

## Disposal of Unused Medicines

More than 300,000 unused tablets, capsules, and other medicines were returned to chemists in the Metropolitan Borough of Stockport during the town's campaign for the disposal of unwanted medicines and pills. The campaign was launched on 16 October by the Metropolitan Borough of Stockport in conjunction with local pharmacists. More than one in 20 of all home accidents dealt with at Stockport Infirmary concern child poisoning, and 40% of these cases are children who have swallowed medicines prescribed for other people.

## Pedestrian Safety Campaign

The Department of the Environment has launched a road safety publicity campaign aimed at adult pedestrians and older children and intended to cut the casualty rate and to bring the problem of pedestrian safety to the attention of the public. The campaign will continue until early January 1975. Television commercials will show genuine, recent histories of pedestrian accidents and how such accidents could have been avoided.

## Psychiatric Units in General Hospitals

A survey of the opinions of patients and staff in 14 psychiatric units located in general hospitals has been published as a 48-page booklet by the King's Fund. While a great diversity of viewpoints is expressed, in general both patients and staff emphasized the advantage of the units' location in terms of accessibility, smaller size, and lesser stigma than the large psychiatric institutions.

Separating age groups, particularly the elderly demented from the young, was generally considered desirable, and criticism of the unit design, particularly with regard to lack of office space, was common among staff interviewed. *Just an Ordinary Patient*: A preliminary survey of opinions on psychiatric units in general hospitals. King Edward's Hospital Fund for London, 14 Palace Court, London W2 4HT, price £1.30.

## COMING EVENTS

**British Institute of Radiology.**—Day meeting, "A Critical Evaluation of Ultrasonic Diagnosis," 17 December, Leeds University. Details from the general secretary, B.I.R., 32 Welbeck Street, London W1M 7PG. (Tel. 01-935 6237.)

### ARMY

Lieutenant-Colonels P. K. Coakley and D. Russell, from R.A.M.C., to be colonels.

## Corrections

### Anastomotic Leakage

The leading article on "Anastomotic Leakage" in the *B.M.J.* of 2 November, p. 251 described polypropylene as an absorbable suture. It is of course a non-absorbable suture and we regret this error.

### Traumatic Hindquarter Amputation

We regret that a printing error occurred in the letter from Mr. G. Parker (2 November, p. 290). The last sentence should have read "This injury is perhaps not so uncommon as we had previously thought," not "common" as printed.—ED., *B.M.J.*

## Notice to Authors

When the original articles and letters for publication are not submitted exclusively to the *British Medical Journal* this must be stated.

Correspondence on editorial business should be addressed to the Editor, *British Medical Journal*, B.M.A. House, Tavistock Square, London WC1H 9JR. Telephone: 01-387 4499. Telegrams: *Aitiology*, London, W.C.1.

Authors wanting reprints of their articles should notify the Publishing Manager, B.M.A. House, Tavistock Square, WC1H 9JR, on receipt of proofs.
