

The project is to examine the possible pharmaceutical uses of the lymphocyte chalone, which has an inhibiting effect on cell division. The grant is from the Australian section of Aspro-Nicholas Ltd., who intend that an Australian university department will also be associated with the work.

Alcohol and Flying

The Civil Aviation Authority has issued an information circular (112/1973) reminding pilots of the loss of performance from even a modest intake of alcohol. Alcohol taken by the pilot was a contributory factor in three fatal accidents involving light aircraft in 1973. Research has confirmed that blood alcohol concentrations of 40 mg/100 ml—that is, half the legal driving limit—are associated with important increases in pilot error, in both experienced and inexperienced flyers. *Aeronautical Information Circular United Kingdom 112/1973* 26 November, may be obtained from Aeronautical Information Service (AIS 1), Tolcarne Drive, Pinner, Middlesex, HA5 2DU. Tel: 01-866 8781 ext. 259.

Medical Biophysics Research

The Scottish Home and Health Department has allotted £15,800 to Professor John Martin in the department of medical biophysics, University of Dundee. The grant is to provide an ultra-fine focus x-ray plant and xeroradiography unit for evaluation in research and clinical use. Evaluation studies using the xeroradiographic equipment will be carried out by Dr. C. Pickard at Dundee Royal Infirmary, and laboratory and clinical trials of both systems are to be carried out in Dundee Dental Hospital and in Ninewells and associated hospitals.

Corrections

Amphotericin Pharmacophobia

In the article "Amphotericin Pharmacophobia" (24 November, p. 460) by W. St C. Symmers, the 7th line in the paragraph headed Case 4 should read (Symmers, 1973) not (Symmers, in press). Also the reference Symmers, W. St C. (In press). *Curiosa—A Miscellany of Clinical and Pathological Experiences*, chap. 21. London, Balliere Tindall, should be omitted.

Changes in Skeletal Mineral in Patients on Prolonged Maintenance Dialysis

We regret that in the paper on Changes in Skeletal Mineral in Patients on Prolonged Maintenance Dialysis (1 December, p. 519) "dihydroxycholecalciferol" was spelt incorrectly in the tenth line of the Summary and the sixth line of the last paragraph under Discussion.

Medicine in the Common Market

In Professor Franco Ferraro's paper on "Young Hospital Doctors" in the R.S.M. symposium on "Medicine in the Common Market" (24 November, p. 480) the penultimate sentence of the third paragraph under the heading Hospital Doctors' Collective Agreement should have read: "A young doctor with 1,000 I.N.A.M. patients is paid six million lire a year by the Institute."
