**Weiss's Illustrated Catalogue,**

containing nearly 800 engravings of Surgeons' Instruments and Apparatus, classified for their various purposes. Price, 5s. 62, Strand, London.

"This catalogue has many and great merits. It is modest, truthful, carefully arranged, and extremely well illustrated. In the great majority of cases the name of the surgeon is appended to the modification which he has introduced, and frequently other makers' names are honourably attached to instruments which they first originated. These are large principles of honour which we are glad to see strictly observed in this catalogue."—*Lancet*, September 12th, 1863.
