and reference to the prescription and the chemist who made it up showed that they were Easton's tablets B.P.C., each equivalent to 60 min. (3.6 ml.) of Easton's syrup. The tablets looked like sweets, were sugar-coated, and nothing in the packaging indicated they were dangerous. Dr. A. S. Curry, of the Forensic Science Laboratory, Harrogate, said that deaths of this kind were not infrequent. The coroner, Mr. S. E. Brown, also stressed that there was nothing about the tablets to show that they could be harmful; an adult could take any number. A verdict of death from misadventure was recorded.

# FATAL ACCIDENT AFTER TAKING METHYLPENTYNOL

A youth aged 18, Derek Alan Wiltshire, who with John Hogan, 20, took three or four "oblivon" (methylpentynol) capsules to give himself courage to break into a house, was tried at the Kent Assizes, Maidstone, on July 5. Wiltshire, an inexperienced driver, drove away after the burglary on a stolen motor-cycle and crashed, killing Hogan, who was riding pillion. Wiltshire pleaded guilty to driving while under the influence of a drug, and was remanded for a medical report. The judge, Mr. Justice Byrne, learning that oblivon could be bought without a prescription, said he hoped the Home Office authorities would consider it and put it on the dangerous drugs list.

### REPORTING OF ACCIDENTS IN HOSPITALS

Accidents or other untoward occurrences which may give rise to complaints and legal proceedings are the subject of a circular (H.M.(55)66) sent to hospital authorities by the Ministry of Health. It asks all hospitals to adopt the practice of obtaining immediate statements, in the form provided, on any such occurrence. The arrangements set out in the circular have been agreed in consultation with the representatives of the medical and dental professions and the defence societies, and they are designed to provide administrative and legal safeguards in the circumstances, often embarrassing, that are apt to surround such accidents.

### Medical Notes in Parliament

### Poliomyelitis Vaccines

Mr. S. P. Viant (Willesden, West, Lab.) on July 7 asked the Minister of Health what proportion of the Mahoney strain of poliomyelitis virus was used in the manufacture of poliomyelitis vaccine in this country. Mr. IAIN MACLEOD said he understood that the vaccine so far manufactured in this country contained virus strains of each of the three known types in roughly equal proportions. The strain of Type I virus which had hitherto been used had been the Mahoney strain. None of this vaccine had been used here except for laboratory purposes. The Medical Research Council had advised that no vaccine containing the Mahoney strain should be used in the immunization of children, and investigations were proceeding with a view to replacing the Mahoney strain.

Mr. Viant asked to what extent animals were being used in the intensive tests being made of the exact effects of antipolio vaccine; what condition resulted when the vaccine was dangerous or capable of communicating poliomyelitis; and what condition resulted when the vaccine was said to be safe. Mr. Macleod told him that, while most of the tests for vaccine were carried out in test-tubes, it was necessary to test each batch for safety by inoculating monkeys. If the vaccine contained the living virus the monkeys might develop poliomyelitis. If the vaccine was safe the monkeys suffered no ill effects.

Mr. VIANT also asked what tissue the two firms manufacturing anti-polio vaccine used as a basis for the preparation. Mr. MacLeod said he understood that monkey kidney tissue was at present being used for this purpose.

### Dental Treatment for Expectant and Nursing Mothers

Mr. R. K. VAUGHAN-MORGAN (Reigate, Con.) asked the Minister of Health on July 7 whether he was satisfied that local health authorities were making adequate arrangements for the dental treatment of expectant and nursing mothers and children under the age of 5 years; and if he would make a statement. Mr. MACLEOD stated that many local authorities had had difficulties in engaging enough dental officers, and he could not yet be satisfied that the arrangements made were generally adequate. There had, however, been a gratifying improvement in the past few years in the number of sessions devoted to this work, the number of mothers and children treated, and the increasing emphasis generally on conservative treatment rather than extraction. He had recently issued to local health authorities a memorandum on dental treatment and health education for mothers and young children, suggesting ways in which these services could be developed, and he was confident that authorities would wish to respond to this lead.

### Evidence on Homosexuality

The Home Secretary stated on July 7 that he could not say when the committee appointed to study problems of homosexuality and prostitution would be able to report. He understood that it was likely to be occupied for some time to come in hearing oral evidence. Mr. Montgomery Hyde (Belfast, West, Ulster Unionist) recalled that it was a year since the committee was appointed. In view of the importance of the subject there should be some expedition about it. Major G. Lloyd-George agreed, but added that he thought too much expedition might be a bad thing. The committee did not start sitting till last September, and people were invited to bring forward all the evidence they had by June; but one or two important witnesses had asked to be allowed a little more time, as their evidence was not ready.

### Number of Dentists

Miss PAT HORNSBY-SMITH, the Parliamentary Secretary, stated in answer to Mr. A. BLENKINSOP (Newcastle-upon-Tyne, East, Lab.) that about 9,600 dentists practised under the general dental service in England and Wales. This was some 8,000 short of the estimate made by the Teviot Committee. The numbers of courses of conservative dental treatment had risen from 4,280,000 in 1950 to 5,240,000 in 1953 and 5,900,000 in 1954 (53 weeks).

Mental Hospital Beds.—The number of beds available for use in mental hospitals at the end of 1951 was 119,502, and in mental deficiency hospitals 47,617. At the end of 1954 the numbers were 121,555 and 50,726.

Home Confinements.—Of the 677,529 live births in 1951 the percentage of home confinements was 37.4. In 1953 the figures were 684,372 (35.9%) and in 1954 673,651 (36.4%).

Orthodontic Treatment.—Circulars to local education and hospital authorities on guidance to enable the best use to be made of the limited number of orthodontists were issued on July 12.

## Universities and Colleges

### UNIVERSITY OF LONDON

The following have been recognized as teachers of the University in the subjects indicated in parentheses: University College Hospital Medical School, Dr. Kenneth Soddy (Mental Diseases (Psychiatry)), Dr. E. A. B. Pritchard (Medicine). Institute of Neurology, Dr. E. A. B. Pritchard (Neurology). University College, Dr. S. P. Datta (Biochemistry).

The following scholarships at the Royal Free Hospital School of Medicine have been awarded for 1955-6: Mabel Sharman-Crawford Scholarship, Miss J. M. Richmond (Girls' Grammar School, Grimsby); Bostock Scholarship for Women, Miss S. M. Atherton (Alice Ottley School, Worcester); MacIntyre Evans Scholarship for Women, Miss P. A. Gething (Royal Free Hospital

School of Medicine); Elizabeth Garrett Anderson Scholarship for Women, Miss L. F. Courtier (Royal Free Hospital School of Medicine); Dr. Margaret Todd Scholarship for Women, Miss R. Khin Zaw (Royal Free Hospital School of Medicine).

The following candidates at the London School of Hygiene and Tropical Medicine have been approved at the examination for the Academic Postgraduate Certificate in Public Health:

A. Bukhari, C. Cywinski, A. S. Härö, W. R. Rochester, Y. Savegh,

The following candidates have been approved at the examination indicated:

A. Bukhari, C. Cywinski, A. S. Härö, W. R. Rochester, Y. Sayegh, P. Sirivorasarn.

The following candidates have been approved at the examination indicated:

Thrpo M.B., B.S.—3H. B. Anstall, 'Alison M. Armstrong, 'Kathleen M. Berget, 'P. B. Soulter (swarded University Medal).

Ballower, B. B. L. Harra IN, H. Kemp, 'P. McDonald, 'Joyce M. Pallett, 'Hazel M. Price, 'K. P. Robinson, 'N. E. Rust, 'Finid H. Shaw, 'B. M. L. Harra IN, H. Kemp, 'P. McDonald, 'Joyce M. Pallett, 'Hazel M. Price, 'K. P. Robinson, 'N. E. Rust, 'Finid H. Shaw, 'S. R. A. Scoud, 'Sveril IM. Walker, W. S. Agras, N. Ahmed, Ann K. Aistrop, R. H. Anderson, B. G. Andrews, J. C. Anthony-Davles, Martine Y. K. Armstrong, D. L. Arnold, M. J. Atwill, M. Aylett, R. D. Bailey, G. E. W. Baker, R. T. Barber, Winfred M. Barindale, B. J. E. B. Benwell, W. S. M. Berry, R. W. Bewicke, Rosemary, H. Bakeney, End M. Blewett, P. W. Blower, A. E. Blumenfeld, T. A. Boliston, J. P. Booth, G. T. K. Boughey, T. L. Bowen, J. B. Bowes, Dorothy A. Bowman, T. A. Boxall, T. R. Boyde, Jean O. Boyton, Jean M. Bradley, D. Brenham, Susan M. Broadbent, B. J. Brooks, J. D. Broons, Susan M. Broadbent, B. J. Brooks, J. D. Broons, Susan M. Broadbent, B. J. Brooks, J. D. Broons, M. Sang, M. Brook, J. D. Broons, M. Bradley, D. Broons, B. M. Brown, J. J. Camp, C. M. G. Buttery, P. H. Byles, D. A. O. Cairns, J. J. Camp, G. Hiller, C. M. G. Buttery, P. H. Byles, D. A. O. Cairns, J. J. Camp, Gillian M. Cann, P. J. S. Cannon, Sarah Capell, P. J. Carrie, R. P. Carrington, S. J. Carter, G. Catrunel, Anne Chandler, J. A. Chappel, R. W. Clark, Mary D. Clarke, F. G. Clayton, B. J. Clayton Payne, T. Coates, R. G. Congdon, M. A. Cooper, M. D. Coulter, M. J. Cox, B. W. Clark, Mary D. Clarke, F. G. Clayton, B. J. Clayton Payne, T. Dennis, Britherman, E. R. Dingley, A. D. J. Davison, J. T. Davy, J. M. Davson, P. H. G. Dawton, A. G. Day, D. T. F. Deakin, Zaka-Ud Dean, P. Dennis, Smitherman, E. R. Dingley, A. D. J. Davison, J. T. Davy, J. M. Davson, P. H. G. Dawton, A. G. Day, D. T. F. Dakin, J. Carri

Hsien-Chen Hsieh (London School of Hygiene and Tropical Medicine) has been approved at the examination for the Academic Postgraduate Certificate in Tropical Medicine and Hygiene.

The following candidates at the Institute of Psychiatry have been approved at the examinations indicated:

ACADEMIC POSTGRADUATE DIPLOMA IN PSYCHOLOGICAL MEDICINE.—R. W. A. C. Barton, R. H. Gosling, L. A. Hersov. The following have passed in Part I only: H. R. Alderton, A. A. Bartholomew, S. Benaim, A. J. Coppen, D. T. F. MacSorley, C. M. B. Pare, J. M. Pencheon.

¹Distinguished in pathology and bacteriology. ²Distinguished in medicine. ³Distinguished in applied pharmacology and therapeutics. ⁴Distinguished in surgery. ⁵Distinguished in obstetrics and gynaecology.

### INFECTIOUS DISEASES AND VITAL STATISTICS

Summary for British Isles for week ending June 25 (No. 25) and corresponding week 1954.

Figures of cases are for the countries shown and London administrative county. Figures of deaths and births are for the 160 great towns in England and Wales (London included), London administrative county, the 17 principal towns in Scotland, the 10 principal towns in Northern Ireland, and the 14 principal towns in Eire.

A blank space denotes disease not notifiable or no return available. The table is based on information supplied by the Registrars-General of England and Wales, Scotland, N. Ireland, and Eire, the Ministry of Health and Local Government of N. Ireland, and the Department of Health of Eire.

Measles not notifiable in Scotland, whence returns are approximate. Includes primary and influenzal pneumonia. Includes puerperal pyrexia.

### **Vital Statistics**

#### Infectious Diseases

The chief features of the returns of the notifications of infectious diseases in England and Wales during the week ending June 25 were decreases of 1,317 for measles, from 21,832 to 20,515, and 46 for scarlet fever, from 587 to 541, and increases of 157 for whooping-cough, from 1,666 to 1,823, and 25 for acute poliomyelitis, from 29 to 54.

The largest falls in the incidence of measles were 239 in Yorkshire West Riding, from 1,410 to 1,171, 227 in Warwickshire, from 693 to 466, 200 in Essex, from 1,134 to 934, 189 in Staffordshire, from 919 to 730, 164 in Surrey, from 880 to 716, 137 in Sussex, from 814 to 677, and 121 in Lancashire, from 1,032 to 911, and the largest rises were 162 in Devonshire, from 549 to 711, and 150 in Glamorganshire, from 1,193 to 1,343. The largest increases in the number of notifications of whooping-cough were 95 in Kent, from 63 to 158, and 44 in London, from 51 to 95. The rise in Kent was due to an outbreak involving 84 persons in Faversham M.B. No large fluctuations were recorded in the trends of scarlet fever. 18 cases of diphtheria were notified, being 8 more than in the preceding week. Diphtheria was mainly confined to four areas—Birmingham C.B. 5, Liverpool C.B. 4, London 4, Taunton R.D. 3.

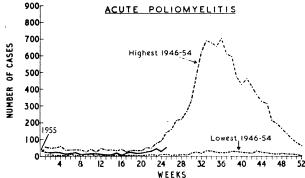

The two main centres of paratyphoid fever were Yorkshire West Riding 12 (Sheffield C.B. 12) and Sussex 7 (Brighton C.B. 2, Hove M.B. 2).

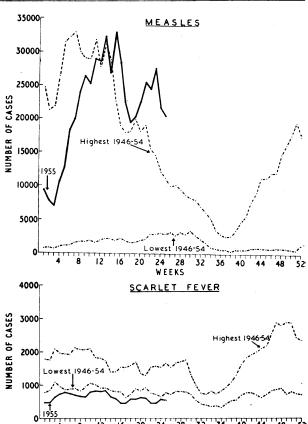

54 cases of acute poliomyelitis were notified during the week, and these were 13 more for paralytic and 12 for non-paralytic cases than in the preceding week. The largest returns were Yorkshire West Riding 22 (Barnsley C.B. 7, Spenborough M.B. 3, Leeds C.B. 2, Rawmarsh U.D. 2, Worsborough U.D. 2), London 8 (Stepney 4), and Lancashire 6 (Liverpool C.B. 3, Manchester C.B. 2).

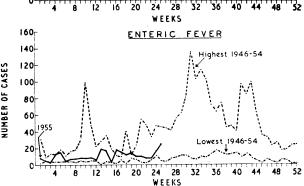

The notifications of dysentery numbered 862, being 3 more than in the preceding week. The largest returns were Lancashire 300 (Liverpool C.B. 58, Blackpool C.B. 56, Westhoughton U.D. 37, Manchester C.B. 20, Ulverston R.D. 20, Blackburn C.B. 18, Swinton and Pendlebury M.B. 12, Salford C.B. 10), Yorkshire West Riding 91 (Huddersfield C.B. 39, Leeds C.B. 16, Sheffield C.B. 12), London 72 (Stepney 11), Durham 48 (Stanley U.D. 12), Surrey 40 (Croydon C.B. 35), Warwickshire 37 (Birmingham C.B. 20, Coventry C.B. 15), Northumberland 29 (Seaton Valley U.D. 13), Glamorganshire 24 (Swansea C.B. 10, Rhondda M.B. 10), and Suffolk 20 (Blyth R.D. 16).

### Graphs of Infectious Diseases

The graphs below show the uncorrected numbers of cases of certain diseases notified weekly in England and Wales. Highest and lowest figures reported in each week during the nine years 1946-54 are shown thus -----, the figures for 1955 thus ———. Except for the curves showing notifications in 1955, the graphs were prepared at the Department of Medical Statistics and Epidemiology, London School of Hygiene and Tropical Medicine.

Week Ending July 2

The notifications of infectious diseases in England and Wales during the week included: scarlet fever 585, whooping-cough 1,833, diphtheria 6, measles 17,716, acute pneumonia 295, acute poliomyelitis 73, dysentery 807, paratyphoid fever 17, and typhoid fever 5.

### The Services

Colonel A. A. G. Flemming, O.B.E., T.D., R.A.M.C., T.A., has been appointed Honorary Physician to the Queen in succession to Colonel G. J. V. Crosby, C.B.E., T.D., who has been transferred to the T.A.R.O.

A Supplement to the London Gazette has announced the following appointments and mentions in dispatches in recognition of distinguished service in Malaya during the period July 1 to December 31, 1954:

C.B.E. (Military Division).—Colonel E. J. Curran, late R.A.M.C.

M.B.E. (Military Division).—Majors A. J. Moss-Blundell and D. E. S. Steele, R.A.M.C.

Mentioned in Dispatches.—Lieutenant-Colonel (Temporary) S. Mackenzie, O.B.E., and Captains N. C. Frame, P. Honan, M. Dulake, and G. G. Thomas, R.A.M.C.

Emeritus Professor John Cruickshank, formerly professor of bacteriology at Aberdeen, had conferred on him the honorary LL.D. of Aberdeen University at the summer graduation ceremony on July 8.

Scottish Medical Golfing Society.—The competition on June 23 for the Treasurer's Thistle, presented to mark the society's coming of age, was held at Highgate Golf Course, being won by Dr. A. R. Anderson, with Dr. Alexander FINLAY second. There are some vacancies in the society, and inquiries would be welcomed by the hon. secretary, Dr. IAN M. ANDERSON, 152, Harley Street, London, W.1.

### **COMING EVENTS**

International Conference of Medical Librarians and Reference Librarians.—A conference will be held on September 10 at the University Hall, Brussels. Further details from Miss CH. DE LOOZE, Librarian, c/o Œuvre Nationale Belge de Défense contre la Tuberculose, 56 rue de la Concorde, Brussels.

11th International Congress of Dermatology will be held in Stockholm, July 31 to August 5, 1957.

#### **NEW ISSUES**

British Journal of Venereal Diseases.—The new issue (Vol. 31, No. 1) is now available. The contents include:

NEISSER AND NEISSERIAN PRINCIPLES IN VENEREOLOGY. L. W. Harrison.
CARDIOVASCULAR SYPHILIS. John F. O'Brien, Clarence A. Smith, and
M. A. Fisherkeller.

M. A. Fisherkeilet.

EVALUATION OF CABDIOLIPIN ANTIGEN IN ROUTINE WASSERMANN REACTIONS.

Sidney Shaw.

COMPARISON OF OXYTETRACYCLINE AND CHLORTETRACYCLINE IN THE TREATMENT OF NON-GONOCOCCAL URETHRITIS. R. R. Willcox.

A STUDY OF NON-GONOCOCCAL URETHRITIS, PRESUMABLY VENEREAL IN ORIGIN,
BASED UPON 588 INFECTIONS IN 529 PATIENTS. Edward Gartman and
Albert Jeibovitz

Albert Leibovitz.

Urethral Stricture in the Male. G. O. Mayne.

Anticomplementary Reactions in Syphilis. F. Rappaport and G. J.

Stark.

FURTHER STUDIES ON THE EFFECT OF SOME ANTI-COAGULANTS UPON SERODIAGNOSTIC TESTS FOR SYPHILIS. Roger D. Coleman, Milo D.
Appelman, and Harrison M. Kurtz.

PROSTITUTION. Eleanor French.
EIGHTEENTH-CENTURY V.D. PUBLICITY. Helen Macgregor.
LOCAL TREATMENT OF TRICHOMONAS VAGINITIS. R. D. Catterall and Mary
Williamson

Issued quarterly; annual subscription £2 2s.; single copy 12s. 6d.; obtainable from the Publishing Manager, B.M.A. House, Tavistock Square, London, W.C.1.

Archives of Disease in Childhood.—The new issue (Vol. 30, No. 151) is now available. The contents include:

BLOOD FORMATION IN INFANCY: PART IV. THE EARLY ANAEMIA OF PREMATURITY. Douglas Gairdner, John Marks, and Janet D. Roscoe. THE SCHÖNLEIN-HENOCH SYNDROME (ANAPHYLACTOID PURPURA) COMPARED WITH CERTAIN FEATURES OF NEPHRITIS AND RHEUMATISM. Ian C. LEWIS. THE CLINICAL ASSESSMENT OF HAEMOLYTIC DISEASE OF THE NEWBORN. KARCE POLACES. ASSOCIATED WITH KERNICTERIES R. FORTESTER and

DENTAL CHANGES ASSOCIATED WITH KERNICTERUS. R. Forrester and

John Miller.

On a Search for Rhesus Antibodies in Very Young Foetuses. Bruce Chown.

Obstructive Jaundice in Haemolytic Disease of the Newborn Treated with Magnesium Sulphate. N. V. O'Donohoe.

Nuclear Agenesis: Möbius' Syndrome: The Congenital Facial Diplegia Syndrome. Philip Rainsford Evans.

The Early Manifestations and Course of Diplegia in Childhood. T. T. S. Ingram.

A Controlled Investigation of Artane in Cerebral Palsy. John Lorder. Early Diagnosis and Early Therapy in Congenital Cretinism. Y. Akettén.

PRE-NATAL GROWTH OF MONGOLOID DEFECTIVES. Alwyn Smith and Thomas McKeown.

TUBERCULOUS MENINGITIS IN TWO BROTHERS VACCINATED WITH B.C.G.

R. McLaren Todd.

Does Measles Cause Hypertension? C. Choremis, Ch. Tsenghi, and C. Economou-Mavrou.

ECONOMOU-MAVIOU.

RICKETS WITH ALKALINE PHOSPHATASE DEFICIENCY: AN OSTEOBLASTIC

DYSPLASIA. Bernard Schlesinger, Joseph Luder, and Martin Bodian.

EPIDERMOLYSIS BULLOSA IN THE NEWBORN. Ian C. Lewis, Eluned M.

Steven, and James W. Farqwhar.

CHRONIC CONSTRICTIVE PERICARDITIS COMBINED WITH HYPOPROTEINAEMIA.

F. Kuipers.

TRANSIENT DIABETES IN INFANCY. S. E. Keidan.

BRITISH PAEDIATRIC ASSOCIATION. PROCEEDINGS OF THE TWENTY-SIXTH GENERAL MEETING.

Issued six times a year; annual subscription £3 3s.; copy 12s. 6d.; obtainable from the Publishing Manager, B.M.A. House, Tavistock Square, London, W.C.1.

Abstracts of World Medicine.—The July issue (Vol. 18, No. 1), which is now available, contains abstracts of important papers drawn from medical and other scientific journals, published in some 20 different countries and in all five continents. The subjects covered range over the whole field of clinical medicine, and include pathology, bacteriology, pharmacology, and chemo-therapy; there are also sections dealing with medical genetics, public health, and industrial medicine, forensic medicine and toxicology, anaesthetics, radiology, and the history of medicine. Issued monthly; annual subscription £4 4s.; single copy

8s. 6d.; a specimen will be sent free on request to the Publishing Manager, B.M.A. House, Tavistock Square, London, W.C.1.

British Journal of Ophthalmology.—The new issue (Vol. 39, No. 7) is now available. The contents include:

DOMINANT MACULAR DYSTROPHY. Arnold Sorsby and J. B. Davey.

MODIFICATION OF THE AMPLITUDE OF THE HUMAN ELECTRO-OCULOGRAM BY
LIGHT AND DARK ADAPTATION. F. François, G. Verriest, and A. De

EXPERIMENTAL APPROACH TO THE PATHOGENESIS OF RETROLENTAL FIBRO-PLASIA, III. CHANGES IN THE EYE INDUCED BY EXPOSURE OF NEW-IA. III. CHANGES IN THE EYE INDUCED BY EXPOSURE OF NEW-MICE TO GENERAL HYPOXIA. Lars J. Gyllensten and Bo E.

RARITIES IN OCULAR SARCOIDOSIS. M. Klein, R. J. Calvert, W. E. Joseph,

RARITIES IN OCULAR SARCUIDUSIS. M. KICHI, R. J. CERTON, M. J. CARLON, M. ARTHER AND ARCHITIS CAUSED BY ARSENICALS. TREATMENT WITH B.A.L. C. Ochninger, R. Rodriguez Barrios, and C. A. Gomez Haedo.

CASE NOTES: DICTYOMA. ROSS G. S. Malone.

RECURRENT CHOROIDAL DETACHMENT. R. M. Mathers and A. R. Moodie.

OSSIFICATION IN A CONJUNCTIVAL TUMOUR. LOUIS Schrife.

Issued monthly; annual subscription £4 4s.; single copy 8s. 6d.; obtainable from the Publishing Manager, B.M.A. House, Tavistock Square, London, W.C.1.

### SOCIETIES AND LECTURES

A fee is charged or a ticket is required for attending lectures marked Application should be made first to the institution concerned.

#### Tuesday, July 19

ROYAL COLLEGE OF SURGEONS OF ENGLAND.—5 p.m., Moynihan Lecture by Dr. F. A. Coller (Michigan, U.S.A.): Indications for and Results of

Dr. F. A. Coller (Michigan, U.S.A.): Indications for and Results of Splenectomy.

Society for the Study of Addiction.—At Medical Society of London, 8 p.m., Presidential Address by Dr. W. R. Bett: Medical Societies and International Understanding, followed by International Symposium on Problems of Alcoholism and Drug Addiction in Different Parts of the World.

### Thursday, July 21

ROYAL SOCIETY OF TROPICAL MEDICINE AND HYGIENE.—At Hospital for Tropical Diseases, 4, St. Pancras Way, N.W., 7.30 p.m., clinical meeting.

Society of Medical Officers of Health (Welsh Branch).—At B.M.A. House, 195, Newport Road, Cardiff, 6.30 p.m., annual meeting.

### Saturday, July 23

ASSOCIATION OF CLINICAL BIOCHEMISTS (SOUTHERN REGION).—At Central Laboratory, Milton Road, Portsmouth, 11 a.m., meeting. Scientific papers.

### **APPOINTMENTS**

EAST ANGLIAN REGIONAL HOSPITAL BOARD.—E. M. Cheffins, M.B., B.S., M.R.C.P.I., Consultant Physician Superintendent, Papworth Hospital; J. M. Weston Wells, M.R.C.S., L.R.C.P., D.M.R.D., Consultant Radiologist, King's Lynn and Wisbech Area; A. Gillie, M.B., Ch.B., Assistant Psychiatrist, Little Plumstead Mental Deficiency Group of Hospitals and Child Psychiatry Service; W. M. Martin, M.B., B.Ch., Anaesthetic Registrar, Newmarket General Hospital; J. Adam, M.B., Ch.B., D.M.R.D., Registrar in Radiology, Norfolk and Norwich Hospital; J. M. Pencheon, M.B., Ch.B., Registrar in Psychiatry, Hellesdon Hospital; M. E. N. Smith, L.M.S.S.A., Ear, Nose, and Throat Registrar, Norfolk and Norwich Hospital and Jenny Lind Hospital; L. Capper, M.B., B.S., M.R.C.P., Assistant Chest Physician, Cambridge Area Chest Clinic; M. V. Braimbridge, M.B., B.Chir., F.R.C.S., Surgical Registrar, East Suffolk and Ipswich Hospital. WATKINS, MELVILLE, M.R.C.S., L.R.C.P., D.P.H., Medical Officer of Health, Area Medical Officer, and Divisional School Medical Officer, Leyton.

### BIRTHS, MARRIAGES, AND DEATHS
