

clear, but even if the powders were not given at clinics it would not interfere with the right of a doctor to prescribe a preparation in which this was included.

Charge for Certificates

Mr. V. COLLINS (Shoreditch and Finsbury, Lab.) on March 7 asked the Minister of Health if he was aware that many doctors charged 2s. for medical certificates issued to Health Service patients, and if he would make a regulation to prohibit this charge. Miss PAT HORNSBY-SMITH, Parliamentary Secretary, replied that general practitioners in the Health Service were not required to provide free medical certificates other than those required under the National Insurance Acts and certain other enactments which are set out in Regulations. The Minister saw no reason for altering this system. Mr. COLLINS said that often these certificates had to be paid for after a period of unemployment. If the per capita charge did not cover them, could it be adjusted so that the certificates could be issued free? Miss HORNSBY-SMITH said that certificates required to obtain benefit under any of the regulations were obtainable free, but other types of certificate were not.

Opticians' Registration

Miss PAT HORNSBY-SMITH informed Mr. A. BLENKINSOP (Newcastle-upon-Tyne, East, Lab.) on March 7 that the Government could hold out no hope of introducing legislation for the registration of ophthalmic and dispensing opticians at present. She said that the difficulty was with the Parliamentary time-table.
