

7. The Microscope in Medicine. By Dr. Lionel Beale, F.R.S. 16s. Churchill.
8. Histological Demonstrations. By G. Harley, M.D., F.R.S., and G. T. Brown, Esq. 12mo. 12s.

OPHTHALMOLOGY.

1. The Natural and Morbid Changes of the Human Eye. By Charles Bader. Text, 16s.; Plates, 21s. Triibner and Co.
2. A Handybook of Ophthalmic Surgery (Lawrence and Moon). 8vo, 6s. Hardwicke.
3. Diseases and Injuries of the Eye. Wood Engravings. By George Lawson, F.R.C.S. Fcap, 8vo. 7s. 6d. Renshaw.
4. A Guide to the Practical Study of Diseases of the Eye. By James Dixon, F.R.C.S. 9s. Churchill.
5. A Treatise on Diseases of the Eye. By J. Soelberg Wells. 24s. Churchill.

On Diseases of the Eye, Dixon's work should be read first. It is a model of clear concise writing, and will serve as an excellent introduction to the subject. It scarcely, however, contains enough to serve as a class-book. For the latter purpose, the student will find Mr. Lawson's by far the best that he can obtain. Bader's work and that of Mr. Wells are both of them excellent for reference, but too detailed for beginners. The little work of Mr. Z. Laurence on *Physiological Optics* is well worth perusal. On the special subject of the Ophthalmoscope, we have nothing to equal Carter's translation of Zander; but it contains much that a student will not want. If Mr. Carter, taking Zander as his basis, would write a new and smaller monograph himself, we have no doubt that he would merit our warm thanks and best commendation next year.

GENERAL REMARKS.

As a further guide to selection, we have made the subjoined list (necessarily imperfect) of the books required in each stage of the student's course.

The first year's student will find himself well supplied if his library contains the following:—Heath or Gray or Holden and Gray on Anatomy; Holden's Osteology; Huxley and Kirkes on Physiology; Roscoe and Fownes on Chemistry; Heath on Minor Surgery; Druitt's Surgeon's Vade Mecum; Oliver's Botany.

The second year's student will require to add Tanner's Practice of Medicine; Erichsen's Science and Art of Surgery; Tyler Smith on Midwifery; Churchill or Graily Hewitt on Diseases of Women; Tilbury Fox on Skin-Diseases; Lawson on Diseases of the Eye; Garrod's Materia Medica. He should also read through, not as a task, but as a treat, Watson's Lectures on Physic.

The student, in his third year, may buy or not as he likes, but ought certainly to read, the following:—Virchow's Cellular Pathology; Paget's Lectures on Pathology, etc.; Hilton on Rest and Pain; Mr. Simon's Essay on Inflammation in Holmes's System; Trousseau's Clinical Lectures; West on Diseases of Children.

In concluding this notice, we have a word or two of suggestion to authors, and also a few hints to students. To the authors of class-books we would commend a high sense of the dignity and value of the task they have undertaken. None but those actually engaged in teaching can appreciate at its true worth a well-written student's book. There is no possible field of work in which a man may do more for the advancement of science. We should gladly welcome books on some subjects more exclusively designed for the use of students, written with a definite aim to supply precisely their needs. We should be glad, also, to see additions to the number of concise, small, and yet cheap manuals. The three issued by Macmillan on Botany, Chemistry, and Physiology, are models in their way; and works on their plan on other branches of professional study, designed for beginners, and for beginners only, would be most useful. Large books defeat their object and repel readers.

Many of the works which we have had under notice have displayed, we regret to say, remarkable qualities of growth. Long after it might have been supposed that they had reached adult age, they go on developing in size. We hear on all sides expressions of regret that such and such a book "has got so big." Erichsen's *Science and Art of Surgery*, and Tanner's *Practice of Medicine*, have been each expanded into two volumes, with corresponding increase in price. We applaud the care of authors in revising new editions; but, as regards the wants of students, it is much to be desired that size should be kept down, and that when additions are necessary, great attention should be given to the attempt to make room by the omission of superfluous information, or by pruning down redundant expressions. It is a great pity to spoil a good book by expansion and dilution.

Having strongly urged upon students the advisability of procuring a good library, it may not be amiss if we make a few suggestions on reading. He who would read to advantage must try to develop a good appetite for knowledge. Mental food, taken without relish, is rarely digested. It is of little use trying to cram information before the mind has appreciated its want. In the dissecting-room and the ward the student should seek difficulties which his books will solve. He should employ the latter quite as much for reference as for systematic study. Subjects which have seemed obscure in the day must be looked up at night.

It is his object to obtain a real practical knowledge of his subjects—not to become a mere book-man. To do this he must combine the study of things, with the use of books for their elucidation.

The plan of copying out extracts from books is scarcely to be commended. It is very commonly mere waste of time. On the other hand, the attempt to make an abstract of any given chapter the day after reading it, or the same day, without referring, is an admirable means both of impressing the memory and of ascertaining whether the subject has been understood.

ASSOCIATION INTELLIGENCE.

SOUTH-EASTERN BRANCH: WEST KENT DISTRICT MEETINGS.

THE next meeting of the above Branch is appointed to be held at St. Bartholomew's Hospital, Rochester, on Tuesday, September 28th, at 3.45 P.M.

Dinner will be provided at the Sun Hotel, Chatham, at 5.45 P.M.

The Antiseptic Treatment of Wounds by Carbolic Acid will be brought before the meeting by A. W. Nankivell, Esq., F.R.C.S.

Trains down:—North Kent Railway, 2.10; London, Chatham, and Dover Railway, 2.5.

FREDERICK JAMES BROWN, M.D., *Hon. Secretary*.
Rochester, September 14th, 1869.

SOUTH MIDLAND BRANCH.

THE thirteenth autumnal meeting of the above Branch will be held on Wednesday, October 6th, in the Board Room of the Stamford and Rutland Infirmary, at 2 P.M.: WILLIAM NEWMAN, M.D., President, in the Chair.

Gentlemen intending to read papers or cases, are requested to send the titles forthwith to Dr. Bryan, Northampton.

J. M. BRYAN, M.D., Northampton } *Hon. Secs.*
G. P. GOLDSMITH, Esq., Bedford }

Northampton, September 1869.

SHROPSHIRE ETHICAL BRANCH.

THE annual general meeting of the above Branch will be held at the Lion Hotel, Shrewsbury, on Wednesday, October 6th, at 2 P.M.; J. W. ROE, M.D., in the Chair.

Dinner will be served punctually at 4 P.M., for the convenience of the country members.

Gentlemen intending to read papers, or to be present at the dinner, will oblige by communicating their intention, at their earliest convenience, to

JUKES STYRAP, } *Hon. Secs.*
EDWYN ANDREW, }

Shrewsbury, September 20th, 1869.

WEST SOMERSET BRANCH.

THE autumnal meeting of the above Branch will be held at the Clarence Hotel, Bridgwater, on Thursday, October 21st, at 5 P.M.; H. J. ALFORD, M.B., President, in the Chair.

Gentlemen intending to be present at the dinner, or to read papers after, are requested to give notice to the Honorary Secretary.

W. M. KELLY, M.D., *Honorary Secretary*.
Taunton, September 22nd, 1869.

CUMBERLAND AND WESTMORLAND BRANCH.

THE autumnal meeting of the above Branch will be held at the Globe Hotel, Cockermouth, on Wednesday, October 13th, at 12.30 P.M.; M. W. TAYLOR, M.D., President, in the Chair.

Gentlemen intending to read papers or cases are requested to give notice to the Honorary Secretary.

HENRY BARNES, M.D., *Honorary Secretary*.
Carlisle, September 22nd, 1869.

THOMAS GRAHAM, D.C.L., F.R.S.

MASTER OF HER MAJESTY'S MINT.

WE regret to have to announce the death of Mr. Thomas Graham on September 16th, at the age of 63. Mr. Graham was the son of a merchant at Glasgow, and was educated at the Grammar School and University of that city, and afterwards spent ten years in Edinburgh. He then returned to Glasgow, where he distinguished himself as a practical chemist, and was elected Professor in the Andersonian University. In 1837, he was appointed Professor of Chemistry in University College, London, which position he retained until 1855; when, on the death of Sir John Herschel, he was appointed Master of the Mint. To him we are indebted for the discovery of the laws of the diffusion of gases, and of the diffusion of liquids, and the method of separation known as dialysis. He was a Fellow of the Royal Society, a member of the French Academy of Sciences, and an honorary D.C.L. of Oxford.

HENRY EWEN, F.R.C.S.

MR. EWEN of Long Sutton, in the county of Lincoln, died, after intense and protracted suffering, from disease of the stomach, on September 15th.

One of the most accomplished and successful practitioners in the kingdom, his life during the last forty years had been a continued career of uninterrupted usefulness, and his loss is most deeply felt and lamented by all the neighbourhood in which he resided. A sincere christian, he bore the pains and anguish attending his disease, whilst fully conscious of its inevitably fatal result, with great fortitude and most pious resignation.

MEDICAL NEWS.

APOTHECARIES' HALL.—Names of gentlemen who passed their examination in the science and practice of medicine, and received certificates to practise, on Thursday, September 16th, 1869.

Betts, John, London Road, Brighton
Lett, Francis, Woolwich

The following gentleman also on the same day passed his first professional examination.

Marshall, John, Guy's Hospital

As an Assistant in compounding and dispensing medicines.

Grainger, Robert Reed, Sunderland

MEDICAL VACANCIES.

THE following vacancies are declared:—

ABERDEEN, CITY PARISH OF—A District Medical Officer and Public Vaccinator.

ARTHOG SLATE QUARRIES, Barmouth, Merionethshire—Surgeon.

BALLYMALION UNION, Co. Longford—Medical Officer for the Abbeyshrule Dispensary District: applications, October 1st; election, October 6th.

BELLINGHAM UNION, Northumberland—Medical Officer for District No. 2.

BRISTOL DISPENSARY—A Resident District Surgeon: applications, 2nd Oct.; election, 4th Oct.

CHARING CROSS HOSPITAL—Physician for Treatment of Diseases of the Skin: applications, 28th. Lecturer on Midwifery; Lecturer on Botany.

CHICHESTER INFIRMARY—Assistant to the House-Surgeon: duties early in October.

CHORLTON, Lancashire—Certifying Factory Surgeon.

CHORLTON UNION—Consulting Medical Officer for the Workhouse.

DINGLE UNION, co. Kerry—Apothecary for the Workhouse and Dingle Dispensary: 30th.

DOLGELLY UNION, Merionethshire—Medical Officer for the Barmouth District. GLOUCESTER GENERAL INFIRMARY—Assistant-Physician: applications, 30th Sept.

GREAT YARMOUTH HOSPITAL—Resident Medical Officer: applications, 27th Sept.; duties, 14th Oct.

HOLBEACH UNION, Lincolnshire—Medical Officers for the Long Sutton and Central Wingland Districts.

HULL GENERAL INFIRMARY—Resident House-Surgeon.

KING AND QUEEN'S COLLEGE OF PHYSICIANS IN IRELAND—King's Professor of the Institutes of Medicine: applications, 1st Oct.; appointment, 18th October.

LEEDS GENERAL INFIRMARY—Resident Medical Officer: applications, 4th Oct.; election, 7th Oct.

LONDON HOSPITAL—Two Assistant-Surgeons: 28th Sept.

MANCHESTER TOWNSHIP—Medical Officer for the St. Michael District.

PENZANCE UNION, Cornwall—Medical Officer for District No. 5.

RATHDRUM UNION, co. Wicklow—Medical Officer for the Dunganstown Dispensary District: applications, 30th Sept.; election, 1st Oct.

ROYAL SOUTHAMPTONSHIRE INFIRMARY, Southampton—Surgeon.

ROSCREA UNION, Co. Tipperary—Medical Officer for the Workhouse and the Ballybritt Division of the Roscrea Dispensary District.

ROYAL ISLE OF WIGHT INFIRMARY, Ryde—House-Surgeon: applications, 5th October; vacancy, 3rd Nov.

ST. BARTHOLOMEW'S HOSPITAL—Resident Physician.

SEISDON UNION, Staffordshire—Medical Officer for the Wombourn District.

SPALDING UNION, Lincolnshire—Medical Officer and Public Vaccinator for the Gosberton District: 27th Sept.

SWANSEA INFIRMARY—House-Surgeon: applications, 24th Nov.; election, 1st Dec.

UNIVERSITY OF ABERDEEN—Three Examiners for Graduation in Medicine; election, October.

WEST RIDING OF YORKSHIRE LUNATIC ASYLUM—Clinical Clerk: applications, 28th Sept.

WIRRAL UNION, Cheshire—Medical Officer for the Upton District.

MEDICAL APPOINTMENTS.

Names marked with an asterisk are those of Members of the Association.

HUMBY, William Warren, M.R.C.P., appointed Resident Surgeon to the Bourne-mouth General Dispensary and Cottage Hospital.

PHILLIPS, John J., M.D., appointed Physician to the Royal Maternity Charity, in the room of *Robert Barnes, M.D., resigned.

BIRTHS.

BLASSON.—On September 15th, at Heckington, the wife of George Blasson, Esq., Surgeon, of a son.

GREENE.—On September 18th, at 218, Old Kent Road, the wife of *W. T. Greene, M.B., of a daughter.

MALINS.—At Cradley Heath, Staffordshire, on September 17th, the wife of *Edward Malins, M.D., of a son.

MAURICE.—On September 18th, at Reading, the wife of *Oliver C. Maurice, Esq., Surgeon, of a son.

OGLIVIE.—On September 9th, at Lee, Kent, the wife of Charles F. Ogilvie, M.D., Surgeon Her Majesty's Bombay Army, of a daughter.

SIMMS.—On September 13th, at Twickenham, the wife of *F. Simms, M.B., of Wimpole Street, of a son.

MARRIAGES.

*ALLBUTT, Thomas Clifford, M.A., M.D., F.L.S., of Leeds, to Susan, only daughter of Thomas ENGLAND, Esq., of Weston House, Weston, Yorkshire, on Sept. 15th.

CRITCHETT, George A., Esq., eldest son of *George Critchett, Esq., Surgeon, of Harley Street, to Maria Amelia Carneiro Lins, youngest daughter of the late Manuel C. L. d'ALBUQUERQUE, LL.D., of Pernambuco, on September 16.

*DREIGHTON, Christopher, M.D., of Clapham, Yorkshire, to Ann, only daughter of the late Richard MATHER, Esq., of Litton, at Clapham, on September 14th.

GLOVER, James Grey, M.D., of Islington, to Mary, daughter of William MULLER, Esq., of Clapton, at Hackney, on September 16th.

HASSELL, Benden S., Esq., of Buxted, Sussex, to Fanny, second daughter of the late Jonathan MONCKTON, Esq., Surgeon, Brenchley, Kent, on September 15th.

DEATHS.

*EWEN, Henry, Esq., Surgeon, at Long Sutton, Lincolnshire, aged 65, on September 15th.

FOX, Henry Erasmus, Esq., Surgeon, on board the *Orwell*, off Madeira, aged 42, on August 16th.

FOX, Thomas, M.D., Retired Deputy Inspector-General, Army Medical Department, at Ilfracombe, aged 66, on August 31st.

GRAHAM, Howard Claude, M.B., late of Chillen, Chile, at Ryde, Isle of Wight, on September 4th.

HIGHETT.—On September 19th, Elizabeth Holder, wife of *Charles Highett, Esq., M.R.C.P.Ed., Montpelier, Bristol.

ROGET, Peter Mark, M.D., F.R.S., at Malvern, aged 90, on September 12th.

THE COUNCIL OF THE ROYAL HOSPITAL FOR DISEASES OF THE CHEST, CITY ROAD, acknowledge the receipt of the liberal donation of one thousand pounds which has been paid to the credit of the Hospital with Messrs. Glyn, Mills, Currie, and Co. The sum has been given under the initials W. P. D.

BEQUESTS.—Mr. Richard Gosling, banker, of Fleet Street, has bequeathed £100 to St. George's Hospital. —Mr. Edward Giles, formerly of the Stock Exchange, late of Clapham Common, has left £500 to the Brompton Hospital, and £1,000 each to the Royal Sea-bathing Infirmary at Margate, and the Sussex County Hospital, Brighton. —The late Dr. William Bullar, of Southampton, has bequeathed £3,000 to the Royal Hampshire Infirmary.

THE DEAN OF CARLISLE ON MODERN OPINIONS.—In a sermon at Carlisle to those just ordained, Dean Close was bold to say "that in all the dreams of Hindoos, and all the false religions—corrupt, degraded, and ridiculous—that were ever among the Pagans, there were none so frivolous and childish as those unto which the science of the present day has reduced our scientific men."

MORTALITY RETURN IN 1746.—The following is copied from *Aris's Birmingham Gazette*, No. 235, the copy that gives an account of the Battle of "Collodden." The return is for Birmingham for the week ending May 10th, 1746. "Diseases and casualties this week. Diseases—Aged 58, Consumption 90, Convulsions 113, Dropsy 26, Fever 95, small-pox 70, Teeth 24. Casualties.—Drown'd 2, Found dead 2, Suffocated 1, Hang'd himself 1, Killed by a Cart 1, Scalded 1, Shot 1. Births and Burials this week. Christened,—Males 151, Females 139, In all 290. Buried,—Males 285, Females 258, In all 543. Decreased in the Burials this week 33." By the above return, small-pox caused 70 out of 485 deaths, or 14.5 per cent.

OPERATION DAYS AT THE HOSPITALS.

MONDAYMetropolitan Free, 2 P.M.—St. Mark's, 9 A.M. and 1.30 P.M.—Royal London Ophthalmic, 11 A.M.

TUESDAY.....Guy's, 1.30 P.M.—Westminster, 2 P.M.—Royal London Ophthalmic, 11 A.M.—National Orthopaedic Hospital, 2 P.M.

WEDNESDAY..St. Mary's, 1.15 P.M.—Middlesex, 1 P.M.—University College, 2 P.M.—London, 2 P.M.—Royal London Ophthalmic, 11 A.M.—St. Bartholomew's, 1.30 P.M.—St. Thomas's, 1.30 P.M.—Samaritan Free Hospital for Women and Children, 2.30 P.M.—Great Northern, 2 P.M.

THURSDAY....St. George's, 1 P.M.—Central London Ophthalmic, 1 P.M.—Royal Orthopaedic, 2 P.M.—Royal London Ophthalmic, 11 A.M.—Hospital for Diseases of the Throat, 2 P.M.

FRIDAY.....Westminster Ophthalmic, 1.30 P.M.—Royal London Ophthalmic, 11 A.M.—Central London Ophthalmic, 2 P.M.

SATURDAY....St. Thomas's, 9.30 A.M.—St. Bartholomew's, 1.30 P.M.—King's College, 1.30 P.M.—Charing Cross, 2 P.M.—Lock (Clinical Demonstrations and Operations), 1 P.M.—Royal London Ophthalmic, 11 A.M.—Royal Free, 1.30 P.M.—East London Hospital for Children, 2 P.M.

NOTICES TO CORRESPONDENTS.

All Letters and Communications for the JOURNAL, to be addressed to the EDITOR, 37, Great Queen Street, Lincoln's Inn Fields, W.C.

WE CANNOT UNDERTAKE TO RETURN MANUSCRIPTS NOT USED.

CORRESPONDENTS not answered are requested to look to the Notices to Correspondents of the following week.

TO PURCHASERS.—To insure attention, it is requested that all orders sent to the Office for extra copies of the JOURNAL, be accompanied with stamps for the amount.

CORRESPONDENTS, who wish notice to be taken of their communications, should authenticate them with their names—of course, not necessarily for publication.

MR. N. MCGREEVY requests us to correct an error in his letter published last week. He was described as "F.R.C.S. Edin.," instead of "L.R.C.S. Edin."

PROFESSOR CHURCH, M.A., whose Report on the Spectroscopic Examination of Animal Substances was read at the Exeter Meeting of the British Association, is not, as stated by a contemporary, the Assistant-Physician to St. Bartholomew's Hospital, but the Professor of Chemistry at the Royal Agricultural College.

A CORRESPONDENT.—The simplest is the best. A reflector and a lens without handles, at Krohne's in the Whitechapel Road, for 6s. or 8s. and upwards. Also, at nearly all the surgical instrument makers.

VISIBLE PULSE.

SIR,—In a large proportion of healthy persons whose arms are not plump, the pulsations of the radial artery are perfectly visible, or become so as soon as the energy of the heart's action is increased by exercise; and in thin men with irritable hearts a pulse somewhat resembling the true locomotive pulse may not infrequently be seen, both in that vessel and in the posterior tibial, where it lies behind the inner malleolus, though there is no regurgitation through the aortic orifice, of which lesion however the visible and vermicular pulse (at first noticed by Sir D. Corrigan) is a valuable sign when it is highly marked and observable in other vessels besides those I have mentioned. Having known this appearance cause much unnecessary alarm, I offer this reply to X. Y. B. I am, etc.,
Dublin, September 18th, 1869. J. L.

J. R. S. (Bantry, Ireland).—Under the circumstances you mention, we should strongly recommend you to subscribe to the New Sydenham Society. In addition to other valuable works, Trousseau's *Lectures*, etc., you will obtain every second year a *Resumé* of progress in the different departments of medicine, which will serve your purpose exceedingly well.

MACNIVEN and CAMERON'S PEN.—We have for some time been in the habit of using the "Owl" and "Waverley" pens—the latter especially; and have been better satisfied with them than with almost any other steel pen. One writes easily with them. The "Pickwick" pen resembles the "Waverley," but is more suited for those writers who like fine points.

GLASS FOR HOSPITAL WALLS.

SIR,—Among the various suggestions which have lately been made for the prevention of the poisonous infiltration of hospital walls, I have seen no mention made of glass as a material for wall covering. Glass can now be made in sheets so large and thick, and at a cost, comparatively speaking, so reasonable, that no bar need exist to the entire coating of at least one surgical ward, to which infectious cases might be removed, with plate glass. The polished glass would be *absolutely impervious* to infiltration, and the surface could at any time be thoroughly washed. The large squares of glass may be accurately fitted together, and cemented, so as to exclude any chance of infiltration at their junctions. Some kind of "hold-fast," in addition to the cement, would probably be required to keep the glass in position. This, however, is a point which a practical glazier would readily settle. If the walls be previously painted or papered, the colour or pattern would show through the glass, and present a very pleasant and cheerful appearance to the patients.
Baslow, Chesterfield. I am, etc., FERGUSON BRANSON, M.D.

INFLUENCE OF THE MOON ON DISEASE.—In a pamphlet, *On Lunar Influence over Malarious Fevers*, Dr. W. J. Moore, Surgeon Rajpootana Agency, examines the evidence for and against this question. It appears that in India, malarious fevers are supposed by some medical men, and by many Anglo-Indians, to be aggravated at the new and full moon. This influence is supposed by the author to be indirect, and to be exerted primarily on the temperature, moisture, electrical and magnetic states, etc., of the atmosphere, which, in its turn, affects the development of "malarious influences" already existing in the systems of those who have suffered from malarious fever.

NOTICE TO ADVERTISERS.—Advertisements should be forwarded direct to the Printing-Office, 37, Great Queen Street, W.C., addressed to Mr. RICHARDS, not later than *Thursday*, twelve o'clock.

A SUBSCRIBER.—There is no disease to which this name can properly be applied. You must describe the case. (Tinea Tonsurans?)

DR. CLIFFORD ALLBUTT'S Clinical Thermometer (Harvey and Reynolds, Leeds). Price 10s. 6d.

H. P. W.—*Botany*. Bentley (12s. 6d.) or Balfour. Oliver (Macmillan) is very good, but too small. You should also get Lindley's *Descriptive Botany*, 1s.—*Zoology*, etc. You must certainly get Huxley on Classification, 6s., just out. Also, Milne-Edwards or (better) Dallas.—*Natural Philosophy*. Ganot, 15s. Brooke, 12s. 6d., and Newth, 1s. 6d., will be found useful in addition.—*Chemistry*. Roscoe, 4s. 6d.; enough, if well mastered. Fownes, 12s. 6d. Recollect, the cheaper books may do to pass; but, if ambitious of honours, you must study the large books.

MERCANTILE MARINE.—The scurvy is said to have first appeared in Denmark in 1530.

WE are indebted to correspondents for the following periodicals, containing news reports and other matters of medical interest:—The Wiltshire County Mirror, Sept. 15th; The New York Medical Gazette, Sept. 4th; The Parochial Critic, Sept. 15th; The New York Medical Record, Sept. 4th; The Boston Medical and Surgical Journal, Sept. 2nd; The Aberdeen Free Press, Sept. 14th; The Madras Mail, July 14th; The Indian Medical Gazette, August 9th; The Newcastle Daily Journal, Sept. 15th; The Chester Courant, Sept. 15th.

COMMUNICATIONS, LETTERS, ETC., have been received from:—

Mr. P. Squire, London; Dr. Cameron, Dublin; A Subscriber, London; Mr. T. Longmore, Netley; Dr. Allbutt, Leeds; Dr. Wilkinson, Norwich; Mr. Tuson, London; Dr. J. Murie, London; The Honorary Secretary of the Meath Hospital and County of Dublin Infirmary; Dr. Cotton, London; Dr. Branson, Doncaster; Dr. George Johnson, London; Mr. J. Williams, Sudbury; Mr. E. C. Garland, Yeovil; Mr. G. Gaskoin, London; Dr. D. C. Black, Glasgow; Dr. Neil McGreevy, Drogheda; Dr. Fraser, Brighton; Dr. Ballard, London; Dr. Cheadle, London; S. W., London; Dr. J. J. Phillips, London; Suburban M.D.; R. H. O. J.; Dr. Coleman, Henley-on-Thames; Dr. Brabazon, Bath; Mr. Edwin Bush, Frome; Dr. Bradbury, Cambridge.

LETTERS, ETC. (with enclosures) from:—

Dr. H. Blanc, London; Mr. James Walton, London; Dr. Paul, London; The President and Treasurer of St. Thomas's Hospital; J. L., Dublin; Dr. Brumwell, Mossley, Manchester; Dr. Letheby, London; Mr. H. J. Alford, Taunton; Mr. T. R. Jessop, Leeds; Mr. F. Le Gros Clark, London; Dr. E. Sidebottom, Mottram-in-Longdendale; Mr. F. Wright, Stamford Bridge; Dr. Styrup, Shrewsbury; Dr. Kelly, Taunton; Dr. Malins, Cradley Heath; Dr. Oppert, London; Dr. Greene, London; Dr. Kelburne King, Hull; Mr. R. Rendle, London; The Secretary of Apothecaries' Hall; The Registrar-General of Ireland; The Registrar-General of England; Mr. T. M. Stone, London; Dr. Lomas, London; Dr. Treutler, Kew; Dr. E. Headlam Greenhow, London; Dr. Cammack, Spalding; Dr. Hightett, Bristol; Dr. H. Barnes, Carlisle; Dr. John Murray; Dr. Hughlings Jackson; and Dr. Tidy.
