Corrections

Vitamin E deficiency and platelet functional defect in a jaundiced infant

In the case report of this article (4 October, p 19) under sub-title *Progress*, line 2, the dosage of vitamin E (Ephynal) should have read: 10 mg three times a day, and line 11, water soluble α -tocopherol-acetate preparation (supplied by Roche) 100 mg three times a day.

A free service?

The Health Service absorbs about £10m a day, not £1m as stated in the last sentence of the letter from Dr A R Bailey (11 October, p 106).
