

## SELECTIONS FROM JOURNALS.

## THERAPEUTICS.

**COLD BATHS IN CEREBRAL RHEUMATISM.**—At a meeting of the Société Médicale des Hôpitaux in Paris on June 22nd, M. Valleix reported a case of cerebral rheumatism cured by the cold bath. The intensity of the symptoms, the elevation of the temperature (106.5 Fahr.), amply justified the use of this method, of which the efficacy was demonstrated by the rapid amendment of the patient. M. Valleix, however, is of opinion that this mode of treatment, which may be termed of a revolutionary character, should be reserved for very serious cases only, as, for instance, those in which the temperature exceeds 106.5 deg. Fahr.

**ALBUMINURIA DURING PREGNANCY: CURE BY JABORANDI.**—M. Langlet of Reims, in the *Union Médicale et Scientifique du Nord-Est*, No. 6, reports the case of a woman in the third month of pregnancy who for six weeks had suffered from œdema of the legs, great oppression, cephalalgia, vomitings, etc. The urine was very scanty and loaded with albumen, and was uninfluenced by the usual diuretics. From the first day after the administration of jaborandi, there were salivation, very little perspiration, but, as a counterbalance, an increase in the quantity of urine voided, which continued for some subsequent days. The patient took jaborandi for sixteen days, and during that time the œdema was reabsorbed, the albumen decreased, the general symptoms improved, and there was eventually a favourable delivery, with a healthy child.

**EXOPHTHALMIC GOÛTRE CURED BY GALVANISATION OF THE SYMPATHETIC IN THE NECK.**—The *New York Medical Record* quotes an important case from the *Giornale Veneto di Scienze Mediche*. The patient was a girl nineteen years of age; her brother suffered from progressive muscular atrophy, his sister from frequent attacks of hemiplegia, and she herself had been subject throughout youth to repeated diarrhoea accompanied by colicky pains, which occurred without traceable cause, and proved rebellious to all treatment. Two years ago, the eyes became more prominent, and palpitation of the heart appeared. Shortly afterwards, a tumefaction of the neck was noticed, accompanied by emaciation, prostration, frequent flushing of the countenance, diarrhoea, and change of character, which became irritable and capricious. The digestive functions became languid. Dr. Ancona proposed galvanisation of the first cervical ganglion of the sympathetic. The poles were applied to each side of the neck behind the angle of the jaw, pressing back the sterno-mastoid muscles. He employed at first ten elements of Stöhrer's apparatus. Each application lasted from three to five minutes. After a few days, the circuit was frequently interrupted. The physiological effects observed were, dilatation of the pupils at each closing of the circuit, more marked on the side corresponding to the negative pole; slight contractions of the sterno-mastoid muscles; sometimes an increased flow of saliva, and a coppery taste in the mouth; occasionally some vertigo. In the course of five months, one hundred sittings were had. The treatment was well borne, and during the whole time she only suffered from one severe attack of hemiplegia and two very light ones. With the treatment by electricity was associated the internal administration of arsenic. From the very beginning of the treatment, a notable amelioration was observed, which proved continuous, so that at the end of five months the patient had increased in weight about thirty pounds. The face and the mucous membranes gradually returned to their normal colour. The eyeballs regained their position and their mobility; the thyroid body became greatly diminished in size; the pulsation of the arteries ceased to be visible; the cardiac impulse became regular; the pulse beat forty times a minute; menstruation became regular; and with the digestive functions the strength returned.

## MEDICINE.

**TYPHOID FEVER COMPLICATED WITH MENINGITIS.**—Dr. Cadet de Gassicourt recently communicated to the Société Clinique the following case. The patient, a boy aged 5, was brought to the Hôpital Sainte-Eugénie, his parents saying he had been ill a week, and had been unconscious five days. The child was pale, prostrate, nearly immovable in the dorsal decubitus; the eyes half closed; the nostrils slightly encrusted; the tongue red, clammy; the lips dry; the abdomen tender, with slight tympanites, painful to pressure over the right iliac fossa, without appreciable gurgling; no lenticular spots. The spleen could neither be felt nor measured, percussion proving every-

where an equal dulness. He had involuntary soft motions. There was slight contraction of the muscles of the neck; slight paralysis of the right eyelid. The pupils were much dilated, but equal. There was marked paresis of the right arm. Cutaneous sensation was slightly obtuse. The child cried constantly, as if in pain. The temperature was 103 deg.; respirations 36; pulse regular, 124. The next day, the little patient died. At the necropsy, the following lesions were discovered. There was subarachnoid effusion, with abundant red punctation of the left occipital, right parietal, and anterior and inferior parts of the two frontal lobes. There was meningitis, with a rather abundant exudation at the level of the two first anterior frontal convolutions. The meninges at these spots were thickened and contained a little pus. Beneath, the white cortical matter was softened superficially; the grey matter was congested. There was no effusion into the lateral ventricles; no tubercles. In the intestine were found the changes characteristic of typhoid fever in the second week; the agminated follicles were swollen; Peyer's patches were inflamed and puffed, and one of them showed commencing ulceration. The mesenteric glands were very large and of the colour of wine-dregs. The spleen was small and hard, measuring 4 by 2½ inches. The lungs were congested in the lower part. In the right superior lobe at the back, and nearly at the apex, there was extensive sclerosis with old pneumonia surrounding a small crude tubercle.—*France Médicale*.

**THORACENTESIS IN THE CASE OF PLEURISY WITH CARDIAC CLOT.**—M. Vergely lays down the following rules to aid in the diagnosis of pleurisy and pneumonia. In pleurisy, if the fluid be thin and serous, there is true ægophony; if the effusion be of a greater density, or purulent, there is a peculiar bronchophony. Bronchophony in purulent pleurisy is more metallic and of a higher tone than in pneumonia; and this sign is sufficient, when other signs, as the thoracic vibrations, are not easily made out, to permit one in doubtful cases to give the preference to pleurisy. As to thoracentesis, it is contraindicated when there are signs of cardiac clot. These signs are, œdema successively invading the face, neck, and chest; smallness of the pulse; and increasing dyspnoea. This œdema is caused by the superdistension of the superior vena cava.—*Gazette Médicale de Paris*.

## REPORTS AND ANALYSES AND DESCRIPTIONS OF NEW INVENTIONS IN MEDICINE, SURGERY, DIETETICS, AND THE ALLIED SCIENCES.

## A NEW NURSING-BOTTLE.

MESSRS. VILLIERS, LUCHTI, & Co., of 59, Frith Street, Soho, W., London, have forwarded us a sample of M. Monchovault's self-acting feeding-bottle. This very useful and ingenious contrivance presents the following advantages.

1. The bottle (of white glass) is graduated so that the quantity of food swallowed is at once known.
2. The stopper has an aperture which lets the air into the bottle as the milk is withdrawn, and which prevents the milk from escaping in case the bottle should be accidentally inverted. A pin is attached to each instrument for cleaning its aperture.
3. The exhaust-tube contains a valve, and the mouth-piece or nipple is so perforated that the whole constitutes a sucking-pump which admits of the child getting his food without exertion, as very slight pressure on the nipple-piece causes the fluid to flow.

This apparatus may therefore be recommended to the attention of the profession as a very excellent feeding-bottle, of great value in artificial nursing.

## NEW MEDICINAL PREPARATIONS.

MESSRS. C. J. HEWLETT & SON, manufacturing chemists, have forwarded us a "liquor santal flavi cum buchu et cubebâ", which is readily miscible with water, and which, when administered in cases of gonorrhoea and gleet, proves to contain all the medicinal virtues rightly attributed to these drugs.

They have also forwarded us a solutio opii purificata, which is guaranteed perfectly free from resinous matter and other impurities. This solution, in certain suitable cases, appears to be a very valuable addition to the list of preparations of opium, as it does not parch the mouth or induce the unpleasant cerebral excitement frequently observed in the administration of ordinary preparations of this drug. It is of the same strength as the tincture of opium of the *British Pharmacopœia*.

far they occurred in other diseases attended with an elevation of temperature. He thought that Dr. Coats's observations on the condition of the salivary glands and kidneys were of great value.

Dr. JOHN HARLEY said that, in experiments with aconite, he had found it possible to produce all the symptoms of hydrophobia.

Mr. JOHN WOOD asked if Dr. Coats had examined the scar in hydrophobia. Perhaps the examination of this might throw light on the period of incubation.

The PRESIDENT called attention to the tetanus of new-born children as likely to throw light on the matter. This disease was formerly very prevalent in the Lying-in Hospital in Dublin, but had been almost banished by ventilation of the wards. He had been struck with the tendency to overlook the results of clinical observation, and to regard the microscope as affording the clue to the pathology of disease. He would by no means undervalue morbid anatomy or microscopic research; but the results obtained by these were not more certain than those of clinical observation. To look at the process of disease only when it was completed, and not when it was in progress, was a mistake. He did not find that the study of pathological anatomy had done much to put a stop to the wild theorising of which our predecessors of a hundred years ago were accused; but the theories were now wrapped in more scientific language. There seemed to be a risk of losing sight of our position, as curers of disease, in investigating disease when it was beyond our power.

Dr. COATS, in reply, said that only a portion of the paper (from want of time) had been read, and this had caused some misunderstanding of his meaning. He had not regarded the lesions as the disease, but only as the evidence of irritation—of the action of some poison. And, as the irritation differed, so he recognised a difference in the two diseases, though they were to a certain extent analogous. He considered tetanus and hydrophobia to be due to totally different morbid poisons. He thought that the term "miliary abscess", as used by Benedikt, was not a happy one. An infiltration of nervous tissue with leucocytes did not constitute an abscess. He had found leucocytes in the stomach in cases of hydrophobia; but they were also present in other stomachs which he had examined. He did not think that the alterations of the spinal cord in tetanus were sufficiently advanced to produce paralysis. With regard to the incubation of tetanus and hydrophobia, he was disposed to endeavour to gain instructions from tubercle. A cheesy tubercle might remain local for a long period until, under some unknown influence, general tuberculosis was developed from it. The same might be the case in hydrophobia; the disease being at first local, and then, after a time, becoming general. But both the tubercle and the hydrophobic poison might remain localised throughout life. He had examined the cicatrix in hydrophobia, and had found evidence of irritation of the neighbouring tissues, more than would be expected, after the wound had healed for some time. He had endeavoured to associate the pathological anatomy of the disease with its symptoms.

## UNIVERSITY INTELLIGENCE.

### UNIVERSITY OF CAMBRIDGE.

**NATURAL SCIENCE FELLOWS.**—Two new Natural Science Fellows have been elected this term. One, Mr. A. M. Marshall, Senior in the Tripos of 1874, has been elected at his own College, St. John's. His able papers on Embryology have been an important addition to the researches which are making the British school again famous in this subject, and he is the first Doctor of Science in Comparative Anatomy in the University of London. Two of the newly elected Fellows of St. John's are taking to Medicine; viz., Dr. Marshall and Mr. McAllister, the last Senior Wrangler. At Trinity, the open Fellowship has been adjudged for the first time to a non-member of the College, Mr. J. N. Langley, B.A., of St. John's, whose services as Demonstrator of Physiology to Dr. Foster are most highly appreciated.

**THE ANATOMY AND PHYSIOLOGY BUILDINGS.**—The new buildings for anatomy and physiology are advancing to completion and are partially occupied, Mr. Balfour's two practical classes of Comparative Anatomy being accommodated in them. Dr. Foster will transfer much of his work here after Christmas. The new buildings will be almost too small as soon as completed; for Dr. Foster has fifty men and several ladies working in his elementary classes this term.

### UNIVERSITY OF DURHAM.

**REPRESENTATIVE IN THE MEDICAL COUNCIL.**—At a convocation of the University of Durham on December 11th, Dr. Thomas T. Pyle was re-elected as the representative of the University in the General Medical Council for the ensuing five years.

## CORRESPONDENCE.

### A MUNIFICENT OFFER.

SIR,—Many years ago, when commencing the practice of my profession, I was so fortunate as to make the acquaintance, and secure the friendship, of the founder of this Association; and it is with pleasure that I remember how often, and sometimes at brief notice, I contributed to the pages of its earliest journal—the *Midland Medical and Surgical Reporter*. Among other subjects discussed with him, in the prospect of the predicted extension of the objects embraced by the Association, it was then thought desirable to preserve at fixed periods a record of the progress of the various material sections of medical and surgical science. I speak from memory; but such is my impression. If this be now the view of the Council, I shall have the pleasure of presenting the sum of five hundred pounds for the purpose of founding a triennial (?) prize for the best essay or analysis of the progress of ophthalmic medicine and surgery, subject to such regulations as may be suggested.—I am, sir, yours, etc.,

A RETIRED SURGEON.

Birmingham, December 12th, 1877.

### CONFLICT OF MEDICAL EVIDENCE.

SIR,—I shall feel much obliged by your allowing me to state that, in the case referred to as one of conflict of ophthalmic evidence in the *JOURNAL* of December 8th, I gave no opinion whatever on the condition of the plaintiff's eyes.

My evidence had merely reference to the general condition of his health. To this I had the less hesitation in speaking, as the patient had been under my observation, and had been treated by me in conjunction with his medical attendants, since last May.

The surgeons who saw the patient on behalf of the railway company did not take the same view of the case that I had. Such differences of opinion appear to me to be unavoidable and perfectly legitimate in obscure and complicated cases, such as this undoubtedly is. Were they confined to cases that come into the courts of law, the spectacle would be a melancholy one. But he must have but a very slender experience of our profession who does not know that they are of daily occurrence in the wards of the hospital and in the sick-room of the private patient.

The fact is, that the same group of symptoms is often differently interpreted as to cause, nature, and probable duration by different observers; and the opinions formed on all these points will necessarily be as widely divergent as are the various interpretations of the phenomena on which they are founded.

The following is a case in point. Not long since, I met in consultation, but separately, two physicians of very great eminence on the case of a lady who had become paraplegic during pregnancy. One pronounced the paralysis to be due to softening of the cord, and consequently to be incurable and permanent. The other considered it to be simply hysterical and quite curable. Had this been a "compensation case", a conflict of evidence must necessarily have arisen of an irreconcilable character; but it would have been as honest as I most truly believe the conflict of evidence to have been in the case to which you have referred.—I am, sir, very obediently yours,

London, December 8th, 1877.

JOHN ERIC ERICHSEN.

## ASSOCIATION INTELLIGENCE.

### THAMES VALLEY BRANCH.

THE next general meeting of the above Branch will be held at the Spread Eagle Hotel, Wandsworth, on Tuesday, December 18th, at 5 o'clock.

The following communications are promised.

1. Dr. Hooper: Case of Intussusception treated by Foreign Injection.
2. Mr. W. A. F. Bateman: On the Muco-Enteritis of Young Children.

There will be a dinner at the above hotel at 7 o'clock. Charge, 7s. 6d., exclusive of wine.

F. P. ATKINSON, M.D., *Honorary Secretary*.

Kingston-on-Thames, December 12th, 1877.

## MEDICAL NEWS.

### UNIVERSITY OF LONDON.—M.D. Examination, 1877.

Archer, Herbert Ray, St. George's Hospital  
 Hetley, Henry, Guy's Hospital  
 Hoar, Charles Edward, King's College  
 Hunt, J. W., B.S. (Gold Medal), University College  
 Jameson, Leander Starr, B.S., University College  
 Kidd, Walter Aubrey, B.S., Guy's Hospital  
 \*Ord, William Miller, St. Thomas's Hospital  
 Rigby, James Arthur, Guy's Hospital

### Logic and Moral Philosophy only.

Ashby, Henry, Guy's Hospital  
 Bogg, Thomas Wemyss, University College and Manchester Royal Infirmary  
 Burton, Samuel Herbert, B.S., University College  
 Firth, Charles, St. Bartholomew's Hospital  
 Morley, Thomas Simmons, Guy's Hospital

### M.S. Examination.

Pepper, Augustus Joseph, University College

### B.S. Examination. Pass List.

*First Division.*  
 Symonds, Charters James, Guy's Hospital  
 Verco, Joseph Cooke, M.D., St. Bartholomew's Hospital

*Second Division.*  
 Bury, Judson Sykes, University College

### Examination for Honours.

*First Class.*  
 Verco, Joseph Cooke, M.D. (Scholarship and Gold Medal), St. Bartholomew's Hospital  
 Symonds, Charters James (Gold Medal), Guy's Hospital

\* Obtained the number of marks qualifying for the Medal.

## MEDICAL VACANCIES.

THE following vacancies are announced:—

- ADDENBROOKE'S HOSPITAL, Cambridge—House-Surgeon. Salary, £65 per annum, with board and residence. Applications to be made on or before the 17th instant.
- BRADFORD UNION, Yorkshire—Medical Officer for the Horton West District. Applications to be made on or before the 22nd instant.
- DUNDALK UNION—Medical Officer for the Ravensdale Dispensary District. Salary, £120 per annum, and the usual sanitary and vaccination fees. Applications before the 29th instant.
- GUEST HOSPITAL, Dudley—Resident Medical Officer. Salary, £120 per annum, with furnished apartments, board, coals, and gas. Applications to be made on or before January 1st.
- INFIRMARY FOR CONSUMPTION AND DISEASES OF THE CHEST, Margaret Street, W.—Physician in Ordinary. Applications to be made on or before the 10th instant.
- KENT AND CANTERBURY HOSPITAL—Assistant House-Surgeon and Dispenser. Salary, £50 per annum, with board, lodging, and washing. Applications to be made on or before the 28th instant.
- KIDDERMINSTER INFIRMARY—House-Surgeon.
- NEWCASTLE-UPON-TYNE INFIRMARY—Senior House-Surgeon. Salary, £100 per annum, with board lodging, and washing. Applications to be made on or before February 4th, 1878.
- TAVISTOCK UNION—Medical Officer for the Tavistock District and the Workhouse.
- URLINGFORD UNION—Medical Officer for the District. Salary, £120 per annum, besides vaccination and registration fees. Applications up to the 20th instant.

## MEDICAL APPOINTMENTS.

*Names marked with an asterisk are those of Members of the Association.*

- HELME, J. Milner, M.B., appointed House-Surgeon to the Royal Southern Hospital, Liverpool, *vice* W. Roughton, M.R.C.S.Eng., resigned.
- \*HUGHES, H. R. Greig, L.R.C.P.Ed., appointed Honorary Surgeon to the Carnarvonshire and Anglesey Infirmary, *vice* J. Richards, L.K.Q.C.P., appointed Physician; also appointed a Certifying Surgeon under the Factory Act.
- \*SNELL, Simeon, M.R.C.S.Eng., appointed Lecturer on Anatomy at the Sheffield School of Medicine, *vice* \*W. Skinner, M.R.C.S.Eng., resigned.

## BIRTHS, MARRIAGES, AND DEATHS.

*The charge for inserting announcements of Births, Marriages, and Deaths, is 3s. 6d., which should be forwarded in stamps with the announcement.*

### BIRTHS.

- CLARKSON.—On December 7th, at Tockwith, near York, the wife of \*F. R. Clarkson, M.R.C.S.E., of a daughter.
- GOWERS.—On December 10th, at 50, Queen Anne Street, the wife of \*W. R. Gowers, M.D., of a daughter.

### DEATHS.

- GAINE.—On December 7th, at 8, Edgar Buildings, Bath, Adèle Brydges, the beloved wife of \*Charles Gaine, M.R.C.S., aged 31.
- WARD.—On December 11th, at West Brompton, Tilleard William, youngest surviving son of the late \*Dr. Martindale Ward, of Chelsea, aged 24.

## OPERATION DAYS AT THE HOSPITALS.

- MONDAY..... Metropolitan Free, 2 P.M.—St. Mark's, 9 A.M. and 2 P.M.—Royal London Ophthalmic, 11 A.M.—Royal Westminster Ophthalmic, 1.30 P.M.—Royal Orthopaedic, 2 P.M.
- TUESDAY..... Guy's, 1.30 P.M.—Westminster, 2 P.M.—Royal London Ophthalmic, 11 A.M.—Royal Westminster Ophthalmic, 1.30 P.M.—West London, 3 P.M.—National Orthopaedic, 2 P.M.
- WEDNESDAY.. St. Bartholomew's, 1.30 P.M.—St. Mary's, 1.30 P.M.—Middlesex, P.M.—University College, 2 P.M.—King's College, 1.30 P.M.—London, 2 P.M.—Royal London Ophthalmic, 11 A.M.—Great Northern, 2 P.M.—Samaritan Free Hospital for Women and Children, 2.30 P.M.—Cancer Hospital, Brompton, 3 P.M.—Royal Westminster Ophthalmic, 1.30 P.M.—St. Thomas's, 1.30 P.M.—St. Peter's, 2 P.M.
- THURSDAY.... St. George's, 1 P.M.—Central London Ophthalmic, 1 P.M.—Charing Cross, 2 P.M.—Royal London Ophthalmic, 11 A.M.—Hospital for Diseases of the Throat, 2 P.M.—Royal Westminster Ophthalmic, 1.30 P.M.—Hospital for Women, 2 P.M.—St. Thomas's (Ophthalmic Department), 4 P.M.
- FRIDAY..... Royal Westminster Ophthalmic, 1.30 P.M.—Royal London Ophthalmic, 11 A.M.—Central London Ophthalmic, 2 P.M.—Royal South London Ophthalmic, 2 P.M.—Guy's, 1.30 P.M.
- SATURDAY.... St. Bartholomew's, 1.30 P.M.—King's College, 1.30 P.M.—Royal London Ophthalmic, 11 A.M.—East London Hospital for Children, 2 P.M.—Royal Westminster Ophthalmic, 1.30 P.M.—St. Thomas's, 1.30 P.M.—Royal Free, 9 A.M. and 2 P.M.

## MEETINGS OF SOCIETIES DURING THE NEXT WEEK.

- MONDAY.—Medical Society of London, 8.30 P.M. Dr. Andrew Clark, "On the Prognosis of certain forms of Heart-Disease".
- TUESDAY.—Pathological Society of London, 8.30 P.M. Professor Lister, "On Lactic Fermentation and its bearings on Pathology". Mr. Lister's specimens will be ready for inspection at 8 P.M.
- THURSDAY.—Harveian Society of London, 8.30 P.M. Dr. Graily Hewitt, "On the Mechanical System of Uterine Pathology".
- FRIDAY.—Medical Microscopical Society, 8 P.M. Dr. Urban Pritchard, "The Cochlea of the Ornithorhynchus". Special Meeting to consider Mr. Golding-Bird's resolution.

## LETTERS, NOTES, AND ANSWERS TO CORRESPONDENTS.

CORRESPONDENTS not answered, are requested to look to the Notices to Correspondents of the following week.

AUTHORS desiring reprints of their articles published in the *BRITISH MEDICAL JOURNAL*, are requested to communicate beforehand with the printer, Mr. Thomas Richards, 37, Great Queen Street, W.C.

PUBLIC HEALTH DEPARTMENT.—We shall be much obliged to Medical Officers of Health if they will, on forwarding their Annual and other Reports, favour us with *Duplicate Copies*.

WE CANNOT UNDERTAKE TO RETURN MANUSCRIPTS NOT USED.

COMMUNICATIONS respecting editorial matters, should be addressed to the Editor, 37, Great Queen Street, W.C.; those concerning business matters, non-delivery of the *JOURNAL*, etc., should be addressed to the General Manager, at the Office, 36, Great Queen Street, W.C., London.

CORRESPONDENTS, who wish notice to be taken of their communications, should authenticate them with their names—of course not necessarily for publication.

### A RENEWED PLEA FOR BREVITY.

WITH the continued increase of the number of readers of the *BRITISH MEDICAL JOURNAL* (which has now a circulation of eight thousand copies weekly), the pressure on space by correspondents naturally grows apace, and we must once more remind our contributors of all classes of the necessity of cultivating brevity to the utmost degree. Of many communications of great interest which we publish from time to time, it is difficult to suppose that the same amount of information could not be conveyed in fewer words.

### PERILS OF PRACTICE.

WE sometimes hear remarks from outsiders (as in the case of Dr. Vose of Liverpool) about the fees of consultants for country journeys; but the appreciable risk of a railway accident, which may inflict incalculable injury, is seldom taken into account. Such a painful event as the death of Dr. Baly does not, indeed, often occur, but the risk cannot be ignored. We regret extremely to learn that Dr. C. D. F. Phillips of Grosvenor Square was injured in the accident which occurred at Nine Elms on Saturday evening last. He was returning from a professional visit in the Reading train when it collided with a "light engine". Fortunately, it was not at full speed, or the results would have been still more disastrous; but several carriages were driven off the rails, and several passengers were seriously hurt, and conveyed, we believe, to St. Thomas's Hospital. Dr. Phillips, we are sorry to say, sustained a fracture of one or two ribs, and suffered from severe nervous shock; but happily, according to the latest accounts from his medical friends, he is now making favourable progress.

SIR,—Are gaoi-surgeons legally entitled to the usual fees for making *post mortem* examinations and giving evidence at coroners' inquests on the death of prisoners?—I am, etc.,  
 INQUIRER.

JOSEPH CHRISTIE (Leipsic).—Professor Nussbaum's method of preliminary narcotisation by the subcutaneous injection of morphia prior to the injection of chloroform for operations, especially about the nose and face, is well known in this country; but is not, we believe, much practised.

1878.

# THE BRITISH MEDICAL ASSOCIATION.

*President*—M. A. EASON WILKINSON, M.D., F.R.C.P., Senior Physician to the Royal Infirmary, Manchester.

*President-Elect and President of Council*—R. WILBRAHAM FALCONER, M.D., D.C.L., F.R.C.P., Senior Physician to the Mineral Water Hospital, Bath.

*Treasurer*—W. D. HUSBAND, F.R.C.S.Eng., Senior Surgeon to the County Hospital, York.

*Editor of Journal*.—ERNEST HART, Esq.

*General Secretary*.—FRANCIS FOWKE, Esq.

The ANNUAL MEETING of the Association for 1878 will be held in August, at BATH, under the Presidency of

**R. W. FALCONER, M.D., D.C.L., F.R.C.P.**

The ADDRESS in MEDICINE will be delivered by H. F. A. GOODRIDGE, M.D., F.R.C.P., Senior Physician to the Royal United Hospital, Bath.

The ADDRESS in SURGERY will be delivered by C. G. WHEELHOUSE, F.R.C.S.Eng., Senior Surgeon to the Leeds General Infirmary.

The ADDRESS in FORENSIC MEDICINE will be delivered by DOUGLAS MACLAGAN, M.D., F.R.C.P.Ed., F.R.S.E., Professor of Medical Jurisprudence and Clinical Medicine in the University of Edinburgh.

The objects of the Association are—the promotion of Medical Science, and the maintenance of the honour and interests of the Medical Profession. The Subscription to the Association is One Guinea annually; and each Member on paying his Subscription is entitled, in addition to the other advantages of the Association, to receive weekly, post free, the "BRITISH MEDICAL JOURNAL: BEING THE JOURNAL OF THE BRITISH MEDICAL ASSOCIATION". The Subscription is payable, in advance, on the 1st January in each year.

Gentlemen desirous of becoming Members of the Association should communicate their wish to the HONORARY LOCAL SECRETARIES (of whom a list will be found on page 872); or to the General Secretary, F. FOWKE, Esq., 36, Great Queen Street, Lincoln's Inn Fields, London W.C., in order that the proper steps may be taken for their election.

For the Annual Subscription of One Guinea, paid in advance, the BRITISH MEDICAL JOURNAL is forwarded weekly to Members, free by post. For persons not Members of the Association, the Annual Subscription is Twenty-eight Shillings.—Orders, enclosing remittances, should be addressed to FRANCIS FOWKE, Esq., at the Office of the Journal, 36, Great Queen Street, London, W.C.

## GRANTS in AID of ORIGINAL RESEARCHES in MEDICINE and the ALLIED SCIENCES.

Annual Grants of the total value of £300 are made, in aid of Scientific Researches in Medicine and the Allied Sciences. Applications, stating the nature and objects of the intended research, should be sent before the 29th day of DECEMBER instant, to the General Secretary, at the Office of the Association, 36, Great Queen Street, London, W.C.

## THE BRITISH MEDICAL JOURNAL for 1878,

Edited by ERNEST HART, Esq.

The JOURNAL includes the earliest *scientific, social, and political information* on all subjects interesting to the Profession; LEADING ARTICLES and Editorial Comments on the subjects of the Week; ORIGINAL ARTICLES and LECTURES by the most eminent authorities; MEMORANDA and RECORDS of DAILY PRACTICE by Hospital and General Practitioners; Extracts from BRITISH and FOREIGN JOURNALS; Reports of the Practice of the HOSPITALS and Asylums of Great Britain and Ireland; Full Reports of the Proceedings of the BRITISH MEDICAL ASSOCIATION and of its BRANCHES and COMMITTEES; SPECIAL CORRESPONDENCE from the principal cities and localities of Great Britain, Ireland, and the Continent; REPORTS of the PRINCIPAL MEDICAL SOCIETIES in ENGLAND, SCOTLAND, and IRELAND; REPORTS on NEW INVENTIONS; SPECIAL REPORTS on SANITARY and MEDICO-LEGAL QUESTIONS; REVIEWS of BOOKS; a Department devoted to the PUBLIC HEALTH and POOR-LAW SERVICE; a Department devoted to the MILITARY and NAVAL MEDICAL SERVICES; University Intelligence; Lists of Vacant Appointments; Obituaries of Medical Men; NOTICES and ANSWERS to CORRESPONDENTS.

The arrangements for reporting the proceedings of the MEDICAL SOCIETIES in the United Kingdom are very complete, and include the Transactions of Societies in London, Edinburgh, Dublin, Manchester, Liverpool, Glasgow, Leeds, Bradford, etc., together with Reports of the Papers read, and the Cases and Specimens exhibited, at the Meetings of the Branches of the BRITISH MEDICAL ASSOCIATION.

The Department devoted to the interests of the **PUBLIC HEALTH and POOR-LAW MEDICAL SERVICES** has been largely developed, and the services of gentlemen of the highest authority and largest experience have been obtained. The Department includes notices and answers to questions from Medical Officers of Health and Poor-Law Medical Officers, and is intended to assist and support them in the performance of their difficult duties.

The Department devoted to the interests of the **ARMY and NAVY MEDICAL SERVICES** is intended to fulfil similar functions in respect to these services.

In the forthcoming Volumes will be published from the Authors' Manuscripts, and adequately illustrated :—

**THE HARVEIAN ORATION** delivered at the Royal College of Physicians of London. By **John Burdon Sanderson, M.D., LL.D., F.R.S.**, Jodrell Professor of 'Physiology in University College, London, and Professor Superintendent of the Brown Institute.

**THE LUMLEIAN LECTURES**, delivered at the Royal College of Physicians of London, on the **Medico-Legal Relations of Insanity**. By **John Charles Bucknill, M.D., F.R.C.P., F.R.S.**, late Lord Chancellor's Visitor in Lunacy.

**THE GOULSTONIAN LECTURES**, delivered at the Royal College of Physicians of London, on **Clinical Illustrations of Cerebral Localisation**. By **David Ferrier, M.D., F.R.C.P., F.R.S.**, Professor of Forensic Medicine in King's College, and Assistant-Physician to King's College Hospital. (With Illustrations.)

**SIX HUNTERIAN LECTURES**, delivered at the Royal College of Surgeons of England, on the **Diagnosis and Surgical Treatment of Abdominal Tumours**. By **T. Spencer Wells, F.R.C.S.**, Hunterian Professor of Surgery and Pathology at the College. (With Illustrations.)

**FOUR LECTURES** on the **Infective Processes of Disease**. By **J. Burdon Sanderson, M.D., LL.D., F.R.C.P., F.R.S.**, Jodrell Professor of Physiology in University College, and Professor Superintendent of the Brown Institute. (With Illustrations.)

**REPORTS** presented to the **Scientific Grants Committee of the British Medical Association**.

These Reports are printed in large type, paged separately, and may be cut out and preserved for binding, if desired, in a separate form. Many of them are elaborately illustrated.

The Subjects of Research for 1878 are :—

**The Reflex Action of the Vascular System of Muscles, and Reflex Vaso-Motor Action generally:** **Mr. Gaskell.**

**The Changes produced in the Salivary Glands by Nerve-Influence:** **Mr. Langley.**

**The Action of Cholagogues, (continued):** **Dr. Rutherford, F.R.S.**

**Life-History of Contagium, third Report:** **Dr. Braidwood and Mr. Vacher.**

**Investigation of the Relations between the Circulation in the Retina, and that in the Brain:** **Mr. Pye.**

**Syncope and Shock:** **Mr. Bruce Clarke.**

**The Quantitative Determination of Digestive Products obtained by the Action of Pancreatic Ferment upon various Albumens:** **Mr. A. S. Lee.**

**The Antagonism of Drugs:** **Dr. McKendrick.**

**The Dialysis of Blood:** **Dr. McKendrick.**

**The Changes produced in the Blood-vessels by Alcohol:** **Dr. John Barlow.**

**The Action of Anæsthetics:** **Dr. Joseph Coats, Dr. McKendrick, and Dr. Ramsay, (Committee).**

**Pyæmia:** **Dr. McKenzie.**

**Pathology and Treatment of Hydrophobia:** **Mr. Callender, F.R.S., Dr. Burdon Sanderson, F.R.S., Dr. Lauder Brunton, F.R.S., Mr. Ernest Hart, and Dr. W. R. Gowers (Committee).**

The Journal will also contain :

**The President's Address, the Addresses in Medicine, Surgery, and Forensic Medicine, and the Addresses of the Presidents of Sections**, delivered at the Annual Meeting of the **BRITISH MEDICAL ASSOCIATION**.

**Clinical and other Lectures and Addresses, and Papers on Important Scientific and Practical Subjects**, by Medical Officers of the Hospitals in the United Kingdom, and other eminent Members of the Medical Profession, as heretofore.

In an early number of the Journal will be published a Map of the Metropolitan District, prepared with the aid of the Charity Organisation Society, so as to shew the distribution of the action of Free and Provident Hospitals and Dispensaries.

## THE VOLUMES FOR 1877 HAVE CONTAINED

**THE HARVEIAN ORATION** delivered at the Royal College of Physicians of London. By EDWARD H. SIEVEKING, M.D., F.R.C.P., Physician to St. Mary's Hospital, and Physician Extraordinary to the Queen.

**THE LUMLEIAN LECTURES**, delivered at the Royal College of Physicians of London, on the **Muscular Arterioles: their Structure and Function in Health and in certain Morbid States**. By GEORGE JOHNSON, M.D., F.R.C.P., F.R.S., Senior Physician to King's College Hospital, and Professor of Clinical Medicine.

**THE CROONIAN LECTURES**, delivered at the Royal College of Physicians of London, on the **Difference between the Sexes in Relation to the Aspect and Treatment of Disease**. By J. BRAXTON HICKS, M.D., F.R.C.P., F.R.S., Physician-Accoucheur to and Lecturer on Midwifery and Diseases of Women and Children at Guy's Hospital.

**THE GOULSTONIAN LECTURES**, delivered at the Royal College of Physicians of London, on **Pharmacology and its Relations to Therapeutics**. By T. LAUDER BRUNTON, M.D., F.R.S., Lecturer on Materia Medica and Therapeutics and Assistant-Physician at St. Bartholomew's Hospital.

**THE HUNTERIAN ORATION**, delivered at the Royal College of Surgeons. By Sir JAMES PAGET, Bart., D.C.L., LL.D., F.R.S., Sergeant-Surgeon to Her Majesty the Queen, and Consulting Surgeon to St. Bartholomew's Hospital.

**TWO HARVEIAN LECTURES**, delivered at the Harveian Society of London, on **Bright's Disease, and its Treatment, considered mainly in relation with Arterial Tension from Blood-contamination**. By the late FRANCIS SIBSON, M.D., D.C.L., F.R.C.P., F.R.S., Consulting Physician to St. Mary's Hospital.

The following **ADDRESSES** delivered at the **ANNUAL MEETING** of the **BRITISH MEDICAL ASSOCIATION** in **MANCHESTER**, in August 1877:—

1. **PRESIDENT'S ADDRESS**. By M. A. EASON WILKINSON, M.D., F.R.C.P., Senior Physician to the Manchester Royal Infirmary.
2. **THE ADDRESS IN MEDICINE**, on the **Doctrine of Contagium Vivium and its Applications to Medicine**. By WILLIAM ROBERTS, M.D., F.R.C.P., F.R.S., Physician to the Manchester Royal Infirmary, and Professor of Medicine in Owens College.
3. **THE ADDRESS IN SURGERY**, on the **Past, Present, and Future of Scientific Surgery**. By T. SPENCER WELLS, F.R.C.S.Eng., Surgeon to the Queen's Household.

4. **THE ADDRESS IN OBSTETRIC MEDICINE**, on the **Scientific and Political Position of Obstetrics**. By ROBERT BARNES, M.D., F.R.C.P., Obstetric Physician and Lecturer on Midwifery and Diseases of Women at St. George's Hospital.

5. **AN ADDRESS** on the **Objects and Uses of Association in the Medical Profession**. By Sir WILLIAM JENNER, Bart., K.C.B., M.D., D.C.L., F.R.S., President of the Section of Medicine.

6. **AN ADDRESS** on the **After-History of Surgical Cases**. By EDWARD LUND, F.R.C.S.Eng., Surgeon to the Manchester Royal Infirmary; President of the Section of Surgery.

7. **AN ADDRESS** on the **History of Obstetric Medicine in Manchester**. By W. O. PRIESTLEY, M.D., F.R.C.P., President of the Section of Obstetric Medicine.

8. **AN ADDRESS** on **Scientific Research in Relation to Sanitary Progress**. By F. DE CHAUMONT, M.D., Professor of Military Hygiene in the Army Medical School, Netley; President of the Section of Public Medicine.

9. **AN ADDRESS** on **Confession: the Physician and the Priest**. By JOHN CHARLES BUCKNILL, M.D., F.R.C.P., F.R.S., late Lord Chancellor's Visitor in Lunacy; President of the Section of Psychology.

10. **AN ADDRESS** on **Recent Advances in Physiology**. By ARTHUR GAMGEE, M.D., F.R.S., Brackenbury Professor of Physiology in Owens College, Manchester; President of the Section of Physiology.

11. **AN ADDRESS** on the **Present Position of State Medicine in England**. By ARTHUR RANSOME, M.D., Lecturer on Public Health and Hygiene in Owens College, Manchester.

**AN ADDRESS**, delivered at the Clinical Society of London, on the **Experience and Expectation of Clinical Research**. By GEORGE W. CALLENDER, F.R.C.S.Eng., F.R.S., Surgeon to St. Bartholomew's Hospital and President of the Society.

**AN ADDRESS**, delivered to the Medical Society of London, on **Ophthalmology in its Relations to General Medicine**. By J. HUGHLINGS JACKSON, M.D., F.R.C.P., Physician to the London Hospital.

**AN ADDRESS** to the Medical Society of London, on **Some Relations of Theory to Practice in Medicine**. By GEORGE BUCHANAN, M.D., F.R.C.P., President of the Society.

**INTRODUCTORY ADDRESS** delivered in the Medical Department of King's College, October 1, 1877. By JOSEPH LISTER, M.B., F.R.C.S., F.R.S., Professor of Clinical Surgery and Surgeon to King's College Hospital.

**AN ADDRESS** to the Glasgow and West of Scotland Branch of the British Medical Association, on the **Four Apostles of Surgery**. By G. H. B. MACLEOD, F.R.S.E., Surgeon in Ordinary to the Queen in Scotland, Regius Professor of Surgery in the University of Glasgow.

**AN ADDRESS** to the Obstetrical Society, on **some Subjects in Obstetric Medicine**. By W. O. PRIESTLEY, M.D., F.R.C.P., late President of the Society.

**A LECTURE** on **a Combat with an Infective Atmosphere**. By JOHN TYNDALL, LL.D., F.R.S., Professor of Natural Philosophy in the Royal Institution.

**CLINICAL LECTURES** and other Contributions from the following Members of the Medical Profession:—

AITKEN, LAUCHLAN, M.D., (Rome).—NOTE on the **DIAGNOSIS** of the **NATURE** of **PLEURITIC EFFUSIONS**.

ALLBUTT, T. CLIFFORD, M.A., M.D., Physician to the Infirmary, Leeds.—**MENTAL ANXIETY** as a **CAUSE** of **GRANULAR KIDNEY**.—**URÆMIC ASTHMA**.—**ACUTE RHEUMATISM**.—**HYPERPYREXIA: RECOVERY**.—The **TREATMENT** of **PLEURITIC EFFUSION**.

ANDERSON, T. MCCALL, M.D., Professor of Clinical Medicine in the University of Glasgow.—**CLINICAL LECTURE** on a **CASE ILLUSTRATIVE** of the **CIRRHOTIC FORM** of **BRIGHT'S DISEASE**.

ANDREW, EDWYN, M.D., Surgeon of the Shropshire Eye and Ear Infirmary, Shrewsbury.—**EXTIRPATION** of the **LACRYMAL GLAND** in **OBSTRUCTION** of the **NASAL DUCT**.

ANNANDALE, THOMAS, F.R.S.E., Professor of Clinical Surgery in the University of Edinburgh, and Surgeon to the Edinburgh Royal Infirmary.—**LARGE HYDATID TUMOUR** of **OMENTUM** successfully treated by a **FREE INCISION** with **ANTISEPTIC PRECAUTIONS**.—**CARIES** of the **TROCHANTER MAJOR** successfully removed with the **CHISEL** and **MALLET**.—**CASE** in which **MOBILITY** and a **PERFECTLY USEFUL LIMB** resulted after **EXCISION** of the **KNEE-JOINT**.

- ARLIDGE, J. T., M.D., Physician to the North Staffordshire Infirmary.—The PATHOLOGY of CHOREA.
- BACON, G. MACKENZIE, M.A., M.D., Resident Medical Superintendent of the Cambridge-shire Asylum.—A CASE of ATHETOSIS.
- BANTOCK, G. G., M.D., Surgeon to the Samaritan Hospital.—DRAINAGE in OVARIOTOMY.
- BARLOW, THOMAS, M.D., Assistant-Physician to the London Hospital.—A CASE of DOUBLE HEMIPLEGIA with CEREBRAL SYMMETRICAL LESIONS.
- BARLOW, T., M.D., and PARKER, R. W., M.R.C.S. Eng., Assistant-Surgeon to the East London Children's Hospital.—NOTES on PLEURITIC EFFUSIONS in CHILDHOOD.
- BARNES, HENRY, M.D., Physician to the Cumberland Infirmary.—On the VALUE of PARACENTESIS of the CHEST in the TREATMENT of PLEURITIC EFFUSION.
- BARTRUM, JOHN S., F.R.C.S. (Bath).—CASE of SPINAL SCLEROSIS.
- BARWELL, RICHARD, F.R.C.S., Surgeon to Charing Cross Hospital.—CLINICAL LECTURES on ANTISEPTICISM in SECTIONS and RESECTIONS.
- BASTIAN, H. CHARLTON, M.A., M.D., F.R.S., Professor of Pathological Anatomy in University College, and Physician to University College Hospital.—REMARKS on the PATHOLOGY of CHOREA.
- BENNETT, A. HUGHES, M.D.—The MEDICAL FACTS and EVIDENCE in the Case of the QUEEN v. TREADAWAY.
- BRADBURY, J. B., M.D., F.R.C.P., Physician to Addenbrooke's Hospital, Cambridge.—HYDATID CYST of the LIVER cured by a SINGLE ASPIRATION.—HYDATID TUMOUR of the LEFT KIDNEY successfully treated by ASPIRATION.
- BRADLEY, S. MESSENGER, F.R.C.S., Surgeon to the Manchester Royal Infirmary.—ABSTRACT of CLINICAL LECTURE on CASES of DISEASED KNEE-JOINT, with REFERENCE to the QUESTION of EXCISION.
- BRAMWELL, BYROM, M.D., Physician to the Newcastle-on-Tyne Infirmary.—INTRATHORACIC TUMOUR (Lymphadenoma), with SECONDARY DEPOSIT in the SUPRARENAL CAPSULE.—The SUPRARENAL CAPSULE and LYMPHATIC GROWTHS.—CASE of UNILATERAL CONVULSIONS and HEMIPLEGIA depending on LESION of CERTAIN CEREBRAL CONVOLUTIONS.
- BROADBENT, W. H., M.D., F.R.C.P., Physician to St. Mary's Hospital.—The CAUSES of the SOUNDS of the HEART.
- BROOM, JOHN, M.D., (Clifton).—GANGLION: its TREATMENT by PNEUMATIC ASPIRATION.
- BUCKELL, E., M.R.C.S. Eng. (Winchester).—CÆSAREAN SECTION *POST-MORTEM*: TRANSPOSITION of VISCERA.
- BUCKNILL, JOHN C., M.D., F.R.C.P., F.R.S.—OBSERVATIONS on the GROUNDS of BELIEF in MEDICAL EVIDENCE TOUCHING INSANITY.—On some RELATIONS BETWEEN INTEMPERANCE and INSANITY.
- BURDETT, HENRY C., Esq., Seamen's Hospital, Greenwich.—HOSPITALISM in COTTAGE HOSPITAL PRACTICE, in RELATION to SIR JAMES SIMPSON'S THEORY.
- CAMERON, HECTOR C., M.D., Surgeon to the Glasgow Royal Infirmary.—CLINICAL OBSERVATIONS on CASES of TRACHEOTOMY.
- CAMPBELL, W. WATSON, M.D., F.R.C.P.E. (Dunse).—The USE of SPONGE-PADS in EXCISION of TUMOURS.
- CASSELLS, JAMES PATTERSON, M.D., Aural Surgeon to the Glasgow Royal Infirmary.—EAR DISEASE & LIFE ASSURANCE.—The ETIOLOGY of AURAL EXOSTOSES.
- CLARK, THOMAS, L.R.C.P. & S. Ed.—MINE-HEAD as a WINTER-RESIDENCE for those SUFFERING from CHEST DISEASES.
- CLOVER, J. T., F.R.C.S.—PORTABLE REGULATING ETHER INHALER.—LARYNGOTOMY in CHLOROFORM ASPHYXIA.
- COBBOLD, T. SPENCER, M.D., F.R.S.—On BLAPS MORTISAGA as a HUMAN PARASITE.
- COCHRANE, JOHN, L.R.C.P. Ed. (Colmonell).—CURE of an ULCERATED LEG of THIRTEEN YEARS' STANDING.
- COGHILL, J. G. SINCLAIR, M.D., Physician to the Royal National Hospital for Consumption and Diseases of the Chest, Ventnor.—CASE of OESOPHAGEAL FISTULA OPENING THROUGH the THORACIC PARIETES laterally.
- COLDSTREAM, ALEXANDER R. M.B., (Leith).—HEMORRHAGE from the BOWELS during ENTERIC FEVER, found to be due to POLYPUS of the RECTUM.
- COTTON, RICHARD PAYNE, M.D., F.R.C.P., Consulting Physician to the Hospital for Consumption, at Brompton.—CONSUMPTION and CLIMATE.
- CROOKSHANK, H., M.R.C.S., Surgeon-Major Turkish Military Service.—ROUSTCHOUK MILITARY HOSPITAL.
- CROWE, Surgeon-Major J. D., L.K.Q.C.P., Army Medical Department.—CASE of PENETRATING GUNSHOT WOUND of the ABDOMEN.
- DALBY, W. B., F.R.C.S., Aural Surgeon to St. George's Hospital.—FOREIGN BODIES in the EAR.
- DARUTY, CLEMENT, L.R.C.P. & S. Ed., House Surgeon to Leith Hospital.—FAILURE of SALICYLIC ACID, and SUCCESS of COLD PACKING, in HYPERPYREXIA in a CASE of RHEUMATIC FEVER.
- DAVIES, HENRY N., L.R.C.P.—The Recent CATASTROPHE at TYNEWYDD COLLIERY.
- DAVIS, HARRY, L.R.C.P. Lond. (Callington).—CASE of OPISTHOPTONOS CURED by CHLORAL-HYDRATE.
- DAVY, RICHARD, F.R.C.S., Surgeon to the Westminster Hospital.—A New Form of REMOVABLE PATTERN for SURGICAL or GENERAL USE.—CLINICAL LECTURE on RECTAL EXAMINATIONS.—ABSTRACT of a LECTURE on a CASE of TALIPES.
- DEAS, P. M., M.B., Medical Superintendent of the Cheshire County Asylum.—SPONTANEOUS FRACTURE of the HUMERUS and FEMUR, RESULTING from DEGENERATION of the BONES.
- DOWSE, THOMAS S., M.D., F.R.C.P. Ed., Physician Superintendent of the Central London Sick Asylum, Highgate.—The EMBOLIC THEORY of CHOREA.
- DRAPES, THOMAS, M.B. (Enniscorthy).—SEPTICÆMIA after PROLONGED USE of an URETHRAL BOUGIE.
- DUCKWORTH, DYCE, M.D., F.R.C.P., Assistant Physician to St. Bartholomew's Hospital.—The MEDICAL INJUNCTION of STIMULANTS in DISEASE and in HEALTH.
- DUNCAN, J. MATTHEWS, M.D., F.R.C.P. Ed., Obstetric Physician to St. Bartholomew's Hospital.—INVESTIGATION of the UTERUS by the CARBOLISED HAND at LONG INTERVALS after DELIVERY.
- EASTWOOD, J. W., M.D. (Darlington).—LIFE ASSURANCE and SUICIDE.
- EATON, J., M.D. (Cleator).—COMPOUND COMMINUTED FRACTURE of FEMUR CURED WITHOUT ANTISEPTIC TREATMENT.
- ELLIOTT, THOMAS, M.D.—A CASE of STARVATION.
- FAIRLAND, Staff-Surgeon EDWIN, L.R.C.P. Ed. (Lucknow).—MALIGNANT CHOLERA treated with NITRITE of AMYL and HYDRATE of CHLORAL.
- FARQUHARSON, R., M.D., F.R.C.P. Assistant-Physician to and Lecturer on Materia Medica at St. Mary's Hospital.—On some POINTS in the ART of PRESCRIBING for CHILDREN.
- FARRAR, JOSEPH, L.R.C.P. Ed. (Bradford).—ACUTE ARSENICAL POISONING from the USE of GREEN PAINT.
- FIELD, G. P., M.R.C.S., Aural Surgeon to St. Mary's Hospital.—CASES in AURAL SURGERY.
- FLEISCHMANN, ALFRED, M.R.C.P. Eng. (Florence).—NON-ERUPTIVE VARIOLA.
- FLEMING, J., M.D., Surgeon-Major, Army Medical Department.—LIGATURE of EXTERNAL ILIAC ARTERY for FEMORAL ANEURISM.
- FOTHERGILL, J. MILNER, M.D., Assistant-Physician to the West London Hospital.—The USE of DIGITALIS in DISEASES of AORTIC VALVES.
- FOX, A. W. M.D., Physician to the Eastern Dispensary, Bath.—CASE of INDURATED MEDIASTINO-PERICARDITIS.
- FOX, EDWARD LONG, M.D., Physician to the Bristol Royal Infirmary.—CASE of PARALYSIS of the DIAPHRAGM with PECULIAR LARYNGEAL SYMPTOMS.
- FOX, TILBURY, M.D., F.R.C.P., Physician to the Department for Diseases of the Skin in University College Hospital.—The SKIN-AFFECTION lately DESCRIBED as DYSIDROSIS.
- FOX, WILSON, M.D., F.R.C.P., F.R.S., Physician Extraordinary to the Queen; Holme Professor of Clinical Medicine in University College.—REMARKS on the MORTALITY of PLEURISY in RELATION to the OPERATION of PARACENTESIS THORACIS.
- FRY, J. FARRANT, L.R.C.P.—HODGEN'S SPLINT as USED in GUY'S HOSPITAL.
- GALABIN, A. L., M.A., M.D., Assistant Obstetric Physician to Guy's Hospital.—The MECHANICAL and OPERATIVE TREATMENT of PROLAPSE of the UTERUS.
- GAMGEE, SAMPSON, F.R.S. Ed., Surgeon to the Queen's Hospital, Birmingham.—On the REMOVAL of SCIRRHOUS TUMOURS of the BREAST.—REMARKS on our MEDICAL CHARITIES ANTISEPTICISM and COTTON-WOOL.
- GOODHART, J. F., M.D., Assistant Physician to Guy's Hospital.—FIBROID CHANGES in the LUNG and their RELATION to SYPHILIS.—The NATURAL HISTORY and TREATMENT of PLEURITIC EFFUSION.
- GORE, Surgeon-Major ALBERT A., M.D.—NOTES of a VISIT to the MILITARY HOSPITALS of the CONTINENT.
- GOWERS, W. R., M.D., Assistant-Physician to University College Hospital.—The DIAGNOSIS and TREATMENT of AUDITORY NERVE VER-TIGO.
- GREENE, JOHN, L.R.C.P. (Birmingham).—ANIMAL VACCINATION.
- GREENHOW, THOMAS M., M.D. (Chapel Allerton).—TERMINATION of the CASE of MISS HARRIET MARTINEAU.
- GREENWAY, H., M.R.C.S. Eng. (Plymouth).—SUCCESSFUL TREATMENT of PNEUMONIA and BRONCHITIS.
- HAMILTON, D. J., F.R.C.S. Ed., Demonstrator of Pathology in Edinburgh University.—FAT-EMBOLISM RESULTING from RUPTURE of a FATTY LIVER.
- HARDY, H. NELSON, F.R.C.S. Ed.—OUT-PATIENT HOSPITAL REFORM.
- HARRISON, REGINALD, F.R.C.S., Surgeon to the Liverpool Royal Infirmary.—CASE of LITHOTRITY where NITRIC ACID INJECTIONS were EMPLOYED.
- HEATH, CHRISTOPHER, F.R.C.S., Holme Professor of Surgery in University College, and Surgeon to University College Hospital. CLINICAL LECTURE on DISTAL LIGATURE in AORTIC ANEURISM.—CLINICAL LECTURE on OVARIOTOMY.—CLINICAL LECTURE on COLO-TOMY.
- HEATH, GEORGE Y., M.D., Senior Surgeon to the Newcastle-upon-Tyne Infirmary.—CASE of OVARIOTOMY PERFORMED under SPRAY-PEDICLE TIED under ANTISEPTIC PRECAUTIONS.

- HEWITT, GRAILY, M.D., F.R.C.P., Professor of Midwifery in University College.—ABNORMAL SOFTNESS of the NULLIPAROUS UTERUS as a FACTOR in the ETIOLOGY of UTERINE DISTORTIONS, &c.
- HICKS, J. BRAXTON, M.D., F.R.C.P., F.R.S., Physician Accoucheur and Lecturer on Midwifery at Guy's Hospital.—HÆMORRHAGE from RETROFLECTED UTERUS, and its TREATMENT.
- HIGGINS, C., F.R.C.S.E., Ophthalmic Assistant Surgeon to Guy's Hospital.—CLINICAL REMARKS on TUMOURS of the ORBIT; with CASES.
- HOAR, CHARLES E., M.D., Physician to the West Kent General Hospital, Maidstone.—PECULIAR WOUND by a KNIFE, CAUSING SUDDEN DEATH.
- HODGKINSON, ALEXANDER, M.B., B.Sc., Physician to the Hospital for Consumption and Diseases of the Throat, Manchester.—EXAMINATION of the POSTERIOR NARES.
- HOGGAN, G., M.B., and HOGGAN, F. E., M.D.—NOTES on a CASE of TRANSFUSION by AVELING'S APPARATUS.
- HOLLAND, EDMUND, M.D., Assistant Physician to the Hospital for Women.—PROTRACTED SUSPENSION of the MORAL and INTELLECTUAL CONSCIOUSNESS in EPILEPSY.—RETROFLEXION of the VIRGIN UTERUS.
- HOPE, S. WILSON, L.R.C.P. (Petworth).—A CASE of HYDROPHOBIA.
- HOUGHTON, J. HYDE, M.R.C.S. Eng. (Dudley).—The PREVENTION of POST PARTUM HÆMORRHAGE.—CASE of SUDDEN ONSET of VIOLENT CHOREA during an ATTACK of ACUTE RHEUMATISM.
- HUDSON, ROBERT S., M.D., (Redruth).—The GERM-THEORY of ENTERIC FEVER.—USE of the TREPHINE in DEPRESSED FRACTURES of the SKULL.
- HUTCHINSON, JONATHAN, F.R.C.S., Senior Surgeon to the London Hospital.—CLINICAL LECTURE on CASES of SPINA BIFIDA with PARALYSIS of SPHINCTERS.
- JACKSON, J. HUGHLINGS, M.D., F.R.C.P., Physician to the London Hospital.—NERVOUS SYMPTOMS with EAR-DISEASE.
- JOHNSON, GEORGE, M.D., F.R.C.P., F.R.S., Professor of Clinical Medicine and Senior Physician to King's College Hospital.—CASE of POISONING by so-called HOMŒOPATHIC SOLUTION of CAMPHOR.—The RELATION BETWEEN ANGINA PECTORIS and PERIPHERAL ARTERIAL CONTRACTION, and the MODUS OPERANDI of NITRITE of AMYL as a REMEDY for the DISEASE.
- JONES, H. MACNAUGHTON, M.D., Surgeon to the Cork Ophthalmic and Aural Hospital.—OPHTHALMOLOGY in its RELATION to PRACTICAL MEDICINE.—The ESSENTIALS of CLINICAL TEACHING.
- JONES, L. HERBERT, M.R.C.P.—POISONING by a LARGE DOSE of TINCTURE of ACONITE: REMARKABLE SYMPTOMS.
- JONES, TALFOURD, M.B., Physician to the Breconshire Infirmary.—REMARKS on OPHTHALMIC THERAPEUTICS and on the TREATMENT of the COMMONER DISEASES of the EYE.
