, Alfred, Gilbert Terrace, West Hampstead.

The following gentlemen also on the same day passed their Primary Professional Examination.

Foot, Ernest George, Middlesex Hospital.

Gittings, Alfred, Middlesex Hospital.

Robertson, James Sprent, Middlesex Hospital.

Wingrave, Thomas, London Hospital.

Walter, Ernest Walter, Charing Cross Hospital.

UNIVERSITY OF DUBLIN.—WINTER COMMENCEMENTS.—At a meeting of the Senate, held on Wednesday, December 20th, in the Examination Hall of Trinity College, under the Presidency of the University Caput, the following Degrees and Licences in Medicine and Surgery were conferred.

Bachelors in Surgery.—William Hallaran Bennett, Joseph Bulfin, William Alexander Carte, Francis Richard Cassidi, Arthur Wellington Fenton, John W. Gowlard, George L. M. Lloyd-Apjohn, Francis A. de T. Mouillot, Henry W. Peard, Augustus Mayberry Whitestone.

Bachelors in Medicine.—John Armstrong, Francis R. Cassidi, Eugene Cormack, Richard G. Hanley, Arthur W. Fenton, John FitzGerald, Denis W. Freeman, Augustus M. Whitestone.

Master in Surgery.—Charles Gorman.

Doctors in Medicine.—Charles Gorman, Edward Gordon Hull.

Licentiate in Medicine, and in Surgery.—Joseph F. Finegan.

ROYAL COLLEGE OF SURGEONS IN IRELAND.—At a meeting of the Court of Examiners, held on December 11th and following days, the under-mentioned gentlemen passed their final examination for

the Letters Testimonial, and having taken the declaration and signed the roll, were admitted Licentiates of the College.

Arthur Ottewill, Michael Cleary, Thomas B. Chum, Walter W. S. Corry, John Craig, Francis J. Cruise, Cornelius Daly, Michael O'F. Dolphie, Percy J. Drought, Jas. E. Fitzgibbon, John W. Gormley, Francis B. Hawes, George B. Heffernan, David W. Kennedy, Richard T. King, Thomas Lane, Edward E. Lennon, John J. Lyons, Hercules L. Miles, Henry J. O'Brien, Denis M. O'Callaghan, John J. O'Hagan, Peter J. O'Reilly, Francis F. Peet, Francis E. Finn, Alfred E. W. Ramsbottom, George F. Ridley, James D. Ryan, George P. Torney, George A. Walpole, William H. Waterfield, and Robert Wright.

MEDICAL VACANCIES.

CHORLTON UNION.—Assistant Resident Medical Officer. Salary, £120 per annum. Applications by January 24th.

CITY OF DUBLIN HOSPITAL.—House-Surgeon. Salary, £100 per annum. Applications by January 6th.

DENTAL HOSPITAL OF LONDON, Leicester Square. Dental Surgeon. Applications by January 8th.

EAST LONDON HOSPITAL FOR CHILDREN AND DISPENSARY FOR WOMEN, Shadwell, E.—Out-patient Clinical Assistant.

ECOLESALE BIERLOW UNION, Rural Sanitary Authority.—Medical Officer of Health. Salary, £30 per annum. Applications by January 16th.

ECOLESALE BIERLOW UNION.—Medical Officer and Public Vaccinator. Salary, £40 per annum. Applications by January 16th.

GENERAL INFIRMARY, Northampton.—House-Surgeon. Salary, £125 per annum. Applications by January 8th.

GENERAL INFIRMARY, Northampton.—Assistant House-Surgeon. Salary, £30 per annum. Applications by January 8th.

GOREY UNION.—Medical Officer. Salary, £100 per annum, and £20 as Consulting Sanitary Officer. Applications by January 6th.

KILKEEL UNION.—Medical Officer for Workhouse and Fever Hospital. Salary, £50 per annum. Applications by January 8th.

KILKEEL UNION, KILKEEL DISPENSARY.—Medical Officer. Salary, £100 per annum. Applications by January 8th.

LEICESTER INFIRMARY AND FEVER HOUSE.—House-Surgeon. Salary, £130 per annum. Applications by January 16th.

LONDON LOCK HOSPITAL, Male Hospital and Out-patient Department, 91, Dean Street, Soho, W.—House-Surgeon. Salary, £50 per annum. Applications by January 23rd.

OWENS COLLEGE, Manchester.—Demonstrator and Assistant Lecturer in Zoology. Salary, £150 per annum. Applications by January 6th.

PAROCIAL BOARD OF AUCHTERGAVEN.—Medical Officer, Officer of Health, and Vaccinator for the Western District of the Parish. Salary, £40 per annum. Applications to Mr. Donald Cumming, Inspector of Poor, Auchtergaven, Bankfoot, Perth, by January 30th.

PAROCIAL BOARD OF NEW ABBEY.—Medical Officer. Salary, £40 per annum. Applications to Captain Stewart, Shambellie, New Abbey, Dumfries.

ROYAL EDINBURGH ASYLUM.—Junior Assistant-Physician. Applications to Dr. Clouston.

SEABORN'S HOSPITAL (late Dreadnought), Greenwich, S.E.—Resident House-Surgeon. Salary, £50 per annum. Applications by January 19th.

ST. ASAPH UNION. Medical Officer. Salary, £83 per annum. Applications by January 10th.

ST. BARTHOLOMEW'S HOSPITAL.—Casualty Physician. Applications by January 6th.

UNIVERSITY COLLEGE, London.—Jodrell Professor of Physiology. Salary, £234 per annum. Applications by January 24th.

UNIVERSITY OF EDINBURGH.—Examiner in Medicine in each of the Departments of Chemistry, Anatomy, Midwifery, and Practice of Physic. Applications by January 15th.

VICTORIA HOSPITAL FOR CHILDREN, Queen's Road, Chelsea, S.W.—Medical and Surgical Registrar. Salary, 60 guineas per annum. Applications by January 9th.

MEDICAL APPOINTMENTS.

BEEVOE, Hugh, M.R.C.S., L.S.A., appointed Assistant House-Physician to King's College Hospital.

HERON, G. A., M.D., M.R.C.P., promoted to the Senior Assistant-Physician at the City of London Hospital for Diseases of the Chest, vice S. West, M.D., M.R.C.P., promoted to a Physician in the same Hospital.

BIRTHS, MARRIAGES, AND DEATHS.

The charge for inserting announcements of Births, Marriages, and Deaths is 3s. 6d., which should be forwarded in stamps with the announcements.

MARRIAGES.

JEFFREYS—DILLON.—On the 3rd of January, at St. George's Bloomsbury, by the Rev. J. Montagu Cadman, Richard Jeffreys, M.R.C.S., of Eastwood House, Chesterfield, to Elizabeth Catherine Dillon, of Ballinasloe, daughter of the late Thomas Dillon, Esq., M.D., F.R.C.S.I., and J.P. for co. Mayo, and Poor-law Medical Inspector. No cards.

MACDONALD—TRUMAN.—January 3rd, at All Saints, Nottingham, by the Rev. M. J. Truman, vicar of Arnold, brother of the bride, assisted by the Rev. A. Pearson, and by the Rev. R. C. Macdonald, brother of the bridegroom, Henry Murray Wyld Macdonald, surgeon, son of the late Major-General William Pitt Macdonald, Madras Staff Corps, to Mary Matilda, youngest daughter of the late Becket Truman, surgeon, Nottingham.

DEATHS.

ELLIOT.—December 31st, at Carlisle, Robert Elliot, M.D., F.R.C.P., in his 72nd year.

HILL.—On the 19th ultimo, at Lambton, New South Wales, John James Hill, J.P., L.R.C.P. Edin., L.F.P.S. Glas., Mayor of Lambton, and Honorary Surgeon to the Newcastle Hospital, eldest son of the Rev. R. Hill, vicar of Rayton, Lancashire, aged 39. (By telegram.)

OPERATION DAYS AT THE HOSPITALS.

MONDAY......Metropolitan Free, 3 P.M.—St. Mark's, 3 P.M.—Royal London Ophthalmic, 11 A.M.—Royal Westminster Ophthalmic, 1.30 P.M.—Royal Orthopaedic, 2 P.M.—Hospital for Women, 2 P.M.

TUESDAY......Guy's, 1.30 P.M.—Westminster 2 P.M.—Royal London Ophthalmic, 11 A.M.—Royal Westminster Ophthalmic, 1.30 P.M.—West London, 3 P.M.—St. Mark's, 9 A.M.—Cancer Hospital, Brompton, 3 P.M.

WEDNESDAY......St. Bartholomew's, 1.30 P.M.—St. Mary's, 1.30 P.M.—Middlesex, 1 P.M.—University College, 2 P.M.—London, 2 P.M.—Royal London Ophthalmic, 11 A.M.—Great Northern, 2 P.M.—Samaritan Free Hospital for Women and Children, 2.30 P.M.—Royal Westminster Ophthalmic, 1.30 P.M.—St. Thomas's, 1.30 P.M.—St. Peter's, 2 P.M.—National Orthopaedic, 10 A.M.

THURSDAY......St. George's, 1 P.M.—Central London Ophthalmic, 1 P.M.—Charing Cross, 2 P.M.—Royal London Ophthalmic, 11 A.M.—Hospital for Diseases of the Throat, 2 P.M.—Royal Westminster Ophthalmic, 1.30 P.M.—Hospital for Women, 2 P.M.—London, 2 P.M.—North-west London, 2.30 P.M.

FRIDAY......King's College, 2 P.M.—Royal Westminster Ophthalmic, 1.30 P.M.—Royal London Ophthalmic, 11 A.M.—Central London Ophthalmic, 2 P.M.—Royal South London Ophthalmic, 2 P.M.—Guy's, 1.30 P.M.—St. Thomas's (Ophthalmic Department), 2 P.M.—East London Hospital for Children, 2 P.M.

SATURDAY......St. Bartholomew's, 1.30 P.M.—King's College, 1 P.M.—Royal London Ophthalmic, 11 A.M.—Royal Westminster Ophthalmic, 1.30 P.M.—St. Thomas's, 1.30 P.M.—Royal Free, 9 A.M. and 2 P.M.—London, 2 P.M.

HOURS OF ATTENDANCE AT THE LONDON HOSPITALS.

CHARING CROSS.—Medical and Surgical, daily, 1; Obstetric, Tu. F., 1.30; Skin, M. Th., Dental, M. W. F., 9.30.

GUY'S.—Medical and Surgical, daily, exc. Tu., 1.30; Obstetric, M. W. F., 1.30; Eye, M. W., 1.30; Tu. F., 12.30; Ear, Tu. F., 12.30; Skin, Tu., 12.30; Dental, Tu. Th. F., 12.

KING'S COLLEGE.—Medical, daily, 2; Surgical, daily, 1.30; Obstetric, Tu. Th. S., 2; o.p., M. W. F., 12.30; Eye, M. Th. 1; Ophthalmic Department, W. 1; Ear, Th. 2; Skin, Th., Throat, Th., 3; Dental, Tu. F., 10.

LONDON.—Medical, daily, exc. S., 2; Surgical, daily, 1.30 and 2; Obstetric, M. Th., 1.30; o.p., W. S., 1.30; Eye, W. S., 9; Ear, S., 9.30; Skin, W., 9; Dental, Tu., 9.

MIDDLESEX.—Medical and Surgical, daily, 1; Obstetric, Tu. F., 1.30; o.p., W. S., 1.30; Eye, W. S., 8.30; Ear, and Throat, Tu., 9; Skin, F., 1; Dental, daily, 9.

ST. BARTHOLOMEW'S.—Medical and Surgical, daily, 1.30; Obstetric, Tu. Th. S., 2; o.p., W. S., 9; Eye, Tu. W. Th. S., 8; Ear, M., 2.30; Skin, F., 1.30; Larynx, W., 11.30; Orthopaedic, F., 12.30; Dental, Tu. F., 9.

ST. GEORGE'S.—Medical and Surgical, M. Tu. F. S., 1; Obstetric, Tu. S., 1; o.p., Th., 2; Eye, W. S., 2; Ear, Tu., 2; Skin, Th., 1; Throat, M., 2; Orthopaedic, W., 2; Dental, Tu. S., 9; Th., 1.

ST. MARY'S.—Medical and Surgical, daily, 1.45; Obstetric, Tu. F., 9.30; o.p., Tu. F., 2; Eye, Tu. F., 9.15; Ear, M. Th., 2; Skin, Tu. Th., 1.30; Throat, M. Th., 1.45; Dental, W. S., 9.30.

ST. THOMAS'S.—Medical and Surgical, daily, except Sat., 2; Obstetric, M. Th., 2; o.p., W. F., 12.30; Eye, M. Th., 2; o.p., daily, except Sat., 1.30; Ear, Tu., 12.30; Skin, Th., 12.30; Throat, Tu., 12.30; Children, S., 12.30; Dental, Tu. F., 10.

UNIVERSITY COLLEGE.—Medical and Surgical, daily, 1 to 2; Obstetric, M. Tu. Th. F., 1.30; Eye, M. Tu. Th. F., 2; Ear, S., 1.30; Skin, W., 1.45; S., 9.15; Throat, Th., 2.30; Dental, W., 10.30.

WESTMINSTER.—Medical and Surgical, daily, 1.30; Obstetric, Tu. F., 3; Eye, M. Th., 2.30; Ear, Tu. F., 9; Skin, Th., 1; Dental, W. S., 9.15.

MEETINGS OF SOCIETIES DURING THE NEXT WEEK.

MONDAY.—Odontological Society of Great Britain, 8 P.M. Annual General Meeting. Valedictory Address by the President. Casual communications by Mr. Sewill (Discussion on the Theory of Caries), Messrs. Stevenson, Storer Bennett, and Van Der Pant, etc.

TUESDAY.—Royal Medical and Chirurgical Society, 8.30 P.M. Dr. Colcott Fox: On two cases of so-called Erythema Gangrenosum. Dr. Percy Kidd: Contribution to the Pathology of Diphtheritic Paralysis.

WEDNESDAY.—Obstetrical Society of London, 8 P.M. Specimens will be shown. Mr. Knowsley Thornton: Case of Extirpation of Uterus and Appendages for Epithelioma of the Cavity. Mr. W. S. A. Griffith: Notes of a Specimen of Antelexion of the Uterus. Mr. C. E. Jennings: Transfusion. Dr. Galabin: Notes of two cases of Transfusion of Blood.—Hunterian Society, 7.30 P.M., Council Meeting. 8 P.M., Dr. Charlwood Turner will show a Heart of Two Cavities. Mr. J. McCarthy: Cases of Fracture of the Skull.—Royal Microscopical Society, 8 P.M. Mr. A. D. Michael: Notes on the Anatomy of the Oribatida.

THURSDAY.—Ophthalmological Society of the United Kingdom, 8.30 P.M. Mr. Priestley Smith: On the Growth of the Crystalline Lens. Dr. David Lees: Case of Paralysis of Third Nerve in a Child. Dr. Abercrombie: Case of Paralysis of Sixth Nerve in a Child. Dr. Hughlings Jackson: On the Movements of the Eyes in a Case of Ear-Disease. Dr. E. Madox (communicated by Dr. Greenfield): A New Method of Determining the Relation between Convergence and Accommodation. Mr. Rockliffe: Case of Epithelial Tumour growing from a Hair in the Anterior Chamber. Living specimens at 8 P.M.

FRIDAY.—Clinical Society of London, 8.30 P.M. Annual General Meeting. Report of Council. Election of Officers and Council for 1883. Dr. Coxwell: On the Case of a Child with Symptoms resembling those of Myxodema. Mr. Davies-Colley: On a Case of Enormous Enlargement of the Lower Lip cured by Operation. Dr. Southey: On Tachetie and Symmetrical Gangrene.

A QUESTION OF DIAGNOSIS AND TREATMENT.

SIR.—I should be greatly obliged if some of your numerous readers would inform me if they have ever had a similar case to the following; and, if so, what was the line of treatment adopted, and what was the result.

A lady, aged 35, weighing about 7½ st., indifferently nourished, has a nearly complete loss of motive power in the lower extremities, partial loss of motion in the arms, particularly the right. There is no loss of sensation, no pain anywhere, no tenderness along the spine; the appetite is very poor, with a tendency to take stimulants in lieu of food. The mental powers, as noticed in house-management, memory, and sharpness or quickness, are unimpaired; but the articulation is slightly slow and wanting in strength. The father and mother both died of apoplexy, aged respectively 70 and 64; one sister died at 33 years of age, having had six children rather rapidly, and having been paralysed in the lower limbs for six years; the last child being born three years previously to her death; one brother died at 33 years of age, from pneumonia and general dissipation.

My patient married in April 1874. She had previously a slight dimness in the left eye; the medical attendant said it was want of tone. In May 1874, she first noticed a loss of power in the right leg, which passed away in two days. In January 1876, she was confined of a female child. In June 1876, she had a miscarriage. In January 1878, she was confined of a male child. In April 1878, she went on a tour in Ireland, seemed weak, and gave evidence of loss of power on the right side. In May 1878, she consulted a London physician, and stayed in London six weeks. A building-up treatment was prescribed, with bromide of potassium, tonics, and vin de Boudoux. The loss of power gradually increased. In October 1879, she was confined of a male child. In March 1881, she stayed at the Matlock Baths for three months, undergoing electricity, and dieting with an absence of alcohol. In July 1881, she consulted another London physician, and was recommended the continuance of the hypophosphites. He suggested that the disease was a functional one, which it has proved not to be. In September 1881, she was confined of a female child. The eldest child died of pneumonia, aged 13 months. All the confinements have been easy and straightforward, particularly the last; all the children are healthy, the last being a very strong and healthy girl, now aged 15 months. Three years ago, she displayed great nervousness about her state of health, but this has entirely passed away. She takes exercise in an open carriage whenever the weather is fine.

She has at different times taken Easton's Syrup, Fellowes's Syrup of the Hypophosphites, Parrish's Syrup of the Phosphate of Iron and Quinine. One of the London medical men suggested that there might be a deterioration of a portion of the spinal cord.

In conclusion, I may say that my patient would be only too glad to know from any medical man, that he has so treated such a case as I have described, as to justify her in seeking further advice.—I am, etc., A PHYSICIAN.

DAVOS PLATZ.

SIR.—Allow me space for a few words *à propos* of the favourable notice of Mr. Maddock's "Davos Platz," that appeared in your issue of December 2nd. It is clear to me, on reading the notice, that your reviewer, quoting Mr. Maddock's remarks on the inefficient state of the drainage of Davos, has given his attention to the first edition of the book, now twelve months old, instead of to the last.

In the "J. E. M." guide to Davos Platz., 1882, on pages 10 and 11, the editor, speaking of the drainage and water-supply, now says: "We are glad to be able to state that, by next year, there will no longer be any cause for complaint, as, during the present year, some definite steps have been taken to establish an efficient state of drainage. We have been favoured with a plan of the scheme.....There will be a main sewer commencing at the Hotel d'Angleterre, and from this sewer various branch-pipes will run, having a common outlet in the river far below Davos. The plan also comprises an elaborate arrangement of traps to prevent the escape of sewer-gas.....In addition to the drainage improvements, the slaughter of cattle in scattered slaughter-houses is to be prohibited, and a general *abattoir* erected outside the village, at an estimated cost of 35,000 francs; and, in order to keep the air of the village free from smoke, the bakers are to be encouraged to carry on their work during the night-time only. No refuse of any description will be allowed to be placed near the village, and on this point the utmost vigilance will be exercised." The water-supply, copious as it is, will shortly be further supplemented from a source in the Flüela Valley, whence the water will be brought to Davos by a conduit."

I may remark that the authorities have been stimulated to this energetic action, in some measure, by the severe strictures Mr. Maddock passed when writing on the sanitary state of the valley twelve months ago; and, in justice to the Davosians, as well as for the information of intending visitors, it is desirable that these facts should be known.—I am, yours faithfully,

PHILIP HOLLAND.

Analytical Laboratory, 18, Exchange Street, Manchester.

R. A. O. CALLAGHAN will find full information on the subject in Mr. H. O. Burdett's book on Cottage Hospitals, published by Churchill.

MEDICINE AND PHARMACY.

SIR.—I would suggest that clauses should be inserted in the proposed new Medical Act, to the following effect:

1. That no registered medical practitioner residing within, say, half a mile or a mile of a pharmaceutical chemist, should, between 8 A.M. and 9 P.M., except in a case of emergency, supply or dispense medicines.
2. That a prescription, unless ordered to the contrary, should not be dispensed by a chemist on more than one occasion, unless redated and signed by a registered medical practitioner, with full name and address.
3. That stringent regulations should be inserted to prevent counter-prescribing by chemists: that they should not be allowed to recommend any medical preparation of their own, or patent medicines of any kind; and that all patent medicines should merely state on their wrappers and labels the ingredients and quantities of which they are composed, without any reference to their medical uses or effects.

Unless non-dispensing by medical men be made, as on the continent, contrary to law, it will be difficult to abolish it. Many patients, when a prescription is proposed, decline, probably to save the druggist's account, but say they have no faith in medicines supplied by the druggist, and wish to have it from the surgery of the medical attendant; while those medical men who perpetuate the public opinion of the trading association of the profession by charging for their medicines, will object to the non-supplying of medicines as a reduction to their profits.

In consideration of the increased business which non-dispensing by medical men would give to the druggists, they would probably be induced to charge less for dispensing prescriptions, and be satisfied with 25 to 50 per cent. profit on the retail price of the drugs used.—Yours faithfully, A NON-TRADER.

THE Editor will be obliged to correspondents if they will address communications relating to corrections in the list of members, advertisements, addressing of the JOURNAL, and other business matters, to the General Secretary and Manager, Mr. Francis Fowke, 161A, Strand, and not to the Editor.

COMMUNICATIONS, LETTERS, etc., have been received from:

Mr. R. J. W. Oswald, London; Mr. A. J. Scott, St. Leonard's-on-Sea; Mr. J. Dudley Phillips, Hoxne; Dr. H. Prescott Roberts, Ealing; Mr. Vincent Jackson, Wolverhampton; Mr. R. H. Firth, London; Mr. R. O'Connor, Limerick; Dr. Harkin, Belfast; Dr. Norman Kerr, London; Senex; Mr. R. Pennell, Ryde; Mr. D. Bradley, Dudley; Dr. C. H. Carter, London; Dr. Sutherland, London; The Secretary-General to the International Medical Congress; Dr. Gairdner, Glasgow; Mr. Simeon Snell, Sheffield; Dr. G. W. Crowe, Worcester; Dr. Mace, Nice; Dr. T. C. Bailton, Old Trafford, Manchester; Dr. A. W. Sanford, Cork; Mr. G. Jackson, Plymouth; Mr. J. P. Russell, Sheffield; Mr. H. Sankey, Littlemore, Oxford; Dr. J. Hamilton, Aberdeen; Dr. Haig, London; Mr. William Coates, London; Mr. M. Balding, Royston, Cambridge; Mr. Ansell Ball, Spalding; Messrs. J. R. BOOKS, ETC., RECEIVED.

Harness as it has been, as it is, and as it should be. By John Phillips. With Remarks on Traction and the Use of the Cape Cart, by Nimshovich; also Appendix by the same Author, containing some very important directions to grooms and coachmen respecting their duties, their dress, hints on driving, etc. Newcastle-upon-Tyne: Andrew Reid, 32, Collingwood Street; Mawson, Swan, and Morgan, Grey Street. London: Edward Stanford, 55, Charing Cross, S.W. 1882.

Clinical Lectures on Diseases peculiar to Women. By Lombe Atthill, M.D. Seventh Edition, revised and enlarged. Dublin: Fannin and Co. 1883.

Year-Book of Pharmacy; comprising Abstracts of Papers relating to Pharmacy, Materia Medica, and Chemistry, contributed to British and Foreign Journals from July 1st, 1881, to June 30th, 1882; with the Transactions of the British Pharmaceutical Conference at the Nineteenth Annual Meeting, held at Southampton, August 1882. London: J. and A. Churchill. 1882.

SCALE OF CHARGES FOR ADVERTISEMENTS IN THE "BRITISH MEDICAL JOURNAL."

Seven lines and under	20	3	6
Each additional line	0	0	4
A whole column	1	15	0
A page	5	0	0

An average line contains eight words.

When a series of insertions of the same advertisement is ordered, a discount is made on the above scale in the following proportions, beyond which no reduction can be allowed.

For 5 insertions, a deduction of	10 per cent.
" 12 or 13 "	"	"	"	25 "
" 26 "	"	"	"	30 "
" 52 "	"	"	"	30 "

For these terms, the series must, in each case, be completed within twelve months from date of first insertion.

Advertisements should be delivered, addressed to the Manager, at the Office, not later than Twelve o'clock on the Wednesday preceding publication; and, if not paid for at the time, should be accompanied by a reference.

Post-Office Orders should be made payable to the British Medical Association, at the West Central Post-Office, High Holborn. Small amounts may be sent in postage stamps.
