## MACNAUGHTON-JONES' DISEASES OF WOMEN.

Some notices of the SEVENTH, and Greatly Enlarged, Edition. Price 15s.

"Un grand succès . . . riche en indications pratiques pour le diagnostic et la technique opératoire . . . précieux secours à ses compatriotes, étudiants, et praticiens . . . il sera consulté avec fruit par tous ceux qu'intéresse le mouvement gynécologique."—Professor Pozzi, in *Revue de Gynécologie*.

"Undoubtedly deserves a high rank, not only among English, but among all text books, whether French, German, or English . . . Whoever takes it up for perusal will find a complete survey of the position of the gynaecology of the day, and each separate chapter is so thoroughly worked out that even the specialist will possess in this work an excellent one for reference."—Professor Landau, in the *Deutsche Medizinal-Zeitung*.

"Undoubtedly the most up-to-date work of the kind that has so far been published in England."—*Dublin Journal of Medical Science*.

"A manual which is a credit to the British school of Gynaecology. . . An epitome up to the date of its publication of the teachings and opinions of the greatest living gynaecologists."—*British Gynaecological Journal*.

LONDON: BAILLIERE, TINDALL & COX.

NOW READY.

## LECTURES ON THE ACTION OF MEDICINES.

Being the Course of Lectures on Pharmacology and Therapeutics delivered at St. Bartholomew's Hospital during the Summer Session of 1896.

By T. LAUDER BRUNTON, M.D., D.Sc.Edin., LL.D. Hon. Aberd., F.R.C.P., F.R.S., Physician to St. Bartholomew's Hospital. 8vo, 10s. 6d. net.

MACMILLAN & CO., LTD., London.

PUBLISHED 1894.

teenth Edition, much enlarged and Revised up to date, Price 12s. 6d.

## SQUIRE'S COMPANION

TO THE

## BRITISH PHARMACOPÆIA.

"The contents extend far beyond the limits of the Pharmacopœia, as a very large number of unofficial drugs and preparations are considered with the same care and minuteness as the others."—*British Medical Journal*, June 16, 1894.

"It is considerably ahead of the average text books, and affords a valuable standard of reference to those who are anxious to keep pace with pharmaceutical advances, the allusions relating in many instances to current literature bearing the date of the present year."—*Lancet*, March 24th, 1894.

"The present edition has evidently been revised with the greatest care, of which evidences are to be found on almost every page. Altogether, the improvements are so great that many of those who already possess the work will find it worth while to have the new issue."—*Practitioner*, June, 1894.

"As representing the actual condition of pharmaceutical practice in the United Kingdom, the work has, however, long since far out-grown the latest edition of the Pharmacopœia, to which it was originally intended to serve as a companion, and, as containing a store of valuable information, it may now be regarded as in many respects anticipating the next issue of that authority. Few statements as to which any doubt existed have been adopted without careful examination."—*Pharmaceutical Journal*, June 16, 1894.

"No man who has the faintest aspiration to be in the van of pharmaceutical progress can afford to ignore the claims this exact and comprehensive epitome of pharmaceutical information has to a place at his elbow."—*Chemist and Druggist*, March 24, 1894.

London:

J. & A. CHURCHILL, 7, Great Marlborough Street, W.

Now ready, Demy 8vo, half bound, 17s. net.

## A GUIDE TO THE SELECTION AND ADAPTATION OF

## Orthopaedic Apparatus,

WITH A  
Detailed Description of their Salient  
Points.

By F. GUSTAV ERNST,  
Orthopaedic Mechanician

"The illustrations of this work are excellent. The descriptions of the instruments are also good."—*Lancet*.

" . . . We cannot but admire the ingenuity and skill shown in the instruments illustrated. Gentlemen who make a speciality of correcting deformities of the limbs or trunk, will find the book a useful one for reference on the subject of apparatus."—*Medical Press*.

" . . . It is manifest from the cleverly designed apparatus illustrated and explained in this book, that Mr. Ernst is a thorough master of his vocation; and surgeons who may require mechanical support for their patients, might consult Mr. Ernst's 'Guide' with great profit."—*The Hospital Gazette*.

SPRAGUE & CO., 22, Martin's Lane, Cannon St., E.C.

BY C. MANSELL MOULLIN, M.D. OXON., F.R.C.S.

London: 38. West Smithfield, E.C.

By SAMUEL HYDE, M.D.

Now Ready, crown 8vo, 3s. 6d.

## THE CAUSES AND TREATMENT OF RHEUMATOID ARTHRITIS.

"The exceptional opportunities that many years' practice in Buxton have afforded Dr. Hyde of studying cases of rheumatoid arthritis and watching the results of its treatment make the expression of his view worthy of every consideration and study. The work contains much that is original and will well repay perusal."—*Lancet*.

"For an excellent summary of treatment we can cordially recommend Dr. Hyde's book. The keynote of it is greater hopefulness in the success of systematic treatment.....contains much interesting and often new information.....contributes in important particulars to the elucidation of the disease."—*Brit. Med. Journ.*

"It is impossible to experience any other feeling than admiration for Dr. Hyde's endeavour to view the etiology and treatment of the malady from an unbiased standpoint, and we therefore welcome this result of a thoughtful and thorough investigation of rheumatoid arthritis."—*West London Medical Journal*.

Also by the same Author. Third Edition, crown 8vo, 2s. 6d.

**BUXTON: its Baths and Climate.**

".....Very superior in type and paper. It gives an excellent account of the place and its history, of its waters and their use."—*British Medical Journal*.

**It Means Money****Saved !****It Means Comfort****Gained !!**

Two of the things most to be desired, if you purchase one of **H. WHITE'S Famous Watches**, It means "money saved" because in purchasing from **H. WHITE** you secure a Watch of the **most superior quality** at a much lower price than an inferior Watch costs elsewhere. It means "comfort gained" because **H. WHITE's** Watches register correct time, and help you to make the most of your time, by enabling you to apportion the hours of work and play so that the one may not encroach upon the other. Medical men can *readily appreciate* the advantages to be obtained in dealing direct with **H. WHITE**, from whom a **high-class** Gold Watch can be obtained at the same price as a retailer charges for a silver one.

Send **24 17s. 6d.**, Cheque or P.O.O., to **H. WHITE**, and you will receive, by return mail, his famous speciality.

The **"M.D."** is a superb **4-plate keyless Lever centre-Seconds**, with a high-class movement, jewelled in every action, fitted with a fine *Chronometer Balance* and *Breguet Hair Spring*. Heavy **14-carat** Gold Cases (stamped) polished plain, upon which an elegant monogram can be engraved for **5s. extra**, sunk white enamel dial, clearly and accurately divided into fifths of seconds, flat crystal glass, and gold hands, complete the excellencies of this **truly admirable Doctor's Watch**. A similar watch could not be purchased from an ordinary jeweller under **£8 8s. 0d.**

Supplied with a higher-grade movement, and in **heavy 18-carat Gold** Cases at **27 15s. 0d.**

Send Cheque or P.O.O. for **£3 15s.** to **H. WHITE**, and you will receive, by return mail, safely and securely packed, a beautiful **14-carat Gold Keyless Lever Watch** for a Lady, possessing a highly-finished, full-jewelled movement, fitted with a *Chronometer Balance* and *Breguet Hair Spring* in a **heavy 14-carat Gold Case**, polished plain for monogram, or richly chased, as preferred. Sunk enamel dial or gold dial as desired. An exquisite watch, truly worth **£5 5s.**

**Supplied also in a heavy 18-carat Gold Case at £5 5s. worth £7 7s.** Specialities for all wearers from **2ls.** to **£50.** A Certificate of **Guarantee** accompanies each watch.

Either of the watches described above, or selected from catalogue, will be forwarded to any part of the world, safely packed, at **H. WHITE's** own risk. Postage abroad (British Possessions) **2s. 6d.**, others **5s.** Any watch sent for inspection upon receipt of reference (medical preferred).

Medical Men should write for **H. WHITE's** Illustrated Guide Book of Watches and Jewellery. It is full of valuable information, and may save you pounds Sent post paid by return mail to every applicant.

# SCOTT'S EMULSION

## Is Manifestly The Standard Emulsion of Cod Liver Oil.

We say "manifestly" because it has more generally the indorsement of the medical fraternity than has any other preparation of cod liver oil.

Physicians have found by personal observation that it is a reliable emulsion—probably Scott's Emulsion is prescribed more often than all other forms of cod liver oil combined.

To tell physicians who have prescribed it why this is so, is unnecessary—to those who have never given it a test, we shall be pleased to deliver a sample free.

SCOTT & BOWNE, LTD.,

95, 96, 97, & 98, GREAT SAFFRON HILL,  
13, CROSS STREET, HATTON GARDEN, } LONDON, E.C.

# NESTLÉ'S CONDENSED SWISS MILK

THE RICHEST IN CREAM.

## PERCENTAGE OF BUTTER FAT:

Six samples of NESTLÉ'S MILK bought at random at six different Shops and analyzed by Mr. OTTO HEHNER, late President of the Society of Public Analysts, contained AN AVERAGE OF

**13·13 per cent. of BUTTER FAT.**

*Sample Tin sent free to the Medical Profession on application to HENRI NESTLÉ,  
48, CANNON STREET, LONDON, E.C.*

*Pure, Palatable, and Unadulterated.*

# HOVIS BREAD

Builds up the constitution,  
Increases Vitality, and Nerve  
Power, to the benefit of  
the general health.

HOVIS Bread, Biscuits, and Flour for Home use can be obtained from all leading Bakers and Grocers ; or 6d. and 1s. Samples will be sent on receipt of Stamps by S. FITTON & SON, Millers, Macclesfield.

# Cadbury's Cocoa

NO ALKALIES USED.

is absolutely pure, and stands all tests, the Medical profession and Press proclaiming its superiority as a delicious beverage and nutritious food. It is light, refined, and digestible, and can be safely and beneficially taken as an article of daily diet **at all times and all seasons** . . . . The **LANCET** says: "Cadbury's Cocoa represents the standard of highest purity at present attainable."

## SPECIAL ADVANTAGES OF

# Angier's Petroleum Emulsion

WITH HYDROPHOSPHITES, LIME, &amp; SODA.

1. Made with a specially purified petroleum obtained from selected wells.
2. A perfect Emulsion, readily miscible with water and other liquids.
3. Palatability and tolerance by delicate stomachs. It can be administered in the hottest weather without fear of disturbing digestion.
4. Antiseptic and disinfectant action upon the gastro-intestinal and respiratory mucous tracts.
5. Soothing and healing influence upon inflamed mucous surfaces generally.
6. Better effect from the Hypophosphites when administered in Petroleum.
7. Marked effect upon nutrition, aiding digestion and assimilation and increasing weight and strength.
8. Prompt and almost certain relief of the stubborn coughs of bronchitis and phthisis.

## A MOST EFFICIENT SUBSTITUTE FOR COD-LIVER OIL.

EXTENSIVELY PRESCRIBED BY EMINENT LUNG SPECIALISTS.

Free Samples to the Medical Profession.

ANGIER CHEMICAL CO., Ltd., 32 &amp; 33, Snow Hill, London, E.C.

# S. H. KENNEDY'S Extract of Pinus Canadensis.

DARK.

WHITE.

## MEDICAL PROPERTIES:—NON-IRRITATING MUCOUS ASTRINGENT.

A Most Valuable Remedy in all Diseases of the Mucous Surfaces Requiring an Astringent.

**INDICATIONS.**—Albuminuria, Diarrhoea, Dysentery, Night Sweats, Hæmorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhœa and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhœa, Gleet, &c.

When used as an injection, to avoid Staining of Linen, the WHITE Pinus should be used.

To increase its astringency, the WHITE Pinus also contains five grains each of chemically pure alum and sulphate of zinc, and should be used ONLY as an injection and externally to PREVENT STAINING. In all other cases the Dark Extract should always be used.

## DIRECTIONS FOR USE.

As an Internal Remedy in Diarrhoea, Dysentery, Night Sweats, Hæmorrhage, or Profuse Expectoration: Mix one part of the Extract with five of warm water; let it cool, and take a teaspoonful of the solution every three hours or oftener, as the case may require.

For Leucorrhœa and other Vaginal Diseases: Dissolve a teaspoonful or two in a pint of warm water and inject twice a day; in obstinate cases a stronger solution should be used.

For Protruding or Itching Piles: Mix one-fourth of glycerine and apply as often as convenient.

Fissures of the Anus, Ulcers, Burns or Scalds: The Extract should be applied in its full strength.

For Catarrh: Dissolve a teaspoonful or two of the Extract in a pint of warm water, and inject into the nostrils, using a nasal douche, twice a day.

For Sore Throat: Dissolve a teaspoonful of the Extract in a half-pint of warm water, let it cool and apply as a gargle, repeated during the day.

For Gonorrhœa or Gleet: Mix one part of Extract with seven of water; inject three or four times a day.

*Put up in 12 oz. Bottles only. Price, per bottle, 7s.*

“Does not depress the Heart.”

# ANTIKAMNIA (C<sub>N</sub>H<sub>2N-6</sub>)

PROF. H. E., A.M., M.D.,

Fellow of the American Academy of Medicine, points out one or two important facts in regard to ANTIKAMNIA. He says:

“Antikamnia possesses no merit as a preventive of pain; its action is *nil* until the pain begins.

“Antikamnia, when given in five-grain doses every ten minutes until grs. xxx. have been taken, produces no effect whatever in a *healthy* person. As my investigation concerned its action under pathological conditions, I did not inquire further into the question how much more than thirty grains might be administered to a healthy person without any deleterious effect.

“The action of Antikamnia as an analgesic begins the moment an individual is attacked by pain, and here a great number of observations has established with me the following rule for its administration to adults:

“As early as possible after the pain has developed—if possible, immediately after—Antikamnia grs. v. are taken; from three to four minutes later, if the first dose has no, or but little, effect, the same dose is repeated and again three or four minutes later, provided again the effect *nil* or not sufficient, this dose is administered the third time. Then I let the patient wait ten minutes; if by the end of that time the pain be greatly ameliorated but a trace of it still present, a fourth dose of gr. v. then (*i.e.*, ten minutes after the third) given will generally stop the pain completely.”

Prof. E.'s. observations have been confirmed and reinforced in England by Mr. A. W., L.R.C.P. & S., &c., and Mr. R. J. B., L.R.C.P. & S., &c. See MEDICAL REPRINTS, Jan. 1896.

PRICE OF ANTIKAMNIA TO THE MEDICAL PROFESSION.—In three-grain or five-grain Tablets, or in Powder, 3s. 9d. per ounce. One-ounce packages only. Price to the public (on prescription only) 4s. 6d. per ounce.

## ANTIKAMNIA COMBINATIONS.

Antikamnia and Codeine Tablets | Antikamnia and Quinine Tablets | Antikamnia and Salol Tablets  
( $\frac{1}{2}$  gr. Antikamnia,  $\frac{1}{4}$  gr. Sulph. Codeine). | ( $\frac{1}{2}$  gr. Antikamnia,  $\frac{1}{4}$  gr. Sulph. Quinine). | ( $\frac{1}{2}$  gr. Antikamnia,  $\frac{1}{4}$  gr. Salol).

SAMPLES gratis and post-free to any medical man to whom (by accident) we have omitted to send one. British Depot:—46, Holborn Viaduct, London, E.C.

OPPOSED . . .  
- - - TO PAIN.

The American antipyretic, anodyne, and analgesic, is in combination of Coal-Tar derivatives of the series C<sub>n</sub>H<sub>2n-6</sub>, into which the amines have entered, forming the various amido-compounds.

It has, in contradistinction to other coal-tar products, a stimulating action on the nerve centres and the vital functions, especially the cardiac system.

It occurs in micro-crystalline powder, and is perfectly white in colour; of a slight pungently bitter taste and alkaline reaction. It is moderately soluble in water, more freely with glycerine sparingly added, and freely soluble in brandy, whisky, or wines, according to their alcoholic percentage. In liquid prescriptions, however, simple elixirs offer the best vehicles.

ANTIKAMNIA should not be dispensed, however, in any vehicle of acid reaction. It can be readily given in tablets, as well as in powder (dry on the tongue) followed by a swallow of water or wine.

Dose for adults 5 to 15 grains; for children in proportion. As a pain reliever in Neuralgia, Rheumatism, &c., ANTIKAMNIA acts with safety, certainty, and celerity.

“Does not depress the Heart.”

COCA LEAVES.

**UNSOLICITED CERTIFICATE.**

18th June, 1897.

GENTLEMEN,

I thank you for the sample of Coca Wine (medium) which you sent, the effect of a wineglassful was decidedly charming and invigorating. I thought it would suit a case of cancer of the bladder, so ordered some—unfortunately another make was sent which was certainly inferior to yours, this was recognised by both my patient and me, we have now some of yours which he takes to his own satisfaction as well as mine.

Yours, etc.,

Beef, Malt and Port, 24/- doz.; Coca Wine, 24/- doz.; Coca and Kola Wine, 24/- doz.

#### CACHETS.

Full List given in "Priced Catalogue."

# HALL'S WINE

## A CURE FOR DIPSOMANIA.

Two cases of complete cures of Dipsomania having been reported to the proprietors of "HALL'S WINE," they wish to call the attention of the Medical Profession to the facts of each case with a view of giving the preparation an extended trial.

The first case was that of an elderly lady taking an average of three bottles of brandy weekly and who had suffered from Dipsomania for several years. The same quantity of "HALL'S WINE" was substituted for brandy and the doses gradually diminished until one bottle per week was sufficient. The patient regained appetite, increased in weight, and obtained sleep.

The other case, a lady having taken Morphia eventually substituted large quantities of brandy. "HALL'S WINE" was given as in first case. She is now quite cured both of Dipsomania and Insomnia from which she suffered; she has also discontinued taking the wine regularly, an occasional glass when feeling nervous being sufficient to keep her in good health.

The late Dr. Richardson, who treated the first case, stated that he found the coca in two ounces of "HALL'S WINE" as stimulating as the same quantity of brandy, but without the evil after-effects of alcohol.

*To thoroughly test the value of this remedy, the Proprietors will for a limited period supply a bottle of "HALL'S WINE" free to Medical Men wishing to try the effects in suitable cases.*

Proprietors—STEPHEN SMITH & CO., Bow, London, E.

# A BEER ABSOLUTELY FREE FROM SUGAR.

We have to place before the Medical Profession a beverage that is simply unique, namely, a Beer which is free from Sugar. An article of this kind has long been wanted, and many efforts have been made to produce something which, while containing all the agreeable qualities of fine Pale Ale, should be free from sugar; but these efforts have been failures. Now, however, Messrs. HARVEY & Co., of the Pellon Brewery, Halifax, have perfected and protected by Her Majesty's Royal Letters Patent

## A SUGAR-FREE PALE ALE

which is simply a most perfect beverage of pure Pale Ale brewed from the choicest Malt and Hops. It is not a compound of the mawky character which is so often met with in semi-chemical compositions, but is nothing more or less than

## A PERFECTLY PURE PALE ALE

the only thing being that it is **Sugar-Free absolutely.**

The advantage of this Beer to persons of delicate digestion, to say nothing of chronic dyspeptics, will be apparent. In cases of **Rheumatism, Gout, Diabetes, etc.**, where ordinary Beers, so much relished by the patient, cannot under any circumstances be tolerated, its use is especially indicated.

Mr. T. FAIRLEY, Leeds City Analyst, F.R.S. Edin., F.C.S., F.I.C., under date of June 3rd, 1896, certifies that this Pale Ale is

## “ABSOLUTELY FREE FROM FERMENTABLE SUGAR”

*British Medical Journal:*—“We have received from Messrs. Harvey & Co., of the Pellon Brewery, Halifax, samples of Pale Ale which is claimed to be absolutely free from sugar, and moreover to be simply a pure pale ale brewed from malt and hops. The samples sent to us were of excellent pale ale quality, well aerated, and distinctly flavoured with hops. Analysis gave 11.9 degrees of proof spirit, acidity 0.10 per cent., expressed as acetic acid, and only 0.74 per cent. of extraction. The extractive matter, on being submitted to the action of yeast, showed no signs of fermentable sugar; it is, therefore, a non-saccharine Pale Ale as stated, and would be an acceptable and important addition to the dietetic resources of those who from various causes are unable to drink malt liquors containing a large amount of saccharine extractives.

*The Lancet:*—“It is quite true according to our examination, that this beer is free from sugar. Analysis shows 0.73 extractives, equal to acetic acid, 0.04 per cent. This beer is practically free from both sugar and acidity. It possesses an agreeable, light, bitter flavour, and forms an acceptable beverage.”

The Sugar-free Pale Ale is supplied by HARVEY & Co., Pellon Brewery, Halifax, upon receipt of Cheque or Postal Order, in quantities of not less than one doz. Imperial  $\frac{1}{2}$ -pints. Price **4/6** per doz.

Cases and Bottles charged 3/- per doz. extra, which amount will be refunded upon return of empties.

And Wholesale in quantities of not less than three doz.

*by their London Wholesale Agents,*

**BURGOYNE, BURBIDGES & CO., 12 & 16, Coleman Street, London, E.C.**

Special Terms allowed to the Medical Profession, and a Sample Bottle will be sent free upon application.

**GREGORY'S POWDER CAPSULES.**

## BLAUD PILL CAPSULES.

**GUARANTEED STRENGTH.**

At the request of medical men and others we have analysed a number of **BLAUD PILL CAPSULES** similar in size and colour to those of our own make. These capsules were stated to be each equal to three Blaud's Pills, but our analyses showed that in no instance were they equal to more than  $1\frac{1}{2}$  Blaud Pills. This is neither fair to the medical man nor to his patient.

WE GUARANTEE OUR ONE, TWO, AND THREE PILL CAPSULES TO BE EQUAL RESPECTIVELY IN FERROUS CARBONATE TO ONE, TWO, AND THREE FRESHLY-PREPARED BLAUD PILLS. THEY HAVE ALSO THIS DISTINCT ADVANTAGE OVER PILLS, THAT THEY NEITHER OXIDISE NOR HARDEN.

# WIESBADEN GOUTWATER.

**Analytical Report  
from  
THE LANCET.**

"A litre of this water contains, according to our analysis, 8.47 grammes of bicarbonate of soda and 7.84 grammes of common salts. It is practically FREE FROM LIME SALTS, and contains but a trace of sulphates. It contains a slight excess of carbonic acid gas, so that it is gently effervescent on withdrawing the cork from the bottle. Its composition, therefore, is well suited to those requiring a course of carbonated alkaline and saline waters, and the water should be USEFUL IN THE TREATMENT OF GOUTY DISORDERS arising from CHRONIC INDIGESTION FROM HYPERACIDITY, or those connected with them, as in HEPATIC DERANGEMENT. The dissolved carbonic gas present adds, probably, to its efficacy chiefly in exerting a SEDATIVE ACTION UPON THE GASTRIC NERVES. The water has the *softness of salinity* and taste characteristic of a natural water, which is not found in an artificial water of the same composition."

Demonstration at  
the 14th Congress  
for  
Innere Medecin.

Fig. A shows a Uric Acid Calculus (renal). This was placed in urine which had become alkaline after the use of Wiesbaden Goutwater. B shows it one hour later; C after two hours more; D the same. The globular urate having been washed away (E), the same shows later. What remains of the stone is a soft, transparent mass impregnated with pigment. (Enlarged 140 times).

First Med. Klinik  
of Prof. LEYDEN,  
Berlin.

Prof. BRUNNER  
and Prof. THOMAS  
Univ. of Freiburg.

Dr. E. F.,  
Univ. of Breslau

Dr. DUMS,  
Leipzig.

Dr. GRENZNER,  
Prague.

Dr. PFEFFER,  
Surgeon-General,  
Berlin.

Dr. G. LINDNER,  
Surgeon-General,  
Cassel.

Dr. TAMPKE,  
Stolzenau, a.U.

"Your consignment of fifty bottles Wiesbaden Goutwater to hand. As I have already informed you, the results obtained from the use of the twenty bottles previously sent have been so far satisfactory, inasmuch as the overloading of the urine with uric acid as well as the resulting gouty and rheumatic symptoms, from which I had been suffering, have ceased, and the urine is now faintly acid and at times alkaline in reaction."

"Your Goutwater has decidedly surpassed in its action all other mineral waters I have so far tried in a case of chronic pyelitis."

"The undersigned requests you to forward a further consignment of twenty-five bottles of Wiesbaden Goutwater. The effect is excellent; and two attacks of gout, which usually lasted eight to twelve days, passed off with little pain in three days."

"I have much pleasure in assuring you, with perfect truth, that the gouty affection of the joints which I had been suffering from, and which led me in the first instance to try the Goutwater, passed off more rapidly and readily than has usually been the case after using other mineral waters having a similar action."

"I therefore consider Wiesbaden Goutwater as an excellent prophylacticum against gouty affection of the joints and kidneys. (One bottle daily generally suffices to prevent a fresh attack)."

"The favourable result I experienced from the use of 'Wiesbadener Gichtwasser' on myself—I have for many years suffered from gouty troubles—induced me to recommend it to several of my gouty patients. In not a single case did I fail to obtain a satisfactory result, the symptoms either abating considerably or completely disappearing. In one case, that of a gentleman, who had for many years suffered from backache, occasional attacks of gout, and extremely violent pains radiating towards the front of the body, the use of 'Wiesbadener Gichtwasser' caused the elimination of several renal calculi, and since then to the present time, an interval of four months, the troubles have completely subsided. Control experiments performed by me with other mineral waters commonly recommended for gout—Fachingen, Kronenquelle, Vichy—proved that 'Wiesbadener Gichtwasser' far surpasses them in its efficacy. Further, I must point out a special advantage which 'Wiesbadener Gichtwasser' has over Fachingen and Vichy waters, and which I have experienced both in myself and others—viz., that the former water in no way interfered with, but rather had a beneficial influence on, the digestion, whilst the latter gave rise to digestive troubles."

Dr. MORDHORST  
Wiesbaden.

reported on the exceedingly satisfactory results of the thorough experiments undertaken by him with "Wiesbadener Gichtwasser," at the Medical Congress held at Wiesbaden in April, 1891, and again at the 11th Medical Congress held in Rome, 1894. The latter intensely interesting dissertation was published by special and universal request by Loescher and Co., booksellers to H.M. the Queen of Italy, Rome, under the title, "The Remedies which are applicable in the treatment of Gout and Uric Acid Diathesis and their mode of Action."

# FELS'S GERMICIDE SOAP.

That Medical Man is yet to be found who after investigation and trial fails to fully endorse the claims made for FELS'S GERMICIDE SOAP.

The more thorough and searching the investigation, the more extended and varied the tests, the more complete is the approval of the expert.

This being so, it behoves every Physician and Surgeon who pretends to Modern Practice to see to it that in all cases of Eczema and other Skin troubles, in Obstetrics, in Infectious Diseases, &c., that FELS'S GERMICIDE SOAP is used.

1s. per Cake in Boxes of 3 Cakes. 9s. 6d. per dozen to the Profession.

## VIN COCAE (LORIMER'S).

In spite of the vast number of imitations put on the market during the last few years, our COCA WINE still maintains its popularity with Medical Men.

It is always uniform and reliable, and never disappoints, being most carefully prepared with *specially selected* Fol. Coca Erythroxylon.

*In Imperial Pints, 29s. per Case of One Dozen.*

## SYR. HYPOPHOSPH. CO. (LORIMER'S).

The following unsolicited letter fairly represents the views of the Profession as to the merits of this elegant preparation, being one of several thousands we have received:—

"CLIFTON, July 20th, 1886.

"DEAR SIRS,—I prefer it to that of any other makers. It appears to meet with the desideratum long sought by the medical profession, viz., an elegant preparation, definite and stated formula, and moderate price.

"\_\_\_\_\_, M.D."

*In 1-lb. Bottles, unstamped, 36s. per Dozen; ½-lb. Bottles, 21s. per Dozen.*

**LORIMER & CO., BRITANNIA ROW, ISLINGTON, LONDON, N.**

*Will be pleased to supply Lists and Specimens to Members of the Profession free on application.*

**SPECIAL QUOTATIONS TO HOSPITALS.**

Throughout the whole world the excellence of Van Houten's Cocoa is universally recognised. It is *delicious, strengthening, stimulating, and easily digested*—hence its enormous sale.

The most eminent Physicians and Analysts affirm that in consequence of Van Houten's special process of manufacture, the *solubility* of the valuable constituents of the Cocoa, including the flesh-formers, is *increased 50 per cent*, while the whole is rendered more appetising and easier to digest.

The result to the consumer is that he finds the rich natural Cocoa *flavour perfectly developed* and gets out of a cup of Van Houten's Cocoa *more nourishment and strength* than out of any other.

W. R. WARNER & CO., whose laboratories are equipped with every modern appliance for the production of elegant Pharmaceutical preparations, have in recent years placed at the disposal of practitioners reliable and permanent granular (and compressed) Effervescent Salts. Among these may be named "Antalgic Saline," "Bromo Lithia," "Salicylate of Lithia," "Triple Bromides," &c., as well as the following. Advantages claimed are accuracy, efficacy and convenience.

### EFFERVESCENT

## LITHIA

Containing five grains

An elegant, portable,

Gout, Rheumatism, Gravel,  
Bright's Disease,

Each Tablet affords a convenient method  
Lithia in a pleasant form, besides the advan-  
presenting a therapeutic value of a higher  
which oftentimes contain but an indefinite

Our compressed Lithia Tablets are con-  
Lithia water, useful in the treatment of

water, will, in a few moments entirely dis-  
sing draught.

EFFERVESCENT VICHY LENTIFORMS.—Replacing the  
Bottled Spring Waters which are cumbersome and often  
of doubtful strength medicinally.—These Lentiforms present  
the remedy in a portable, economical, and pleasant form, and ensure  
an uniform definite strength. To prepare a draught as of the  
natural water, dissolve one Lentiform in a glass of pure water and  
drink while effervescing. For a warm draught use tepid water.

Per Bottle, 1s.

I have used Effervescent Bromo-Soda very extensively, and can cheerfully recommend it to my professional brethren. The addition of the grain of Caffein Hydrobromate to the thirty grains of Sodium Bromide I think a most happy idea. I recommend your Bromo-Soda because I have used Sodium Bromide for years instead of the Potassium Bromide. Sodium Bromide is not a foreign salt in the system, is much less depressant, can be used where the heart is extremely weak, and does not impair the integrity of the muscular tissue. Effervescent Bromo-Soda is very valuable in cases superinduced by over-work of a mental kind; in fact, at times when over-worked, I have refreshed myself with a little in water.—J.K.B., M.D., LL.D.

(Registered.) Per Bottle, 3s. 6d.

**N.B.**—It is pre-eminently the right of Physicians to designate a choice. The leading Druggists throughout the world keep W. R. # SYR. HYPOPHOS. CO., FELLOWS

**CONTAINS THE ESSENTIAL ELEMENTS** of the Animal Organization—Potash and Lime;

**THE OXIDISING AGENTS**—Iron and Manganese.

**THE TONICS**—Quinine and Strychnine;

**AND THE VITALISING CONSTITUENT**—Phosphorus: the whole combined in the form of a syrup, with a **SLIGHTLY ALKALINE REACTION.**

**IT DIFFERS IN ITS EFFECTS FROM ALL ANALOGOUS PREPARATIONS;** and it possesses the important properties of being pleasant to the taste, easily borne by the stomach, and harmless under prolonged use.

**IT HAS GAINED A WIDE REPUTATION,** particularly in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs. It has also been employed with much success in various nervous and debilitating diseases.

**ITS CURATIVE POWER** is largely attributable to its stimulant, tonic and nutritive properties, by means of which the energy of the system is recruited.

**ITS ACTION IS PROMPT;** it stimulates the appetite and the digestion, it promotes assimilation, and it enters directly into the circulation with the food products.

The prescribed dose produces a feeling of buoyancy, and removes depression and melancholy; *hence the preparation is of great value in the treatment of mental and nervous affections.* From the fact, also, that it exerts a double tonic influence, and induces a healthy flow of the secretions, its use is indicated in a wide range of diseases.

## NOTICE—CAUTION.

The success of Fellows' Syrup of Hypophosphites has tempted certain persons to offer imitations of it for sale. Mr. Fellows, who has examined samples of several of these, **FINDS THAT NO TWO OF THEM ARE IDENTICAL**, and that all of them differ from the original in composition, in freedom from acid reaction, in susceptibility to the effects of oxygen when exposed to light or heat, **IN THE PROPERTY OF RETAINING THE STRYCHNINE IN SOLUTION**, and in the medicinal effects.

As these cheap and inefficient substitutes are frequently dispensed instead of the genuine preparation, Physicians are earnestly requested when prescribing the Syrup, to write "Syr. Hypophos. FELLOWS."

As a further precaution, it is advisable that the Syrup should be ordered in the original bottles (4/- or 7/-); the distinguishing marks which the bottles (and the wrappers surrounding them) bear, can then be examined, and the genuineness—or otherwise—of the contents thereby proved.

# SAVORY & MOORE'S BEST FOOD for INFANTS.

The attention of the Medical Profession is specially requested to the following characteristics of this old-established SELF-DIGESTING Food, which has so thoroughly maintained its reputation for superiority during an experience of thirty years:—

**Ratio of Albuminoids to carbo-hydrates.** The ratio of the albuminoids to the carbo-hydrates is the same as in human milk, —viz., 1 to 6·4; the ratio in cow's milk being only 1 to 3·8.

**Albuminoids made easy of digestion not pre-digested.** The albuminoids are *not predigested* as in pancreatised foods, but are rendered *easy of digestion*, leaving (as in human milk) just sufficient work to strengthen and develop the immature digestive powers, instead of weakening and abrogating them by keeping them inactive. Sir WILLIAM ROBERTS's experiments in feeding kittens show that distinct failure of nutrition occurs when the milk is predigested (peptonised), and the same thing has been observed in feeding infants, probably owing, as THE LANCET points out, to atrophy of unemployed glands.

**Healthy nature of evacuations.** As a consequence of the foregoing the proper peristaltic action of the bowels is maintained, and the healthy nature of the evacuations of infants fed on this food is a satisfactory feature much and favourably commented on by Mothers and Nurses.

**The curdling of cow's milk prevented.** When mixed with cow's milk it prevents the troublesome curdling in the stomach which takes place when cow's milk is given alone, and assimilates its composition to that of human milk.

**Complete conversion of the starch.** The active Malt Diastase present provides for the rapid and complete conversion of the starch at the time of mixing into the soluble assimilable products of maltose and dextrine. The point of the gelatinisation (thickening) of the Food —viz., 140° F.—is just that at which Malt Diastase is most active, and the *conversion of the starch is consequently the work of a very few minutes only*.

**Retention of the Phosphates and Fat.** The retention of the fat and of the phosphates of the wheat and malt, which are so essential to bone formation. These exist chiefly in the outer portions of the grain, *the very parts which some manufacturers pride themselves upon so successfully rejecting*.

**Absence of Fermentable sugar.** The absence of the fermentable sugar, which in the various malt extracts and milk foods so often gives rise to Diarrhoea and Flatulence.

**Verdict of Jury as to inferiority of imitations.** It is the ONLY Infants' Malted Food which obtained a Gold Medal at the International Health Exhibition, the Jury being comprised of such authorities as Dr. ATTFIELD, F.R.S.; G. W. WIGNER, F.I.C., the then President of the Society of Public Analysts; Dr. JAMES BELL, F.R.S., the Head of the Government Laboratories; and other distinguished Medical and English and Foreign Experts. This affords significant indication of the value to be attached to the numerous imitations, which, whilst pirating the descriptive notices of the Food, utterly fail to approach its standard of excellence.

**SAVORY & MOORE,  
143, NEW BOND STREET, LONDON, W.**

## IZAL and Antiseptic Surgery.

REMARKABLE results have been obtained during the short time this preparation has been in use.

A leading London Surgeon, after using Izal for two years, reports as follows:—

"As Izal does not break up the blood-clot like carbolic acid and corrosive sublimate, the difficulty of cleaning one's sponges and instruments after an operation is much less than with any disinfectant ordinarily in use. In addition to its powerful germicidal properties, it does not irritate the surgeon's hands or the patient's skin. This non-irritating character is further seen when it is employed either in washing out a peritoneal abscess, a foul bladder, or a stinking sinus. In one or two instances in which an old sinus has been hyper-distended with this fluid, the effect has been very remarkable, and has caused it to heal with great rapidity, but the uncertainties which always surround the course and direction of any fistulous tract hold out but little hope of any drug panacea for their removal. It is, however, no small matter to feel that in using Izal one is employing a most powerful disinfectant, and at the same time one that is absolutely innocuous whether it is used for ordinary wound purposes, for washing out large abscesses, or to purify mucous membrane. I am well satisfied with it, and shall not be easily induced to revert to the use of carbolic acid or sublimate."

For the cleansing of a large ovarian abscess, a lotion of the strength of 1 part of Izal to 200 of water produced a marvellous result, without any toxic or irritating symptoms, after the use of carbolic acid had utterly failed, and its continuance was feared.

In severe scalp wounds and large abrasions of the skin, Izal appears to act not only as a unique antiseptic, but to possess actually the capability of promoting small, healthy granulations and stimulating epithelial growth.

## IZAL: its Properties and Preparations.

IZAL is an emulsion of Izal Oil, a body extracted from an oil intermediate of the benzene and paraffin series of hydrocarbon compounds. Owing to its high point of volatilisation, and the fact that it is insoluble in water, the action of Izal is very much more persistent than carbolic acid.

A striking proof of the remarkable persistence of the action of Izal is shown by the result of a crucial test of its effect in the case of the *acarus ovis*, a parasite of the sheep. The period of incubation and larval development is fifteen days' yet one application of Izal was sufficient to effect a complete cure proving that not only were the parasites themselves killed, but the agent remained active sufficiently long to destroy any larvæ hatched from previously deposited eggs.

*Bacteriological experiments* have conclusively proved that Izal Emulsion when diluted to 1 in 200 will kill the most resistant micro-organisms in five minutes—thus being far more powerful than carbolic acid of the same strength.

*Pharmacological experiments* have shown that Izal is non-poisonous and non-irritating.

Izal is therefore the most perfect antiseptic, as it is persistent and powerful, but non-poisonous in its action.

*Medicinally*, Izal is indicated for all such affections of the alimentary canal as are caused by specific micro-organisms; and it has been suggested that it should be used in specific fevers and phthisis.

## "Malted" Food (or No. 3)

FOR

### Infants and Invalids.

THIS preparation is a perfectly assimilable farinaceous food. It is prepared on Baron von Liebig's principle of malting, but by greatly improved methods. It differs from other forms of Malted Food in that the malt is present in a soluble, concentrated, and most active form, rendering this Food not only most nutritious but self-digesting.

The basis of the Food is fine wheaten flour, rich in nitrogen, with this advantage, that a large proportion, but not all, of the starch is converted by the action of Malt Extract. The proportions are so arranged that the infant economy does not sink into an atonic condition, by having no work to do, as in the case of so many wholly digested foods, while care is taken that the child is not given too much starch to assimilate.

The Food is rich in soluble phosphates and albumenoids, constituents especially adapted for the formation of firm muscle and solid bone, and, with the addition of the proper proportion of milk and water, or milk only, it forms a perfect diet for young children.

ALLEN & HANBURYS have more recently introduced a "First" and "Second" Food for Infants, which differ in character from the "Malted" (No. 3) Food, in that they are Milk Foods, and do not contain starch. These Foods are so arranged that, if the child be fed by hand from its birth, a series of foods is obtainable which is scientifically adapted to its progressive alimentary requirements.

The "First Food" (No. 1) is a correct substitute for mother's milk, and should be given for the first three months. It is prepared in the form of a dry powder, and is made from cow's milk, from which the excess of casein is removed, and the deficiency in fat, soluble albumen, and milk-sugar corrected.

The "Second Food" (No. 2) is the same as No. 1, but with the addition of Maltose, soluble Phosphates, and Albumenoids. There is no unconverted starch present. This should be given for the next three months, until the use of

The "Malted Food" (No. 3) may be naturally and advantageously commenced.

The experience of many years during which this preparation has been in use all over the world demonstrates how accurately chemico-physiological principles can be brought to bear in formulating a proper dietary.

The following quotation from the *British Medical Journal* will illustrate the practical value of this accurately-adjusted food:—

"We have taken some trouble to have this Food carefully tested by skilled persons. The result of Dr. W—'s trials was decidedly satisfactory. Delicate children have, in many instances, improved under its use; infants who have thriven under its use fell off when it was discontinued, and it was generally liked by the children to whom it was given. In the same way, Dr. D— was able to report very favourably of its influence upon the health, nutrition, and digestion of the children to whom it was administered in his hospital practice. In two large crèches the Food has been found very successful; in more than one instance the children who had been subject to sickness being freed from it by the use of Messrs. ALLEN & HANBURYS' Food."

*The Lancet* writes:—

"An improved form of LIEBIG's well-known Food. It is excellent in quality and flavour."

Samples free to medical men on application.

First Food and Second Food in tins at 1/6 and 3/- Malted Food in tins at 1/-, 2/-, 5/-, & 10/- each.

**"AN INFANT FOOD APPROACHES PERFECTION IN THE DEGREE  
IN WHICH IT RESEMBLES HUMAN MILK."**

"I have at frequent intervals analysed the humanised milk as prepared with the Peptogenic Powder; have made many analyses of milk and of 'infant foods,' and have studied the various methods of treating milk for the artificial feeding of infants. As a result of this experience, I feel confirmed in the conviction that the Peptogenic Milk Powder with the method given is the most exact, natural, and practical means at present known of rendering cows' milk suitable as a comprehensive substitute for woman's milk."

**Dr. ALBERT R. LEEDS.**

"Cows' milk, modified by the addition of water, cream, and Peptogenic Milk Powder, offers a product containing to the full extent all of the proximate principles present in human breast milk, and wholly free from extraneous admixtures. The proportion of solid matter, fat, albuminoids, carbohydrate, and inorganic salts corresponds as closely as one could ask with what is considered as the average chemical composition of mother's milk, and in this respect the product differs notably from all the other products examined. Further, the process of modification takes into account the radical difference between cows' casein and the human casein, and affords a method by which the former can be modified to a closer resemblance to the latter without the addition of any substance that will permanently interfere with the purity of the final product.

"The general resemblance of milk modified by the Peptogenic Milk Powder to the infants' natural supply is a very striking one."

**Dr. R. H. CHITTENDEN.**

"The object to be accomplished in the preparation of cows' milk is to make it resemble human milk as much as possible in chemical composition and physical properties.

"When properly prepared, the resultant, so-called 'humanised milk' [prepared with Peptogenic Powder], presents the albuminoids in a minutely coagulable and digestible form; has an alkaline reaction; contains the proper proportion of salts, milk sugar, and fat; is not bitter in taste, being but partially peptonised, and in appearance as well as chemical composition resembles human milk."

**Dr. LOUIS STARR.**

**Peptogenic Milk Powder** yields the "perfection" of an Infant Food.  
It renders cows' milk almost identical with human milk.

Originated and manufactured by

## ANTIDIPTHERITIC SERUM.

It will be remembered that Burroughs, Wellcome & Co. were the first to produce dry antidiptheritic serum of full potency. This form of antitoxin possesses conspicuous advantages. It is readily soluble in 3 or 4 parts of water; the volume of the injection is only about 1·3 cc. for 1000 units. It enables the physician to administer serum of any desired potency. It is perfectly sterilised and keeps better than the liquid antitoxin in all climates. Each package of serum contains practical directions for use, a clinical chart and an outfit for the transport of specimens for bacteriological diagnosis. Antidiptheritic Serum Dried (B. W. & Co.) is supplied in tubes, each containing 1000 units, price 1s. per tube.

Liquid Antidiptheritic Serum (B. W. & Co.) is also supplied in bottles containing 1000 units at 1s. per bottle. Supplies of these serums are sent *immediately on receipt* of letter or telegram. Copies of clinical reports from the medical journals will be gladly forwarded on request.

### THE B. W. & CO. SERUM SYRINGE.

This syringe is adapted for use with all serums. It is entirely of British manufacture, excellently finished and strong. All the parts are readily detachable, and may be rendered aseptic with the greatest ease. It is more compact than those hitherto in use. By an ingenious arrangement the rubber plunger can be instantly and accurately adjusted to the calibre of the syringe barrel. The B. W. & Co. Serum Syringe is supplied in a metal case with two platino iridium needles, and is fitted with finger grips and with detachable flexible nozzle to prevent breakage of needles in case of any sudden movement of the patient. It is made in two sizes to hold 5 or 10 c.c., the price of each, fitted complete in case, being 25s.

## THE RELATIVE VALUE OF IRON PREPARATIONS.

In a paper read before the West Kent Medico-Chirurgical Society the author gives the following results of sixty-five clinical trials conducted by him at the National Hospital for Diseases of the Heart, Soho Square, London, W.

"In every case the haemoglobin in the blood was estimated; the treatment was then continued for twenty days and the haemoglobin again estimated. Ten patients were given 10 grains of ordinary coated Baud's pill from the hospital dispensary three times a day. These pills had probably been made three months or so previously. The average daily increase of haemoglobin was one-eighth per cent. Ten patients were given 10 grains of freshly made Baud's pill. The daily increase of haemoglobin was nearly one-half per cent. Separate sets of five patients were given respectively equivalent doses three times a day of various iron preparations, the average daily increase of haemoglobin ranging from below one-eighth to one-half per cent. Ten patients were given three times a day eight grains of sugar-coated 'Tabloids' of Baud Pill made by Burroughs, Wellcome & Co. The increase of haemoglobin was 1·2 per cent. per day." In a later portion of his paper the author explains this great superiority of Baud pill "Tabloids" as follows:—

"When a 'Tabloid' is swallowed, reaction between the salts takes place on coming into contact with any fluid which may be present in the stomach, and the nascent ferrous carbonate is formed in the viscera itself. Such 'Tabloids' made

by Burroughs, Wellcome & Co. are further protected by a coating of sugar. If a 'Tabloid' is cut open, the cream-coloured contents will be seen instantly to change to the dark green ferrous carbonate on the addition of a drop of moisture.

It will thus be seen that the whole weight of evidence from these clinical investigations demonstrates the immense superiority of Baud Pill "Tabloids" over other iron preparations. Fuller details of this series of clinics and samples of Baud Pill "Tabloids" will be forwarded on application.

### LIST OF BLAUD PILL "TABLOIDS."

LONDON and SYDNEY.

# DISINTEGRATION.

## A Crucial Question.

CLOSED.

**Pills and Compressed Tablets** require Disintegration before Absorption, as the following extract shows :

"Calcium sulphide was prescribed in pill form. After a few days eight of these pills reappeared, having passed through the body apparently unchanged. The pills were discontinued, but for days continued to make their reappearance. This naturally annoyed the prescriber, and rendered the position of all concerned rather an ignominious one. The recovered pills, on being placed in water, fell to a green powder, which evolved  $H_2S$ ."

OPEN.

**Palatinoids and Bipalatinoids**, being uncompressed and merely enclosed in a soluble glycerine jujube covering, which opens immediately on reaching the stomach, **require no disintegration.**

The palatinoid form of medication is reliable, tasteless, and is, above all others, **THE FORM** for administering nauseous medicines.

OPEN.

## Liquor Pancreaticus (Benger).

For the preparation of peptonised or partially digested milk and other articles of food.

Simple directions for use enclosed. In 4 oz., 8 oz., and 16 oz. Bottles.

The *British Medical Journal*, in an article on Benger's Preparations, says:—"Time and use have justified the claims put forward for these preparations."

The *London Medical Record*, says:—"These are undoubtedly a great advance on any previous attempt in this direction. . . . The introduction of these preparations is a distinct advance in therapeutics."

The *Medical Times and Gazette*, says:—"Benger's Preparations have deservedly a very high reputation and are all largely used."

## Liquor Pepticus (Benger).

An exceedingly active fluid pepsine, without disagreeable taste.

Dose.—One or two tea-spoonfuls with meals. In 4 oz., 8 oz., and 16 oz. Bottles.

## Benger's Peptonised Beef Jelly.

A delicious quick restorative for Invalids and the Aged. In patent glass jars. No metallic contamination possible. Retail 2s. each.

The *Lancet* says:—"It is a most valuable form of concentrated food."

The *London Medical Record* says:—"Invaluable for old people; also in convalescence with acute diseases."

A Physician writes:—"I feel I cannot express my gratitude to you sufficiently, as your Beef Jelly is the only thing my niece can retain, and it has certainly kept her alive for the last week."

## Benger's Peptonised Chicken Jelly.

In similar glass jars. Retail, 2s. each.

The *Lancet* says:—"Mr. Benger's preparations are now so well known that all we need say of the sample before us is—that it is excellent. It has a delicate chicken flavour."

The *Medical Press* says:—"Few modern improvements in pharmacy have done so much as Benger's preparations to assist the physician in the treatment of the sick."

*Benger's Preparations may be obtained through all Retail and Wholesale Houses and Shippers, or of the Manufacturers—*

Sold by all wine Merchants. Sample can be obtained free on application to  
BOWEN & McKECHNIE, Cross Street, Finsbury, E.C.

## TAKA-DIASTASE.

### *Some Experts' Opinions as to its Value as an Aid to Digestion:—*

"The preparation of this substance is due to the researches of Mr. Jokichi Takamine, a Japanese Chemist. It is obtained by the cultivation of the fungus *Eurotium oryzae* upon bran. From the cultivated fungus an extract is prepared and the Taka-Diastase separated from it by the subsequent manipulations. The product is a powder soluble in water, possessing very considerable amyloytic power. It is capable of converting 100 times its weight of starch, a fact we have proved experimentally by adding one grain of Taka-Diastase to a mucilage of 100 grains of Arrowroot, the starch reaction entirely disappearing within the hour."—*British Medical Journal*, February 1st, 1896.

"Hitherto the digestive properties of diastase have been appropriated chiefly by using extracts of malt, which of course contain a large excess of malt sugar, which in certain cases it is desirable to exclude. The use of the Taka-Diastase therefore offers obvious advantages on this head."—*Lancet*, May 25th, 1895.

"In the Laboratory its action has proved to be very much quicker than that of any starch ferment compared with it as well as having a higher ratio of diastatic power.....There is no doubt.....that in Taka-Diastase we have an exceedingly powerful starch ferment which will give us results more certain than those we have hitherto learned to be thankful for."—*Quarterly Medical Journal*, January, 1896.

"Persons who object to the taste and consistence of Malt Extracts of the ordinary kind may be glad to have Taka-Diastase. It is capable of converting over 100 times its weight of starch into sugar, and it must therefore be a valuable drug in the treatment of amyloseous dyspepsia."—*Bristol Medico-Chirurgical Journal*, September, 1896.

"Its activity is astonishing. At blood heat it completely converts 100 times its own weight of starch in half-an-hour, the intermediate product being maltose instead of glucose. It seems to be established that flatulent dyspepsia is most commonly caused by faulty starch digestion, in which case we should expect benefit to follow the ingestion of this ferment. Such, we find, occurs in practice, with the further advantage that the constipation which almost always accompanies this form of dyspepsia is rapidly relieved at the same time."—*Quarterly Medical Journal*, April, 1897.

"We have carried out a series of tests with the Taka-Diastase comparing it with three of the best known malt extracts, also with a sample of commercial diastase in powder. The result of these experiments showed that Taka-Diastase was, weight for weight, sixty times the diastatic strength of the malt extracts, and that the commercial diastase had no starch-converting power at all. In cases of amyloseous dyspepsia, Taka-Diastase appears to be likely to prove of considerable service. It is a pale buff powder free from any nauseous taste, and may be taken as a tablet or capsule. The dose is from one grain, which costs rather less than one-half-penny."—*Clinical Sketches*, November, 1895.

"Comparing it with a first-class Malt Extract as to diastatic power we found that Taka-Diastase appeared to be somewhat

slow in action, i.e., one drachm of Malt Extract digested in three and-a-half minutes what it took a quarter grain of Taka-Diastase to digest in seven and-a-half minutes, but the latter had the far more important characteristic that the digestive power did not stop there, for when we added a single grain to a mucilage of 100 grains of arrowroot, there was not the slightest starchy reaction at the end of fifty minutes, the temperature of digestion being between 45° and 50° c. We feel sure that the grain of Taka-Diastase would have digested more than 100 grains of arrowroot. It is evident that in this product we have a medicinal agent for which there should be a place in therapeutics."—*Chemist and Druggist*, January 25th, 1896.

"This preparation will be found of great value in the treatment of those forms of dyspepsia which depend upon the faulty digestion of starchy foods. The question of the dependence of many forms of dyspepsia on the presence of undigested starch in the stomach is one which is not so fully recognised by all practitioners as it should be, and we can recommend any of our readers who expect such to be the nature of some cases of intractable dyspepsia to try the effect of Taka-Diastase. We also venture to suggest its use in the feeding of infants, in whom the dire effects of starchy foods and their influence on rickets is well known."—*West London Medical Journal*, January, 1896.

"We are now able to relieve a large number of persons suffering from faulty digestion of starch, and can aid our patients during convalescence, so that they speedily regain their weight and strength by the ingestion of large quantities of the heretofore indigestible, but nevertheless very necessary starchy foods. We trust that the readers of the *Gazette* will at once give this interesting ferment a thorough trial, administering it in the dose of from one to five grains."—*The Therapeutic Gazette*, July, 1895.

"The new ferment promises to become a remedy for amyloseous indigestion. It has passed the experimental stage, and many excellent reports have been made from physicians of repute on its value."—*Scalpel*, February, 1896.

"Taka-Diastase is, as we have found by experiment, an exceedingly active form of Diastase. In reducing carbohydrates to a soluble and probably more assimilable condition in food, it should prove of great service."—*Lancet*, March 28th, 1896.

"I am convinced that in Taka-Diastase we have at command a remedy of the highest value which is capable of giving excellent results in many obstinate cases of dyspepsia, auto-poisoning with amyloseous ptomaines, and the resulting train of symptoms so frequently classed together under the names of latent and suppressed gout."—W. A., Esq., M.R.C.S. in *Liverpool Medico-Chirurgical Journal*, January, 1897.

### **Precautions to be observed in Prescribing Taka-Diastase.**

If Taka-Diastase is given in water, it should be in the form of a draught to be taken at once. This digestive agent is very active, and the presence of water causes it in a few hours to undergo fermentation changes, therefore it is not suitable for inclusion in the ordinary mixtures containing several doses. Acid should not be mixed with it. A neutral solution answers well. The best results are obtained with Taka-Diastase when it is taken at the commencement of a meal.

**VICTORIA WORKS,**  
112, BELVEDERE ROAD,  
LAMBETH, S.E.

## VINEGAR

# TANNALBIN-KNOLL.

undergoes gradual decomposition setting free its tannin constituents on the way. It is a yellowish powder, tasteless and odourless, readily taken by patients. It is indicated in chronic intestinal affections such as chronic Catarrh, tuberculous and nephritic diarrhoeas, Congestive Catarrh, etc. The excellent results obtained in Children deserve special attention. Dr. von ENGEL, Bruenn ("Deutsche Medicin Wochenschrift," No. 11, 1896), says:—"Tannalbin is an intestinal astringent possessing all the properties of tannin but free from any detrimental effect on the gastric-secreting apparatus. It is a perfectly safe remedy with the advantage of being quite tasteless." Prof. Dr. O. VIERORDT, of the University Polyclinique, Heidelberg (Deutsche Med. Wochenschrift, 1896, No. 25) places Tannalbin at the head of all the tannic acid preparations yet introduced. He describes it as a perfectly safe remedy which exerts its effects on the intestinal canal with the greatest certainty and energy.

**DOSE.**—Fifteen grains three times a day for Adults; eight grains three times a day for Children.

# PAPAIN-FINKLER.

see *Lancet*, April 27, 1895, page 1050). The solvent action of Papain on albuminous bodies is also turned to account in Diphtheria. Under the application of a 5 per cent. aqueous mixture the false membranes promptly disappear, leaving the mucous membrane accessible to the action of suitable antiseptics. The importance of this effectual local treatment is in no wise diminished by the constitutional effects of the antitoxin treatment. Papain is further indicated in all forms of dyspepsia, its action being fully maintained in acid, alkaline, and neutral medium, exhibiting at the same time a tonic and antiseptic effect.

This ideal purely vegetable digestive ferment, is largely used in the curative treatment of Gastric Ulcer (*Lancet*, Feb. 9, 1895, p. 338), and as an aid to the nutrition of patients suffering from Phthisis, its value cannot be overrated

The above may be had in  $\frac{1}{2}$ -lb. or 1-lb. Bottles and upwards, through most of the Wholesale Drug Houses.

Each Bottle has the Inventor's Protection Label over the cork, without which none are genuine.

Samples of any of the above sent free on application, from

B. ROBINSON, Pharmaceutical Chemist & Distiller, PENDLETON, MANCHESTER.

## CONTREXEVILLE PAVILLON

GOUT, GRAVEL, DIABETES, ARTHRITISM

Be Careful to specify:  
SOURCE DU PAVILLON  
(Diuretic, Tonic, Digestible)

The Contrexéville Mineral Water (Pavillon SPRING) is a diuretic and laxative, a tonic, a stimulant, and aid to digestion. — It acts upon the secret mechanism of nutrition, as is proved by its influence in checking the production of uric acid and glucose: it favourably modifies those morbid processus of biological chemistry which result in the accumulation of uric acid in the blood, inducing the phenomena of gout. — It facilitates the elimination of urinary deposits, by contracting the ducts containing them and increasing the quantity of liquid by which these vessels are flushed. — It assists the cicatrization of the inflamed mucus of the urinary organs, and helps to restore the normal acidity of the urine; facilitates the flow of the bile, by causing contraction of the biliary ducts and the expulsion of calculi; and is invaluable in the treatment of congestion of the liver.

Samples free to Members of the Medical Profession on application to INGRAM & ROYLE, 42, Farringdon-st., London, E.C.

"IN THE FRONT RANK."

Is a combination of the African Kola Nut, Extract of Malt, Hops, and the best Caracas Coeoa.

REFRESHING, AGREEABLE, and STIMULATIVE.

TAKES THE PLACE OF TEA AND COFFEE AS A MORNING AND EVENING BEVERAGE

*The British Medical Journal* says:—"Vi-Cocoa is a very palatable beverage of great stimulating and sustaining properties. *The Lancet* says:—"Vi-Cocoa must be assigned a place in the front rank of really valuable foods, since it is the embodiment of the numerous principles contained in malt, hops, kola, and coocoas.....Of distinct value as a restorative and stimulative food."

*The Medical Magazine* says:—"Medical practitioners will find a valuable weapon in Tibbles' Vi-Cocoa in combating the various conditions of nervous exhaustion and enfeebled digestion. The ingredients of which it is composed are carefully selected and of undoubted purity and strength."

SAMPLE TINS SENT FREE ON APPLICATION. [Kindly mention the Brit. Med. Journ.

Address: TIBBLES' VI-COCOA LTD., 60, 61, and 62, Bunhill Row, LONDON, E.C.

## MISTURA BISMUTHI COMP.

MACKEY'S ORIGINAL PREPARATION.

Composition Liq. Bismuth, Tr. Nux Vomica, Morphia, Hydrocyanic Acid, and Spt. Chlorof., price 7/6 lb.

This reliable preparation contains Bismuth in its most effective form for the successful treatment of Atonic and Irritative Dyspepsia, Gastric Catarrh, and Pyrosis accompanied with Pain after Food. It is highly useful in some forms of Vomiting, and has been used with success in the Diarrhoea or Constipation connected with Debilitated Conditions of the Alimentary Canal.

*THE LANCET* says:—"Bismuth could hardly be given in a better form."

"I have used the Mistura Bismuthi Co., prepared by Messrs. MACKEY, MACKEY & Co., and have found it most efficacious, and far superior to any other preparation of Bismuth that has come under my notice."—C. E. B.—, M.R.C.S., &c.

"MACKEY'S Mistura Bismuthi Co. is an improvement on other preparations of Bismuth, and more acceptable to the stomach. I have found it a very valuable preparation."—J. P.—, F.R.C.S.

# BAYER'S PHARMACEUTICAL SPECIALITIES

TRIONAL.

TANNIGEN.

SALOPHEN.

LYCETOL.

SOMATOSE.

A most reliable and quickly acting hypnotic of the Sulphonal group. Dose: 16 to 20 grains, in a large cup of hot liquid.

An almost tasteless astringent. Most efficacious in Chronic, Acute, and Summer Diarrhoeas. Adult dose: 8 grains every three hours.

Invaluable for Influenza, Headache, Migraine, Acute Articular Rheumatism, Chorea, Sciatica. Dose: 15 grains four to six times daily, in powders, &c.

Tartrate of Piperazine Antilithic Uric Solvent. Has a marked effect on the diuresis. Dose: 10 to 32 grains daily.

A tasteless, odourless, nutrient meat powder; it contains all the albuminoid principles of the meat in an easily soluble form. It has been extensively employed and found to be of the greatest service in consumption, diseases of the stomach and intestinal tract, chlorosis, and rickets. It is of great value in convalescence from all diseases. Somatose supplies all the protein matter required by the body, it strengthens the muscles and stimulates the appetite in a remarkable manner.

Dose for adults: a level teaspoonful three to four times a day with milk, gruel, coffee, &c.

The active principle of the Thyroid Gland. It is most efficacious in Strumous Diseases, Myxoedema, Obesity, Rickets, Psoriasis, Eczema, and Uterine Haemorrhages. Dose: 5 grains two to eight times a day for adults; 5 grains one to three times daily for children.

An Iodine Cicatrisant which is an excellent odourless substitute for Iodoform, and highly recommended for Burns, Wounds, Scrofulous Ulcerations, &c.

A perfect substitute for Iodoform. Odourless and non-toxic. Has a covering power five times greater than Iodoform. Especially useful in Ulcus Molle et dur.

A creosotiodide particularly efficacious in the treatment of all kinds of cutaneous disorders caused by animal parasites.

IODOTHYRIN.

ARISTOL.

EUROPHEN.

## THE "BREATHE-EASY

## CHEST SUSPENDER."

The patentee having been a severe sufferer from Asthma, has discovered that immediate benefit was received during the Asthmatic Paroxysm by supporting the shoulders in a specially contrived apparatus which he is now introducing to the public.

It has been found by many eminent physicians to be of essential service in removing the most distressing symptoms of asthma. It affords immediate relief to the sufferer, and not only does it arrest spasmodic attacks, but it is also of great value in relieving the difficulty of breathing associated with diseases of the heart and lungs, sleep is secured and the needed rest is gained without further difficulty.

Chest measurement of patient should be sent with order.

### PRICES ONE GUINEA & TWO GUINEAS.

Remittances to be made by crossed postal order or cheque to

THE ASTHMA SUSPENDER CO.,  
6, Princes Chambers, Corporation St.,  
BIRMINGHAM,

Where it may be seen in use on application.

There is a hydraulic lift for the convenience of visitors.

### BONUS YEAR, 1897.

## National Provident Institution FOR MUTUAL LIFE ASSURANCE.

All PROFITS are divided amongst the assured. Already divided, £4,600,000. All persons now assuring will participate in the approaching Division of Profits as at 26th November, 1897.

Funds exceed £5,000,000. Claims paid, nearly £10,000,000.

Endowment-Assurance Policies are issued, combining Life Assurance at Minimum Cost with provision for old age.

6, GRACECHURCH STREET, LONDON, E.C.

N.B.

**SCHACHT'S** A combination of SCHACHT'S LIQUOR BISMUTHI and PEPSINI LIQUIDA (the most powerful Fluid Pepsine known) with sedatives.

**LIQUOR  
BISMUTHI  
SEDATIVUS.**

FORMULA.—Each drachm contains in addition to the Pepsine and Bismuth, gr. 1-24 Morphine Mur., min. iij., Acid Hydrocyan, B.P. and min. v Tinct. Nucis Vom. DOSE: 1 drachm diluted.

The remarkable efficacy of this formula has been conclusively shown in very many cases of dyspepsia, especially those attended by gastric pain after eating. It arrests vomiting, banishes or alleviates the pain, and renders excellent service as a digestive nerve-tonic when such a remedy is indicated.

In 4 oz., 8 oz., and 16 oz. Bottles.

Sole Manufacturers:  
**GILES, SCHACHT & CO., CLIFTON, BRISTOL.**

**GLYCERINE PASTILLES OF PHENACETIN AND SULPHONAL.**

Prepared by GEO. CURLING, WYMAN & CO., 58 and 59, Bunhill Row, E.C.

Each Phenacetin still contains grains of the remedy, and each Sulphonal Pastille 10 grains. Put up in Boxes of 3 dozen.

Price of Phenacetin Pastilles, 1/- per box; Sulphonal Pastilles, 2/-.

**EXTRACTS FROM MEDICAL PAPERS:**

*The British Medical Journal* says:—"GLYCERINE PASTILLES. Pastilles or Lozenges containing medicinal substances are convenient for patients as regards portability, and, when they are made palatable, are easily taken. Messrs. G. CURLING, WYMAN & CO., 58 & 59, Bunhill Row, London, E.C., prepare Sulphonal and Phenacetin in the form of a rose-scented, oval, soft, jujube-like Pastille, which will be found a pleasant method of administering these insoluble drugs."

*The Lancet* says:—"Glycerine Pastilles of Phenacetin and Sulphonal (CURLING, WYMAN & CO., 58 & 59, Bunhill Row, London, E.C.). These Pastilles consist of soft gelatin lozenges containing a definite dose of the medicaments indicated. They are offered as a convenient and palatable means of administering these drugs. The material is readily soluble, and serves as an easy aid to swallowing the measured quantity of the medicament incorporated with it."

# "THE LEICESTER"

(TRADE MARK)

PERFECT

# Plaster-of-Paris Bandages.

In Tins containing half-a-dozen bandages:—

5 yards long—	2-in.	2½-in.	3-in.	4-in. wide.
Medium	6s. 6d.	7s. 6d.	9s. 6d.	12s. 0d. } per dozen
Extra Thick	8s. 0d.	10s. 0d.	12s. 6d. } Bandages.	

These Bandages are not affected by age or exposure. Harden rapidly and firmly when applied. Are free from grittiness, cleanly in use, far superior to the old style, and suitable for any climate.

For Fractures of the upper extremity, or of the leg, the MEDIUM Bandages are preferable as they are less bulky, and, therefore, more easily adapted to smaller inequalities of surface. For Fractures of the thigh, Sayre's Jackets, and jury-masts, the THICK ones are the most suitable, as it is unnecessary to carry them so many times round the trunk of the body.

## St. Dalmas' "Leicester" Selvedge Bandages.

For all surgical purposes these bandages are superior to the old kinds.

6 yards }	2 in.	2½ in.	3 in. wide.
long	2s. 10d.	3s. 4d.	3s. 10d. per doz.

"St. Dalmas' 'Leicester' Bandage is woven with a soft selvedge on each side, is light, porous, elastic and strong, and is greatly superior to calico."—*The Lancet.*

## The "Leicester" Adhesive Umbilical Pad.

Strongly  
Adhesive,  
Antiseptic.

With  
Waterproof  
Back.

5/- per dozen.

## The "Leicester" Patent Wound and Bed Sore Pads.

Prepared with a pad of absorbent cotton-wool in the middle, and a self-adhesive border. Very useful for dressing wounds, ulcers, etc., and for shielding diseased surfaces from friction. Perfection for Bed Sores. Made all shapes and sizes, in boxes of one dozen. Can with ease be applied by patients ignorant of the science of bandaging.

An ARMY SURGEON writes:—"I think the idea is a capital one, and have no doubt but that it will be the first field dressing of the future."

Three dozen assorted (sizes inside the border: 2 by 2, 2 by 3, 3 by 3, 3 by 4, 3 by 5, and 4 by 4 inches—6 of each), on Holland, 2/6; on Waterproof Sheetings, 3/-.

THE ABOVE CAN BE OBTAINED FROM ALL WHOLESALE HOUSES.

With two movable, plate-glass shelves, for instruments, etc.

### DR. FISHER'S PATENT FLEXIBLE KNEE-CAP.

The above is considered the only Knee Cap made which allows free action of the joint, while at the same time keeping up the requisite pressure.

The front is constructed of nickel-plated fine steel wire, and meshed in a manner to contract and extend with the motion of the knee, but fixed from side to side. It is lined with soft felt. The top and bottom straps are merely for the purpose of keeping the knee-cap in position, but the middle portion is made of soft buckskin, divided into two straps which buckle on the outside. It is cool and light, adding scarcely any size to the joint, and it is calculated to wear for a considerable time.

In ordering, give circumference of centre of knee, also four inches above and below the same, and state for which knee.

PRICE 30s.

### DR. FISHER'S (IMPROVED) BOW-LEG SPLINTS.

These Splints have been in use during the last nine years with very great success. Directions for measurement and application: Give height from ground to centre of knee, and state age of child.

Should the Splints not fit well below the knee, calf, or ankle, warm the part gently before the fire till it bends freely, then mould it on the leg and hold it in position until it has set. The success of these Splints depends a good deal on keeping the centre strap as tight as possible without causing inconvenience. They may also be worn as a support for weak ankles only, in which case it should be stated on which side of the foot the child is inclined to walk. Light boots should always be worn.

Per pair.

PRICE, FIRST QUALITY ... ... ... 31s.  
Do. SECOND OR ORDINARY QUALITY 21s.

### RÖNTGEN RAYS.

Messrs. WEISS will be pleased to give demonstrations (by appointment) of this apparatus free of charge to Medical Men.

RESTRAINING  
MISCHIEVOUS HANDS, &c.,**  
Consisting of cages for the Hands and  
"Genitalia."

**GUARDS** for protecting genitalia of  
cricketers.

**ARTERIOMETER.**

Patented

1895.

This clinical instrument has been devised with a view of determining the internal diameter or calibre of the radial artery.

The interval traversed by the indicator from the point when it leaves zero, and moves in the direction of the arrow, to that which shows the artery to be occluded, affords the measurement of the calibre.

**PRICE 23 13 6.**

An illustrated descriptive pamphlet of the above, and the SPHYGMO-DYNAMOMETER, sent free on application.

**THE STETHONOSCOPE.**

(PATENT APPLIED FOR.)

(TESKE.)

**A New Instrument for Auscultation.**

THE STETHONOSCOPE is an instrument constructed on the same principle as the Microphone. It is of English manufacture, and is preferable to the Phonendoscope in that it can be attached to any ordinary Binaural Stethoscope, and when not in use, can be carried in the waistcoat pocket without the slightest inconvenience.

ONE OF THE LEADING LONDON CONSULTANTS says:—"By its use the sounds are rendered much more distinct than is the case when an ordinary stethoscope is used. This is exemplified in the highest degree in regard to the lung sounds. The varieties of rales can be most easily distinguished, and areas of tubercular breathing can be mapped out with greater facility than heretofore. In regard to the heart, the relative loudness of the normal sounds—always a very important point—is most accurately determined. Murmurs can be distinguished which, under other circumstances, would pass unnoticed."

**Price, in case, 21s. 6d.**

**MAW'S ANTISEPTIC DRESSINGS.**

*Prepared under Medical supervision in accordance with the special formulæ of Lord Lister.*

**GUARANTEED TO CONTAIN THE CORRECT PERCENTAGE OF THE ANTISEPTIC.**

The best materials are used, and the greatest possible care is taken to prevent contamination during the course of preparation.

Large quantities of these Dressings are now being shipped abroad for use in the Graeco-Turkish War.

**SPECIAL PRICE LIST ON APPLICATION.**

*Vide THE LANCET, Feb. 13th, 1897.*

*Vide MED. PRESS AND CIRCULAR, March 10th, 1897.*

*Extract from BRITISH MEDICAL JOURNAL, Feb. 27th, 1897.—*

"Mr. Bickerton of Liverpool has had a modified nasal style and probe made for him by Messrs. Arnold & Sons. It is shown in the accompanying drawing. Mr. Bickerton states that the instrument possesses the following advantages: 1. The introduction of the style is facilitated by use of the probe—(a) The probe may be passed first and the style then threaded over it, the horizontal limb being convenient to lay hold of; (b) The probe may be placed in the style, its end just projecting through, thus converting an open end with sharp margins likely to hitch against the mucous membrane of the tube or any obstruction, into a solid point which will more readily pass any stricture of the duct. 2. When *in situ* the style can be worn indefinitely, for (a) being hollow it allows the tears to pass down, and the obstruction is at once relieved; (b) the horizontal limb of the style lies in the slit inferior canaliculus, where it is not visible. 3. The open elbow of the style is less liable to blockage by mucus, and is more easily cleansed while *in situ*—as when blocked it is only necessary to pass the probe down in order to ensure patency."

## “Ronuk” Polishes

FOR FLOORS, FURNITURE, &c.

They give a brilliant polish with the minimum of labour; possesses valuable Sanitary and Preservative Properties, and impart an agreeable freshness to the atmosphere. Now extensively used in Metropolitan and Provincial Hospitals, &c.

I have much pleasure in stating that I consider the Sanitary Polish, “RONUK,” an excellent composition. I have used it in the Wards of this Hospital for some time, it cleanses the floors thoroughly, and gives them a high polish. (Signed) EMMELINE B. FEASER, Matron.

I have used the Sanitary Polish, “RONUK,” for sometime in our New Infirmarys, Wards and Day Rooms and consider it the best in the market. As a cleaner and preservative it does its work admirably, it is easy to use and most economical. I have no hesitation in recommending it to Institutions in which Wood Block Flooring is in use, as it not only cleanses and preserves, but also improves them in appearance. (Signed) VALENTINE W. BURDEN, Master.

SUPPLIED IN FOURTEEN POUND TNS.

A Sample will be sent free to any Institution on application to

## SPIRAL ELASTIC STOCKINGS.

There are few members of the profession who have not had experience of the extreme disappointment so often resulting from the use of elastic stockings by their patients. They are usually ill-fitting, and ill-adapted to the particular case; being taken out of stock, they fit only in the event of the patient's leg corresponding to one of the graduated sizes always kept. The woven stockings, sold by all waterproof dealers, chemists, and sometimes by drapers, are made of very common materials—are at first very unyielding, giving great pain and discomfort if a little tight in any one part; but they steadily give way and yield no pressure. The stocking remaining apparently good is worn when quite useless, and found to have been a bad investment, although the original cost was trifling. The prices of goods of our own make will of course not compete with those just named; with us every order is made *expressly to measure*, and with due regard to the ease in the selection of material used. This plan occupies a little more time in the execution of an order, but disappointment is never experienced, and our goods *always fit*. I venture to suggest that these considerations are more important than mere cheapness in a great majority of cases occurring in ordinary practice.

Circumference at a, b, and c. Length from a to d and d to e.

State sex and age of patient, and all particulars of case.

**Aberystwith, "The Biarritz of Wales,"**

is highly recommended for invalids. It possesses the most equable temperature, its shore being swept by the Gulf Stream, and the S.W. breezes of the Atlantic. The drainage is perfect, and the town is supplied with the purest water from Plymliammon. The late Sir James Clarke, M.D., says: "A fortnight in Aberystwith is equivalent to a month's residence in most watering places."

# BUXTON—DERBYSHIRE.

ON THE MOUNTAIN LIMESTONE, 1,000 FEET ABOVE SEA LEVEL.

## THE WARM MINERAL WATER BATHS OF BUXTON.

Natural Temperature of Water 82° Fahr. Average number of Bathers during past Twenty Years 62,867 per annum.

These very extensive Baths are fitted with all modern appliances for Bathing, with either the natural or heated Mineral Water, and also for the Massage Treatment.

The warm Springs of Buxton have been resorted to from the earliest ages for the cure of Rheumatic and Gouty affections.

On application at the Duke of Devonshire's Estate Office, Buxton, lists of charges for Bathing, with analysis of the water, and all necessary information will be forwarded.

Medical Gentlemen will, on personal application at the same Office, receive an order to view and make use of the Baths, free of all cost.

*A new and magnificent Pump Room has been provided by the Duke of Devonshire, and it is estimated that a million persons drink of the Waters annually. There is also a Social Club which Visitors can join as weekly members.*

**ATTRACTI0NS.**—BUXTON GARDENS & PAVILION.—These charming Gardens are unsurpassed in England. Sylvan Walks, Shaver-Lawns, Waterfalls, and Rustic Bridges; skimming trout abound; and every form of popular amusement, such as Tennis, Rowing, Rinking, Bowling, Croquet, &c., may be found here. Indoors: Vocal and Instrumental Concerts, Organ and Pianoforte Recitals, Theatre for Dramatic Performances. Military and Orchestral Bands play daily throughout the year. Local Bands play on the Slopes and Sylvan Park on alternate evenings.

**GOLF.**—Very fine 18-hole Course, over 3 miles long; splendid turf. Coaches and other Vehicles run daily to Chatsworth, Haddon Hall, Peveril of the Peak, Dovedale, Monsall Dale, &c. &c.

# STRATHPEFFER SPA,

IN THE HIGHLANDS OF SCOTLAND.

## THE STRONGEST SULPHURETTED-HYDROGEN WATERS IN GREAT BRITAIN.

The various Sulphur Waters of Strathpeffer are chiefly valuable in cases of Rheumatism, Gout, Skin Affections and Indigestion. The Carbonated Chalybeate Spring is employed as a tonic.

The Establishment of Baths, which has been recently enlarged, now includes besides Sulphureous Baths, Douches in different varieties, Peat or Moor Baths, similar to those of Franzenbad, Russian, Needle, and Pine Baths, Inhalation, &c., &c.

Skilled Masseurs and Masseuses are in attendance.

Strathpeffer is noted for its pure bracing air and beautiful surroundings. Several excellent Hotels and Lodging Houses.

A Golf Course has been laid out for the Visitors, and a Band plays during the season—from April to October.

Medical Gentlemen are invited to inspect and make use of the Baths, free of charge.

For further information apply to the Estate Office.

N.B.—Under the New Act voluntary boarders can be received, on their own personal application.

## THE GROVE, JERSEY.

A HOME for a limited number of Ladies and Gentlemen of the upper classes afflicted with Nervous and Mental Diseases.

It is healthily situated on the high grounds 2 miles from St. Heliers, commanding extensive views over St. Aubin's Bay, and comprises a park of 11 acres, besides gardens and farm land, and a mansion of handsome proportions, in which all is arranged with a view to the comfort and privacy of home. The Grove is especially suited to those whose constitutions are delicate, or temporarily reduced through Alcohol, Drugs, Hysteria, or Nervous and Mental Diseases.

The Amusements and Occupations include Tennis, Boating, Billiards, Gardening, Farming, &c. Sea-bathing (hot and cold). Private machines on beach, ten minutes walk.

Associated and single rooms, or self contained suites of 2, 3, or 4 rooms. Voluntary Boarders and friends of patients may be accommodated. Horse and carriage exercise.

For terms and further particulars (descriptive, legal, means of access, &c.) apply to F. NEEL GAUDIN, M.P.C., M.R.C.S.E., L.S., Proprietor; and Resident Medical Superintendent, The Grove, Jersey.

## Exeter City Asylum.

PRIVATE PATIENTS are admitted into this Asylum at a uniform rate of 25s. a week. This sum include everything except clothing. For further information, printed forms of certificates, etc., apply R. L. RUTHERFORD, M.D., Medical Superintendent.

"The wards are in excellent order, bright and cheerful, and those occupied by the patients of the private class should attract many, whose means are limited, from all parts of England."—Extract from the Forty-eighth Report of the Commissioners in Lunacy.

SPRINGFIELD HOUSE PRIVATE  
ASYLUM, BEDFORD.

For Forms of Admission, etc., address DAVID BOWER, M.D., as above (Dr. B. attends at 5, Duchess Street, Portland Place, W., on Tuesdays, from 3 to 4).

TERMS—TWO AND A-HALF GUINEAS PER WEEK.

There are vacancies for gentlemen; vacancies for ladies will be announced when they arise.

## BOREATTON PARK.

This Private Asylum, which was founded by the late W. H. O. Sankey, M.D., F.R.C.P., for the reception of a limited number of ladies and gentlemen mentally afflicted, is now conducted on the same lines by his son, H. H. O. SANKEY, M.A., M.B., B.C.Cantab.

Dr. BURD, Newport House, Shrewsbury, M.D. and M.C.Cantab, Consulting Physician to the Salop Infirmary, and to the Salop and Montgomery Lunatic Asylum, &c., is Consulting Physician, and visits the House once a month, and oftener if required.

The mansion stands high, among handsomely laid out gardens in the midst of a picturesque deer park (about 70 head of deer are kept), and commands a magnificent view of Welsh mountain scenery.

Carriages, horses, lawn-tennis, golf, trout and other fishing are provided.

The Asylum is situated about ten miles from Shrewsbury, within easy distance of Baschurch Station, G.W.R., whence carriages can be sent at any time for visitors.

Letters and telegrams should be addressed to Dr. SANKEY, Boreattion Park, Baschurch, Salop

ST. ANDREW'S HOSPITAL FOR MENTAL  
DISEASES, NORTHAMPTON.

FOR THE UPPER AND MIDDLE CLASSES ONLY.

President—The Right Hon. The EARL SPENCER, K.G. Chairman of the Committee of Management—

The Most Hon. the Marquis of

NORTHAMPTON, K.G.

The Institution is pleasantly situated in a healthy locality, one mile from the London and North-Western or Midland lines, and 1½ hours only from London.

It is surrounded by more than 100 acres of pleasure grounds.

Great care is exercised in the classification of the Patients according to their habits and different degrees of mental aberration, so that those who are quiet or convalescent may not associate with those whose minds are more affected.

Ample means of occupation and amusement are provided, including Cricket, Croquet, Lawn Tennis, and Archery. There are also Billiard Rooms, and a large Recreation Hall and Theatre.

The terms vary from 25s. to 24s. a week according to the requirements of the case.

Patients paying higher rates can have Special Attendants, Horses and Carriages; and Private Rooms in the Hospital, or in detached Villas in the grounds of the Hospital; or at Moulton Park, a branch establishment, two miles from the Hospital.

There is also a Seaside House, to which Patients may be sent.

For further information apply to the Medical Superintendent.

## Isle of Wight County Asylum.

## PRIVATE PATIENTS.

A New and Detached Residence for Private Patients in connection with this County Asylum will be opened on 1st July, next.

The building is beautifully situated in the centre of the island, in a warm and healthy climate and fitted with the electric light and other modern conveniences.

Provision is made for amusement by dances, concerts, billiards, etc., and for employment and treatment.

Apply to the Med. Superintendent, Whitecroft Isle of Wight.

## NERVOUS AND MENTAL AFFECTIONS.

The Grove, Catton, near  
NORWICH.

A quiet HOME for the Special treatment of a limited number of ladies suffering from nervous and mental affections. The house stands in beautiful grounds of about 10 acres in extent, is situated a mile-and-a-half from the city of Norwich, and contains the most modern requirements and comforts. Carriage drives and amusements of all kinds are provided for the patients. Boarders are also received without certificates.

For further particulars, apply to the Resident Physician, CECIL A. P. OSBURN (formerly medical attendant Grove House Asylum, and The Oaks Sanatorium, Hythe).

## THE COPPIE, NOTTINGHAM.

## HOSPITAL FOR MENTAL DISEASES.

President: The Right Hon. The EARL MANVERS.

This Institution is for the reception of a limited number of Patients of both sexes, of the Middle and Upper Classes only, at moderate rates of payment. It is pleasantly situated on an eminence a short distance from Nottingham, and commands an extensive view of the surrounding country, and from its singularly healthy position, affords every facility for the relief and cure of those mentally afflicted. Particulars as to terms, &c., may be obtained from Dr. TATE, the Medical Superintendent.

## Stretton House, Church

Stretton, Salop.

A Private Institution for insane gentlemen Established 44 years.

Church Stretton lies among the hills, 800 ft. above s. l.; climate very healthy and bracing; excellent facilities for recreation and employment. A few voluntary cases received. Express trains from London (44 hours) and other parts.

For further information see "Medical Directory," p. 1943, or apply for prospectus to Resident Medical Officer.

Telegrams: CAMPBELL-HYSLOP, Church Stretton

KINGSDOWN HOUSE,  
BOX WILTS.

A Sanatorium for the Treatment and Cure of Mental and Nervous Disorders.—The Commissioners in Lunacy report in favour of this Institution as being one where suitable accommodation can be obtained for a moderate charge. It is situated in lovely country, having a fine golf links close to the house, and being five miles from the city of Bath, and fifteen minutes walk from Box station.

Voluntary patients or boarders received on their own personal application. For terms apply to

H. C. MACBRYAN,

Joint Proprietor and Medical Superintendent

City of London Asylum, near  
Dartford, Kent.

PRIVATE PATIENTS are received at a uniform charge of £1 1s. per week for each person, to include all things necessary except clothing. There are now separate wards for this class.

The Institution is situated on an elevated site between Dartford and Greenhithe, and is about 16 miles from London on the S.E.R.

The Estate comprises 140 acres. Cricket, Tennis, Billiards, Dances, and other amusements are amply provided.

For particulars apply to Medical Superintendent. The Hollies, near Dartford

St. Luke's Hospital,  
London, E.C.

ESTABLISHED 1751.

This Hospital was established for the treatment of mental diseases of the middle classes. Preference is given to acute cases, and these are admitted either gratuitously or on payment of a weekly sum varying from 14s. to 30s., according to the circumstances of each. Patients are eligible for admission from any part of the United Kingdom. Forms of application may be had from, and enquiries addressed to, the Secretary, at the Hospital.

The Convalescent Establishment in connection with the Hospital is at St. Lawrence, near Ramsgate.

W. H. BAIRD,

Secretary.

## Fiddington House, Market

Lavington, Wilts. This old-established Asylum (under new management) for Private Patients only, is pleasantly and healthily situated, and stands in about fifteen acres of pleasure grounds, gardens, &c. Every indoor and outdoor amusement provided for the patients, including billiards, cycling, and carriage exercise. Voluntary Patients or Boarders received without certificates. Railway station, Devizes, G.W.R.

For terms, &c., apply to the Proprietor or Medical Superintendent.

Telegrams: REILLY, Market Lavington.

**WONFORD HOUSE HOSPITAL** for the INSANE, near EXETER.—A Registered Hospital for the UPPER and MIDDLE CLASSES.—This Institution is situated in a beautiful and healthy locality, within a short distance of the City of Exeter. There is comfortable accommodation at moderate rates, both in the Hospital itself and at Plantation House, Dawlish, a seaside residence on the South Devon Coast, affording more privacy, with the benefit of sea-air and a mild and salubrious climate. Private rooms and Special Attendants provided if required. Voluntary Patients or Boarders also received without certificates. For terms, &c., apply to P. MAURY DEAS, M.B., M.S.Lond., Resident Medical Superintendent.

**WEST MALLING PLACE, KENT** for MENTAL and NERVOUS DISORDERS, an easy distance from London, between SEVENOAKS and MAIDSTONE, a commodious country residence, beautifully situated in a retired position on its own ample grounds, in one of the healthiest localities in England. Old-established, reconstructed, most modern nursing and other requirements, home-like. Dr. Adam resident physician, formerly Phys.-Supt. Crichton Royal and Metropolitan Public Institutions. London Address, 64, Welbeck St., Cavendish Sq., W. (Wed. morn.). Voluntary boarders received. Telegraphic Address: "Adam, West Malling."

**"PERITEAU."**—A Private Asylum for five mentally afflicted Ladies conducted on the system of a private family, with an utter absence of anything that could remind the invalids that they are under care. A special feature of this establishment is the employment of ladies only as attendants, and numerically being one in excess of the patients. Medical Superintendent, E. W. SKINNER, M.D.—Address, Proprietress (Mrs. SKINNER, Senr.), "Periteau," Winchelsea, Sussex. Personal interview from 2 to 3.30 second Wednesday in every month.—33, Wimpole Street, Cavendish Square, W.

**HAYDOCK LODGE, NEWTON-LE-WILLOWS, LANCASHIRE**, is charmingly situated in a healthy and retired neighbourhood, midway between Liverpool and Manchester, about 2 miles from Newton-le-willows Station on the London and North Western Railway. It is a comfortably-furnished Country Mansion, especially adapted for the care and treatment of persons of unsound mind. Besides the use of the general sitting-rooms, &c., patients of both sexes can have private apartments and special attendants at moderate rates of payment. Information as to terms, &c., may be obtained on application to the Resident Medical Superintendent, CHARLES T. STREET, L.R.C.P.Lond., M.R.C.S.Eng., who attends at 51A, Rodney Street, Liverpool, on Thursday from 2 to 4. Telegrams: "Street, Ashton-in-Makerfield." Telephone (National) "No. 3, Ashton-in-Makerfield." Visiting Physician—ALEXANDER DAVIDSON, M.D., F.R.C.P., Physician to the Liverpool Royal Infirmary.

**HYGIENIC HOME AND REMEDIAL EXERCISE ROOMS**, 39, York Place, Portman Square, W. (and "Sunnybank," Chiltern Hills, Bucks). Telegraphic Address: "CHREIMAN, LONDON." Remedial Exercises Daily for Muscular and Nervous Weakness; Asymmetries of Chest and Spine; Increase of Respiratory Capacity, &c. All Resident and Non-resident Cases under their own Medical Advisers.

## NORTHWOODS HOUSE, WINTERBOURNE, near BRISTOL.

### PRIVATE ASYLUM for LADIES and GENTLEMEN.

Situated in a large park in a healthy and picturesque locality, easily accessible by rail via Bristol, Patchway, or Yate Stations. Voluntary Boarders can now be received.—For further information see Medical Directory, page 2013; and for terms, &c., apply to DR. EAGER Resident Physician.

### Reading Union.

#### ASSISTANT NURSE WANTED.

Wanted, an Assistant Nurse at this Workhouse Infirmary. Salary £30 per annum, with rations, lodging, washing, and indoor uniform, valued by the Guardians at £35 per annum. Quarterly deductions will be made from the salary, in respect of the salary and emoluments, in accordance with the provisions of the Poor Law Officers' Superannuation Act, 1896.

Candidates must be between 25 and 30 years of age, and must have had not less than three years' hospital or infirmary training.

Applications, stating age and experience, accompanied by copies of not less than three recent testimonials, must be sent to me not later than Thursday, 1st July, 1897.

Canvassing, either directly or indirectly, will disqualify any candidate.

By order of the Board,  
CHARLES KIFT, Clerk.  
Guardians' Offices, Thorn Street, Reading,  
June 10th, 1897.

### City of Sheffield.

#### FEVER HOSPITALS.

Wanted, a single woman or widow without incumbrance as MATRON of the Winter Street Fever Hospital, Sheffield. Candidates must have had experience as Matron, and be trained and qualified nurses, able to keep the books and to superintend the nursing, cooking and general arrangements of the Hospital. Salary £60 per annum, with rations and apartments. Written applications, stating age, qualifications, and past experience, with copies of testimonials of recent date, marked "Application for Matron," to be sent to me not later than Tuesday, the 6th July next.

By order,  
HERBERT BRAMLEY,  
Town Hall, Sheffield,  
16th June, 1897. Town Clerk.

A lady Nurse (surgical and obstetric training) is going to Rangoon shortly, and would be glad to take charge of a patient or invalid *en route*. In connexion with MR. PERCIVAL TURNER. INVESTIGATION OF PRACTICES FOR PURCHASERS.

DEBTS COLLECTED.

BOOKS POSTED AND AUDITED.

PARTNERSHIP ACCOUNTS ADJUSTED &amp;c. by Mr. F. G. KEMBLE, F.S.A.A.

Incorporated Accountant, 4, Adam Street, Adelphi, London, W.C.

**MEDICAL PARTNERSHIP AND CON-**

VEYANCING AGENCY.

1, ADAM STREET, ADELPHI, W.C.

The Sale of Practices and Partnerships negotiated. Trustworthy Locum Tenens and Assistants can be had at a few hours' notice.

N.B.—No charge made to Purchasers.

**Notice.—Mr. J. C. Needes,**

with an experience of over a quarter of a century, is in an exceptional position to give intending purchasers independent information concerning most practices and partnerships. Those Investments in the following List marked with an Asterisk are well known to him, having been purchased through his office by the present Incumbents years ago, and in many other cases, introduction can be given to gentlemen who have taken charge of the practices during the absence of the incumbents.

**London Suburb.—An old-**

established PRACTICE worth about £700 per annum. Situated in a pleasant London suburb (south) offers for negotiation. The house is large, in an excellent position, and held at a moderate rental. Appointments yield £120 a year. About 50 cases of midwifery yearly. Fees 1 to 6 guineas. An efficient introduction given. The practice admits of extension and has been rapidly increasing.

**Moderate premium.—Country**

PRACTICE estimated to be worth about £1,000 a year, including appointments £175. Situated in a town of 4,000 to 5,000 inhabitants in Cambridgeshire. The house is detached and contains 2 sitting-rooms, 5 bed-rooms, &c., with garden and stabling. Rent £30. Premium £200, £600 down and balance by instalments extending over two years.

**Staffordshire.—A well-**

established PRACTICE worth between £500 and £600 per annum can be secured for £450. Situated in a thriving town of 50,000 inhabitants. Expenses very light. House rent low, and neither horse or assistant required. Three months' introduction given. The practice is capable of increase.

**South of England.—In a**

beautiful district, about 10 miles from a cathedral city, a well-established easily worked country PRACTICE, yielding last year about £500. Appointments £30. Railway station in place. Expenses very light; a horse not kept. Visits 2s. 6d. to 10s. Midwifery 1 to 5 guineas; about twenty cases yearly. Rent £30 a year. Three months' introduction given. Premium £800. Hunting, fishing and shooting.

**\*London, W.—Well established**

cash PRACTICE yielding £650 a year and increasing. About 50 cases of midwifery yearly, at 1 to 2 guineas. Hours of attendance at the surgery 11 till 1 and 7.30 till 9.30. Vendor occupies an excellent family residence. (Rent £65) within a few hundred yards of the surgery. An efficient introduction given.

**Holiday Voyage.—America.**

A Surgeon, aged about 35 years to a first-class s.s. carrying saloon passengers only, would be willing to take charge from the middle of July of a good class PRACTICE in London whilst the Incumbent of the latter acted as his substitute on the ship for one voyage. Remuneration £15 for the trip, exclusive of wine money.

Apply to J.C. NEEDES, 1, Adam Street, Adelphi, W.C.

**Locum Tenens and Temporary**

ASSISTANTS. Practitioners requiring the above can immediately obtain thoroughly reliable qualified gentlemen upon application to 1, Adam Street, Adelphi, W.C. Every gentleman engaged by the office in either of the above capacities is personally known to Mr. J. C. NEEDES. An office fee of half a guinea is payable by the principal.

Telegraphic Address: "Acquirement, London."

**MEDICAL TRANSFER AND PARTNERSHIP**

32, LUDGATE HILL.

Messrs. Orridge & Co., Medical Transfer Agents, Referees, and Valuers, in offering their services to the Profession, have pleasure in referring to the fact, that for about HALF A CENTURY the name of Mr. Orridge has been known in the advertising columns of the leading Medical Journals, that a very large proportion of the Medical men throughout the Kingdom have confided their interests in the adjustment of Partnerships and Transfers to their care.

Purchasers who will communicate (confidentially) the nature and extent of their wishes regarding investments can be apprised of appropriate opportunities as they occur.

On occasions where advice is required in forming a correct conclusion as to the worth or eligibility of a Practice, Messrs. Orridge & Co. trust that their familiarity with the various contingencies that govern value will be found of considerable service to those by whom they may be employed.

N.B.—No charge is made to Purchasers.

**MEDICAL TRANSFER AGENCY,**AND  
ACCOUNTANCY OFFICES,  
19, CRAVEN STREET, STRAND, W.C.

Partnerships and Transfer of Practices speedily arranged. Locum Tenens or Assistants, a large number of reliable well qualified men always available.

Open to all medical men. No charge to Purchasers or for Enquiries.

Every application receives the immediate personal attention of the Principals.

All communications treated as confidential.

List of Terms (which are moderate) and References gratis on application.

Telegraphic Address: "INTERJOIN, LONDON."

# THE SCHOLASTIC, CLERICAL, AND MEDICAL ASSOCIATION. LIMITED.

## MEDICAL DEPARTMENT.

This Association was established in 1880 as a Limited Liability Company under the direction of professional men, its object being the creation of a RESPONSIBLE and THOROUGHLY TRUSTWORTHY Agency. The Medical Department has met with so great success that it has been found necessary for one of the Managing Directors (Mr. G. B. Stocker) to devote his whole attention thereto; and he has the assistance of an experienced Medical Accountant and a large staff of clerks. Further, a Board composed entirely of gentlemen of high standing in the Medical Profession has been appointed, and to them matters of dispute and complaint are referred.

The Association undertakes the SALE of PRACTICES and PARTNERSHIPS; the Introduction of LOCUM TENENS and ASSISTANTS; MEDICAL ACCOUNTANCY (by a duly qualified Medical Accountant); INVESTIGATION and VALUATION of Practices, &c.; POSTING BOOKS and sending out Bills, &c., &c.

A Pamphlet relating to the Medical Department with the names of the "Directors" and the "Medical Advising Board," and terms will be sent on application to—Mr. G. B. STOCKER,\* MANAGING DIRECTOR, 8, LANCASTER PLACE, STRAND, W.C.

Telegraphic Address:—TRIFORM, LONDON."

### FOR SALE.

- (2) COUNTRY TOWN, West.—Good class PRACTICE of £500 to £600 per annum. Fair sized house. Centrally situated. Rent £25. Premium £800 cash. Three months' introduction.
- (3) LONDON, W.—Middle and working class PRACTICE. Cash receipts for the year ending December 31st, 1896, £628, including appointments now worth £278. No midwifery under £1 1/-. No carriage. Rent £60. Premium £850.
- (4) SOUTH WESTERN COUNTY.—Old-established PRACTICE in a small country town. Cash receipts for last two years have averaged £364 per annum, including appointments of £140. One horse; one opponent. Very good house, with large garden. Rent £50. Premium £550. The practice is capable of considerable increase.
- (5) Large PROVINCIAL TOWN.—An exceptionally good opportunity offers for an experienced gynaecologist with capital.
- (6) LONDON, W.—Good class PRACTICE of £600 per annum. Visiting fees 7/- upwards. First-rate house, rent £160, which need not necessarily be taken. Premium £750.
- (7) LONDON.—PARTNERSHIP in a Middle-class PRACTICE. Receipts for 1896, £1,300. Visiting fees from 2/6 and 5/-. Midwifery about thirty cases from 1½ to 3 guineas. Price for half share £1,300.
- (8) MIDLAND TOWN.—Middle and working class PRACTICE of £750, consisting largely of club work. Rent of house with stabling and garden, £60. Three or six months' introduction. Premium £700.
- (9) SOUTH COAST—Fashionable Watering Place. Cash receipts for last three years average £318 per annum, including £66 from a transferable club. Middle and working class. House well situated contains 13 rooms with bathroom, rent £23. Suitable for resident patients. Efficient introduction. Premium £345. This practice has been investigated by the Association's accountant.
- (10) LONDON, W.—PARTNERSHIP in small high-class Practice. Would suit only a man of considerable experience and private means.
- (11) First-rate Residential Town in the NORTH OF ENGLAND. Middle and working-class PRACTICE of about £500. No visiting fees under 2/6. Midwifery mostly £1 1/-. Dispensing by chemist. No carriage. Good house (ten rooms) in the best part, rent £84. Premium £750.
- (12) Large NORTHERN CITY.—Middle and working class PRACTICE. Cash receipts for 1896 about £500. Visiting fees 2/6 to 5/-. Well situated house containing nine rooms and attics. Rent £40. Premium £500.
- (13) NORTH OF ENGLAND.—Country PRACTICE. Bookings last year £400. Cash receipts, £300. Fees 2/6 to 10/6. Midwifery £1 1/-. No clubs. Union appointment £30. Good house with garden, stabling, &c., attached. Rent, including rates and taxes, £64. Premium £530, to include book debts. Considerable scope.
- (14) LANCS.—A working-class PRACTICE in a manufacturing town. Cash receipts for past two years average £515. Fees from 2/6. Midwifery £1 1/-. No horse. Good house on lease. Price £500, including drugs. Efficient introduction.
- (15) NURSING HOME in a fashionable South Coast Watering Place and Health Resort. Receipts nearly £500. Premium, including furniture, &c. (valued at £450), £600.
- (16) NORTH-WESTERN COUNTY.—Country PRACTICE of £380 (receipts for 1896) increasing. Near several good towns. Rent of house, with good garden, £40. Premium £250.
- (17) CONTINENTAL.—A small PRACTICE in a first-rate town. Receipts last season, owing to exceptional causes, only £200. Scope to £400 or £500. Premium £200.
- (18) Large NORTHERN CITY.—Cash receipts for the last three years average £400 (1896, £508), including appointments of nearly £100 per annum. Likely to increase in value. Visiting fees 3/6 to 7/6. No carriage. Small house situated on main road, with stabling and garden, rent £30. Premium £500. Purchaser must be a Roman Catholic.
- (19) SOUTH WESTERN COUNTY.—Unopposed Country PRACTICE in a very picturesque part. Receipts at present at rate of over £300 per annum and increasing. Cottage residence with stabling, garden and meadow, rent £26. Premium £375. Hunting, fishing and shooting.
- (20) LONDON.—Middle-class residential suburb.—PRACTICE of £1,100 per annum, average receipts for the last three years, but much neglected recently owing to ill-health. Visits 3/6 upwards. Midwifery £1 1/-. upwards. Good corner house. Price for house and practice, £1,100.

### For Sale.—Continued.

- (21) SCOTLAND.—In a lovely part of the country, much frequented in the summer, a PRACTICE of over £500 (receipts for 1896), with first-rate house. Would best suit a man with private income. Premium £500.
- (22) SCOTLAND.—Unopposed country PRACTICE of £400 to £450 per annum, near the sea. Working expenses and rent very light. Premium £400.

### WANTED TO PURCHASE.

- (23) Wanted, a country or country town PRACTICE of £500 per annum, upwards. Preferably within two hours' rail of London. Purchaser is a B.A.Oxon., M.R.C.S., &c., and has the necessary capital.
- (24) Wanted, a good class PRACTICE in a good hunting district within an hour and a half of London. Some society indispensable. Purchaser M.R.C.S., L.R.C.P., experienced and possessed of considerable private means.
- (25) Wanted, at once, an unopposed or good country town PRACTICE of £800 to £1,000 per annum by an experienced practitioner who has the necessary capital.
- (26) Wanted a PRACTICE or PARTNERSHIP in the neighbourhood of Carlisle, or in a pleasant town, south. Purchaser is an M.D.Lond., and can invest £1,500.
- (27) Wanted, a good class PRACTICE or PARTNERSHIP in Harrogate or good residential suburb of Liverpool or Manchester, with scope for surgical work (ophthalmic in particular). Purchaser is an F.R.C.S., &c., age 29, and can invest up to £2,000.
- (28) Wanted, a small PRACTICE in Devonshire or Cornwall on the coast with a good yachting harbour. Purchaser is a graduate of Edinburgh, experienced, and can invest £500.
- (29) Wanted, a good-class non-dispensing PRACTICE of about £700 per annum in a good residential neighbourhood or country town within easy reach of London. Good house and garden. Purchaser is M.B.Lond., age 32, married, and can invest £2,000.
- (30) Wanted, a PRACTICE or PARTNERSHIP—Sydenham or good London suburb preferred. Purchaser is M.D.London and has sufficient capital.
- (31) Wanted in June, a good class PRACTICE in a suburb of Manchester, or any large city. Purchaser is a F.R.C.S.I., and can invest £2,000.
- (32) Wanted to purchase, a PRIVATE ASYLUM or HYDROPATHIC. Purchaser is an M.D., M.S., experienced in lunacy, and can invest up to £4,000.

N.B.—There are several hundred purchasers on the books of the Association so that the sale of any good Practice or Partnership within a reasonable time is virtually certain.

### LOCUM TENENS SUPPLIED.

\* Author (jointly with Wm. Barnard, M.A., LL.B.) of "Medical Partnerships, Transfers and Assistantships," published by Stevens & Sons, Ltd., 119, Chancery Lane, E.C. Price net, 8s. 6d., or by post, 9s.

# “APENTA”

Bottled at the Springs, Buda Pest, Hungary,

*UNDER EMINENT SCIENTIFIC CONTROL.*

“We know of no stronger or more favourably-constituted Natural Aperient Water.”

*Q. Liebermann.*

Royal Councillor, M.D., Professor of Chemistry, and Director of the Royal Hungarian State Chemical Institute (Ministry of Agriculture), Buda Pest.

**APPROVED BY THE ACADEMIE DE MÉDECINE, PARIS.**

“The proportion of sulphate of soda to sulphate of magnesia is 15·432 to 24·4968 in the litre, so that this water may be classed with the best Aperient Waters, and be pronounced one of the strongest.”

PROFESSOR OSCAR LIEBREICH, *University of Berlin.* (“*Therapeutische Monatshefte.*”)

“Apenta Water shows an excellent proportion of sulphates and chlorides.”

“It is therefore a **most useful Aperient.**”

“It contains an appreciable amount of lithium chloride, by which it is distinguished from all the other waters of this group.”

“The presence of lithium in Apenta Water explains why a course of the latter is **so useful in warding off attacks of gout**, and in moderating their intensity when present.”—“*THE BRITISH MEDICAL JOURNAL,*” 26th September, 1896.

“The water is constant in its composition.”

“The predominance of sulphate of magnesia, the existence of iron in organic combination, the presence of lithia and of bicarbonate of soda (the traces of bromine, boron, fluorine, and thallium) are all advantages demanding the attention of therapeutists to this purgative water, and recommending it to practitioners.”

DR. G. POUCHET,  
*Professor of Pharmacology in the Faculty of Medicine of Paris.*

“*THE LANCET*” says:—

“A much-esteemed purgative water.”—“**Its composition is constant.** The practitioner is thus enabled to prescribe definite quantities for definite results.”

“*THE EDINBURGH MEDICAL JOURNAL*” says—

“One of the **most valuable aperient waters.**—Agreeable to take.—Very efficient.—‘Apenta’ Water requires only to be known to be extensively prescribed.”

“**Constant in composition,** and therefore reliable in its therapeutic effects.”

“**An ideal purgative.**”—“*PRACTITIONER.*”

Considering the well-known nature of the Hungarian Bitter Water Springs, it must obviously be desirable for the medical profession and the public to be assured authoritatively that the working of the Springs from which Apenta Water is drawn is carried on in a scientific manner, and not merely upon commercial lines, and with this view it is placed under direct independent scientific and hygienic control and supervision.

**Full Analysis, Additional Testimony, and Samples will be supplied on application to  
The APOLLINARIS CO., Ltd., 4, Stratford Place, Oxford St., London, W.**

**Of all Druggists and Mineral Water Dealers. Prices, 6d., 1/-, and 1/3 per Bottle**
