Y. G. L. O. F.

MEDICAL JOURNAL,

AND

RETROSPECT OF THE MEDICAL SCIENCES.

EDITED BY

DR. HENNIS GREEN AND DR. STREETEN.

VOL. V.

LONDON:

HENRY RENSIAW,

MEDICAL BOOKSELLER AND PUBLISHER, 356, STRAND.

1843.

- Abdomen, wound of, cases of, 229, 391, 502; fibrous tumors of, 395
Abscess of lung, 34; of brain, 34
Abscess, retro-pharyngeal, 45; M. Mondiere on, 60; of liver, 181; of uterine wall communicating with rectum, 381
Acne, Dr. Burgess on, 307
Aconite, use of, in rheumatism, 421
Acorns, sweet, of Portugal, 416
Addenbrooke's Hospital, election at, 115
Air, introduction of into veins, 133, 501
Alkaloids, vegetable, tests for, 341
Allison, Mr., cases by, of abscess of prostate, 11; of excision of neck of uterus, 89; on diagnosis of cholera, 168
Allison, Mr. J., case by, of malformation of fœtus, 226
Amputation of leg, modes of, 320
Anasarca, Dr. Watson on, 123, 164
Anatomy, inspectors of, 35
Anchyllosis of knee, cure of, 140; M. Malgaigne on, 381
Andral, M., on carbonic acid of, respiration, 354
Aneurysm of aorta, 58, 294, 435; of abdominal aorta, cases of, 135, 477; Mr. Liston's case of, by Dr. Bucknill, 116; Dr. Horner on double ligature in, 236; cricoid, Dr. Laurie on, 340
Anæmia, Dr. Watson on, 264
Anthrakokali, 21
Anthrax, from diseased meat, 60
Aorta, aneurysm of, 58, 294, 435; abdominal, cases of, aneurysm of, 135, 297; case of rupture of, 176; rupture of valves of, 439; contraction of, 461
Apoplexy, case of, by Dr. Watson, 183; abdominal, in infants, Mr. Dorrington on, 315
Apothecaries' Hall, licentiates admitted to, 22, 62, 102, 122, 182, 202, 262
Appendix vermiformis, hernia of, 418
Appointments (see Promotions)
Aquo-capsulitis, 459
Arsenic, analysis of substances containing, 317; case of poisoning by, 380
Arsenical paste, poisoning from, 481
Artemesia absinthium, Dr. Houlton on, 415
Arteries, fatty degeneration of, Mr. Gulliver on, 499
Ascites, remarkable case of, 40
Ashburner, Dr., letter from, on Mesmerism, 221
Assurance Office fees, meeting at Shrewsbury on, 115, 137; Mr. Phené on, 177; Mr. Cartwright on, 335; editorial remarks on, 353
Asthma, nervous, 40
Atrophia alactatorum, Dr. Lees on, 477
Auscultation, rules for, by Dr. Walshe, 260
Azotised principles, M. Dumas on, 219
- Baker, Mr. A., case by, of fungoid disease of tibia, 52
Balanitis, treatment of, 484
Ballad, hydropathetic, 441
Bancks, Mr. T., case by, of imperforate vagina, 450
Banner, Mr. J. M., case by, of fracture of cranium, 325; on fractures, 426
Barnstaple, notice of trial at, 114
Barrett, Mr. J., on cholera, 91
Baynham, Mr., death of, 382
Bed-sores, use of nitrate of silver in, 277
Belladonna as a preventive of scarlatina, 256
Berzelius, Baron, accident to, 342
Bile, circulation of, mechanism of, 40
Binns, Dr., on sleep, review of, 94
Birmingham School, annual meeting at, 54; munificent donation to, 291
Black, Dr., on neuralgia, 468
Blindness from vitriol, proposed operation for, 320
Blood, pus-like globules of, Mr. Gulliver on, 118
Boards of health, Mr. Chadwick's ideas of, 292
Bottomley, Mr. G., case by, of malignant disease in mediastinum, 220
- Bouillaud, M., election of, to Chamber of Deputies, 42
Bowels, death from distension of, 20
Bowman, Mr., medal awarded to, 202
Brain, abscess of, cases of, 31, 241; softening of, M. Fardel on, 100; microscopic researches on, 170; of Chimpanzee, Dr. Macartney on, 166; affection of, after scarlatina, 169; affection of, simulating apoplexy, 206; effusion on, after scarlatina, 313
Brittain, Mr. T., note from, 382
Bronchial glands, great enlargement of, 356
Browne, Dr. F., case by, of abscess of brain, 34
Buck, Mr., case by, of paralysis of œsophagus, 507
Bucknill, Dr., on Mr. Liston's case of aneurysm, 116
Burgess, Dr. T. H., review of Manual of Diseases of Skin, by, 194; on diseases of the skin, 285, 307, 349, 383, 423, 463
Burns, deformity from, Dr. Mütter on treatment of, 199
Bury, Mr. G., on mania, 472
Butler, Mr. F. J., case by, of intestinal calculus, 507
Byron, Dr., on treatment of lupus, 201
- Cæsarean operation, case of, by Mr. Wraith, 329; case of, 420
Calculus of bladder, case of, by Mr. Elliott, 88; peculiar shape of, 161; of kidney, 436; biliary, voided by rectum, 453; intestinal, case of, 507
Cancer of stomach, Dr. Watson on, 84
Cancerous disease, extensive case of, 475
Cantharides, poisoning by, 239
Carbonic acid, respiration of, M. Andral on, 354; expired during typhus, 501
Carcinoma, rare form of, 481
Carpenter, Dr., on physiology, review of, 272
Cartwright, Mr. R., letter from, on assurance office fees, 335
Catalepsy, case of, 446
Cataract, subconjunctival, operation for, 20; cases of, by Mr. Walker, 186, 408; M. Roux on, 303; green, 318; peculiar appearances in, Dr. Jacob on, 377; Mr. Estlin on pretended cure of, 209; Mr. Morgan on, 480
Ceylon moss, M. Guibourt on, 370
Chadwick, Mr., report of, notices of, 153, 173, 191, 292
Chambers, Dr., election of to Essex Hospital, 416
Chapman, Dr., sketch of, 14
Children, at Southampton Asylum, Dr. Hennen on health of, 152
Chimpanzee, brain of, Dr. Macartney on, 166
Cholera, diagnosis of, Mr. Salter on, 32, 110; Mr. West on, 48, 129; case of, 129; Mr. Barret on, 91; Mr. Allison on, 168; cases of, 189, 291; use of hemp in, 365; Dr. Fife on, 208, 267, 327, 466
Chorea, Dr. Watson on, 225, 263
Circle of Willis, obliteration of, 436
Circulation, through capillaries, Mr. Poiseuille on, 325
Cirrhosis, of liver, Dr. Watson on, 105; of liver, 456; of lung, 457
Citrate of iron, M. Mialhe on, preparations of, 210
Clark, Sir J., on medical reform, 500
Clavicle, fracture of without displacement, 139
Clewe, Mr., case of hydatids of uterus by, 327; on ununited fracture, 128
Cochineal, in whooping-cough, 330
Colica piftonum, 61; Dr. Watson on, 163; prevention of, 320
College of Surgeons, recent regulations of, remarks on, 230, 473; of physicians, members of, 451
Colon, case of affection of, 72
Constipation, case of, 58
Convulsions, infantile, use of hemp in, 367
Cornea, transplantation of, 132
Coronary circulation, influence of, on heart, 81
Coroner for Dublin, dismissal of, 142

INDEX.

Correspondents, notices to, 22, 62, 82, 102, 122, 142, 162, 182, 202, 222, 242, 262, 322, 342, 382
Cowan, Dr., manual of, review of, 17
Crabb, Mr. A., case by, of bleeding from tooth-drawing, 70
Crepitation of pneumonia, Dr. Hughes on, 280
Cubebs, poisoning by, 419
Cynanche laryngea, Mr. Toogood on, 450
Cysts, serous, injection of, 51

Day, Mr. T. N., case by, of tumor of dura mater, 187
Deaths, sudden, at Strasbourg, 288
Delirium tremens, use of hemp in, 368
Delirium ebriosum, with convulsions, Dr. Lynch on, 387; Mr. Griffith on, 428
Denton, Mr., on mode of cleaning catheter, 98
Diabetes, Dr. Watson on, 106; case of, treated by ioduret of iron, 112; Sir A. Knight on, 277
Digestion, physiology of, 413
Disease, theory of, by M. Liebig, 41, 56
Dislocation of forearm backwards, 141; of femur and humerus, 161; imperfect, of radius, 161; long-standing, successful reduction of, 249
Diving, effects of, 278
Donovan, Mr., liquor of arsenic, mercury, and iodine of, 301
Dorrington, Mr., on abdominal apoplexy in infants, 315
Drake, Mr. J., cases of dislocation by, 249
Dropsy, renal, case of, 165
Druggist a, prescription of, 262
Dumas, M., on azotised principles of food, 219
Dupasquier, M., on ioduret of iron in phthisis, 288
Dura mater, case of tumor of, 187

Ear, M. Kramer on sounds in, 392
Edinburgh, University of, election of Dr. A. Thomson at, 17

EDITORIAL REMARKS, on—

The provincial and metropolitan schools of medicine—effects of the late regulations of the College of Surgeons, 16; the inspectorships of anatomy, 35; poisoning with liquor potassæ, administered through mistake for potash water—necessity of compelling chemists to be careful in the sale of poisons, 36; hydropathy and its effects, 49; remarks on the quarantine question, 75; the Medico-Chirurgical Transactions and the rejected memoir, 77; condition of the insane poor in Wales, 93; successful treatment of idiocy, 94; trial at Barnstaple affecting the profession—the seal of the Apothecaries' Company, 114; the Shrewsbury practitioners and assurance office companies, 115; Addenbrooke's Hospital, Cambridge, 115; vital statistics—report of the Statistical Society on hospital statistics, 130; Mr. Chadwick's report on the sanatory condition of the laboring classes of Great Britain, 152; the British Medical Association, 154; on the chances of life amongst the different classes of society, 172; public health—effects of the condition of their dwelling-houses on the health of the laboring classes, 191; Mr. Morison and the poor-law commissioners—an example of poor-law justice, 211; animal magnetism, 212; the recent regulations of the London College of Surgeons on medical education, 230; the Medico-Chirurgical Society and the Mesmerisers, 231; causes and mortality of epidemic diseases, 253; the poor-law commissioners and union medical officers, 271; anonymous slanderers of the profession in Ireland, 272; an easy method of obtaining a literary reputation, 331; Mr. Chadwick's report on the sanitary condition of the laboring classes—the poor-law commission and boards of health, 292; abandonment of the Irish Medical Charities' Bill, 332; assurance office fees—the assurance "pledge" of the Shropshire practitioners, 353; effects of the over-crowding of the medical

profession, 373; Mr. French and the medical charities of Ireland, 393; aspect of medical affairs in Parliament—long endurance of the profession, 412; lunatic asylum for the poor in Wales, 413; female eunuchs in Central Asia, 413; state of the public health—mortality of epidemic diseases, 433; the "members" of the Royal College of Physicians—Mr. Rooke and his friend the president, 451; the recent regulations of the College of Surgeons—a sop to the poor-law commissioners, 473; the Sydenham Society, 474; medical reform—the proposed charters to the Colleges of Physicians and Surgeons, 493;
Education preliminary, effects of increasing, in France, 374

Edwards, Mr. C., case of cholera by, 129
Effervescing chalybeate water, 211
Electricity, induction of, Dr. Faraday on, 355
Elliott, Mr. R., case of vesical calculus by, 88
Empyema, M. Faure on, 39
Encephaloid tumor of abdomen, case of, 136; disease, case of, 419
Enteritis, tobacco injections in, Dr. Waters on, 226
Epidemics, causes and mortality of, 253
Epilepsy from lactation, case of, 48
Erythema nodosum, Dr. Watson on, 205
Estlin, Mr. J. B., on pretended cure of cataract, 209
Ethnological Society, formation of, 395
Eunuchs, female, in central India, 413
Evans, Mr. E., case of hysteria by, 33
Eye, foreign substance in, 241

Face, Dr. Byron, on malignant disease of skin of, 201; eruptions of, Dr. Burgess on, 285; scrofulous ulcer of, case of, 410

Faraday, Dr., on electrical induction, 355
Fat, M. Dumas on production of, 115
Ferguson, Mr., lecture by on lithotomy, 213; review of practical surgery of, 434

Fibre, Mr. Gulliver, on origin of, 138
Fife, Dr. G., on cholera, 208, 267, 327, 466,
Fistula, urinary, case of, 157
Fœtus, acephalous, case of, 169; malformation of, 225, 472; effects of mental impressions on, 268
Food, review of Truman on, 317
Fracture, of spine, 81; ununited, Mr. Worthington on, 92; of skull, 101, 136, 325; ununited, Mr. Clewe on, 128; immovable apparatus for, 160; of arm, case of, 396; Mr. Banner on, 426
Frank, Joseph, death of, 362
Fulgokali, 21
Fungoid disease of leg, 134

Galvanic influence, M. Matteucci on, 116
Galvanism in disease of eye, 421
Gardner, Mr., notice of pamphlet of, 354
Gastrodynia, case of, 205
Gastrotomy, case of, 235
Genito-urinary organs, tabular view of diseases of, 247
Glanders, transmission of, 414
Gloucestershire Medical Association, annual report of, 176
Gluge, M., on softening of brain, microscopic researches by, 170
Gonorrhœa, Mr. Lucas on, 283, 403, 443
Gout, Dr. Watson on, 124
Greek remedies, notice of, 182, 222
Griffith, Mr. W., on effects of tartar emetic on genital organs, 128; on delirium ebriosum, 428
Gulliver, Mr., on pus-like globules of blood, 118; on origin of fibre, 138; on fatty degeneration of arteries, 499
Gully, Dr., review of work of, 37
Gun-shot wound, case of, 240
Guthrie, Mr., clinical discourse by, 78
Guy, Dr., introductory lecture of, 23; on static lung test, 99

Hæmoptysis, sulphate of quinine in, 321

INDEX.

- Hæmorrhage from tooth-drawing, 70; Dr. Todd on, 141; uterine, tannin in, 162; Dr. Lever on, 321
Hæmorrhoids, treatment of, 229
Hamilton, Professor, notes of lectures of, 12
Hanwell Lunatic Asylum, Twelfth-night in, 336
Harris, Dr., sketch of, 55
Harrowgate, hydropathy at, 372
Hastings, Dr., illustrations of the water cure by, 73, 149, 328
Health, public, laws regulating, 153; state of during year 1840, 433
Heart, malformation of, 52; influence of coronary circulation on, 81; disease of, after rheumatism, frequency of, 165; disease of, 276; very small in healthy female, 358
Hemeralopia, Dr. Forry on, 62
Hemiplegia, case of, 71
Hemp, Indian, Dr. O'Shaughnessy on, 343, 363, 397; Mr. Ley on, 436, 487
Hennen, Dr., on health of children at the Southampton Asylum, 152
Hernia, femoral, case of, 266, 396, 411; strangulated, use of opium in, 316; of appendix vermiformis, 418
Herpes, of face, Dr. Burgess on, 286
Hocken, Dr. E. O., case by, of abscess behind œsophagus, 45
Hodgkins, Mr., case of pelvic tumor by, 410
Hodgson, Mr., case of lardaceous tumor by, 134
Hooping-cough, cochineal in, 330
Hopper, Dr. R. S., case of pneumonia by, 406
HOSPITALS, &c., Reports from—
Croydon Infirmary.—Case of malignant disease of the anterior mediastinum, 220
King's College Hospital.—Clinical lecture on lithotomy, by W. Fergusson, Esq., 213
Leeds General Infirmary.—Excision of the lower jaw, 452
Newcastle-on-Tyne Infirmary.—Removal of tumor from below the jaw, 80; pleurisy with effusion—death—absence of kidney, 158
Northern Hospital, Liverpool.—Strangulated hernia—injury to forearm—amputation during gangrene, 396
Hospitals, statistics of, by Statistical Society, 130
Hull, medical school at, notice of, 55
Humerus, reproduction of, 40
Hunter, Dr. A., on the water cure at Harrowgate, 372
Hydatids, of pelvis, case of, 121; of brain, case of, 150; of uterus, case of, 228
Hydriodate, of arsenic and mercury, 301
Hydrogen, a metal, 262
Hydropathy, editorial remarks on, 49; Dr. Hastings on, 73, 149, 328; at old Harrowgate, 372
Hydrophobia, cases of, 296, 310; treated by hemp, 364
Hysteria, case of, 33
Idiotcy, successful treatment of, 94
Idiots, state of brain in, 167
Imlach, Dr. on magnetism, 458
Impetigo, of face, Dr. Burgess on, 287
Insanity, size of head and brain in, 50; treatment of, in France, 197; impulsive, Dr. Mackinnon on, 478
Iodide of potassium in syphilis, 58
Iodine, in nitric acid of commerce, 118; M. Orfila on poisoning by, 300; injections of, in scrofulous disease of joints, 369; in urine, 386
Ioduret, of iron in diabetes, 112; of sulphur in porrigo, 322; of potassium, M. Ricord on action of, 490
Iron, ioduret of, in phthisis, 288
Jackson, Mr. W., cases of hydrophobia by, 310
Jameson, Mr. J. T., on swelled leg after fever, 207
Jaundice, Dr. Watson on, 124
Jaw, chronic rheumatism of, 456
Jerrard, Mr. J. C., case by, of wound of abdomen, 391
Joints scrofulous disease of, iodine injections in, 369
Jones, Mr. W., on the blood, 94
Kane, Dr., on Kiesteine, 119
Kemp, Mr., death of, 302
Keratoplasty, M. Feldmann on, 132
Kidney, absence of, 158; calculus of, 436; effects of compression of blood in, Mr. Robinson on, 453
Kiesteine, Dr. Kane on, 119
King, Mr. G., on medical reform, 457
King's College, lecture by Dr. Guy at, 23
Knee-joint, cure of ankylosis of, 140; dislocation of, note on, 382
Knife-grinder, necropsy of, 414
Knight, Dr. P. S., case by, of affection of colon, 72
Knight, Mr. H., letter from, on vaccination, 471
Knight, Sir Arnold J., on diabetes, 277
Kramer, M., on sounds in ear, 392
Law, Dr., case by, of aneurysm of abdominal aorta 297
Lactation, protracted, epilepsy from, 48
Lactucarium, extract of, 174
Lafargue, Mr. R. A., case of poisoning by, 251
Lardaceous tumor of bone, case of, 134
Larke, Mr. H., case by, 410
Laryngismus stridulus, apparent case of, 45
LECTURES—
By Mr. P. Bennett Lucas, on Diseases of the Genito-urinary Organs.
Lecture I.—Preliminary remarks; treatment of stutter; operations for strabismus; varicocele; encysted hydrocele of chord; strabismus, 216—219
Lecture II.—Necrosis of the lower jaw; history of case; peculiarities of bone affected; presumed cause of the disease; quantity of matter discharged; appearance of the ulcerated openings; natural progress of the case; signs of the presence of sequestrum; classification of diseases of the genito-urinary organs,—245—247
Lecture III.—Gonorrhœa in children and old persons; balanitis; reasons why this affection is confined to the young; gleet; chancre in the urethra; stricture and its causes; fistula of the urethra; gonorrhœa and syphilis together; warts on the genital organs; arthritic urethritis; inflammation of the prepuce and vagina; gonorrhœal rheumatism; congenital deficiency of the urethra; hernia humoralis; secondary syphilis, 283—285
Lecture IV.—Structure of the urethra; prostatic portion; membranous portion and its peculiarities; spongy portion of the urethra; inner surface of the canal; excretory ducts; dilatations of the urethra; contracted portions of the canal; connection between the dorsal vein and the lacunæ, 323, 324
Lecture V.—Elasticity of the urethra; effects of muscular action on the canal; vascular turgescence; illustrative example; statements of patients relative to the mode of contracting gonorrhœa; gonorrhœa not identical with syphilis; three stages of the disease; case illustrative of first stage; premonitory symptoms; seat of disease at its early stage; treatment of this stage by injections, 403—405
Lecture VI.—Specific distance of gonorrhœa; cause which limits the disease; illustrative case; action of nitrate of silver; general treatment of the first stage of gonorrhœa; second stage of gonorrhœa; cases illustrative of this stage; cases of abscess of the bulb of the urethra, 443—446
Lecture VII.—Former case concluded; second stage of gonorrhœa; quantity and appearance of the discharge; bleeding from urethra; inflammatory symptoms; effects of the inflammatory action; chordee and subcutaneous abscess; treatment of second stage of gonorrhœa; local blood-letting; mode of opening the vena magna; saline nauseating mixture; inefficacy of diuretics; water dressing, 503—506

INDEX.

By Dr. Watson, Clinical.

- Lecture I.**—Importance and necessity of clinical investigation; preliminary remarks; systematic observation; case of cancer of the stomach; history of the case; reasons for the diagnosis; treatment ineffectual; post-mortem appearances; remarks on the mode of death; minute structure of cancerous matter; observations of Dr. W. Budd, 83—85
- Lecture II.**—Clinical examination of patients; knowledge derived from mere view; mode of interrogation; questions to be asked; mode of recording cases; Dr. Duncan's plan; case of fatty liver; pathological appearances; case of diabetes; symptoms of the disease; state of the urine; peculiar odor of breath; connection of diabetes with phthisis; treatment of the complaint, 103—107
- Lecture III.**—Case of anasarca; causes of this disease; effects of impeded circulation through the heart; complications of this species of anasarca; treatment; phthisis in an old person; popular error with regard to the age of phthisical persons; case of jaundice; causes and symptoms of this disease; treatment of jaundice; case of gout in a poor person; effects of porter-drinking; treatment with the iodide of potassium, 123—125
- Lecture IV.**—Pulmonary consumption; ages at which the disease occurs; varieties of different cases; affection of larynx; hæmoptysis; state of the breathing during expiration; diversified symptoms of pulmonary consumption; periods of duration; two varieties of the chronic form; diet of phthisical patients; change of climate; treatment of consumption; relief of cough and diarrhoea; bed sores; case of periostitis; utility of iodide of potassium; case of cynanche tonsillar, 143—146
- Lecture V.**—Doubtful case of colic; symptoms of lead colic; diagnostic sign of Dr. Burton; treatment of Dr. Wilson; varieties of anasarca; anasarca from heart disease; connection between cardiac disease and rheumatism; condition of urine in dropsy; anasarca from renal disease, 163—165
- Lecture VI.**—Case of apoplexy in a young female; immediate and remote causes of cerebral hæmorrhage; influence of atmospheric pressure on the production of apoplexy; abdominal tumors; symptoms of disease of the ovary; effects of retained placenta; remarkable case of ovarian disease, 183—186
- Lecture VII.**—Dysentery; perforation of the intestine; rheumatism; colica pictonum; Dr. Wilson's mode of treatment; obstruction of the bowels from calculus; erythema nodosum; efficacy of the sulphate of quinine in this disease; hysterical affection of the knee-joint; effusion into the pleura, 203—205
- Lecture VIII.**—Cancer of the uterus; scarlet fever; period of incubation; forms of scarlatina; secondary effects of the poison; action of cold on the skin during convalescence; illustrative case; inflammatory affection of the joints after scarlatina; chorea, 223—225
- Lecture IX.**—History of case of purulent infection; post-mortem appearances; theory of its production; opinion of Cruveilhier; abscess of liver from injury to head; causes of the disease occasionally very slight; suppurative phlebitis the cause of purulent infection; objections to this theory answered; different effects of pus entering in mass and by absorption; Mr. Arnott's case of suppurative phlebitis; treatment; it is not necessarily fatal, 243—245
- Lecture X.**—Case of chorea; treatment of this disease; rheumatism and cardiac disease; secondary syphilis; chlorosis and its treatment; emphysema; remote effects of the disease; cerebral affection; rheumatic affection; continued fever; tubercular phthisis; frequent occurrence of pleurisy in this disease; disease of the heart; case of dropped wrists; epilepsy, 263—266
- By M. Payen, on Organic Chemistry*, 43, 87, 108, 126, 147
- Leg, peculiar swelling of after fever, 207; compound fracture of, cases of, 351
- Ley, Mr. W., on Indian hemp, 487
- Liebig's, M., theory of disease by, 41, 56
- Life, chances of, amongst different classes, 172
- Lime, poisoning by, 301
- Liston, Mr., rejection of memoir of, remarks on, 117
- Lithotomy, Mr. Mayo on, 376; Mr. Lyme on, 319; lecture on by Mr. Fergusson, 213, 460; Mr. Fergusson on, 460
- Liver, fatty, Dr. Watson on, 105; abscess of, 181; phlebitis of, case of, 200
- Lucas, Mr. P. B., lectures by (see Lectures)
- Lucifers, case of poisoning from, 251
- Lunatics in Wales, editorial remarks on, 93
- Lung, abscess of, case of, 34; M. Bourguery on structure of, 39; M. Bourguery on capacity of, 375
- Lupus, Dr. Byron on treatment of, 201; Dr. Burgess on, 383
- Lynch, Dr. M. H., on delirium ebriosum, with convulsions, 387
- Macann, Dr., on case of three testicles, 113
- Macartney, Dr., on brain of chimpanzee, 166; death of, 482
- Magnetism, Dr. Imlach on, 458
- Malformation of heart, 52
- Mamma, diseases of, treatment of, 174
- Mania, from decayed teeth, 230; Mr. Bury on, 472
- Manure, species of, M. Payen on, 126; tabular view of, 147
- Maxilla, inferior osteo-sarcoma of, 59; removal of tumor from, 80; superior excision of, by Mr. Teale, 452
- Mayo, Mr., on lithotomy, 276
- M'Cormac, Dr., review of work by, 332
- Measles, inoculation of, 171
- Meat, diseased, anthrax from, 60
- Mediastinum, case of malignant disease in, 220
- Medical Charities' bill, abandonment of, 332; bill of Mr. French, 393; memorial from association on, 458
- Medical reform, letter on, 281; Mr. King on, 457; editorial remarks on, 493
- Medico-Chirurgical Society, annual meeting of, 462
- Mercurial friction, Mr. Toogood on, 47
- Meredith, Mr. E., on poor-law medical relief, 417
- Mesmerism, remarks on, 212, 231; letter from Dr. Ashburner on, 221
- Mezereon ointment, 122
- Milk, M. Donné's instrument for measuring, 475
- Miller, Mr. G., case of catalepsy by, 446
- Milthorp, Mr., case by, 472
- Mitral valves, disease of, 478
- Morison, Mr., treatment of, by poor-law commissioners, 211
- Morris, Dr. B. R., case by, of hemiplegia, 71
- Nasmyth, Mr., on teeth, report on, memoir by, 232
- Necrosis, of tibia, 176; of cranium, 233; of lower jaw, Mr. Lucas on, 245
- Nerve, median, tumors on, 461
- Neuralgia, case of, by Dr. Waters, 352; Dr. Black on, 468; puerperal, Dr. G. Bird on, 500

 Over-supply of profession, effects of, 373
 Owen, Mr., pension granted to, 142
 Owens, Mr., case by, of femoral hernia, 411
 Oxalate of lime, in urine, 261

 Paget, Mr. J., report by, on microscope, 94
 Pancreas, case of scirrhus of, 234
 Paralysis, without loss of sensation, case of, 156; of muscles of face, Dr. Graves on, 318; of Œsophagus, case of, 476, 507
 Parker, Mr. J. C., on speculum, 190
 Parker, Mr. Langston, lecture by, on venereal diseases, 483
 Parts, publication of works in, letter on, 178
 Payen, M. lectures by (see Lectures)
 Pelvis, tumor of in child, 410
 Penis, rupture of, case of, 240; malformations of, treatment of, 278
 Perioritis, Dr. Watson on, 146
 Pericardium, tubercles in, 454
 Pharmaceutical Society, charter to, 482
 Pharmacologia, of Dr. Paris, review of, 475
 Phené, Mr. H., on assurance office fees, 177
 Phlebitis, of liver, case of, 200
 Phosphatic deposition, Mr. Ure on prevention of, 389
 Phreno-magnetism, a barrister on, 398
 Phthisis, historical notice of, 133; Dr. Watson on, 124, 143; proto-ioduret of iron in, 288; decrement of weight in, 357; mortality of, 433
 Phymosis, operation for, 486
 Physiology, Dr. Carpenter's principles of, review of, 272
 Pitt, Mr. J. B., on effects of tartar emetic on scrotum, 170
 Plagiarism, by Dr. Jonathan Green, 332
 Plague, mortality of, 362
 Plants, chemical composition of, 43; and animals, M. Liebig on difference of, 238
 Pleurisy, case of, 158
 Pneumonia, true crepitating râle of, 280; statistics of, 299; frequently recurring case of, 406
 Poisoning, accidental, remarks on case of, 35; suspected, case of, 157; by cantharides, 239; from lucifer matches, 251; by cherry-laurel water, 141; Dr. Christison on, 453
 Polypus, nasal, treatment of, 121; removal of, 132; malignant, Mr. Syme on, 159; of uterus of, 395; of vagina, analysis of, 481; rectal in children, 511
 Poor-law medical relief, memorial from association on, 377; Mr. Meredith on, 416; letter on, 417
 Pranker, Mr., case by, of man with three testicles, 151; case of hernia by, 266
 Prizes at Academy of Sciences, 275
 Prostate, abscess of, 11
 Prussic acid, Mr. Estlin, on pretended cure of cataract by, 209
 Psoriasis, of face, Dr. Burgess on, 287
 Pulmonary artery, laceration of, 479
 Purulent infection, Dr. Watson on, 242
 Purpura urticans, Dr. Todd on, 139

 Quarantine, editorial remarks on, 75

 Ransome, Mr., introductory lecture by, 96
 Respiration, carbonic acid of, M. Andral on, 354
 Retzius, M., on structure of teeth, 95
 REVIEWS AND ANALYSES OF WORKS:—
