

of Manchester, the only university in western Europe to have Bachelor of Nursing graduates. The B. Nurs. degree is a four-year course, and is geared to cover both the theoretical studies of nursing and to give training in the practical skills. The students emerge with the professional qualifications of State Registered Nurse from the General Nursing Council, the Certificate of the Health Visitors' Council, and the District Nursing Certificate.

The professor is Miss Jean McFarlane, who is 48 and trained at St. Bartholomew's Hospital, London. She holds numerous offices on national bodies concerned with nursing education and health visitor training, and recently completed two years as chairman of the representative body of the Royal College of Nursing. Her academic qualifications include an Honours B.Sc. in sociology and an M.A. in manpower studies from the University of London.

Advice on Haemophilia

The Medical Research Council has published a memorandum entitled "*Haemophilia and its related conditions: a brief guide to diagnosis and treatment*," written by Dr. Rosemary Biggs. The purpose of the pamphlet is to serve as a guide to the preliminary diagnosis and emergency treatment of patients with congenital haemorrhagic states for those medical practitioners who may encounter such patients but who do not specialize in the field.

The booklet discusses recognition of a haemorrhagic state, how to reach a correct clinical diagnosis, preliminary laboratory investigation, and the treatment and general management of patients with haemophilia and other serious coagulation defects. There is an appendix listing haemophilia centres in Great Britain and Northern Ireland. It can be obtained from Her Majesty's Stationery Office, price 34p.

Drugs for Patients Going Abroad

A poster dealing with the prescribing of drugs for patients is being issued by the Department of Health and Social Security for general practitioners to display in their waiting rooms. The posters are being sent to family practitioner committees which will send them to all general practitioners (including assistants and trainee general practitioners) in their areas as soon as possible.

Hunterian Society Essay 1974

The subject for the 1974 Hunterian Society medal essay competition is "The medical problems of retirement." The competition is open to all general practitioners resident in the British Isles. Details from Dr. Douglas Woolf, 2 Harley Street, London W1 1AA.

Last year's essay competition was won by Dr. T. C. Dann. The subject was "The value of the medical check up."

Corrections

Clinical Public Health Doctors

We regret that a printing error occurred in the letter from Dr. C. Simpson Smith (8 June, p. 561). In the third paragraph the second sentence should have read as follows: "One of the main functions of the new community specialist in child health for the area is to co-ordinate the whole sphere of operation of the medical aspects of community child health."
