NEW EDITION OF

THE OPERATIVE SURGERY OF MALIGNANT DISEASE.

By HENRY T. BUTLIN, F.R.C.S., D.C.L.,

Surgeon to St. Bartholomew's Hospital, &c., with the co-operation of JAMES BERRY (the thyroid), W. BRUCE CLARKE (the kidney), ALBAN DORAN (the ovary and uterus), PERCY FURNIVALL (the stomach, intestine and rectum), WALTER JESSOP (the eye), and H. J. WARING (the liver and gall-bladder).

With 12 Engravings, 8vo, 14s.

J. & A. CHURCHILL.

"There are few recent books more important, there are none more interesting to the surgeon and the general practitioner than Mr. Butlin's new edition of his work on the *Operative Treatment of Malignant Disease*. . . . Every practitioner in the country should consider it his duty (one can answer for it that it will certainly be his pleasure) to read, to study, to remember, to act upon, the teaching conveyed in this work."—BRITISH MEDICAL JOURNAL.

"Comparatively few treatises dealing with this very important subject (tumours) exist, and the two which lie before us are merely re-editions of works which had previously gained an enviable reputation. Mr. Butlin's book on the *Operative Surgery of Malignant Disease* re-appears after an interval of twelve years, and the changes which have occurred in that period are so great that he has been forced to ask the collaboration of several other surgeons to undertake the representation of special organs."—PRACTITIONER.

"The work, taken as a whole, is good, and the advice given is derived from actual experience and observation, the book differing materially in this respect from a number of contemporary works in which conclusions are drawn from a collation derived from numerous works. The book will be found most useful and instructive and well worth adding to one's library."—NEW YORK MEDICAL JOURNAL.

Surgeon and Lecturer on Surgery at the London Hospital; late Examiner in Surgery at the University of Oxford.

MISTURA BISMUTHI COMP.

MACKEY'S ORIGINAL PREPARATION.

Composition—Liq. Bismuth, Tr. Nux Vomica, Morphia, Hydrocyanic Acid, and Spt. Chlorof.

This reliable preparation contains Bismuth in its most effective form for the successful treatment of Atonic and Irritative Dyspepsia, Gastric Catarrh, and Pyrosis accompanied with Pain after Food. It is highly useful in some forms of Vomiting, and has been used with success in the Diarrhoea or Constipation connected with Debilitated Conditions of the Alimentary Canal.

THE LANCET says:—"Bismuth could hardly be given in a better form."

"I have used the Mistura Bismuthi Co., prepared by Messrs. MACKEY, MACKEY & Co., Ltd., and have found it most efficacious, and far superior to any other preparation of Bismuth that has come under my notice."—C. E. B., M.R.C.S., &c.

"MACKEY'S Mistura Bismuthi Co. is an improvement on other preparations of Bismuth, and more acceptable to the stomach. I have found it a very reliable preparation."—J. P., F.R.C.S.

THE LANCET, 22nd July, 1899, says:—

"This brandy shows excellent features on analysis while the evidence of taste is distinctly in favour of the description that it is an old matured grape spirit. It possesses that ethereal fragrance due to the peculiar ethers of wine. Our analysis yielded the following results:—
Alcohol, by weight 41.00 per cent., by volume 48.43 per cent., equal to proof spirit 84.87 per cent.; acidity expressed as acetic acid, 0.033 per cent.; extractives 0.69 per cent.; mineral matter, *nil*; alcohol in volatile ethers, two grammes per 10 litres. The flavour is soft and mellow and the aroma is characteristic of a sound and mature wine-derived spirit. In view of these analytical and general evidences this brandy may be described as particularly suitable for medicinal purposes."

MARTELL'S THREE STAR BRANDY.

THE MEDICAL PRESS, 2nd August, 1899, says:—

"We have carefully examined a sample of this well-known spirit by the usual tests, and the results obtained by analysis fully warrant our recommending it for medical and dietetic purposes. The analysis gave the following figures:

Alcohol (as proof spirit)	86.5	per cent.
Extractives68	" "
Ash	Nil.	" "
Acidity036	" "
Ethers (as alcohol)028	" "

"APENTA"

Natural Hungarian Aperient Water.

"This water is to be classed with the best aperient waters, and may be pronounced one of the strongest. Owing to the constancy of the 'Apenta' water, that confidence in aperient waters which had been lost will be revived in favour of this important therapeutic agent."

PROFESSOR CSCAP LIEPREICH,
Regius Professor of Chemistry, University of Berlin (Therapeutische Monatshefte).

For Gall-stones, Biliary Colic, and other Disorders of the Liver.

"Apenta" Water taken in the morning fasting has been found a most valuable remedy in cases of Gall-stones.

About 10 ounces warmed may be taken daily in two equal portions at half-an-hour's interval.

It also acts well mixed with Apollinaris Water, as a preventative of Gall-stones. Four ounces of "Apenta" Water, made hot, mixed with six ounces of Apollinaris Water, should be drunk slowly in the morning, fasting. If an attack seems imminent this dose may be repeated once or twice in the day, avoiding thus the expense of visiting a foreign Spa.

In all functional disorders of the Liver "Apenta" is one of the best remedies both for prevention and cure.

CACODYLATE OF SODIUM (CLIN)

(ORGANIC ARSENIC).

Emphatically recommended by Professors GAUTIER, RENAULT, LETULLE, &c., in the treatment of

TUBERCULOSIS (either incipient or declared), **IMPALUDISM, DIABETES, DERMATOSES, and CANCER.**

DROPS:—5 drops contain $\frac{1}{2}$ grain of Pure Cacodylate of Sodium

GLOBULES.—This special form consists of little Globules, easy to swallow, with a shell of gluten. Each Globule contains $\frac{1}{2}$ grain of Pure Cacodylate of Sodium.

TUBES (Sterilised for Hypodermic Injection).—Each Tube contains a sterilised solution dosed at 1 grain of Pure Cacodylate of Sodium per injection of 16 minims.

LECITHINE (CLIN).

NATURAL ORGANISED COMBINATION OF PHOSPHORUS.

LECITHINE (CLIN) is prescribed in all cases requiring reconstituent medication and should replace phosphated preparations.

The three Pharmaceutical Preparations are:—

LECITHINE PILLS (CLIN). Each Pill contains 5 centigrammes (or about 0.77 gr.) of pure Lecithine.

GRANULATED LECITHINE (CLIN). Of easy administration, especially for children. One teaspoonful equals 5 cent. (or about 0.77 gr.) of Pure Lecithine.

LECITHINE SOLUTION (CLIN). For Hypodermic Injection. Each Tube of 1 centimetre cube contains 5 centigrammes of Pure Lecithine.

When prescribing, kindly specify "**CLIN.**" These preparations are employed in the Paris Hospitals.

NOURRY'S IODINATED WINE.

Free from Alkaline Iodides. Palatable. Easily assimilated. A perfect substitute for Cod Liver Oil and Iodides. **LYMPHÆMIA. ANÆMIA. DYSMENORRHEA. PULMONARY AFFECTIONS.**

"77 grain (0.95 gm.) of Iodine and 1.54 grain (0.10 gm.) of Tannin per tablespoonful.

Children—One to two teaspoonfuls. Adults—One tablespoonful. To be taken at meals twice a day.

THE LANCET of January 6th, 1894, in its Analytical Report, states:—"The above preparation, therefore, which contains no free iodine, but which yields it in full quantity on the slightest provocation, is calculated to lead to more extended application. It certainly deserves trial."

THE BRITISH MEDICAL JOURNAL of August 29th, 1896, in its Analytical Report, states:—"The wine contains no free iodine. It is very pleasant to the taste, and no doubt would be very effective in cases where iodine and iodides are indicated."

NOURRY'S IODINATED WINE is not advertised to the public. It owes its success entirely to the Medical Profession.

BISHOP'S LITHIO-PIPERAZINE VARALETTES.

This Combined Salt is of exceptional value in many cases of Uric Acid Diathesis and should be given a trial when other remedies have failed. It is indicated in cases of Gravel, Calculi (especially where there are small concretions in the Kidneys), many forms of Gout, and in all cases where a combined Uric Acid Solvent and diuretic action is desired. This combination is well worth a trial, as the investigations of Berger, Pucinelli and others have shown that remedies given in combination act with much greater intensity and with much better results than do their component parts when administered separately. Lithio-Piperazine Citrate is not a mixture of Lithia and Piperazine but a new definite Salt.

Bishop's Lithio-Piperazine Varalettes are accurate in dose, quick in action, pleasant and convenient for the patient. They dissolve rapidly with brisk effervescence in water or any other liquid, and are put up in bottles shaped for the waistcoat pocket, so that the patient can always carry a supply about with him. The dose is one or two three times a day. Bishop's Lithio-Piperazine Citrate Varalettes are sold in bottles containing 25 in each. The price to the medical profession is 18s. per dozen bottles.

We also make the following Varalettes:—

Piperazine Citrate	3 gra.	Glycero-Phosphate of Lime ...	5 gra.
Lithio Piperazine Citrate ...	5 gra.	Potash Citrate	5 gra.
Lithia	5 gra.	Sodium Bromide	5 gra.
Lithia and Potash	3 and 5 gra.	Urotropine	4 gra.

We put up in this form all the chief Mineral Waters of the Continent.

EMOL (TRADE MARK.) KELEET

A Remarkable Discovery for Skin Treatment.

EMOL-KELEET is a purified, natural emollient, absorbent dusting powder, of impalpable texture, as soft as down to the touch. It in no way resembles the ordinary and unstable compound astringent or starchy absorbent powders.

Chemically, Emol-Keleet may be said to be closely allied to superior qualities of Fuller's Earth, yet it is different in that it contains a considerable percentage of Steatite, Silica, Alumina, traces of Calcium Salts, and an appreciable trace of Ferrous Oxide.

Emol-Keleet has been the subject of investigation by competent hands, both chemico-technologically and therapeutically. It was brought specially to the attention of the profession at the meeting of the British Medical Association, at Newcastle-on-Tyne, when an exceedingly interesting paper was read during the session of the Dermatological section by the President. The interest aroused by the therapeutic notes given in his paper by this distinguished authority on skin diseases brought Emol-Keleet prominently into view, and a brief recapitulation of the points of the paper referred to may be useful.

It was shown that *as dusting powder* Emol-Keleet—a perfectly innocuous and inoffensive material—is therapeutically superior to any previously known. When placed upon the tongue—one of the simplest and yet most severe tests as to utter impalpability which can be applied to a powdered substance—there was an entire absence of any sensation of grittiness.

It was noticed also, as a remarkable property of this powder, that when a small quantity, say a teaspoonful or so, was added to a basinful of hard water it effected an immediate softening influence. Used in this manner with warm water, Emol-Keleet acts as a natural soap, cleansing the skin thoroughly and at the same time leaving it soft and smooth. *This suggested the idea of incorporating it with a pure neutral soap* and it has met with universal approval. EMOL-KELEET soap is prepared with great care under the highest medical and chemical supervision. It is especially good for children and those with delicate and sensitive skins.

Used as an ordinary dusting powder, Emol-Keleet was found to possess anti-pruritic properties, and relieved very markedly the itching of the skin now and then complained of in urticaria or during the eruptive period of measles. The absorbent qualities of Emol-Keleet, with its mild astringent tendency, stamp it as a perfectly harmless and absolutely unequalled dusting powder.

It is also incorporated with Soap as a Shaving Stick.

CERTIFICATE from Dr. C. SCHULTEN, Analytical & Consulting Laboratory

12, MISSION ROW, CALCUTTA, 4th January, 1902.

I have received two tins of Briggs' Food of the Century marked "Indian Food for Everybody" and "Indian Food for Infants."

I have submitted both specimens to a thorough chemical and microscopical examination with the enclosed results.

The chemical composition of the Indian Food—the high percentage of Proteids and Phosphates—recommends itself.

The microscopical examination shows that by the process the food is prepared all the cells containing Carbohydrates (Starch, &c.) are opened by bursting. This is a great advantage and makes the Food very easily digestible.

Briggs' Indian Food compares favourably with the best known similar preparations. (Sd.) Dr. C. SCHULTEN.

XEROFORM. Best and cheapest substitute for Iodoform. In use practically odourless, non-toxic with large doses even as an intestinal antiseptic. Absolutely hæmostatic and analgesic, non-irritating, causing no eczema. Deodorises even the putrid discharges from wounds, has high desiccating action and diminishes suppuration with remarkable rapidity. Although in some cases it has less granulating power than Iodoform, it exceeds Iodoform and all other remedies in its marked influence on the regeneration of the epithelium. **It is indicated for the treatment of Ulcis cruris and all moist eczema.** Fresh wounds heal by primary intention. Shortened time of healing. On account of its non-toxic and anedynic action, of greatest advantage in gynaecology and with burns. With chronic weeping eczema a simple rubbing with a Xeroform-pledget several times a day is sufficient; baths and wound-dressings being thereby obviated.

CREOSOTAL. "Heyden" (Creosote-Carbonate "Heyden") Valuable in all non-tubercular infectious diseases of the respiratory passages. **Rapid cure of Pneumonia**, (also Broncho-, Measles-, Influenza-, Grip-Pneumonia) by means of large doses of Creosotal: 10—15 grams pro die in 4 doses, for children daily dose 1—5 grams.

ACOIN. Local-Anæsthetic for Surgery, Ophthalmology, and Dental operations. **Prolonged anæsthesia, frequently continuing for hours.** Only remedy for painless subconjunctival injections.

# Benger's Food

GOLD MEDAL AWARDED Health Exhibition, London.

## NOTICE TO THE MEDICAL PROFESSION.

**BENGER'S FOOD** is *not* a Malted Food, and it does not contain dried milk, which is a very poor substitute for fresh. It consists of a specially finely ground, nitrogenous, wheaten meal, cooked and impregnated with a suitable proportion of the fresh, natural digestive principles of the pancreas. When mixed with warm new milk or milk and water, as directed on each tin, these digestive principles not only render the farinaceous elements of the Food soluble (as in malted foods), but further, reduce the casein of the milk to a condition similar to that in which it exists in human milk, so that hard indigestible masses of curd cannot be formed in the stomach. **BENGER'S FOOD** forms a delicate and delicious cream, rich in all the elements necessary to maintain vigorous health. It is enjoyed by Infants, Invalids, Convalescents, and the Aged.

The *Lancet* describes it as "*Mr. Benger's admirable preparation.*"

The *London Medical Record* says:—"It is retained when all other foods are rejected. It is invaluable."

The *British Medical Journal* says:—"Benger's Food has by its excellence established a reputation of its own."

The *Illustrated Medical News* says:—"Infants do remarkably well on it. There is certainly a great future before it."

A Government Medical Officer writes:—"I began using your food when my son was only a fortnight old, and now (five months) he is as fine a boy as you could wish to see."

From an eminent Surgeon:—"After a lengthened experience of Foods, both at home and in India, I consider Benger's Food incomparably superior to any I have ever prescribed."

## Glycobenphene-Heil

A NEW REMEDY FOR ECZEMA

and kindred skin diseases. It is a powerful, safe, reliable, non-irritating and pleasant antiseptic, and owing to proper combination of various chemical compounds it possesses great healing properties. It relieves the intense itching almost instantly, and by using it freely, without friction, it can be relied upon in the treatment of Eczema. It is for external use only, and being a mixture and not a solution, it should always be shaken before applying it.

It is an excellent dressing for wounds and an efficient healing agent for sores. In the treatment of ulcers and abscesses it is very valuable. It can be used freely with absolute safety, in fact, it should be used freely to obtain the best results.

**Glycobenphene** is also indicated in facial eruption, erysipelas, hives, burns, scalds, mosquito and other insect bites, and it is a positive remedy for dandruff.

Our representatives, Mess. F. NEWBERRY and SONS, 27 & 28 Charterhouse Square, LONDON, E. C., will cheerfully furnish an original bottle, holding ½ pint, gratis to any physician wishing to try it. We mail literature on application.

## Borobenphene-Heil

THE NEW ANTISEPTIC AND GERMICIDE.

It has the antiseptic properties of Boracic Acid, sublimed Benzoic Acid from Siamese Gum Benzoin, Phenol, etc., and is prepared by a special process, by which a powerful, safe, reliable, non-irritating and pleasant antiseptic is produced.

It mixes in all proportions with water, glycerine and alcohol.

It prevents the development of bacteria and decomposition of animal and vegetable matter and destroys bacteria in every form, is a valuable remedy for the treatment of affections of the ear, nose, throat and mucous membranes of the human body, whenever an antiseptic is indicated, and is of great benefit in the treatment of bronchitis by inhalation. It also possesses powerful healing properties and may be applied locally to wounds, ulcers, abscesses, etc., or used as a gargle, inhalant or injection, in full strength or diluted to suit the varied conditions.

Borobenphene can be used freely with absolute safety externally, and its pleasant odor and agreeable taste recommends it as an internal antiseptic in the treatment of the digestive organs, as in Dysentery, Diarrhoea, etc. Dose internally: For adults, 15 to 60 drops, 3 times a day in a wineglassful of water.

As an antiseptic in Dental Surgery it has no equal.

Our representatives, Mess. F. NEWBERRY & SONS, 27 & 28 Charterhouse Square, LONDON, E. C., will cheerfully furnish an original bottle, holding 1 pint, gratis to any physician wishing to try it. We mail literature on application.

# Carnrick's Liquid Peptonoids

is

**Palatable.** The flavour and odour of "LIQUID PEPTONIDS" are highly agreeable. It resembles a pleasant cordial, and can be tolerated when all other forms of nourishment are rejected.

**Nourishing.** It is prepared from the nutritive portions of Beef, Wheat, and Milk, and contains the *digestible* nutriment of these important foods, as well as their stimulating elements.

**Assimilable.** Its food elements being digested, "LIQUID PEPTONIDS" is capable of being immediately assimilated.

**Stimulating.** "LIQUID PEPTONIDS" is preserved by the addition of alcohol, which imparts to it mildly stimulating properties, of service in many of the conditions for which "LIQUID PEPTONIDS" is prescribed.

**Aseptic.** The aseptic character of "LIQUID PEPTONIDS" is absolutely assured, and this and the fact that it is entirely absorbed are important features of "LIQUID PEPTONIDS."

**Convenient.** As a liquid food that supplies nourishment in a highly assimilable form, and further combines the properties of a Restorative and mild Stimulant, "LIQUID PEPTONIDS" offers a variety of advantages in a convenient form, and has been used with good results for many years by the Medical Profession.

and consequently acceptable to the most fastidious palate. For patients who object to "Bovril" on account of its salt flavour Doctors might order "INVALID BOVRIL," which can be obtained from any Chemist.

**THE LANCET**, writing of two special analyses, the first an analysis of Special Invalid Bovril and the second one of a good home-made beef-tea, remarks that "in considering the question of relative nutriment, regard must, of course, be paid to the amount of water employed in preparing beef-tea," and says very forcibly, that "all things being equal, the Invalid Bovril yielded, according to the analysis from THE LANCET Laboratory, a much higher proportion of nutrient substance than the ordinary beef-tea."

## A Great Improvement on the ordinary Pill or Compressed Tablet.

**"Kapsols"**  
TRADE MARK.

A 'Kapsol' consists of a particularly soft, homogeneous, and hence easily absorbed pill mass, enclosed in a thin jujube coating which is soft and readily soluble. Although the jujube envelope is quickly soluble, yet it is of such a nature as to indefinitely preserve the contents, and 'Kapsols' that have been made over two years are as moist, active, and soluble as on the first day they were made.

'Kapsols' are particularly recommended where prompt action of the drug is required, or where the action is desired to take place in the stomach as with Pepsin, Bismuth, &c. This cannot be guaranteed when hard pearl-coated pills are employed, for these mostly pass through into the intestines before disintegration takes place.

Any pill formula may be had in 'Kapsol' form. A price list of 'Kapsols' will be sent to Medical Men on request.

An Analogue of Easton's Syrup.

# Bynin Amara.

*"The preparation is very palatable, and there is no doubt it will be much appreciated as a pleasant means of obtaining the tonic effects of Easton's Syrup combined with the DIASTASIC and NUTRITIVE value of Extract of Malt."*

The British Medical Journal.

**BYNIN AMARA** is a combination of the Phosphates of Iron, Quinine, and Strychnine with Bynin, Liquid Malt. It is, therefore, with the exception of the vehicle used, similar to Easton's Syrup (Syr. Ferri Quin. et Strych. Phosph.), the strength being one-fourth of the latter.

*Bynin Amara* is, however, superior to Easton's Syrup, in that the inert Syrup is replaced by the active diastasic ferment contained in Malt Extract. This improvement makes it at once far more valuable as a digestive tonic; and experience has shown that it can be used with more safety and to greater advantage than Easton's Syrup, especially in cases of Nervous Debility and Dyspepsia.

The Lancet writes:

"This excellent preparation is a distinct advance on Easton's Syrup. Not only does it contain the Phosphates of Iron, Quinine, and Strychnine unimpaired, but the vehicle for their palatable administration is, as our own experiments have shown, a powerful digestive of farinaceous food. This vehicle is BYNIN, or Liquid Malt, which exhibits a powerful, liquefying, and converting action upon starch. . . . The formula is such as is admirably adapted for the administration of one of the best tonic combinations known."

SAMPLES will be sent FREE to Medical Men on request.

A Distinct Advance in Infant Feeding.

The

# 'Allenburgs' Foods.

THE "Allenburgs" Foods provide nourishment suited to the growing digestive powers of the Infant, and constitute an altogether distinct advance on the mischievous expedient of trying to make the child's stomach accommodate itself to a food essentially unsuited to its digestive powers.

Farinaceous foods of all kinds are totally unfit for infants under five or six months of age, such foods being a potent cause of digestive troubles, rickets, and many disorders arising from mal-nutrition.

## INVESTITURE OF A KING OF ANTIENT PERSIA.

Investiture by the ring or circlet was one of the earliest methods of conferring royal rank. The circle was regarded as the symbol of completeness, perfection, life and power. From a remote period in Babylonia and Antient Persia, the King received the royal circlet from the hands of the Great High Priest. The Kings, who were vassals to the Monarch, received this emblem of their royal dignity, as depicted in the above antient stone carving, from the Sovereign himself, who claimed the title King of Kings.

DOSE—One drachm diluted: equivalent to a full dose of the Trisnitrate.

Mr. Charles Ekin, F.C.S., writing of the prevalence of contaminations in commercial samples of Liquor Bismuthi says: "It must be confessed that the Bismuth preparations of the Pharmacopœia, as at present met with in commerce, are far from satisfactory. It is only just, however, to Mr. Schacht, of Clifton, the inventor of the fluid preparation, to say that the *Liquor as prepared by him* is invariably free, not only from silver, but also from copper, antimony, and arsenic; and that in HIS, prescribers have, at all events, ONE preparation that they may at all times depend upon."

**I**N the MOSQUERA BEEF PREPARATIONS the digestive principle (Bromelin) of the Pineapple is utilised, thus securing for these products the highest degree of nutritive value as distinguished from merely stimulating properties. Thus, in marked contrast to ordinary Beef Extracts, the Mosquera Products contain, in pre-digested and concentrated form, practically the whole of the constituents, soluble and insoluble, of prime, lean Beef. Beef Extracts contain chiefly the soluble portions of the meat, which at best are merely stimulants—not nutriments.

# CONTREXEVILLE SOURCE DU PAVILLON

**DIURETIC, TONIC, DIGESTIBLE - BEFORE AND AT MEALS  
GOUT, GRAVEL, ARTHRITISM**

The Contrexéville Mineral Water (Pavillon SPRING) is a diuretic and laxative, a tonic, a stimulant, and aid to digestion. — It acts upon the secret mechanism of nutrition, as is proved by its influence in checking the production of uric acid and glucose: it favourably modifies those morbid *processus* of biological chemistry which result in the accumulation of uric acid in the blood, inducing the phenomena of gout. — It facilitates the elimination of urinary deposits, by contracting the ducts containing them and increasing the quantity of liquid by which these vessels are flushed. — It assists the cicatrization of the inflamed mucus of the urinary organs, and helps to restore the normal acidity of the urine; facilitates the flow of the bile, by causing contraction of the biliary ducts and the expulsion of calculi; and is invaluable in the treatment of congestion of the liver.

Extracts from an Article in THE LANCET of July 20th, 1901, page 151:—"This is an admirable product.....A special process eliminates milk proteid in a pure and soluble state. Practically tasteless and keeps indefinitely. OUR ANALYSIS SHOWS NO LESS THAN 93 PER CENT. OF PURE PHOTEBID. We have not examined a preparation containing so high a proportion of proteid.....must possess extremely high food value. It readily peptonises and is therefore easily digestible.....Useful towards raising the flesh-forming value of a number of foods. Could be added to soups, beef-tea, cocoa, and many other foods with undoubted dietetic gain. It is free from milk-sugar.....decided advantage for diabetic patients. The flesh-forming constituent of a natural food.....A very powerful and concentrated form of nourishment."

# THE PRACTICAL POISON BOTTLE.

## PRINCIPAL FEATURES.

The Practical Poison Bottle has been designed by one of the largest *practical* bottle-makers in the trade, and possesses the following advantages:

**Touch.**—One side of the bottle is made as rough as possible with diamond projections, and this, with the prominent ribs at the corners, makes the bottle at once distinguishable by touch and conform perfectly to the Poison Regulations. The other side is smooth, but the bottle cannot be handled in any way without its peculiar shape being noticed.

The **Shape** is different from any other bottle ever produced, being a combination of the flat and octagon poison bottle.

**Strength.**—All the corners are rounded, thus doing away with weak corners and making the bottle as strong as possible, and reducing breakages in packing and handling to a minimum.

**Labelling and Packing.**—A smooth side is provided for the label of ample dimensions for full-sized dispensing-labels. The shape of the bottle admits of it being wrapped, without waste of space and paper, so as to make a neat parcel.

**Sizes.**—It is made in all sizes, from 2 drams to twenty-ounce capacity, and in either blue or actinic green glass.

**Price.**—It is one of the cheapest and simplest and best-finished bottles ever placed before the trade.

### DR. FISHER'S PATENT FLEXIBLE KNEE-CAP.

The above is considered the only Knee-Cap made which allows free action of the joints, while at the same time keeping up the requisite pressure.

The front is constructed of nickel-plated fine steel wire, and meshed in a manner to contract and extend with the motion of the knee, but fixed from side to side. It is lined with soft felt. The top and bottom straps are merely for the purpose of keeping the knee-cap in position, but the middle portion is made of soft buckskin, divided into two straps which buckle on the outside. It is cool and light, adding scarcely any size to the joint, and it is calculated to wear for a considerable time.

In ordering, give circumference of centre of knee, also four inches above and below the same, AND STATE FOR WHICH KNEE.

PRICE 30s

### DR FISHER'S (IMPROVED) BOW-LEG SPLINTS.

These Splints have been in use during the last nine years with very great success. Directions for measurement and application: Give height from ground to centre of knee, and state age of child.

Should the Splints not fit well below the knee, calf, or ankle, warm the part gently before the fire, till it bends freely, then mould it on the leg and hold it in position until it has set. The success of these Splints depends a good deal on keeping the centre strap as tight as possible without causing inconvenience. They may also be worn as a support for weak ankles only, in which case it should be stated on which side of the foot the child is inclined to walk. Light boots should always be worn.

### MILK HUMANIZER (PATENT).

A simple apparatus made in glass, enabling cow's milk to be so altered as to resemble Human Milk in its composition, and adaptable to the requirements of individual infants or children. Full directions how to humanize milk for infant feeding, together with description of Hawksley's Patent Sterilizers for Infants and Invalids, free by post on application.

**BELTS.—ABDOMINAL FOR GENERAL** support to the abdominal walls and for obesity. The support given by the above enables the wearer to walk more erect, breathe more freely, and ride with comfort. The uncomfortable swinging of the abdomen whilst hunting is remedied, and in case of a fall the chances of internal injury to the rider are much lessened, no understraps required.

### KNEE TRUSSES.

For Dislocated Semilunar Cartilages.—Made in 3 sizes for right and left knees. The same principle specially adapted for chronic dislocations of the patella. The truss does not interfere with the free use of the joint in kneeling, cycling, football or tennis.

### FRACTURED PATELLA.

A walking splint for use after union of the upper and lower fragments. The steel joints at the sides are so made that the degree of bending at the knee-joint can be gradually increased. In case of a slip the knee cannot bend more than is allowed by this adjustable stop, and thus prevents over-stretching of the newly-formed ligament. To assist extension of the limb a strong elastic band joins the upper and lower part of the splint. This also is adjustable, and greatly assists the weakened quadriceps muscles in walking; as used at Guy's, the Middlesex, & St. Bartholomew's Hospitals.

In the usual form, for twelve months' use, the splint is about 12 inches long, but for permanent disablement it is better to carry a light support to the heel of the foot.

**APPLIANCES** for Varus or Valgus, with Inversion or Eversion Straps, also with Toe-Lifting and Depressing Springs.—For Genu Varum or Vulgum, for Day or Night Use, with and without Screw Extension.

**OPEN-AIR TREATMENT.**

**DARTMOOR.**—A medical man devoting his whole time to the treatment of Pulmonary Tuberculosis, and who has been a patient at Nordrach, in the Black Forest under Dr. Otto Walther, whose principles of treatment are strictly adhered to, is prepared to treat patients suffering from Pulmonary Tuberculosis according to modern open-air methods, in a secluded village on Dartmoor, 700 feet above sea level. The country is especially suitable for the **NORDRACH TREATMENT**, combining as it does, well sheltered walks, wooded and moorland, graduated hill climbing up to 1,200 feet, and pure bracing air. Patients reside either at farms, or in their own private apartments and at hotels in the village, there being good accommodation of all kinds. It is believed that there are a large number of patients who would prefer to be treated in their own rooms rather than undergo the restrictions of sanatorium life. The place is also suitable for patients making an "AFTER CURE" on leaving a sanatorium.—For particulars apply to J. PENN-MILTON, M.R.C.S. (Eng.), L.R.C.P. (Lond.), Chagford, Devon.

## MEDICAL PARTNERSHIP AND CONVEYANCING AGENCY.

1, ADAM STREET, ADELPHI, W.O.

The Sale of Practices and Partnerships negotiated. Trustworthy Locum Tenens and Assistants can be had at a few hours' notice.

N.B.—No charge made to Purchasers.

### Notice.—Mr. J. C. Needes

with an experience of over a quarter of a century, is in an exceptional position to give intending purchasers independent information concerning most practices and partnerships. Those investments in the following List marked with an Asterisk are well known to him, having been purchased through his office by the present Incumbents years ago, and in many other cases, introductions can be given to gentlemen who have taken charge of the practices during the absence of the Incumbents.

### Colonial Practice.—A gentle-

man who has practised for over 20 years in one of the principal cities in Australia is desirous of disposing of his connection, the cash receipts of which are between £2,000 and £2,500 per annum. Appointments (giving very little trouble) produce £150 a year. The practice is almost entirely confined to the city and suburbs, and the residence is in the best part of the former. Lowest midwifery fee 3 guineas. Premium £1,600. Successor should not be less than about 35 years of age.

### Partnership, Devonshire.—A

junior PARTNER (unmarried) is required in an unopposed country PRACTICE situated in a beautiful district. Receipts average £1,100 per annum for the past three years, including appointments, £200. Only 30 cases of midwifery yearly. Very little night work. Drug bill under £30 a year. Third-share for sale to commence with. Premium £700. A suitable gentleman will be permitted to assist in the Practice for 2 or 3 months before a Partnership is actually entered into.

### Shropshire.—Partnership with

Succession (in two years or less) to an old-established country PRACTICE, estimated to be worth about £800 per annum, including appointments (union, cottage hospital, &c.) Situated in a good agricultural district affording opportunities for hunting, shooting, trout-fishing, &c. The Practice is increasing, the fees are good, and there is very little night-work. Premium £1,100. £550 down, and balance on the termination of the Partnership.

### \* West of England.—Totally

unopposed country PRACTICE (worth about £700 a year and increasing), situated in a beautiful district near the sea. Union and Club appointments held. Accounts sent out quarterly, and very few bad debts. Practice compact and one horse sufficient. Good house fitted with modern conveniences, large gardens, lawns, stabling, &c., attached. Rent £35. Hunting, fishing, and shooting. An efficient introduction.

### Partnership, London.—A

junior PARTNER is required in an old-established Practice averaging £1,100 per annum, situated about a mile from Westminster Bridge. Midwifery 1 to 3 guineas. Fifty to sixty cases yearly. Drug bill the only expense. Third share for disposal to commence with. Premium 1½ years' purchase. Suitable house available for partner. Rent £45 a year.

### \* London.—Very old-established

PRACTICE, the cash receipts of which last year amounted to £755, including appointments yielding £150 to £200. Visiting fees 1s. 6d. to 5s. Midwifery 1 to 3 guineas. Good house in thorough repair, with a large pleasant garden (not overlooked) attached; rent £88 per annum. Premium to a prompt purchase £650.

APPLY to J. C. NEEDES, 1, Adam Street, Adelphi, W.O.

### Locum Tenens and Temporary

ASSISTANTS.—Practitioners requiring the above can immediately obtain thoroughly reliable qualified gentlemen upon application to 1, Adam Street, Adelphi, W.O. Every gentleman engaged by the office in either of the above capacities is personally known to Mr. J. C. NEEDES. An office fee of half-a-guinea is payable by the principal.

# THE SCHOLASTIC, CLERICAL, AND MEDICAL ASSOCIATION, LIMITED.

## MEDICAL DEPARTMENT.

This Association was established in 1880 as a Limited Liability Company under the direction of Professional men, its object being the creation of a RESPONSIBLE and THOROUGHLY TRUSTWORTHY Agency. The Medical Department has met with so great success that it has been found necessary for one of the Managing Directors (Mr. G. B. Stocker) to devote his whole attention thereto, and he has the assistance of an experienced Medical Accountant and large staff of clerks. Further a Board composed entirely of gentlemen of high standing in the Medical Profession has been appointed, and to them matters of dispute and complaint are referred.

The Association undertakes the SALE of PRACTICES and PARTNERSHIPS; the introduction of LOCUM TENENS and ASSISTANTS; MEDICAL ACCOUNTANCY (by a duly qualified Medical Accountant); INVESTIGATION and VALUATION of Practices, &c.; POSTING BOOKS and sending out Bills, &c., &c.

A Pamphlet relating to the Medical Department with the names of the "Directors" and the "Medical Advising Board," and terms will be sent on application to Mr. G. B. STOCKER, MANAGING DIRECTOR, 22, CRAVEN STREET, STRAND, W.C.

### LOCUM TENENS SUPPLIED.

\* Author (jointly with Wm. Barnard, M.A., LL.B.) of "Medical Partnerships, Transfers and Assistantships," published by Stevens & Sons, Ltd., 119, Chancery Lane, W.C. Price net, 8s. 6d., or by post 9s.

# PLASMON

*Unaltered Soluble Milk Albumen. Most Highly Nourishing Food known.*

PLASMON is soluble caseinogen retaining the original organic characteristics of milk albumen.

PLASMON contains all the original organic salts, which constitute an essential feature of living albumen. Without these salts milk albumen is wholly valueless as a nutrient.

The solubility of PLASMON is not secured at the expense of its alimentary properties. It is the most perfect natural food.

Dr. C. VIRCHOW (Berlin) says:—"PLASMON is easily digested and wholly assimilated. The digestibility of PLASMON I found to be 99.4 per cent. PLASMON is the albumen of fresh milk in its original unaltered condition."

PLASMON is indicated in Wasting Diseases, Anæmia, Febrile Diseases, Tuberculosis, Enteric Fever, Diseases of the Alimentary Tract, Rickets, Acute Indigestion, Stomach Disorders, &c.

In Packets, 9d., 1s. 4d., and 2s. 6d. Full directions with each packet.

## PLASMON COCOA

Highly nutritious; restorative; absolutely pure; delicious; therefore an ideal beverage, and a perfect food for all, especially for Invalids during, and Convalescents after, exhausting diseases.

The highest scientific authorities give these analytical results;—Finest Cocoa Beans, 6.3 per cent. soluble proteid; Plasmon Cocoa, 66.0 per cent. soluble proteid, or more than ten times as much as that contained in the best and purest cocoas known; thus one cup of Plasmon Cocoa contains more real building-up nutriment than ten cups of cocoa prepared with the finest and purest cocoa obtainable in the market.

In Tins, 9d., 1s. 4d., and 2s. 6d.

## BEEF PLASMON

*The Ideal Nitrogenous Food—Stimulating, Digestible, and Nourishing.*

BEEF PLASMON combines the stimulating and restorative extractives of prime fresh Beef with PLASMON, a soluble and readily assimilable form of pure unaltered albumen.

BEEF PLASMON is composed of—Plasmon, 80 per cent.; Pure Beef Extract, 20 per cent. Hence BEEF PLASMON is eighty times more nourishing than the best beef extract. Under ordinary circumstances it resists decomposition for an indefinite period.

In Hermetically Sealed Tins, 1 oz., 5d., and 2 oz., 9d.

## PLASMON DIABETIC BISCUITS

*ABSOLUTELY FREE from STARCH or SUGAR.*

**SPECIALLY ADAPTED FOR DIABETICS.** The Official Analytical Report on PLASMON DIABETIC BISCUITS states: "Starch, nil; Sugar, nil." These biscuits may also be used with advantage in cases of Obesity.

Plain or Sweetened with Saccharin, price 4s. per 1-lb. box; 2s. per  $\frac{1}{2}$ -lb. box.

**SAMPLES SENT FREE TO MEDICAL MEN.**
