International Society and Federation of Cardiology

Cardiac metabolism is the subject of the latest scientific council to be formed by the International Society and Federation of Cardiology. The ISFC, which has been formed from two separate bodies concerned with scientific work and with fund raising, has an intensive programme of scientific and educational activities. The scientific councils organise multinational research studies, teaching seminars, and postgraduate courses on many aspects of cardiology. Task forces are to examine the current thinking about drugs that inhibit platelet function and other urgent issues. In collaboration with the World Health Organisation, the ISFC is preparing a manual on the control of hypertension for general practitioners and has been working on international classifications and definitions. Teaching and research fellowships are also planned. In public education the ISFC is particularly emphasising the cardiovascular dangers of cigarette smoking, holding workshops and conferences on the subject this year and next. Further information may be obtained from the ISFC Geneva Office, PO Box 117, 1211 Geneva 12, Switzerland.

Gowers prize essay on epilepsy

A triennial award, sponsored by the British branch of the International League Against Epilepsy, is offered for an essay on any aspect of epilepsy, clinical, physiological, or social. This year two prizes are offered—one of £100 to medical graduates under the age of 35 years and one of £50 to medical students, either clinical or preclinical. Intending authors should submit, before 30 November, the title and a brief summary of the scope of their essay to Dr J Laidlaw (Beechwood, Bridge of Weir Road, Kilmacolm, Renfrewshire PA13 4NN), from whom further information may be obtained. Essays must be submitted by 30 June 1980.

Instructions to authors

The following are the minimum requirements for manuscripts submitted for publication.

A stamped addressed envelope or an international reply coupon *must* accompany the manuscript if acknowledgment of its receipt is desired.

(1) **Typing** should be on one side of the paper, with double or triple spacing between the lines and 5-cm margins at the top and left-hand side of the sheet.

(2) **Two copies** (or preferably three) should be submitted.

(3) **Spelling** should conform to that of *Chambers Twentieth Century Dictionary*.

(4) **References** must be set out in the style used in the *BMJ*, and their accuracy verified before the manuscript is submitted.

(5) **SI units** are used for scientific measurements. In the text they should be followed by traditional units in parentheses. In tables and illustrations values are given only in SI units, but a conversion factor must be supplied. For general guidance on the International System of Units, and some useful conversion factors, see *The SI for the Health Professions* (WHO, 1977).

(6) **Authors** should give their names and initials, their current appointments, and not more than two degrees or diplomas. Each author must sign the covering letter as evidence of consent to publication.

(7) **Letters to the Editor** submitted for publication must be signed personally by all the authors.

(8) **Acknowledgments** will not be sent unless a stamped addressed envelope or an international reply coupon is enclosed.

(9) **Detailed instructions** are given in the *BMJ* dated 6 January 1979 (p 6).
