THE NATURAL MINERAL WATERS OF

(France)

CONTREXÉVILLE

(Vosges)

PAVILLON SPRING PAVILLON**TONIC
DIURÉTIC
DIGESTIBLE****The only one under the protection of the French Government**

Medical authorities are unanimous in affirming the efficacy of the natural mineral water of Contrexéville (Pavillon Spring) and have indicated it as the only one whose use is supreme in GOUT, GRAVEL, ARTHRITISM, URINARY DISEASES, VESICAL CATARRH, NEPHRETIC and HEPATIC COLIC and GOUTY DIABETES.

To quote but a few names: Professors POTAIN, CHARCOT, TROUSSEAU, BOUCHARDAT, CIVIALE, SIR D. D..., St BARTHOLOMEW'S Hospital London; DOCTORS DURAND-FARDEL, LEGRAND DU SAULLE, CAUDMONT, MILLET (Tours), T.R.C..., President of the Dublin Medical Academy; all these have drawn the attention of the profession to the great importance of the results which might be obtained through its use with regard to the public health.

The **Contrexéville Mineral Water** (Pavillon SPRING) is a diuretic and laxative, a tonic, a stimulant, and eminently digestible. — It acts upon the secret mechanism of nutrition, as is proved by its influence in checking the production of uric acid and glucose: it favourably modifies those morbid processus of biological chemistry which result in the accumulation of uric acid in the blood, inducing the phenomena of gout. — It facilitates the elimination of urinary deposits, by contracting the ducts containing them and increasing the quantity of liquid by which these vessels are flushed. — It assists the cicatrization of the inflamed mucus of the urinary organs, and helps to restore the normal acidity of the urine; facilitates the flow of the bile, by causing contraction of the biliary ducts and the expulsion of calculi; and is invaluable in the treatment of congestion of the liver.

The repeated use of this water ensures regular movements of the bowels and induces a feeling of health and comfort throughout the entire system.

ASK FOR THE SOURCE**PAVILLON**
