H. K. LEWIS'S PUBLICATIONS.

Just published, FOURTH Edition, with Illustrations, crown 8vo, 10s. 6d.

A PRACTICAL TEXT-BOOK of the DISEASES of WOMEN.

By ARTHUR H. N. LEWERS, M.D.LOND., M.R.C.P.LOND.,

Obstetric Physician to the London Hospital; Examiner in Midwifery and Diseases of Women to the Society of Apothecaries of London.

(Lewis's Practical Series.

"We have read it with much interest, and can recommend it as a most excellent manual, thoroughly practical, carefully written, and up to the latest advances in this most progressive branch of medicine."—*The Lancet*.

"It is well suited to the needs of the students . . . Altogether praiseworthy are the opening chapters on the proper methods for investigating cases where disease of the female genitals is suspected to exist, and on normal and abnormal physiological phenomena in women."—*British Medical Journal*.

"The work has the advantage of being thoroughly practical . . . To the student we heartily commend this little book as handy in size and sound in material."—*British Gynaecological Journal*.

"We congratulate Dr. Lewers upon having produced one of the most readable and valuable of a valuable series. No better book could be given a student or practitioner anxious to brush up his gynaecology."—*Liverpool Medico-Chirurgical Journal*.

The SIXTH Edition, Revised, crown 8vo, 9s.

ELEMENTS OF PRACTICAL MEDICINE.

By ALFRED H. CARTER, M.D.LOND., F.R.C.P.LOND.,

Physician to the Queen's Hospital, Birmingham; late Examiner in Medicine for the University of Aberdeen, &c.

"That this book is much appreciated by the student is evident from the regularity with which fresh editions make their appearance. It merits its popularity in that although necessarily condensed in the treatment of a very wide subject, it contains accurate information, and does not, like so many small works, favour the plan of instruction by tabulation. We consider that such a book as this has a distinct place as an introduction to the study of the more detailed descriptions and discussions of pathological questions to be found in the larger text-books. Moreover, it is thoroughly practical in its aim and sound in its therapeutics."—*The Lancet*.

Now ready, crown 8vo, with Illustrations, 10s. 6d.

PUBLIC HEALTH LABORATORY WORK.

By H. R. KENWOOD, M.B., D.P.H., F.O.S.,

Instructor in the Hygienic Laboratory, University College, and Assistant to Professor Corfield in the Public Health Department, University College.

(Lewis's Practical Series.

"Among the many excellent works upon Hygiene and Public Health which are now in circulation, Mr. Kenwood's 'Public Health Laboratory Work' will certainly find a place. . . . Students will find it of great use in all practical work, as it deals with a subject which the various Public Health Manuals are obliged to pass over with quite a cursory notice, although it is none the less of great importance to the Sanitarian and Hygienist."—*The Sanitary Record*.

Published this day, SEVENTH Edition, royal 32mo, 3s. 6d.

WHAT TO DO IN CASES OF POISONING.

By WILLIAM MURRELL, M.D., F.R.C.P.,

Lecturer on Pharmacology and Therapeutics at the Westminster Hospital.

"Will be of great value to every medical practitioner."—*Edinburgh Medical Journal*.

"The general excellence of its instructions is well maintained in the new edition."—*British Medical Journal*.

"Every medical man in active practice ought to provide himself with a copy of this excellent little work."—*London Medical Recorder*.

Other works by the same Author,

Crown 8vo, 3s. 6d.

Chronic Bronchitis and Its Treatment. | Massotherapeutics; or, Massage as a Mode of Treatment.

Now ready, Second Edition, fcap. 8vo, 2s. 6d.

Guide to the Administration of Anæsthetics. By HENRY DAVIS, M.R.C.S. Eng., Administrator of Anæsthetics at St. Mary's Hospital, &c.

"It is refreshing to meet with a terse and at the same time really useful little book like the one before us."—*Medical Chronicle*.

"Mr. Davis's guide is very convenient for general use. It is essentially practical, the author avoiding physiological subtleties liable to confuse the student."—*London Medical Recorder*.

Demy 8vo, with Photographic and other Illustrations, 5s.

The Treatment of Lateral Curvature of the Spine.

By BERNARD ROTH, F.R.C.S., Fellow of the Medical Society of London; Member of the Clinical and Pathological Societies and of the Medical Officers of Schools' Association; Honorary Member of the American Orthopædic Association.

Large post 8vo, with Illustrations, 6s.

With Special Map of France indicating 96 Hydromineral Stations, Also Two New Chapters on the Therapeutical Action and Specialisation of Mineral Waters. Second Edition, enlarged, price 8s. J. & A. CHURCHILL.

TO MEDICAL AUTHORS.

Under the Amended Copyright Law of the United States, Messrs. LEA BROTHERS & Co., of Philadelphia, are prepared to enter into arrangements for the publication in America of English medical books on the same terms as for those by American authors. The conditions of the law require manufacture in the United States and simultaneous publication in the two countries.

Messrs. LEA BROTHERS & Co. may refer to the fact that their business is strictly confined to medical publications, giving them the advantage of a thorough knowledge of the wants of the American profession. The career of their house during more than a century is a guarantee of the ability and fidelity with which the interests intrusted to their care are managed.

Communications and select advertisements are solicited for their periodicals, the monthly *American Journal of the Medical Sciences* and the *Weekly Medical News*.

Address: LEA BROTHERS & CO., 706, 708 & 710, Sansom Street, Philadelphia, U.S.A.

DETAILED CATALOGUES OF THEIR PUBLICATIONS WILL BE SENT ON APPLICATION.

J. & A. CHURCHILL, PUBLISHERS.

Mayne's Medical Vocabulary; being an Explanation of all Terms and Phrases used in the various Departments of Medical Science and Practice, giving their derivation, meaning, application, and pronunciation. Revised and Enlarged by W. W. WAGSTAFFE, B.A., F.R.C.S. Sixth Edition, crown 8vo, 10s. 6d.

Edited by THOMAS STEVENSON, M.D., F.R.C.P., Lecturer on Chemistry and Medical Jurisprudence at Guy's Hospital; Official Analyst to the Home Office.

Taylor's Principles and Practice of Medical JURISPRUDENCE. Third Edition, with 188 Engravings, 2 vols., 8vo, 2l 11s. 6d.

Taylor's Manual of Medical Jurisprudence. Twelfth Edition, with 56 Engravings, crown 8vo, 14s.

Handbook of Gynaecological Operations. By

ALBAN H. G. DORAN, F.R.C.S. With 167 Engravings, 8vo, 15s.
"A good book.....It bears unmistakable impress both of the teaching and traditions of the 'Samaritan' school."—*Birmingham Medical Review*.

"This handbook can claim to be without a rival guide to the chief gynaecological operations. It meets a decided want, and it meets it admirably. It is a credit to English surgery."—*British Medical Journal*.

"All the information necessary for carrying out the operations treated of will be found in the work, for the author has not confined himself to a description of the operations simply."—*Lancet*.

The Prevention of Disease in Tropical and

SUB-TROPICAL CAMPAIGNS. Parkes Memorial Prize. By ANDREW DUNCAN, M.D., B.S., F.R.C.S., Surgeon-Major, Bengal Army. 8vo, 12s. 6d.

"We have no hesitation in saying that Dr. Duncan's book is of great value to the State, indispensable to the army surgeon, and highly creditable to the author."—*British Medical Journal*.

The Surgery of the Rectum; with Cases

illustrating the treatment of Hæmorrhoids and Prolapsus by the Improved Clamp. (Lettsonian Lectures.) By HENRY SMITH, F.R.C.S., Emeritus Professor of Surgery in King's College, and Consulting Surgeon to King's College Hospital. Fifth Edition, 8vo, 6s.

"It is unnecessary to make an extended notice of a book so well known, by an author who is looked upon as the chief authority on diseases of the rectum."—*Edinburgh Medical Journal*.

DISEASES OF THE RECTUM AND ANUS.

By ALFRED COOPER, F.R.C.S.,

Senior Surgeon to St. Mark's Hospital for Fistula; and

F. SWINFORD EDWARDS, F.R.C.S.,

Surgeon to the West London and St. Peter's Hospital, and Senior Assistant Surgeon to St. Mark's Hospital.

Second Edition, illustrated and much enlarged, 8vo, 12s.

"This will prove itself one of the most complete and useful of recent treatises on this special subject.....The book is well illustrated by plates and engravings—most of which are original."—*British Medical Journal*.

"We can most cordially recommend the book to the general practitioner and to the specialist in this department of surgery, with the full assurance that the authors have produced in this edition a work which is thoroughly abreast of the time and one of the very best with which we are acquainted."—*Dublin Journal of Medical Science*.

The Cardinal Symptoms of Urinary Disease:

their Diagnostic Significance and Treatment. By E. HURRY FENWICK, F.R.C.S., Surgeon to the London Hospital and to St. Peter's Hospital for Urinary Diseases. 350 pp., Illustrated, 8vo, 8s. 6d.

By the same Author,

Electric Illumination of the Bladder and URETHRA as a MEANS of DIAGNOSIS of OBSCURE VESICO-URETHRAL DISEASES. Second Edition, with 50 Engravings, 8vo, 6s. 6d.

"The surgery of the bladder has made such rapid strides in the last few years that a knowledge of this work becomes a necessity to every scientific and progressive surgeon."—*British Medical Journal*.

"A valuable monograph on a most interesting and important subject."—*London Medical Recorder*.

Uric Acid as a Factor in the Causation of

DISEASE; a Contribution to the Pathology of High Arterial Tension, Headache, Epilepsy, Mental Depression, Gout, Rheumatism, Diabetes, Bright's Disease and other disorders. By ALEXANDER HAIG, M.D., F.R.C.P., Physician to the Metropolitan Hospital and the Royal Hospital for Children and Women. With 23 Illustrations, 8vo, 8s. 6d.

KODAK FILMS.

FREE DARK ROOMS

AT THE

WORLD'S FAIR.

The World's Fair Authorities, after seeing the superior work done on our new film, decided to sell no roll film and no cut sheet film on the grounds other than ours.

We have purchased the exclusive concession for a dark room at the fair, and are erecting a building as headquarters for Kodakers. The use of the dark room will be free for changing films and plates.

Competent attendants will be in charge, to set right anybody that may have trouble in operating the Kodak, and will make slight repairs that may be necessary without charge.

If anybody comes to the Fair with a Kodak that will not work properly, we will replace it with one that is in good order.

ALLEN & HANBURY'S

MANUFACTURERS OF

SOLUBLE GELATINE-COATED PILLS.

The *Drugs* are all of the highest quality and are guaranteed pure. The *Excipients* are carefully selected; all excessive drying and hardening are avoided. The advantages of gelatine are found in its *solubility and transparency*. It is so soluble that it disappears in a very few minutes when in contact with moisture at the temperature of the body. Owing to its transparency the colours of the pills can be perfectly seen, thus avoiding the possibility of mistake.

Any pill may be had "pearl-coated" if desired, and quantities of 7 lb. and upwards may be had sugar-coated.

Complete list of pills according to many hundreds of formulae from the British and Hospital Pharmacopœias and from private prescriptions sent on application.

"ORIGINAL" GRANULAR EFFERVESCENT PREPARATIONS.

SILVER MEDAL, PARIS EXHIBITION, 1889.—HIGHEST AWARD FOR GRANULAR PREPARATIONS.

MAGNESIA CITRATE.

We were the Inventors of all granular effervescent preparations, of which the above was the first to appear. So highly is it esteemed that an imitation of it has been introduced into the British Pharmacopoeia.

CARLSBAD SALT.

Our form is specially suitable for the administration of Mineral Water Salts. The chemical ingredients are all reproduced. In this form it is at once palatable, portable, and economical.

LITHIA CITRATE.

5 grains in 60 grains.

This preparation is given with great advantage in acute or chronic gout, to promote the elimination of urate of soda from the blood and tissues. In our granular form it is very portable and economical.

CAFFEINE CITRATE.

1 gr. in 60 grs.

Caffeine is very valuable as a nervine stimulant in ordinary conditions of fatigue. It is of great value as a remedy for Headache, and in our Granular form it is very prompt in its action and most agreeable to the patient. It is particularly valuable as a morning restorative.

MISTURA BISMUTHI COMP.

MACKEY'S ORIGINAL PREPARATION.

Composition Liq. Bismuth, Tr. Nux Vomica, Morphia, Hydrocyanic Acid, and Spt. Chlorof., price 7/6 lb

This reliable preparation contains Bismuth in its most effective form for the successful treatment of Atonic and Irritative
Dyspepsia, Gastric Catarrh, and Pyrosis accompanied with Pain after Food. It is highly useful in some forms of Vomiting, and has
been used with success in the Diarrhoea or Constipation connected with Debilitated Conditions of the Alimentary Canal.

THE LANCET says:—"Bismuth could hardly be given in a better form."

"I have used the Mistura Bismuthi Co., prepared by Messrs. MACKEY, MACKEY & Co., and have found it most efficacious, and far superior to any other
preparation of Bismuth that has come under my notice."—C. H. B.—, M.R.C.S., &c.

"MACKEY'S Mistura Bismuthi Co. is an improvement on other preparations of Bismuth, and more acceptable to the stomach. I have found it a very
valuable preparation."—J. F.—, F.R.C.S.

INTRODUCED AND PREPARED ONLY BY

BULLOCK'S PEPSINA PORCI. DOSE— 2 to 4 grains.

BULLOCK'S ACID GLYCERINE OF PEPSINE. DOSE— 1 to 2 drms.

In this preparation advantage has been taken of the solubility of Pepsine in Glycerine to produce a convenient and desirable
liquid form of this valuable medicine; whilst the preservative qualities of the menstruum confer upon the Acid Glycerine of
Pepsine the property of keeping for any length of time.

May be prescribed with most substances compatible with Acids. In 4-oz., 8-oz., and 16-oz. Bottles, and in Bulk.

The published experiments of G. F. DOWDESWELL, Esq., M.A. Cantab., F.R.S., F.L.S., &c., Dr. PAVY, Professor TUSON, the late
Professor GARRON, and others, conclusively demonstrate the excellence, high digestive power, and medicinal value of the
above preparations.

. In prescribing either of the above preparations, it is suggested to insert in parenthesis as follows (BULLOCK).

J. L. BULLOCK & CO., 3, Hanover Street, Hanover Square, London, W.

CARLSBAD

Recommended in *Chronic Gastric Catarrh, Hyperæmia of the Liver, Gall Stones, Chronic Constipation, Diabetes, Renal Calculi, Gout and Diseases of the spleen arising from residence in the tropics or malarious districts.*

**NATURAL
SPRUDEL-SALT.**

To increase the *aperient* action of the CARLSBAD MINERAL WATER, a teaspoonful of the NATURAL Salt, previously dissolved in a little hot water, should be added.

ALETRIS CORDIAL

Uterine Tonic and Restorative.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN

Indications.—Amenorrhœa, Dysmenorrhœa, Leucorrhœa, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, etc.

Dose.—One teaspoonful three or four times a day.

UNEQUALLED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

Aletris Cordial is prepared from the Aletris Farinosa, or true unicorn (combined with aromatics). There has been and still exists much difficulty among herb-gatherers and druggists to determine the difference between the true and false unicorn, and hence the merits of the true unicorn is not generally known to the profession. Having carefully studied the true unicorn, and the results of very extended tests being eminently satisfactory, we are now warranted in offering to the profession the ALETRIS CORDIAL. We feel sure those physicians who will test it clinically will be much pleased with its action in diseases of the female generative organs.

Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

Prepared EXCLUSIVELY for Prescriptions of Medical Men.

PUT UP IN HALF-POUND BOTTLES ONLY. PRICE PER BOTTLE, 4s. 6d.

GENERAL DEPOT FOR GREAT BRITAIN

VAN HOUTEN'S

Perfectly Pure
Soluble
Easily Digested.

COCOA

PROOFS OF SUPERIORITY.

ALL THE MOST EMINENT BRITISH CHEMICAL AND MEDICAL AUTHORITIES CERTIFY THE FOLLOWING RESULTS FROM THE SPECIAL PROCESS INVENTED BY THE FOUNDER OF THIS FIRM:—

There is a **great increase in the solubility** of the flesh-forming elements; all the cocoa tissues are *softened*, and with the fat or Cocoa Butter made more *digestible*; the natural *flavour* and *aroma* are fully developed, and a *stimulating, nourishing* and *delicious* beverage is produced, of the highest dietetic value, and readily assimilated even by delicate invalids and children, while the **purity of the cocoa is beyond question.**

Copies of analyses and sample tin sent free on application to

C. J. VAN HOUTEN & ZOON, WEESP-HOLLAND.

CADBURY'S COCOA

ABSOLUTELY PURE *therefore* BEST.

THE Manufacturers of this Preparation of Cocoa claim that it is absolutely pure, and that it has no superior in the market, as far as wholesomeness, purity, economy and agreeableness go. Many of the Dutch Cocoas, with which the English market is flooded, are preparations of Cocoa combined with strong and injurious alkalies, while they are not so cheap as they are represented to be, because, when mixed with water, they give in plain English a Soap, the alkalies helping to give an appearance of fictitious strength. CADBURY BROTHERS earnestly appeal to the Medical profession to discountenance the use of these foreign, adulterated, perfumed Cocoas, and to encourage the consumption of pure home-made preparations, like their Cocoa Essence, which has received the unqualified support of large numbers of eminent Physicians and Surgeons.

"LLOYD'S

LEICESTER"

Soluble
Pearl-Coated
PILLS.

"LEICESTER may be regarded as the headquarters of the Pill Industry in England."—*Chemist & Druggist*, January 30th, 1892.

"MR. T. HOWARD LLOYD has been associated with the Leicester Industry for more than Twenty Years."—*Chemist & Druggist*, January 30th, 1892.

"MR. T. HOWARD LLOYD is one of the pioneers of Machine-made Pills."—*Chemist & Druggist*, January 30th, 1892.

During the last two years the sale of these Pills in the UNITED KINGDOM has gone on increasing by leaps and bounds. They have also been tested in almost all climates, INDIA, CHINA, NORTH AND SOUTH AFRICA, AUSTRALIA, NEW ZEALAND, &c., &c., with the result that they are rapidly gaining the first place in the estimation of the Trade and Profession.

THE LANCET, April 9, 1892.—"The coating gradually disintegrates in flakes, even when placed in cold water."

THE BRITISH MEDICAL JOURNAL, Feb. 13, 1892.
—"Possesses a very elegant and finished appearance."

THE CHEMIST AND DRUGGIST, Jan. 30th, 1892.—

"The Blaud's Pill is of a pale green throughout, the surface being no darker than the centre, showing the protective influence of the coating."

Cod Liver Oil \bar{v} . Malt Extract.

MELLIN'S EMULSION

Syn. "Emuls. Ol. Morr. \bar{c} . Hypophosph. 'MELLIN.'"

Contains 50 per cent. of pure Norwegian Cod Liver Oil in finely-divided form; readily miscible with Milk, Water, or other fluids, and is retained by the weakest stomach and easily digested. The addition of the Hypophosphites—which gently stimulate the nervous system and improve the appetite—increases largely the availability of the oil, and thus raises the Nutritive value of this form of Emulsion. MELLIN'S EMULSION being neutral in reaction admits of many additions at the desire of the prescriber, including such substances as Creosote, Terebene, Iron, Nux Vomica, &c., *e.g.*,

The "LANCET" writes:—

Not only is there an element of novelty in the construction of these Syphons, but, what is of greater importance, they are so made as to reduce to a minimum any chance of contamination with objectionable metals. The Syphon heads are lined with porcelain or similar material and the Syphon is charged by means of an orifice at the bottom of the bottle, so that the jamming of the head necessary for re-filling—a process which so often results in the cracking of the lining—is entirely avoided. Messrs. SCHWEPPE'S attention to an important matter of this kind is evidence of their desire to place before the public mineral waters of a high standard of purity."

Absolutely Pure.

Uniformly free from
Arsenic, Antimony, Copper, Silver, Tellurium,
and the other contaminations existing in commercial Bismuth.

The calamity known as
Bismuth-Breath
will not befall the Patient treated with

SCHACHT'S LIQUOR BISMUTHI

Invented and Introduced to the Profession by Mr. G. F. SCHACHT in 1855.

DOSE—One drachm diluted : equivalent to a full dose of the Trisnitate.

Mr. Charles Ekin, F.C.S., writing of the prevalence of contaminations in commercial samples of Liquor Bismuthi, says: "It must be confessed that the Bismuth preparations of the Pharmacopœia, as at present met with in commerce, are far from satisfactory. It is only just, however, to Mr. Schacht, of Clifton, the inventor of the fluid preparation, to say that the *Liquor as prepared by him* is invariably free, not only from silver, but also from copper, antimony, and arsenic; and that in HIS, prescribers have, at all events, ONE preparation that they may at all times depend upon."

N.B.—The value of these opinions has been generally admitted by the Profession during an experience of over thirty years. The inventor therefore hopes, both for the security of the Patient and the satisfaction of the Prescriber, that his Professional Friends will be careful to write—

LIQUOR BISMUTHI (SCHACHT).

HIGHEST AWARD, INTERNATIONAL EXHIBITION, ADELAIDE, 1887.
FIRST CLASS AWARD AND MEDAL, MELBOURNE, 1888.

MEDICAL OPINIONS.

"Mr. Benger's admirable preparations."—THE LANCET, March 25th, 1882.

"Deserving of the highest praise, and only require to be made known to the profession to ensure their extensive employment."—THE PRACTITIONER, February, 1883.

"Few modern improvements in Pharmacy have done so much as Benger's Preparations to assist the Physician in his treatment of the sick."—THE MEDICAL PRESS, June 13th, 1883.

"Benger's Preparations have deservedly a very high reputation, and are all largely used."—THE MEDICAL TIMES AND GAZETTE, September 8th, 1883.

"Benger's Food is a preparation devised on original lines, and which we can speak of in the highest terms. . . . Infants do remarkably well on it, and it is most suitable for many conditions in adults and old people. . . . There is certainly a great future before it."—THE ILLUSTRATED MEDICAL NEWS, December 22nd, 1888.

"Undoubtedly a great advance on any previous attempt in this direction. It is palatable and excellent in every way. We have given it in very many cases with the most marked benefit, patients frequently retaining it after every other food has been rejected. For children who throw up their food in curdled masses it is invaluable."—THE LONDON MEDICAL RECORD, March 15th, 1882.

NOTICE TO THE MEDICAL PROFESSION.

BENGER'S FOOD consists of a specially finely ground nitrogenous wheaten meal, cooked, and impregnated with a suitable proportion of the natural digestive principles of the pancreas. When mixed with warm milk or milk and water, as directed on each tin, these digestive principles not only render the starchy matter soluble (as in malted foods), but, further, reduce the casein of the milk to the same digestible condition in which it exists in human milk, so that hard indigestible masses of curd cannot be formed in the stomach. *In no other food has this result been obtained.* It forms a delicate cream entirely free from rough and irritating particles, but rich in all the elements necessary to maintain vigorous health. It can be taken when other Foods disagree.

EXTRACTS FROM PRIVATE LETTERS.

FROM AN EMINENT SURGEON.

"After a lengthened experience of Foods both at home and in India, I consider 'Benger's Food' incomparably superior to any have ever prescribed."

THE COUNTESS OF ——— WRITES:—

"I really cannot resist telling you of the marvellous results of 'Benger's Food.' Not only am I quite renovated by a cupful every morning, but my daughter is taking it and finds great benefit."

"Really I consider that, humanly speaking, 'Benger's Food' entirely saved baby's life. I had tried four other well-known Foods, but in this horrible climate he could digest nothing, until we began the 'Benger.' He is now rosy and fattening rapidly."

BENGER'S FOOD may be obtained in tins at 1s. 6d., 2s. 6d. and 5s. each of Chemists, etc., everywhere, or by Parcel Post direct from the Manufacturers,

"Johannis"

KING OF NATURAL TABLE WATERS.

Charged Entirely with its own Natural Gas.

PROMOTES APPETITE, ASSISTS DIGESTION, AND PROLONGS LIFE.

MIXES EQUALLY WELL WITH WINES, SPIRITS, OR MILK.

Supplied at all First-class Hotels, Clubs, and Restaurants.

The finest tribute ever accorded to sterling merit is contained in THE LANCET, of August 8th, 1891, pages 807-8, which embodies the "Report of THE LANCET Special Commission on Natural Mineral Waters," "Johannis"—the subject of the Report—being selected from amongst the Natural Mineral Waters of the world as alone worthy of this unprecedented distinction.

This Report, which contains a number of delicate and interesting analysis, a full description of the Spring, method of Bottling, &c., at Zollhaus, Germany, together with numerous press notices, public and private testimonials, &c., will be sent to any part of the world, post free, on receipt of address.

"The Water mixes well with Wines and Spirits, the peculiar softness which the Natural Gas lends to the taste rendering it admirably adapted for the purpose."—THE LANCET, 1891.

"The remainder of a bottle, opened and recorked, exhibited marked effervescence after four days. The Carbonic Gas is exceptionally pure, being the Natural Gas collected from the Springs."—MEDICAL ANNUAL, 1892.

"DEAR SIR,—Eight years ago I bought four cases of 'Johannis' Water with which I was exceedingly pleased, but in moving from one house to another I lost sight of it until two months ago, when I came across it in the cellar, and much to my astonishment when opening it I found it as bright, fresh, and sparkling as when I first bought it, and in every way in as good condition. I have no objection to your making use of my statement.—Yours truly,

Useful and Unique.

CARNRICK'S COD LIVER OIL MILK.

The Best Emulsion.

A Perfect Incorporation of a Sufficient Quantity of Cod Liver Oil in a Nutritive and Emollient Menstruum.

We submit that a trial of "Cod Liver Oil Milk" will substantiate:—

- (I.) That the Oil is rendered palatable and does not give rise to acid eructations.
- (II.) That by the breaking up of the oil globules, the oil is rendered thoroughly digestible, even when the patient's assimilative functions are weak and disordered.
- (III.) That it is a most effective way of exhibiting the fat-forming properties of Cod Liver Oil.

It is, in fact, what its name connotes, a preparation, which, by a carefully devised process, has been brought to the appearance, consistency, and palatability of milk, and constitutes a therapeutic implement, that, under the Physician's direction, will be productive of the best results.

This combination will be found very useful in cases where Cod Liver Oil is indicated in conjunction with the hypophosphite salts. The association of bone-forming material with the fat-making principle of Cod Liver Oil is recommended by the highest authorities, and its value has been conclusively proved in practice.

In 8-oz. and 16-oz. bottles, 2s. 6d. and 4s.

To the Profession, 1s. 11d. and 3s. 6d., carriage paid.

"THE OZOL" POCKET INHALER.

Complete with Inhalant, 2s. 6d.

Is intended for use out of doors; at the business office; when travelling, or attending to one's ordinary work. It is not unsightly like some of the respirators in use. The absorbent medium acts as a perfect filter against fogs or noxious gases, and purifies the air as it passes through. Besides being the most approved apparatus of the sort yet devised by which the amount of medicament inhaled can be regulated, it is strongly recommended to nurses and others in attendance on infectious diseases as a preventative against infection, as it can be carried fully charged with the Antiseptic Inhalant "Ozol."

Price to the Profession, 2s. each, carriage paid.

THE INHALANT "OZOL."

"Ozol" is an oxidised oil, specially prepared for use in the inhalers above mentioned, from the needles of the *Pinus Pumilio* (Alpine pine), and from the fresh leaves of the *Eucalyptus Globulus*. It is recommended in preference to the ordinary preparations in common use on account of its highly oxidating properties and increased power of imparting ozone to the air.

In 2-oz., 4-oz. and 8-oz. bottles, at 2s., 3s. 6d. and 6s. 6d.

To the Profession at 1s. 9d., 3s. and 5s. 9d.

Samples free to Medical Men.

CARNRICK'S SOLUBLE FOOD.

consists of equal proportions of the solid constituents of cow's milk partially digested, and of wheat, the starch of which has been converted into the digestible form of dextrine; with the addition of milk sugar.

"Closely imitates in composition an average sample of human milk."—*British Medical Journal*.

In tins, 1s. 6d., 2s. 6d. and 4s. 6d.

To the Profession 1s., 1s. 11d. and 3s. 6d. carriage paid.

CARNRICK'S BEEF PEPTONIDS.

Represents in powdered form a unique combination of the essentially nutritive constituents of the three great varieties of food—beef, wheat and milk.

It is sterilised and partially peptonised, and has been proved to be the most nutritious and concentrated food ever prepared. Professor STUTZER, who made a comprehensive analysis of meat preparations and extracts of beef, puts the nutritive value of Carnrick's Beef Peptonoids strikingly by comparison with beef-tea. "It would take," he writes, "eighty pints of beef-tea, made from eighty pounds of steak, to obtain the flesh-forming constituents present in one pound of Beef Peptonoids."

Carnrick's Beef Peptonoids is concentrated, assimilable, aseptic, and possesses valuable peptogenic qualities. It is palatable, and can be easily administered in a variety of ways. In the form of nutritive enemata it has been found very useful.

In 4-oz. and 16-oz. tins, 3s. 6d. and 12s. 0d.

To the Profession, 3s. 1d. and 10s. 10d. carriage paid.

CARNRICK'S LIQUID PEPTONIDS.

A concentrated solution of Beef Peptonoids powder, entirely digested, with the addition of the minimum amount of alcohol necessary to make a stable compound. It is extremely palatable, being generally compared by patients to a delicate wine or cordial. Being fluid, it is administered in a convenient form, and as it is entirely pre-digested, it can be assimilated when the digestive functions are involved. The combination of Food and Stimulant properties has frequently given the happiest results, and is highly valued by many physicians.

"A very valuable Food. A very powerful and agreeable Tonic and Stimulant."—*Lancet*.

Also Liquid Peptonoids with Coca: each fluid ounce contains the Extract of 30 grains of Coca. Liquid Peptonoids with Coca is more palatable than any of the wines of coca, and has valuable nutritive properties, which they do not possess.

Peptonoids Iron and Wine; Beef Peptonoids entirely digested and dissolved in combination with Pyrophosphate of Iron in Sherry.

"An ideal form for the administration of iron."—*Medical Press and Circular*.

In 8-oz. and 16-oz. bottles, 3s. 6d. and 6s. 6d.

To the Profession, 2s. 8d. and 5s.

WE SHALL BE PLEASED TO SEND SAMPLES FREE OF CHARGE TO MEDICAL MEN.

CARNRICK & Co., Ltd., 24 & 25, Hart Street, Bloomsbury, London, W.C.

PEPTONIZED MILK

(PATENT CONCENTRATED).

The remarkable value of Peptonized (*predigested*) Milk has now been completely established. Without calling for any digestive effort, it can, in the absence of all other food, supply the system for an indefinite period with the nutriment which it requires. The great drawback to the more extended use of Peptonized Milk has been the trouble, care, and even skill required to be daily expended to prepare a fairly palatable and uniformly peptonized product. These disadvantages are entirely obviated by the use of this Concentrated Preparation, as by mere dilution with water, a deliciously-sweetened Peptonized Milk, of uniform composition, can be instantly prepared by the most inexperienced person.

In Tins, 2s. 6d. In Half Tins (Samples), 1s. 6d.

PEPTONIZED COCOA

AND MILK

(PATENT CONCENTRATED).

In this preparation the Cocoa as well as the Milk is peptonized and rendered soluble, and is therefore more readily assimilable than any other preparation of Cocoa extant, and can be digested by even the most confirmed dyspeptic. Besides its extreme digestibility, its perfect palatableness renders it a most delicious as well as wholesome beverage, which can be taken alike by the invalid and by those who, although otherwise healthy and robust, frequently experience a difficulty in digesting any form of Cocoa. For general convenience in use it is unrivalled, as no addition of milk or sugar is needed, but only mixture with hot water.

In Tins, 2s. 6d., to make fifteen breakfast cups of Cocoa, or ten or more breakfast cups of rich Chocolate, Also in Half Tins (Samples) 1s. 6d. each.

N.B.—The milk used in these preparations is secured from farms under our control, and where the sanitary arrangements have been made perfect, and in addition to this, sterilisation, after the most approved modern methods, is provided for, thus ensuring complete immunity from communication of the infectious diseases which are unhappily so often spread by means of milk.

Opinions of the Medical Press.

The LANCET, June 15th, 1889:—

"Peptonized Milk (Patent Concentrated) is an excellent article. In consistence it is like a thick cream, agreeable in flavour, and yet so well peptonized that it gives no coagulation with dilute hydrochloric acid, even after heating. It will be of great value. The Peptonized Cocoa and Milk (Patent Concentrated) is clearly founded on the above. In appearance it resembles chocolate cream, and it is delicate in flavour, and yet peptonized. It is almost needless to say of Messrs. Savory & Moore's novelties that they are well prepared."

The PRACTITIONER, July, 1889:—

"We have carefully examined and tested Savory and Moore's Peptonized Cocoa and Milk and Peptonized Milk, and have used them ourselves and for patients of fastidious appetite. We find them well peptonized, capable of keeping even when the tin are opened for a considerable time, and very palatable. The Cocoa and Milk forms a thin and inviting beverage of a pleasant nutty flavour, and is retained well even in cases of chronic neurotic vomiting. The Peptonized Milk mixes well with tea or coffee, and improves the taste of both. These properties render Messrs. Savory and Moore's latest preparations a valuable addition to the sick-room dietary, and we can recommend them to the profession."

The MEDICAL PRESS AND CIRCULAR, Sept. 4th, 1889:—

"The Peptonized Cocoa and Milk and Peptonized Milk introduced to our notice by Messrs. Savory and Moore, like everything emanating from their laboratory, are most carefully prepared and of the highest quality. There is, moreover, a delicacy in flavour and aroma with the Peptonized Cocoa which shows at once that the products of selected growths only obtain a place here. It is, therefore, one we can unhesitatingly recommend."

N.B.—These Preparations keep well after the Tins are opened.

ANTIPYRIN IN MALARIA.—It may not be wholly uninteresting to learn that we are at present suffering from Malarial Fever, which in some cases puts on an adynamic form. Antipyrin and sulphate of quinine are very reliable agents for successfully combating it. (Dr. I. A. W—— to the *British Medical Journal*, December 17th, 1892.)

ANTIPYRIN IN THE TREATMENT OF BLENNORRHAGIA.—To mitigate the pain of Injections of Perchloride of Mercury into the urethra, Dr. V—— successfully combines it with Antipyrin, preparing a solution of Antipyrin ʒjss., corrosive sublimate grain 1, distilled water ʒxx. S. 3—4 injections daily. (*La Riforma Medica*, No. 100, 1892.)

ANTIPYRIN IN CRAMP.—In the various convulsive conditions accompanying true epilepsy, hystero-epilepsy and chorea, Dr. A. K—— obtained very encouraging results with Antipyrin in doses of 40 to 45 grains daily for adults. The author regards the treatment worthy of trial in all similar cases. (*Wiener med. Wochenschr.*, 1892, No. 48.)

ANTIPYRIN AS A LOCAL APPLICATION in inflammation of the mucous membrane of the upper respiratory tract is recommended by Dr. G——. The remedy is applied in solution (1·3 per cent.) with a spray to the inflamed surfaces of the nose or throat, the primary irritation produced being rapidly followed by relief of all distressing symptoms. In other cases Antipyrin was used in fine powder, being blown gently into the larynx by a powder blower. The treatment may be combined with application of cocaine, menthol, &c. (*New York Medical Journal*.)

SURGICAL AND MEDICAL.

BEEF AND IRON WINE (B., W. & CO.).

A combination of the nutrients of the best beef with an easily assimilable salt of iron is a favourite tonic, conspicuous among iron preparations in that it does not cause constipation, even when taken by the greatest invalid. Of extreme value to convalescents, and of special use in anæmia, neuralgia, and want of tone generally. May be had with or without quinine. *The Lancet* reports that it is "a really valuable preparation."

Beef and Iron Wine (B., W. & Co.) supplied to the Medical Profession by all Chemists in 4-lb. and 1-lb. bottles at 1s. 10d. and 3s. 6d. each; with Quinine, 2s. 3d. and 4s. 2d. each.

DIALYSED IRON (B., W. & CO.).

A pure neutral solution of Iron Peroxide in the colloid form; each fluid ounce contains 27·68 grains. This preparation does not cause constipation and does not blacken the teeth. The problem of presenting this useful agent in the compressed form has now been solved, and we issue "Tabloids" of Dialysed Iron, each "Tabloid" being equal to 10 minims of the solution. They dissolve easily and are highly convenient.

"Of its kind a perfect preparation, it is often taken without difficulty when other forms are not well borne. It is the best antidote in cases of acute poisoning by arsenic."—*The Lancet*.

Dialysed Iron (B., W. & Co.) supplied to the Medical Profession by all Chemists in 4-oz. and 1-lb. bottles at 2s. 3d. and 3s. 6d. each.

SALOL

Is Salicylate of Phenyl and is largely prescribed internally to produce antiseptics in typhoid fever, cholera morbus and affections of the genito-urinary passages. While in the system Salol breaks up into its components, reappearing in the urine, which becomes dark-coloured, in their separate forms. The "Tabloid" containing 5-gr. is positively one of the best forms for the administration of this valuable antipyretic and antiseptic.

Salol "Tabloids" supplied to the Medical Profession by all Chemists in bottles of 25 and 100 at 10d. and 2s. 2d. In the crystal at 1s. 3d. per oz., and 16s. 10d. per lb.

"SOLOIDS" FOR ANTISEPTIC SOLUTIONS.

For the purpose of providing at a moment's notice an effective and convenient antiseptic solution for midwifery cases we have two agents in the compressed form—"Soloids" of Mercuric Chloride and Iodic Hydrarg. The Mercuric Chloride "Soloids" are made in combination with a sufficiency of an alkaline chloride to prevent the decomposition of the mercuric salt by "hard" waters, and are of such strength that one "soloid" dissolved in a pint of water will give a solution the strength of which shall be 1:1000. These "soloids," it may be remarked, are compressed so as to readily disintegrate and dissolve, are of a distinctive form and colour and give a solution which cannot be easily mistaken for other preparations supplied to the Medical Profession. In bottles of 25 and 100 at 9d. and 2s. each. The "Soloids" of Iodic Hydrarg. are of 1 gr. each of this popular antiseptic and germicide. The superiority claimed for this agent over the Mercuric Chloride in this connexion is important—twice the strength as a bactericide, not nearly so toxic, nor liable to cause complications, does not precipitate albumen nor cause irritation, and may even be taken internally in doses of 16 milligrammes (½ gr.). Micrococci and bacilli in active growth without spores are soon killed by solutions so attenuated as 1:40,000. Solutions of 1:2000 will easily destroy the spores of the bacillus anthracis and the bacillus subtilis. For obstetric or gynaecological practice the strength of the solution generally used for washing out the vagina, for instance, is 1 in 4000, and 2 "Soloids" of Iodic Hydrarg. dissolved in a pint of water will give a solution of this strength, approximately.

"Soloids" of Iodic Hydrarg. (1 gr.) are supplied to the Medical Profession by all Chemists in bottles of 25 and 100, at 8d. and 1s. 4d. respectively.

WAFER MEDICINE CACHETS (B., W. & CO.).

(E. GORLIN'S PATENT.)

The medical practitioner frequently meets with fastidious patients who are unable to take medicines whether in the form of "Tabloids," pills, powders, or mixtures, if the taste be at all disagreeable. The introduction of Wafer Medicine Cachets will remove many of the difficulties hitherto presented in the case of such patients. The Cachet is composed of pure rice starch and is in two parts, the lid being a flat surface and the receptacle itself shaped somewhat like the bowl of a small teaspoon. With the assistance of an ingenious little machine supplied in each box of Cachets the patient is enabled to place "Tabloid" or powder into the hollowed cup; then entirely wet the surface of the lid and close the filler. This will completely conceal the contents.

Supplied to the Medical Profession by all Chemists in boxes of 100, at 1s. 2d. per box.

B., W. & Co. Wafer Medicine Cachet.

THE VEREKER IMPROVED CHLORIDE AMMONIUM INHALER.

The value of Ammonium Chloride Vapour in the treatment of the affections of the mucous membrane of the throat is widely appreciated, but it is absolutely necessary that the vapour be delivered perfectly pure; free, that is, from both alkaline and acid excess. It is claimed for the Vereker Inhaler, in its improved form, that the neutrality of the vapour, once the apparatus is properly set, is absolutely to be relied upon, and it may be inhaled without the slightest irritation in all catarrhal conditions of the fauces and pharynx.

To meet special cases any volatile body desirable may be used with the Ammonium Chloride Vapour by adding it to the liquid in the wash bottle. The "Vereker" is furthermore in a really portable form, easily charged, and once properly arranged contains a suf-

ficiency of material to last for a considerable number of inhalations.

Supplied to the Medical Profession by all Chemists in neat case at 5s.

DIURETIN (KNOLL)

Is Sodæ theobromine sodio-salicylate, and one of our most powerful diuretics. To produce good results it must be given in large doses, the maximum quantity for one day being 120 gr. Diuretin is not cumulative in its action, so that it can be applied for prolonged periods; acts by direct influence on the secreting parenchyma of the kidneys. It being undesirable to prescribe this remedy in powder on account of absorption of carbon dioxide from the air, "Tabloids" are consequently the best form in which to prescribe it.

Diuretin Tabloids supplied to the Medical Profession in bottles of 25 and 100 at 2s. 6d. and 7s. each; 1 oz. bottles at 4s. 4d. per oz.

BURROUGHS, WELLCOME & CO., MANUFACTURING CHEMISTS,

THE FOOD OF FOODS.

KEPLER MALT EXTRACT.

1. It contains no glucose, is uncontaminated, and free from any "doctored up taste."
2. It is not blackened with heat and chemicals, and its valuable proteids are therefore not precipitated.
3. It is prepared from the very best winter barley, and in no case are mixtures or inferior grains substituted therefor.
4. The freedom from burnt or treacly taste and blackish appearance is due to the fact that the Kepler Malt is evaporated *in vacuo*.
5. The Kepler Malt Extract contains everything that is of nutritive value in the barley—viz.:—

**Maltose, Dextrins,
Peptones, Diastase,
Albuminoids, Phosphates, &c.**

6. It is the most assimilable of all foods, as it contains only those ingredients adapted for the sustenance of tender plant life.
7. Its constituents are prepared by nature for immediate utilisation and thus their value in wasting disease.
8. From its carbohydrate being maltose—the most nutritive of sugars—the Kepler Extract does not sour in the stomach.
9. A little of it added to cows' milk gives it the requisite sweetness of mother's milk, prevents dense clotting of casein, agrees well, and in infants is preventive of rickets.
10. Its diastase renders it digestive—constituting it, therefore, an aid to digestion as well as a most delicate food.
11. Freedom from coarse and irritating ingredients makes it the safest aliment in inflammatory conditions of disease.
12. It is, further, an admirable demulcent in irritable states of the throat.
13. Its greater solubility adapts it for administration in all kinds of nutritive or other drinks.
14. It may be mixed with dough, and beautiful rusks and other foods for invalids made thereby.
15. There is no such agreeable substitute for cod liver oil.
16. It is infinitely superior to all kinds of fermented malt, in which fermentation occurs of course at the expense of the desirable nutritive principles of the grain.
17. It is a delicious "tissue-forming," "force-producing," concentrated digestive food.

NOTICE WELL.

"It speedily improves the power of assimilation; and in cases of consumption, scrofula, and many of the wasting diseases of children a wonderful improvement in the patient's condition may be noticed after a fortnight's treatment."—*London Medical Record*.

"The Kepler Extract of Malt is deserving of special commendation. It is by far the best we have seen."—*Medical Times and Gazette*.

"It is as distinct an advance in therapeutics," summed up *The Lancet* in its report, "as was the introduction of Cod Liver Oil. It is one of our best nutritive and digestive agents for atonic dyspepsia and is undoubtedly useful in consumption and other wasting diseases."

Kepler Extract of Malt supplied to the Medical Profession in $\frac{3}{4}$ lb. and $1\frac{1}{4}$ lb. bottles, by all Chemists, at 1s. 8d. and 3s. each; retail, 2s. 6d. and 4s.

KEPLER SOLUTION OF COD LIVER OIL.

Nothing ever lowered the death-rate from consumption like Cod Liver Oil, and it is no doubt true that it would have proved efficient in far more cases than it has if it had been administered differently. If it be borne in mind that Cod Liver Oil is a food, it will appear as senseless to give it plain and between meals as it would be to give butter plain and between meals. In the latter case we should expect to derange the stomach, and in the former case the stomach has been deranged times out of number.

The proper way to take Cod Liver Oil is to take it as any other food oil is taken—that is, at meal times and with other food. This is a simple idea, but it means all the difference between good results and bad results from taking the oil.

Now, the Kepler Solution is a preparation prepared on physiological principles. In it the oil is dissolved in another food—viz., Extract of Malt. On this account the taste of the oil is hardly perceived, the preparation agrees perfectly with the stomach, improving the digestion, correcting constipation, lessening the night sweats, subduing the cough, and increasing the body weight, and all this by its marvellous nutritive powers. The greatest authority in England on phthisical affections declared, after twenty-one years' experience of Cod Liver Oil, that it was the only agent worthy of the name of remedy in consumption.

The British Medical Journal, referring to the Kepler Solution, pronounced it an ideal form for the administration of fat and a great advance on anything hitherto attempted in this direction, and, further, added that the production of the Solution of Cod Liver Oil is a great advance in the history of rational therapeutics.

The Lancet says: Many can take it easily who cannot take the oil."

The Medical Times and Gazette reports: "That there will probably be no difficulty either in taking or digesting it."

The Medical Press and Circular reports: "The Kepler Solution of Cod Liver Oil is the most valuable and easily digested of any form we have yet seen for administering Cod Liver Oil."

The Kepler Solution is a powerful, fattening and strengthening agent, especially adapted as a food for those with affections of the lungs. It is the choicest form of food for children with anæmia, scrofula and rickets, and the most natural food corrective in constipation. It is the purest and best of all forms of Cod Liver Oil food to prescribe for dyspeptic and fastidious patients.

Kepler Solution supplied to the Medical Profession, by all Chemists, in $\frac{3}{4}$ lb. and $1\frac{1}{4}$ lb. bottles, at 1s. 8d. and 3s. each; retail, 2s. 6d. and 4s.

Bynin and its Uses.

ALLEN & HANBURY'S were not only the first to manufacture and to introduce into this country a concentrated Malt Extract prepared *in vacuo*, but under Royal Letters Patent to combine the same with dietetic articles, familiar among which are Fry's Malted Cocoa, Hill's Malted Nursery Biscuits, Pascall's Golden Maltex and their own well-known Malted Food for Infants.

They have since been the first to introduce a LIQUID Malt Extract or Essence under the name of "Bynin."

So many are the advantages of this liquid preparation of malt that it is difficult to give at all a complete account within the limits of a comparatively small space. In what follows an attempt is made to briefly indicate the more important lines on which the use of Bynin is being conducted:—

Firstly—As an *Aid to Digestion*, and as a *Nutritive Agent*, Bynin is of the first importance, containing as it does, Diastase in its most active form.

Secondly—Mixed with *Milk*, Bynin has special properties as an adjuvant to its complete digestion, and pre-

vents the aggregation of the *casein* in large clots usually seen on the addition of acids. Thus, those who, after taking a draught of milk, feel a sense of discomfort over the stomach can, by the previous addition of Bynin, take it freely, and ensure its speedy digestion. *This is a great boon to nursing mothers.* If taken in the place of Stout or Porter it has the best results, the flow of milk being increased, and its quality much enriched, whilst at the same time it is rendered more easy of digestion by the child.

Thirdly—With *Porridge* and other *Farinaceous Food*, Bynin, when well mixed, at once starts a process of digestion, so that before the food can be taken into the mouth a large part has already been made assimilable.

Fourthly—As a *vehicle* for bitter or sour medicines, or chemical foods, Bynin has been found very useful, rendering reasonably palatable an otherwise nauseous or unpleasant draught.

One Fluid Ounce of Bynin represents One Ounce by Weight of Allen & Hanbury's Ordinary Thick Malt Extract.

Bynin is distinct from the thin weak Extracts of Malt, which are often acetuous and seldom uniform in strength.

The *Lancet* writes:—"An active malt essence,"... "We find that one ounce of Bynin will digest perfectly one pound of starch. This is a most favourable result, and coupled with the fluidity and pleasant flavour renders this preparation a most valuable one."

In Capsuled Bottles at 1s. 9d. and 3s. each; 16s. and 27s. per dozen to the Profession.

On the Valuable Tonic Action of Byno-Hypophosphites.

THE valuable tonic properties of BYNO-HYPOPHOSPHITES are due to the Hypophosphites of Iron, Lime, Potash, and Manganese, which it contains together with the well-known tonic alkaloids of Cinchona and Nux Vomica. In addition to these, it contains the valuable nutritive and digestive properties of Bynin (Liquid Malt). Thus the mixture is of great value as a tonic, since, besides acting as a general stimulant to the bodily system, it also aids in digestion and in the general nourishing of the tissues. There are two important points in reference to this preparation worth noting:—

First.—The alkaloids are present as they are found in the plants from which they are derived—that is, in combination with the natural acids—and in this condition are believed to be more readily assimilable. The quantity of each present is accurately measured—there being, *e.g.*, $\frac{1}{2}$ grain of strychnine to each ounce of the mixture.

Second.—Since sugar, as used in ordinary Syrups of Hypophosphites, is liable to cause dyspepsia or other troubles, it is here replaced by the valuable nutrient and digestive constituents of Bynin (Liquid Malt).

The *Lancet* writes, January 7th, 1893:—"This is an excellent preparation, in which are ingeniously combined the Hypophosphites of Iron, Lime, Potash, and Manganese, with the alkaloids of Cinchona and Nux Vomica in combination with the well-known active malt essence, Bynin, of the same firm. We have proved its efficacy as regards digestive power, while the tonic salts already indicated and the alkaloids of Nux Vomica were readily detected. The ash contained an abundance of Phosphates, part of which are of course derived from the hypophosphites originally present. Putting on one side its undoubted therapeutic value, attributable to the hypophosphites, the liquid Malt itself not only affords an excellent vehicle in the place of the ordinary syrup, but it obviously increases this value by reason of its digestive action."

Sold in Bottles (as Fig.) at 2s. 6d. and 4s. 6d.; 24s. and 41s. per dozen to the Profession.

OPPENHEIMER'S PURE CONCENTRATED LIQUORS
STANDARDISED, ACTIVE & RELIABLE

THEORY V. PRACTICE.

The finest theories, the most elaborate ideas are frequently confounded altogether when the practical trial ensues.

Correct in theory, the

Bi-Palatinoids of Carbonate of Iron

needed only the confirmation of clinical test. This has been supplied, and the increase of Hæmoglobin reported in the *Medical Annual* for 1893 places the administration of iron (as the *Lancet* says) "upon a firm and reliable basis."

Percentage increase of Hæmoglobin resulting from the use of two Bi-Palatinoids of Carbonate of Iron three times daily.

MEDICAL ANNUAL, 1893.

A REMARKABLE ENGLISH NATURAL CHALYBEATE

An Unrivalled Specific for ANEMIA, CHLOROSIS and GENERAL DEBILITY.

BRITISH MEDICAL JOURNAL, Feb. 11, 1893.

"The results of our analyses show that the water contains a large amount of iron, entirely in the ferric state, with a moderate amount of alumina and small amounts of lime and magnesia, combined mainly with sulphuric acid, as sulphates; and very marked amounts of the organic compounds derived from peat, the total iron amounting to 96.5 parts by weight per 100,000 parts by weight of the water. It has a pleasant acid taste entirely devoid of 'inkiness,' and it is probable that the peculiar manner in which the iron is held in solution and combination renders it capable of being readily absorbed and assimilated, and so far as our observations go the water does not affect the teeth nor produce constipating effects."

Vide "LANCET," Analysis, Oct. 24, 1891.

"Containing in each gallon more than 170 grains of iron as per-salt, in a nearly neutral solution along with certain peaty constituents."

THE HIGHEST AWARDS—INTERNATIONAL MEDICAL & SANITARY EXHIBITION; NATIONAL HEALTH SOCIETY'S EXHIBITION.

Samples Free to the Medical Profession on application.

ICHTHYOL has of late been universally used in the internal treatment of gynaecological diseases.

ICHTHYOL has great anodyne and astringent properties which make it especially adapted for use in gynaecology.

ICHTHYOL is best employed for external use in the form of an ointment with "Lanoline," and in "Tabloids" for internal administration.

ICHTHYOL "Tabloids" are readily taken, pleasant, and totally devoid of any odour or taste of Ichthyol.

WHOLE WHEAT FLOUR

WITH HYPOPHOSPHITES.

Prepared from the finest Wheats obtainable, ground on millstones in order to secure all the valuable properties of the grain, which are augmented by the Hypophosphites of Lime, Iron and Soda in definite proportions.

For the Nursery this bread is invaluable for building up a strong and healthy constitution, while Invalids will find it adapted to their requirements, as the bran is by special process treated in such a way as to render it medium of size and easy of digestion.

The Mineral Matter contained in the Flour is 1.69 per cent., Albuminoids 14.70, Carbohydrates 69.93. Strongly recommended for household consumption; meeting the demand for an excellent strengthening article of daily food of the highest dietetic value at a price which brings it within the reach of everyday requirements.

Sample, with analysis by Mr. E. GODWIN CLAYTON, F.I.C., F.C.S., free to the Medical Profession.

In bags, 7-lbs., 2s.; 14-lbs., 4s.; 28-lbs., 7s. 6d., from principal Grocers, or direct from the mill, 28-lbs., 7s. 6d.

CHLOROFORM.

(Duncan's.)
Prepared from Pure and Methylated Spirit. Also Blue Label Chloroform.

CHLORIC ETHER.

(Duncan's.)
This is a special preparation, quite different from Spir. Chloroformi P.B., perfectly miscible with water, and always of the same strength.

CASCARA SAGRADA CAPSULES.

Each Capsule equal to $\frac{1}{4}$, $\frac{1}{2}$ or 1 teaspoonful of Fluid Extract of Cascara Sagrada. They can also be had in combination with $\frac{1}{2}$ or 1 grain of EUONYMIN.

BLAUD'S PILL CAPSULES.

In 3 Sizes, equivalent respectively to 1, 2 or 3 Blaud's Pills.

These Capsules differ from all others, and have advantages which no others possess. They are made from Pure Unoxidised Carbonate of Iron by a special process. They are so prepared, that while they retain indefinitely the full efficacy of fresh Blaud's Pills, they have no tendency to become hard and insoluble by keeping, as the pills often do. They are small in size. Owing to the special process adopted by D., F. & Co., the 3 pill Capsule is hardly larger than a single Blaud's Pill. They are soft and flexible, and much more easily swallowed than pills. They can be had in combination with Arsenic, Nux Vomica, &c.

EASTON'S SYRUP CAPSULES.

Each Capsule equivalent to 20, 30 or 60 minims of Easton's Syrup.

SYRUP. HYPOPHOS. COMP.

(DUNCAN'S.)

Some time since we had several samples of well-known SYRUP. HYPOPHOS. COMP. analysed by Mr. D. B. Dorr, F.R.S.E., F.I.C., Ph.C., and in no one case did he find so large a proportion of the active constituents as is found in our preparation by a precisely similar analysis—which analysis is an absolute proof that the proportions of the different ingredients which we state are in our Syrup ARE ACTUALLY PRESENT. We, therefore, submit that from the use of our Syrup the best results may be confidently anticipated.

In proof of our statements we subjoin the report of Analysis referred to.

NOTE.—Our Syrup will darken in colour by lengthened keeping, and so must every Syrup which contains a similar proportion of FERROUS Hypophosphite.

In prescribing please say: SYRUP. HYPOPHOS. COMP., (Duncan's.)

The above may be ordered through any Wholesale or Retail Druggist. The Capsules and Syrup are sold and dispensed by

Messrs. ROBERTS & CO., 76, New Bond Street, LONDON, W.

Wholesale from WM. EDWARDS & SON, 157, Queen Victoria Street, London, E.C.

FLETCHER'S Autometric Stopper.

"A simple and ingenious device."—*The Lancet*.
"An excellent invention."—*Edinburgh Medical Journal*.

"Rapidly measured, and dispensing much facilitated."—*British Medical Journal*.

THIS ingenious contrivance combines the advantages of a permanent stopper, which can neither break nor get fixed, and a graduated measure, always ready for use, and reserved for the one fluid for which it is provided.

By loosening the stopper, and slightly compressing the air chamber attached, any required volume of liquid can be instantly withdrawn from the bottle. It being unnecessary to pour out any of the contents, no spilling or other waste of liquid can occur. Moreover, the inconvenience incidental to the use of the ordinary minim measure, with the necessary washing and frequent breakage, is entirely obviated.

Patent No. 9485

Entered 4th June, 1893.

MEDICAL MEN doing their own dispensing, and others who have frequent occasion to measure small quantities of liquid, will find **FLETCHER'S AUTOMETRIC STOPPER** invaluable for rapid and accurate work.

The **AUTOMETRIC STOPPER** is supplied in three sizes—to measure 30, 60, and 120 minims respectively—and is graduated into 5-minim divisions.

Price, complete with Bottle—1s. 3d., 1s. 6d., and 1s. 9d. each. Postage 3d. extra.

An Autometric Stopper is supplied FREE with each 1-lb. Bottle of our **CONCENTRATED LIQUORS**.

TO BE OBTAINED ONLY FROM

GUAIACOL-CARBONATE (HEYDEN'S), PATENTED.

Contains 91.5 per cent. Pure Crystallisable Guaiacol, chemically combined with Carbonic Acid.

This is, according to the BERLINER KLIN. WOCHENSCHR., 1891, No. 51, practically a non-toxic preparation of Guaiacol free from unpleasant odour, is tasteless and neutral. It has been proven of immense value in the treatment of Phthisis. (Vide BERLINER KLIN. WOCHENSCHR., 1892, No. 3). It is a solid crystalline powder, which is given in doses of 8 grains, increasing to 70 daily. In a short time its beneficial action is shown in the increase in weight of the patient, as much as 23 lb. in four weeks having been recorded. It does not in any way interfere with digestion and is agreeable to taste and smell.

CREOSOTE-CARBONATE (CREOSOTAL) (HEYDEN'S), PATENTED.

Contains 91 per cent. best Creasote from Beech-wood Tar, chemically combined with Carbonic Acid; is free from the toxic effects of the Creasote. Daily, 1 to 4 teaspoonfuls.

Similar good results have been obtained with this preparation, as was shown in a paper read by Dr. CHAUMIER at the Medical Academy at Paris on March 7th, 1893.

OLEO-CREOSOTE (HEYDEN'S). (PROV. SPEC. FOR PAT. ACC.)

With 34 per cent. best Creasote from Beech-wood Tar. This is also strongly recommended in the treatment of Tuberculous Diseases. These three medicines being non-toxic may be taken undiluted.

Medical Practitioners are invited to apply for further particulars to the Sole Consignees for the United Kingdom:—

ST. DALMAS' "LEICESTER" SELVEDGE BANDAGES.

"St. Dalmas' 'Leicester' Bandage is woven with a soft selvedge on each side, is light, porous, elastic, and strong, and is greatly superior to Calico."—*The Lancet*.

"The speciality of the 'Leicester' Surgical Bandages is that, in the process of making, the edges are so arranged that they will expand in exact proportion to the middle of the fabric, so that while the selvedge is perfectly firm, and does not unravel in wear or washing, it does not chafe or indent the most tender limb. These bandages can, with ease, be very evenly applied, and the pressure is equally distributed. They do not easily slip off; they are strong and elastic, and, being of open texture, are suited for use with starch or plaster of Paris."—*British Medical Journal*.

For all surgical purposes these Bandages are superior to the old kinds. Supplied in rolls of 6 yards, 2-in., 2½-in., and 3-in. wide—2/10, 3/4, 3/10 per dozen.

"THE LEICESTER" THORACIC & ABDOMINAL ROLLER BANDAGE

(Selvedged), 7 inches wide, price 3/- per roll of 12 yards.

"An efficient Roller Bandage has been brought out by MR. ST. DALMAS, of Leicester. It is intended for use in Thoracic and Abdominal cases, especially in Fracture of the Ribs and after Parturition. It is seven inches broad, of strong porous material, not elastic, but permitting of slight stretching, light and cheap. These qualities will recommend it to practitioners for the class of cases indicated, instead of the flannel roller in ordinary use."—*The Lancet*.

Superior to any other

Material known.

In Tins of One Yard each.

Kept in stock by Chemists,

In one-yard tins, 7½-in. wide, Belladonna, Capsicum, Pumiline (Stern's), or Opium Plaster, 2/- per tin. Roborans, Calefaciens, Saponis, Alb. or Strengthening Plaster, 1/6 per tin. Porous Plasters on Thin Waterproof, also on Stout Moleskin at same prices.

"This Felt holds as much Plaster as Leather, is warm, and at the same time is comfortable to the patient, and clean."—*British Medical Journal*.

"Porous Belladonna Plaster—(A. DE ST. DALMAS, Leicester). This is a Porous Belladonna Plaster spread on Scarlet Felt. Our experience of its use extends over several months, and we have no hesitation in saying that we believe it to be one of the best Belladonna Plasters ever made. It is very active, is not irritating, and gives plenty of support."—*The Lancet*.

"The Leicester' Porous Belladonna Plaster, spread on Scarlet Felt, is excellent. We have given it an extensive trial for a period of over six months, and have every reason to be satisfied with it. It is the best Belladonna Plaster we have seen for a very long time."—*London Medical Record*.

In 3-yard rolls, 16-in. wide, 8/- per dozen yards. In tins of 1 yard, 6-in. wide, 6d. per tin. In tins of 2 yards, 8-in. wide, 1/- per tin.

"The Leicester" Ribbon Plasters, on flesh-colour cambric, in japanned tins.

Six yards long.	½-in., ⅔-in., and 1-in.	1-in., 1½-in., and 2-in.	2-in. wide.
	5/- per dozen.	6/- per dozen.	8/- per dozen.

Metallic Cases containing 8 assorted widths, 6/- per case.

"The Leicester" Antiseptic Self-Adhesive Hospital or

Infirmiry Plaster. On Pure Calico, 8-in. wide, 3/6 per dozen yards; 1-yard cases, 6d. per case; 6-yard tins, 1/10 per tin.

On Holland, 8-in. wide, 4/- per dozen yards; 1-yard cases, 6d. per case; 6-yard tins, 2/1 per tin. The pure Calico is woven specially, and will tear into strips of any required length if snipped with scissors.

"The Leicester" Emp. Belladonna, on Moleskin, Swansdown, and Felt. Perfectly reliable.

"We can particularly recommend the Belladonna Plaster."—*Provincial Medical Journal*.

"THE LEICESTER" SALICYLIC ACID PLASTER, 38 per cent., on Pink Waterproof, 3s. 6d. per yard, 7-in. wide, and EMP. CERAT-SAPONIS CUM SALICYLIC ACID, 10 per cent. (for Eczema), on Cotton Cloth, 2s. 9d. per yard, 8-in. wide. "THE LEICESTER" MENTHOL PLASTER, on Felt, 2s. 6d. per yard, on Cotton Cloth, 2s. per yard, 8-in. wide.

"The Leicester" Emp. Creolini (containing 5 per cent. of JEVES' CREOLIN).

The marked success which has attended the use of JEVES' CREOLIN, in an immense variety of surgical cases, has induced A. DE ST. DALMAS & Co. to prepare a Plaster which possesses the well-known advantages of "THE LEICESTER" SELF-ADHESIVE STRAPPING, with the antiseptic, styptic, and deodorant properties of Messrs. JEVES' preparation.

Supplied 8-in. wide } In 6-yd. Rolls, on Pure Calico, 3/6; on Strong Sheeting, 5/3 per doz. yds.
In 6-yd. Tins, " " 2/- " " 3/- per Tin.

"The Leicester" Patent Wound and Bed Sore Pads.

Prepared with a pad of absorbent cotton-wool in the middle, and a self-adhesive border. Very useful for dressing wounds, ulcers, &c., and for shielding diseased surfaces from friction. Perfection for Bed Sores. Made all shapes and sizes, in boxes of one dozen.

Can with ease be applied by patients ignorant of the science of bandaging.

An ARMY SURGEON writes:—"I think the idea is a capital one, and have no doubt but that it will be the first field dressing of the future."

Three dozen, assorted (sizes inside the border: 2 × 2, 2 × 3, 3 × 3, 3 × 4, 3 × 5, and 4 × 4 inches—six of each), on Holland 2/6; on Waterproof Sheeting, 3/-.

The above can be obtained from all Wholesale Houses.

Manufactured by A. DE ST. DALMAS & CO., Leicester
Makers by appointment to the British Government.

NEW UTERINE DILATOR.

Suggested by T. F. GARDNER, L.R.C.P., M.R.C.S., &c.

Price, 21/- Nickel-plated, 23/6

Extract from *The Lancet*, January 23rd, 1892:—"The accompanying engraving represents a new dilator designed by me, on the principle of my phimosis dilator figured in *The Lancet*. The advantages of the dilator are its simplicity of action and its applicability for different uses. Not only does it allow the cervical canal to be evenly dilated throughout its whole extent, but by an arrangement at the end of the handles of a rack and screw, working on a scale marked in eighths of an inch, the operator may correctly estimate the amount of dilatation he is producing, and may also keep the blades fixed by the same rack and screw while he makes his application to the interior of the uterus. In many cases of abortion it is necessary to dilate the only partially-opened os uteri in order to abstract the ovum or placenta. In such cases the dilator is of particular use, as it can be employed to first dilate the os uteri and the cervical canal, and then as an ovum forceps, to remove the uterine contents. The instrument has been made by Messrs. Arnold and Sons."

THERMOMETER
IN CASE.
Post Free,
3/8.

The "Newton-Nixon" Thermometer Case was designed by Mr. Nixon after long experience with Thermometers in Hospital Wards. It will save 75 per cent. of breakages, which usually occur when the Thermometer is being used out of its receptacle."

The HOSPITAL of Feb. 4th, 1893, says: "After a short trial of the 'Newton-Nixon' Case, we feel we can conscientiously recommend its adoption by all who are interested in the reduction of the annual loss incurred by the breakages of Thermometers."

THE LANCET of Jan. 21st, 1893, says: "This useful little contrivance is the invention of Mr. Newton-Nixon, of University College Hospital."

See also the BRITISH MEDICAL JOURNAL of Feb. 4th, 1893.

BELFAST LINEN CATHETERS AND BOUGIES,

ARE FLEXIBLE, DURABLE, AND HAVE A VELVETY SURFACE.

These Catheters and Bougies are made of strong Belfast Linen Thread, carefully woven and covered by a new method with extremely elastic gum. The process of manufacture occupies many weeks, and the goods are so thoroughly prepared that they are flexible and durable to an extent hitherto unknown. The advantage of combining strength, flexibility, and a smooth, polished surface in a catheter or bougie is apparent to anyone familiar to the article. The danger from using an instrument liable to crack or break at any time is very serious, but with the Belfast Linen Instruments this cause of danger is quite removed; the flexibility of the material is so marked that but little difficulty is ever experienced in use, and as they are made with cylindrical, olive, or mercier points their adaptability to all cases is, of course, considerably enhanced.

A NEW CATHETER TIP (ANTISEPTIC, NON-BREAKABLE.).

Heretofore in all Flexible Catheters, whether with woven or cut eyes, at least one quarter of the body of the tube is displaced where the eye occurs, and the Catheter is consequently made weakest at the very part where the most strength is required. This general defect has been overcome in the Metal Eye Belfast Linen Catheters, by attaching a properly constructed German Silver Eye Piece, which is firmly woven inside the tip of the Catheter, so that it not only thoroughly protects the weak part about the eye, but makes the head of the Catheter perfectly solid and antiseptic. In the Olive and Conical patterns additional stability is given to the slender points by means of a catgut inside, which extends from the metal eye to the extreme tip, and makes the points solid and firm.

URINALS FOR MALE OR FEMALE.

OF FRENCH VULCANISED INDIARUBBER.

Finding the materials of which articles used in cases of incontinence of urine were made in many respects objectionable and very offensive in use, from their absorbent nature, and from their liability to be affected by change of temperature—becoming hard and rigid in cold, and soft and sticky in hot weather, or from contact with the body,—I have introduced a very superior kind, made of solid Vulcanised Indiarubber, of the best quality, which is quite unaffected by change of temperature, and, from being non-absorbent, is easily cleansed.

Medical men may confidently recommend these goods, as they are made especially for me from my own patterns, and are of very superior quality and manufacture, and have in all cases given the most entire satisfaction to those who have used them, as the most perfect apparatus of the kind.

The prices quoted are to the profession only, and patients will not be supplied at the same rate.

Made also so as to enclose scrotum and for bed use.

EDWARD HUXLEY, 13, Old Cavendish Street, Oxford Street, W.

Post Office Orders payable at Vere Street. Professional discount 30 per cent. where not marked "net." Medical men, being charged the lowest price, are requested to send their orders direct, as there is no margin left as a profit for Agents. Cheques crossed London and County Bank.

THE GROVE, JERSEY.

Proprietor: F. NEEL GAUDIN, M.P.C., M.R.C.S.E., L.S.A. A HOME for a limited number of Ladies and Gentlemen of the upper classes afflicted with Nervous and Mental Diseases.

It is healthily situated on the high grounds 2 miles from St. Heliers, commanding extensive views over St. Aubin's Bay, and comprises a Park of 11 acres, besides gardens and farm land, and a mansion of handsome proportions in which all is arranged with a view to the comfort and privacy of home. The Grove is especially suited to those whose constitutions are delicate, or temporarily reduced through Alcohol, Drugs, Hysteria, or Nervous and Mental Diseases.

The Amusements and Occupations include Tennis, Boating, Billiards, Gardening, Farming, &c. Sea-bathing (hot and cold). Private machines on beach ten minutes walk.

Associated and single rooms, or self-contained suites of 2, 3, or 4 rooms. Voluntary Boarders and friends of patients may be accommodated. Horse and carriage exercise.

For terms and further particulars (descriptive, legal, means of access, etc.), apply to CHARLES CALDECOTT, M.B., B.S.Lond., M.R.C.S.Eng., Resident Medical Superintendent, The Grove, Jersey.

FLOWER HOUSE, CATFORD, S.E.

A Sanatorium of the highest class for the treatment, and cure of gentlemen of unsound mind. Apply to Dr. MENCIER, Resident Medical Superintendent.

N.B.—Under the New Act voluntary boarders can be received, on their own personal application.

City of London Asylum, near Dartford, Kent.

PRIVATE PATIENTS are received at a uniform charge of £1 ls. per week for each person, to include all things necessary except clothing.

The Institution is situated on an elevated site between Dartford and Greenhithe, and is about 16 miles from London on the S.E.R.

The Estate comprises 140 acres. Cricket, Tennis, Billiards, Dances, and other amusements are amply provided.

For particulars apply to Dr. ERNEST WHITE, Medical Superintendent.

BOREATTON PARK.

This Private Asylum which was founded by the late W. H. O. SANKEY, M.D., for the reception of a limited number of ladies and gentlemen mentally afflicted is now conducted on the same lines by his son, R. H. O. SANKEY, M.B., late Medical Superintendent of the Warwick County Lunatic Asylum.

The Mansion stands in its own grounds, handsomely laid out in gardens and terraces, in the middle of an extensive and picturesque Park in which are some 70 head of deer, and commands a magnificent view of Welsh mountain scenery.

The Asylum is situated about ten miles from Shrewsbury, and within easy distance from Baschurch Station, G.W.R. Letters and telegrams should be addressed to Dr. SANKEY, Boreatton Park, Baschurch, Salop.

THE COPPICE, NOTTINGHAM. HOSPITAL FOR MENTAL DISEASES.

President: The Right Hon. The EARL MANVERS.

This Institution is for the reception of a limited number of Patients of both sexes, of the Middle and Upper Classes only, at moderate rates of payment. It is pleasantly situated on an eminence a short distance from Nottingham, and commands an extensive view of the surrounding country, and from its singularly healthy position, affords every facility for the relief and cure of those mentally afflicted. Particulars as to terms, &c., may be obtained from Dr. TATE, the Medical Superintendent.

St. Andrew's Hospital for MENTAL DISEASES, Northampton.

For the Upper and Middle Classes.

President: The Right Hon. The Earl SPENCER, K.G.
Chairman of the Committee of Management:
The Most Hon. The Marquis of NORTHAMPTON, K.G.

The Institution is pleasantly situated one mile from the Northampton Station of either the London and North-Western or Midland lines, being 1½ hours from London, and is surrounded by more than 100 acres of pleasure grounds. The terms vary from 25s. a week upwards, according to the requirements of the Patients, who can have, if desired, private rooms in the Hospital, and in detached Villas on the Grounds, and at Moulton Park, a branch establishment two miles from the Hospital, but connected by telephone. Special attendants, horses, carriages, &c., are provided if required. There are also seaside establishments in North Wales to which Patients may be sent. For further information apply to the Medical Superintendent.

West Kirby, on Estuary of the Dee.

Highly recommended for Invalids. Specially suitable for phthisis and chest diseases, and particularly in strumous conditions. Mild and equable climate, rivalling as a winter resort any of the south-coast watering places. Lowest rainfall in the British Isles. Beautiful drives, walks, and the finest golf-links (Hoylake) in England. Safe shore for bathing and boating. Easy of access from Liverpool.—Enquiries to J. H. WILD, Grange Road.

Warneford Asylum, Oxford.

—This Asylum, for the care and treatment of the Insane of both sexes of the middle and upper classes, is pleasantly situated on Headington Hill, near Oxford, and has been recently enlarged. The grounds are extensive, and cricket, tennis, billiards, dances, and other amusements are amply provided. There are now vacancies for patients at moderate charges. For particulars, apply to the Medical Superintendent, Dr. BYWATER WARD.

Ashwood House, Kingswin-

ford, Staffordshire.—Private Asylum and Home. Picturesque grounds of 40 acres in extent. Patients have all home comforts; congenial occupation is encouraged: carriage exercise, billiards, lawn-tennis and a variety of amusements provided. Private suites of apartments and special attendance if desired. Boarders received. Terms moderate. Proprietors—Drs. PEACOCK and PETERSEN.

St. Luke's Hospital,

London, E.C.

ESTABLISHED 1751.

This Hospital was established for the treatment of mental diseases of the upper-middle, and middle classes for whom there is no statutory relief. Preference is given to acute cases, and these are admitted either gratuitously or on payment of a weekly sum varying from 14s. to 30s., according to the circumstances of each, and chronic cases can only be admitted at the higher rates. Patients are eligible for admission from any part of the United Kingdom. Forms of application may be had from, and enquiries addressed to, the Secretary at the Hospital.

PERCY DE BATHE, M.A.,
Secretary.

Bristol Dispensary.
The Committee are prepared to fill up a vacancy in the Medical Staff of this Institution. Candidates must possess a diploma in Surgery from the Royal College of Surgeons of England, Scotland or Ireland, or from the Faculty of Physicians and Surgeons of Glasgow, and in addition to such diplomas in Surgery must possess a legal qualification to practise Medicine in Great Britain and Ireland, and be duly registered according to the regulations of the Medical Act.

The gentleman appointed will be required to commence his duties not later than the 1st August next, and must give his whole time to the service of the Institution in such way as may be directed. At the end of the first year of service the Committee may give permission to take up private practice.

For salary and other particulars apply to the Secretary, to whom testimonials must be sent, on or before the 7th July. Printed card with address should be enclosed.

By order of the Committee,
Bristol Dispensary, EDWARD STOCK,
Castle Green, Secretary,
June 24th, 1893.

HOUSE SURGEON AND SECRETARY.
Tunbridge Wells General
HOSPITAL.—54 Beds.

Wanted, a RESIDENT HOUSE SURGEON. He must be unmarried, a Member of the Royal College of Surgeons, London, Edinburgh, or Dublin, and a Licentiate of the Royal College of Physicians, London, or of the London Company of Apothecaries, or a Graduate in Medicine of a British or Irish University.

His duties will be to attend, under the direction of the Physicians and Surgeons, the in-patients as well as the out-patients coming to the Hospital. He will also be required to give Lectures to the Probationers and to act as Secretary.

No private practice allowed, and a month's notice to be given on either side to terminate the engagement. Salary £100 per annum, together with board, furnished apartments in the hospital, gas, firing, and attendance.

Applications, with testimonials and certificate of registration, must be sent to the Assistant Secretary at the General Hospital, on or before Thursday, 6th July, 1893.

The election will take place on Wednesday, July 12th, 1893, at 3 o'clock p.m.

H. HARRIS,
June 23rd, 1893. Assistant Secretary.

Essex and Colchester General HOSPITAL.

Wanted, a HOUSE SURGEON agreeably to the following Rule:—

"No person shall be eligible to fill the office of House Surgeon unless he be legally qualified to practise Medicine and Surgery, and be duly registered under the provisions of the Medical Act. He will be required to bring testimonials of his moral character. He must be a single man, or widower without a family, and shall reside in the Hospital; he shall not resign his office without giving three months' notice in writing to the Committee."

A Dispenser assists the House Surgeon at the Hospital daily.

The House Surgeon will be required to give Lectures to the Probationers. All further information as to the duties may be obtained upon application to the Secretary.

Candidates for the appointment are required to send their names and original testimonials, of recent date (not exceeding five), to the Committee, before twelve o'clock (noon), on Saturday, the 8th of July, after which time no person can be admitted as a candidate, nor can any testimonials be received.

Salary £100 per annum, with board and lodging in the Hospital.

By order, CHAS. E. BLAND,
Colchester, 19th June, 1893. Secretary

Croydon General Hospital.

APPOINTMENT OF HOUSE SURGEON.

The Committee require the services of a single gentleman for the above office. Candidates must possess Medical and Surgical qualifications. The gentleman elected must be prepared to hold the appointment for two years. The salary is £100, increasing £10 per annum up to £120, with board and residence in the Hospital.—Applications, accompanied by copies of testimonials (not returnable), to be sent to the Hospital on or before June 29th. Selected candidates only will be required to attend when the election takes place. A personal canvass of the Committee is prohibited.

J. JONES, Secretary.

The Hospital for Sick CHILDREN, Great Ormond Street, W.C.

There will be a meeting of the Joint Committees on Wednesday, 28th June, to elect an ASSISTANT PHYSICIAN.

Candidates, who must be Fellows or Members of the Royal College of Physicians of London, are invited to send in their applications with only three testimonials, written especially for the purpose, on or before 12 o'clock on Tuesday, 27th June.

All candidates will be required to attend before the Joint Committees on Wednesday, 28th June, at 5 p.m. precisely.

ORIENT COMPANY'S YACHTING CRUISES

by the steamships "CHIMBORAZO," 3,847 tons register, "GARONNE," 3,876 tons register, and "LUSITANIA," 3,877 tons register, leaving London as under:—

For NORWAY,

28th June for 29 days. | 2nd Aug. for 24 days.

15th July for 27 days. | 16th Aug. for 15 days.

Calling at Leith two days later.

The steamers will be navigated through the "Inner Lead," i.e., inside the fringe of islands off the coast of Norway—thus securing smooth water, and will visit some of the finest Fjords. On the first two trips the North Cape will be reached while the sun is above the horizon at midnight.

For SICILY, GREECE, the LEVANT & CRIMEA, leaving 2nd September, for 46 days.

For the MEDITERRANEAN,

leaving 12th September, for 31 days.

For MADEIRA, TENERIFFE, WEST INDIES, AZORES, &c.

leaving 22nd of November, for 65 days.

The Steamers are fitted with electric light, electric bells, hot and cold baths, &c.

Managers, F. GREEN & Co., and ANDERSON, ANDERSON & Co., Head Offices, Fenchurch Avenue, London.

For passage apply to the latter firm, at 5, Fenchurch Avenue, E.C., or to the West End Branch Office, 16, Cockspur Street, S.W.

Surgery and Consulting Room

to be LET at Notting Hill. Good position. Rent 10s. per week.—Apply, E. B. HEAD, 52, Lancaster Road, W.

Next sailings—July 1, 15, 29; August 12, 26; September 9.—All applications for Berths to be made to the Yachting Steamer "Midnight Sun" Passenger Office, (4, Lombard Street (Tel. Add., Tourist), Newcastle-on-Tyne. Write for Itineraries.

Wanted, 2 small Unfurnished

ROOMS, one to be on Ground or First Floor as Surgery, between Sloane Street and Earl's Court, by Dental Surgeon (L.D.S. Eng.), in medical man's or private house, with use of waiting-room between 10 and 5. Non-resident.—M., 51, Frithville Gardens, W.

Good opening for Medical Man.

—To Let, a healthily situated eight-roomed VILLAGE RESIDENCE with gardens and out-buildings (stable, coachhouse, etc.). Near railway station. No doctor within six miles.—Further particulars from Wm. MITCHINSON, Bride Hill, Kirkbride, Sillioth, Cumb.

Splendid Site for a Profes-

sional Man. Formerly occupied as such. Freehold to be sold.—1, Berkeley Gardens, Campden Hill, Kensington.

Gatherley Castle, near

Richmond, Yorks.

This large stone, modern built Castle, eminently suited for a Sanatorium or Private Asylum, situate within a mile of a station and commanding magnificent views, will be Sold by Auction on the 15th July, the reserve being a fraction only of its cost of erection. Nearly 700 acres of neighbouring land will also be sold at the same sale.—Particulars, plan and photograph, of Messrs. WALKER, Bedale, Yorks, of Messrs. WETHERELL, Richmond, Yorks, or of Messrs. RYE & BYRE, 16, Golden Square, W.

FOR VARICOSE VEINS AND WEAKNESS.

Very superior SURGICAL ELASTIC STOCKINGS and KNEE-CAPS, on a new principle, pervious, light in texture, and inexpensive, yielding an efficient and unvarying support, under any temperature, without the trouble of lacing or bandaging. Likewise a strong low-priced article for hospitals and the working classes.

Abdominal Supporting Belts, for ladies' use before and after accouchement, are admirably adapted for giving adequate support with extreme lightness—a point hitherto little attended to.

Instructions for measurement, and prices on application, and the articles sent postage free from the manufacturers,

 Trustworthy Locum Tenens and Assistants can be had at a few hours' notice.

N.B.—No charge made to Purchasers.

Notice.—Mr. J. C. Needes

with an experience of over a quarter of a century, is in an exceptional position to give intending purchasers independent information concerning most practices and partnerships. Those Investments in the following List marked with an Asterisk are well known to him, having been purchased through his Office by the present Incumbents years ago, and in many other cases, introduction can be given to gentlemen who have taken charge of the practices during the absence of the incumbents.

Country town (near the sea) in

the West of England. Average receipts during last three years nearly £800 per annum, including appointments, £250. Duties easy; very little midwifery or night work. A horse not required. Good house in the best part of the town, with, garden, stabling, &c. Rent £50. Premium £750.

Within 100 miles of London.—

Absolutely unopposed PRACTICE, doing at the rate of about £700 per annum. Appointments yield £180. One cob sufficient for the work. Railway station in place, and plenty of society in the neighbourhood. Good house at a low rental. Premium £625.

A large Cash Practice, averaging

over £1,100 per annum for the past three years, and situated within a mile of Charing Cross, is for disposal. An Assistant required, but a horse not necessary. There is a private residence in a good position about two minutes walk from the surgery. Premium £1,200. Three months introduction.

***Fifteen miles from Town.—**

An old-established PRACTICE, averaging over £700 per annum, including appointments, situated in a good-class locality, offering exceptional prospect for future increase. No other medical man in the place. Visiting fees 2s. 6d. to 10s. 6d. One horse required. The residence is held at a rental of £60 per annum. Premium £900.

£1,000 a-year—Within

10 miles of London. A mixed private and cash PRACTICE (old-established and held by the present Incumbent 10 years), offers for negotiation. Appointments yield £200. A horse not required. Good house with bath-room, &c. Rent £45.

Easy Terms—An inexpensive

worked PRACTICE averaging nearly £800 per annum for the last 3 years, can be secured for the moderate premium of £400. £200 cash and £50 every six months, secured. Situated in a Town of 90,000 inhabitants in the North of England. Fees for consultation and medicine, 2s. to 2s. 6d. Visits 2s. 6d. to 3s. 6d. No midwifery under a guinea. Thirty cases yearly. Neither horse nor assistant required. Rent of house £40 per annum.

£1,500 a year.—Home Coun-

ties.—In an attractive district within 30 miles of London, an old-established good class PRACTICE is for negotiation. The receipts have averaged the above amount for many years past, and the expenses are distinctly moderate. An assistant not required. Visits 3s. 6d. to £1 1s. Very little midwifery. Commodious family residence. A partnership introduction of 6 or 12 months given.

Apply **J. C. NEEDES**, 1, Adam Street, Adelphi, W.C.

Telegraphic Address—"Acquirement, London."

MEDICAL TRANSFER & PARTNERSHIP,

32, LUDGATE HILL.

Messrs. Orridge and Co.,

Medical Transfer Agents, Referees, and Valuers, in offering their services to the Profession, have pleasure in referring to the fact, that for about HALF A CENTURY the name of Mr. Orridge has been known in the advertising columns of the leading Medical Journals, that a very large proportion of the Medical men throughout the kingdom have confided their interests in the adjustment of Partnerships and Transfers to their care.

Purchasers who will communicate (confidentially) the nature and extent of their wishes regarding investments can be apprised of appropriate opportunities as they occur.

On occasions where advice is required in forming a correct conclusion as to the worth or eligibility of a Practice, Messrs Orridge & Co. trust that their familiarity with the various contingencies that govern value will be found of considerable service to those by whom they may be employed.

N.B.—No charge is made to purchasers.

North of England.—Partner-

ship introduction for 12 months. Good middle-class PRACTICE. Receipts £1,000 yearly. Situate in a good sized town, with good transferable appointments the practice offers a safe investment. Particulars on application. About one year's income required.—Apply, Messrs. ORRIDGE & Co.'s Offices, 32, Ludgate Hill.

Partnership.—Cash Practice.

London. Situated in a thickly populated locality. Income must be prepared to invest £500 to £600.—Apply at Messrs. ORRIDGE & Co.'s Offices, 32, Ludgate Hill.

London, N.—Middle-class

PRACTICE. Easily worked. No midwifery or night work. Income about £850 to £900 yearly. Good residence. About £350 required.—Apply at Messrs. ORRIDGE & Co.'s Offices, 32, Ludgate Hill.

Elliott, Son & Boyton, 6, Vere

Street, Cavendish Square, are the best local Agents for Houses and Consulting Rooms in Harley, Wimpole, Welbeck, Queen Anne, and other leading streets off Cavendish and Portman Squares. Their old-established connection affords them special knowledge and much exclusive information concerning properties in the neighbourhood.

SCOTTISH MEDICAL AGENCY.

JAMES LOGAN, 95, Bath Street, Glasgow.
 Medical Practices transferred and Partnerships Arranged, Assistants Supplied, Debts Collected, &c.

1.—Transfer or Partnership, with view to transfer.—Private Asylum in a favourite part of the South of England, within easy access of London; licensed for 30 patients. Capital necessary, £1,000 to £2,000.

2.—Private Asylum, licensed for 50 patients, in immediate proximity of large wealthy town. North.

3.—Asylum.—Home Counties.

—Licensed for a few females. Goodwill and license for transfer.—Apply to

Mr. STOCKER, 8, Lancaster Place, Strand, W.C.

THE SCHOLASTIC, CLERICAL AND MEDICAL ASSOCIATION. LIMITED.

MEDICAL DEPARTMENT.

This Association was established in 1880 as a Limited Liability Company under the direction of professional men, its object being the creation of a RESPONSIBLE and THOROUGHLY TRUSTWORTHY Agency. The Medical Department has met with so great success that it has been found necessary for one of the Managing Directors (Mr. G. B. Stocker) to devote his whole attention thereto; and he has the assistance of an experienced Medical Accountant and a large staff of clerks. Further, a Board composed entirely of gentlemen of high standing in the Medical Profession has been appointed, and to them matters of dispute and complaint are referred.

The Association undertakes the SALE of PRACTICES and PARTNERSHIPS; the Introduction of LOCUM TENENS and ASSISTANTS; MEDICAL ACCOUNTANCY (by a duly qualified Medical Accountant); INVESTIGATION and VALUATION of Practices, &c.; POSTING BOOKS and sending out Bills, &c., &c.

A Pamphlet relating to the Medical Department, with the names of the "Directors" and the "Medical Advising Board," and terms, will be sent on application to—Mr. G. B. STOCKER, MANAGING DIRECTOR, 8, LANCASTER PLACE, STRAND, W.C.

Telegraphic Address—"TRIFORM, LONDON."
