

so limited by the skull and by the inevitably short period of time available for study during neurosurgical procedures. The more subtle analyses of neural function are now performed on experimental animals, though the clinical observation of human activity, especially in controlled experimental situations, still feeds very much important information into the great complexities of the relationships of body and mind.

This book provides much food for thought, but all these symposia tend to look a little out of date by the time they are published, and one wonders whether their permanent value really justifies the inevitably high cost of the books in which they are recorded.

PESTICIDES AND FOOD ADDITIVES

Residue Reviews. Volume 3. Edited by Francis A. Gunther. (Pp. 170. DM. 22.) Berlin, Göttingen, Heidelberg: Springer-Verlag, 1963.

Three issues of *Residue Reviews* have appeared in nine months, and the editor in his preface sounds assured of plenty of material for the future. They are not summaries of recent work, such as appear in annual reviews, but are general accounts of parts of the field. Most assume a

fair acquaintance with their subjects; most are well documented; and nearly all are well presented. If volumes continue to appear three or four times annually they will in three or four years add up to a basic textbook invaluable to anyone concerned professionally with pesticides and food additives.

So far little has appeared in them that is directly concerned with medical aspects, but this deficiency will presumably be remedied in future issues. Indirectly much of the work described has a bearing on these aspects, and shows convincingly that the safety of users and consumers of pesticides and food additives is, and has been for a long time, a real concern of a great many people. This does not imply that the presentation of *Residue Reviews* is in any way polemical. On the contrary, it is for experts by experts with a terminology that gives an interested outsider little help. Normally one would not criticize such an approach—the same is true of most scientific journals—but at a time when there is so much controversy about pesticides it seems a little unfortunate.

The present volume reviews the metabolism of herbicides; the statistical sampling of crops; and, in a long article, many of the processes involved in the deposition, degradation, persistence, and effectiveness of pesticides.

BRITISH MEDICAL ASSOCIATION PUBLICATIONS

ONE of the primary objects of the British Medical Association is the promotion of medical and allied sciences, and each year a considerable portion of its income is spent in publishing a wide range of general and specialist journals.

BRITISH MEDICAL JOURNAL

A comprehensive general medical journal. Essential for every medical man or student who wishes to keep informed of research in medical science, of trends in clinical medicine and of professional activities.

Weekly. Annual Subscription, United Kingdom, Irish Republic, £9 9s.; Overseas, £5 5s. (\$15.00).

— Specialist Journals —

BRITISH JOURNAL OF OPHTHALMOLOGY

Designed for the clinician and research worker and includes original articles, case notes, information on new appliances, book reviews.

Monthly. Annual Subscription, Inland £6 6s.; Overseas £7 (\$20.00).

(Combined subscription for the two ophthalmic journals, Inland £9 9s.; Overseas £10 10s. (\$30.00)).

OPHTHALMIC LITERATURE

Abstracts of articles on the wide field of ophthalmology published throughout the world. Each volume contains some 5,000 abstracts—covering one year.

Six issues a year, plus index. Annual Subscription, Inland £4 4s.; Overseas £4 15s. (\$13.50).

(For combined subscription see above).

JOURNAL OF CLINICAL PATHOLOGY

Original and specially commissioned articles on each branch of pathology, with prominence given to its clinical application. Technical methods, notes on new or improved apparatus, book reviews.

Annual Subscription (six issues), Inland £4 4s.; Overseas £4 15s. (\$13.50).

BRITISH HEART JOURNAL

Original work on the heart and circulation—anatomical, physiological and pathological.

Annual Subscription (six issues), Inland £4 4s.; Overseas £4 15s. (\$13.50).

ARCHIVES OF DISEASE IN CHILDHOOD

Devoted to child health and disease with emphasis on clinical paediatrics. Original articles by paediatricians and other specialists.
