

MEETING OF MEDICAL OFFICERS OF THE CHORLTON UNION.

At a meeting of the medical officers of the Chorlton Union, held at the Union Offices, February 26th, 1856, Present—Messrs. Hatton, Kirkman, Allen, Midwood, and Greaves. It was resolved *nem. con.*

1. That the thanks of this meeting be tendered to R. Griffin, Esq., of Weymouth, for his exertions in the cause of Poor-Law Union Medical Reform.
2. That the medical officers of this union do form themselves into a local association for the attainment of this desirable object; and that Mr. Greaves be requested to act as Honorary Secretary and Treasurer.
3. That a subscription of five shillings per quarter be paid by every member of the Association.
4. That this meeting, without pledging itself to any details, approves generally of the main principles laid down in Mr. Griffin's circular.
5. That a copy of these resolutions be sent to each of the weekly medical journals, and to Mr. Griffin.

GEORGE GREAVES, *Hon. Secretary.*

MEETING OF MEDICAL OFFICERS OF THE HENSTEAD UNION.

At a meeting of the medical officers of the Henstead Union (Norfolk), held on the 4th day of March, it was resolved unanimously:—

1. That this meeting pledges itself to further the movement commenced by Mr. Griffin, for a more equitable adjustment of the remuneration to Poor-Law medical officers.
2. That a subscription of five shillings per quarter be paid by each medical officer of this union, to defray the necessary expenses.
3. That a copy of these resolutions be forwarded to Mr. Griffin, and to each of the journals.

(Signed) J. B. PITT, A. F. MORGAN,
C. DRAKE, F. W. MERRY.

MEETING OF MEDICAL OFFICERS OF THE NORTHEACH UNION.

At a meeting of the medical officers of the Northleach Union (Gloucestershire), held on the 27th February, at the King's Head, Northleach, it was resolved:—

1. That we are of opinion no payment per case will be satisfactory, unless a distinction be made between thickly and thinly populated districts.
2. That the rates of payment for midwifery cases should be fixed according to distance—a guinea being the minimum beyond two miles.
3. That the Art. 177 in the Consolidated Order, should embrace a greater number of accidents, as many giving a great deal of trouble are omitted,—such as fractures of the cervicle, ribs, pelvis, and skull.
4. That a representation should be made to the Poor-Law Board, that some remuneration ought to be allowed to the medical officers for the trouble and inconvenience they are subjected to in granting certificates of the cause of death, such certificate being considered absolutely essential by the Registrar-General for a correct statistical return of the cause of death, and can only be obtained through the profession in such form as can be relied on.
5. That this meeting is of opinion that the most satisfactory mode of payment in thinly populated and agricultural districts will be by an increase of salary, in proportion to the extent of area.
6. That Mr. Bedwell be appointed Local Secretary, and that a subscription of five shillings quarterly be paid, if required, to defray incidental expenses.
7. That the thanks of the meeting are due to Mr. Griffin for his exertions on behalf of the union medical officers.

JOHN RALPH BEDWELL, *Local Secretary.*

THE NEW OFFICER OF EDUCATION. A Bill, brought from the Lords, empowers the Queen to appoint a Vice-President of the Committee of Council on Education, who may sit in the House of Commons. The Vice-President must be chosen from the Privy Council, and will hold office *durante bene placito*. The amount of his salary remains to be filled in by the House of Commons, to which assembly the Bill is now referred.

THE BEDFORD ROW MURDER. Westron, the murderer of Mr. Waugh, is, by the decision of the Home Office, to be condemned to penal servitude for life. The jury, it will be remembered, found him guilty of the murder, but also found that he was "predisposed to insanity".

TO CORRESPONDENTS.

LETTERS and other COMMUNICATIONS for the JOURNAL should be directed to the private address of the Editor, 39, Curzon Street, May Fair.

TO CONTRIBUTORS. The Editor would feel glad if Members of the Association and others, would cooperate with him in establishing as a rule, that in future no paper for publication shall exceed two pages of the Journal in length. If the writers of long communications knew as well as the Editor does, that lengthy papers *always* deter the reader from commencing them this great evil would never arise. Brevity is the soul of medical writing—still more than of wit.

Members should remember that corrections for the current week's JOURNAL should not arrive later than Wednesday.

TO CORRESPONDENTS.—We have been obliged to defer the publication of many interesting letters this week through press of matter.

A CHIRURGEON. Yes. You can obtain a copy of the Bill through your bookseller for 2d.

A WELL WISHER. Your idea has been anticipated; the organisation of the Association has not been thrown away in the matter you refer to.

R. B. We anticipate that petitions in great numbers will pour in prior to the second reading of the Bill, and prove that it speaks the sentiments of the general body of medical men, outside as well as inside the pale of the Association.

*Communications have been received from:—*MR. E. HUSSEY; MR. J. CHITTY CLENDON; MR. WILLIAM THOMAS BELL; A WELL WISHER; MR. GEORGE GREAVES; MR. W. W. MORGAN; MR. R. GORHAM; MR. HENRY SHARPLES; MR. R. TURNER; DR. KIDD; DR. COCKLE; MR. J. V. SOLOMON; DR. ROBERTS; AN ASSOCIATE; A VERY OLD SUBSCRIBER TO THE ASSOCIATION JOURNAL; MR. R. C. N. DAVIES; DR. HERBERT BARKER; MR. L. NEWTON; DR. RADFORD; STUDENT; MR. T. HOLMES; DR. POWELL; MR. DAVIES; MR. MAFSEN; DR. FREDERICK BROWN; THE MEDICAL OFFICERS OF THE HENSTEAD UNION; DR. COCKLE; MR. PYE CHAVASSE; MR. JOHN RALPH BEDWELL (Northleach); MR. RICHARD GRIFFIN; DR. JOHN SLOANE; MR. HUMPHREYS; and A CHIRURGEON.

ADVERTISEMENTS.

Colchester's Liquor Sennæ Comp.—

The great celebrity this Concentrated Preparation of Senna has acquired since its introduction by Mr. Colchester in 1845, having subsequently induced other persons to offer similar preparations of Senna to the notice of the Profession, and sometimes as his preparation, W. M. COLCHESTER begs to inform those wishing for the genuine Liq. Sennæ Compositus, that he cannot be answerable for any obtained through other houses, especially if supplied in bottles without his seal and fac-simile of his signature attached, but as he sends it to all parts of London and environs, carriage free, suggests that all orders for it should be sent direct to himself.

The Liq. Sennæ Compositus was a great favourite with the late Dr. Golding Bird, who constantly prescribed it, and also used it in his own family; and it has been prescribed and used by some of the most eminent of the Profession, from 1845 to the present time.

Those who have not used the Liq. Sennæ Compositus, are respectfully informed that it contains the active principle of the Senna in a concentrated form, upon which alone its aperient property depends; its action is certain and uniform, it keeps any length of time, and being sweetened with pure extract of Licorice, and agreeably flavoured, it suits almost every taste, and is invaluable for the ready formation of the Haust. Nig. and also for children.—Vide "Lancet", January 16, 1846, page 41, and January 31, page 142.

WILLIAM MARKHAM COLCHESTER, Pharmaceutical Chemist, 2, Crown Street, Hoxton Square, London.

1 lb. Bottles 3s. each, large quantities 2s. 6d. per lb.; 4 lb. Bottles packed in a basket, and sent carriage free to any railway station within 200 miles of London, on receipt of a Post-Office Order (made payable to WILLIAM COLCHESTER, at the City Road Post Office), for 10s.

New Preparations of Medicated Cod

LIVER OIL.—Messrs. SAVORY & MOORE beg to announce that they have just completed the manufacture of these valuable preparations of Cod Liver Oil, in combination with various metallic and vegetable substances, in sufficient quantities to meet all demands, and they have now the pleasure to submit them to the notice of the Medical Profession.

It is not the intention of Messrs. SAVORY & MOORE to make any comments upon these compounds beyond stating the following facts:—

First—That they hold testimonials from Physicians and Surgeons of eminence, in which the different combinations are greatly commended, and their effects described as being highly satisfactory.

Secondly—That the Cod Liver Oil employed in the manufacture is of the finest description; and the different substances combined therewith of the purest character (which is ascertained by the usual course of analytical examination in the Laboratory at Bond Street.)

The undermentioned are the compounds which have been principally prescribed, both in private and hospital practice, by the Gentlemen above referred to, but they constitute only a small proportion of the series which will be introduced.
