The BRITISH MEDICAL JOURNAL, reporting on Maltine with Cod Liver Oil, states:—

"The therapeutic value has been so thoroughly recognised and is so well known. . . . Patients who are unable to tolerate the purest and most carefully prepared cod liver oil can readily digest and assimilate it when combined with Maltine. . . . The admixture is complete and permanent, and the consistence is very convenient. . . . As regards taste, that of the cod liver oil is almost entirely concealed, and what suspicion there is of it is not at all unpleasant. We can recommend it on the ground of its perfect admixture, the ease with which it is assimilated, the good quality of the cod liver oil, and the value in diastase of the Maltine."

The MEDICAL PRESS AND CIRCULAR reports:—

"The oil is intimately blended with the malt, and fulfils all the conditions of perfect digestion. Maltine is an excellent medium for the oil, besides aiding materially in its digestion. It has the additional merit of converting it into an elegant and palatable preparation."

"Maltine" with Cod Liver Oil is now generally prescribed when the plain oil disagrees, as it perfectly realises the essential conditions for the successful exhibition of the oil. In the first place, there is no tinkering with this invaluable food. The fact must be admitted that the specific action of cod liver oil is not easily explicable, and cannot be empirically assigned to any one of its constituents. "Cod Liver Oil," as Winckler said, "is an organic whole, differing from all other fixed oils." We make then, no attempt to eliminate any of its principles, but use the best and purest oil obtainable, which we combine with a pleasant food. That the oil should be made palatable is the patient's proviso, and the physician desires it to be in such a condition that it will not interfere with stomach digestion, but will be readily absorbed and assimilated. A trial will convince anyone that both these points have been carefully regarded in the preparation of "Maltine" with Cod Liver O.I. The most fastidious have been able to take it with the regularity necessary to ensure permanent improvement. Experience has shown the futility of the old time artifices for covering the taste of cod liver oil, but in combining it

with a palatable food, we have done what the flavouring ingredients were unable to effect, and "Maltine" with Cod Liver Oil is most agreeable, and patients do not tire of its use.

By the employment of suitable mechanical processes, and by using the malt extract that is renowned for its diastasic superiority, the oil is molecularly incorporated with the "Maltine," and perfect subdivision of the oil globules is effected. The "Maltine" shields the oil in its passage through the stomach and prevents it from interfering with digestion, or causing nausea and eructations.

*In this finely divided state, the oil is ready for immediate absorption.*

TO PROFESSION. 38s. per dozen, carriage paid, against Cheque.

ARMBRECHT, NELSON & CO., Duke Street, Grosvenor Sq., London.

THROUGH CHEMISTS, GROCERS, WINE MERCHANTS, OR DIRECT.

"Several preparations of Coca Wine have been placed before the public, but we unhesitatingly accord to the above the first place. Their Coca Wine is more suited to the English palate than some of the continental preparations, which are too sweet to be palatable, and which destroy their otherwise tonic and invigorating qualities by deranging the digestive system or creating nausea. The value of Coca Wine in conditions of debility is too well recognised to require comment, and we need do no more than say that after a very careful trial of Messrs. ARMBRECHT, NELSON & Co.'s Wine we can speak most highly of it as a sound and invigorating tonic, and can recommend it most unhesitatingly."—*Journal of Laryngology and Rhinology*.

The finest tribute ever accorded to sterling merit is contained in THE LANCET of August 8th, 1891, pages 307-8, which embodies the "Report of THE LANCET Special Commission on Natural Mineral Waters," "Johannis"—the subject of the Report—being selected from amongst the Natural Mineral Waters of the world as worthy of this distinction.

# "Johannis"

## THE KING OF NATURAL TABLE WATERS.

"The Water mixes well with Wines and Spirits, the peculiar softness which the Natural Gas lends to the taste rendering it admirably adapted for the purpose."—THE LANCET.

"The remainder of a bottle, opened and recorked, exhibited marked effervescence after four days. The Carbonic Gas is exceptionally pure, being the Natural Gas collected from the Springs."—MEDICAL ANNUAL.

### MIXES EQUALLY WELL WITH WINES, SPIRITS, OR MILK.

HEALTH says:—"JOHANNIS" is a palatable water of the highest degree of purity. It is perfectly adapted for ordinary drinking purposes, and abroad English visitors and residents should insist on having 'Johannis' water, thereby avoiding all risk of typhoid fever."

SHEFFIELD MEDICAL JOURNAL says:—"Being devoid of organic impurity, 'Johannis' can confidently be recommended as a table water for general use."

HOME JOURNAL (New York) says:—"Johannis" is pure, therefore healthful; it is clear as crystal, thus pleasing to the eye; it is lively and sparkling, therefore refreshing to the taste."

VANITY FAIR says:—"If you want a good wholesome table water, try 'Johannis.' If you have tried it, you do not want a good wholesome table water, for you will have had it."

COURT CIRCULAR says:—"Of the many table waters now before the public, 'Johannis-Brunnen,' or 'Johannis,' as it is more commonly called, is the one we venture to predict that will eventually be the most consumed."

NEW YORK HERALD says:—"Delicious Table Waters."

Charged entirely with its own Natural Gas.

### PROMOTES APPETITE, ASSISTS DIGESTION, & PROLONGS LIFE.

The GAS consists, it is evident, of practically pure CO<sub>2</sub>, viz., 99.98 per cent.

"So enormous, in fact, is the Quantity of Gas evolved from the Spring, that a considerable proportion of it is pumped under pressure into steel cylinders or tubes, which are made to contain liquid carbonic acid equal to many hundred gallons of gas, and actually sold to the Proprietors of Springs which are less favoured by Nature as regards the yield of gas."—THE LANCET.

The merits and health-giving qualities of this water are now being recognised by the public and the medical profession. The springs at Zollhaus are practically inexhaustible, both as regards water and gas, and, in order to meet the daily-increasing demand the bottling machinery and stores are being doubled in size.

**CAUTION.**—If you drink a natural mineral water, obtain a guarantee that it is bottled with its own natural gas, as the purity of the gas is an important element in the healthful action of the water. The proprietors of Johannis Water, who own the freehold of the springs, can give this guarantee.

The resources of the Johannis Spring are more than sufficient to yield  
**80,000,000 BOTTLES**

per annum of Water charged with its own Carbonic Acid Gas, absolutely pure and natural.
