SAUNDERS' NEW BOOKS

SOBOTTA & McMURRICH'S Human Anatomy.

IN THREE VOLUMES
VOLUME I. JUST READY

This entirely new work on human anatomy, the first volume of which is just ready, will undoubtedly be the most beautiful and practical ever produced, the numerous large quarto-sized plates representing in colours the anatomic structures with wonderful accuracy and clearness. Indeed, these magnificent plates will be of great advantage in the study of anatomy, making much easier of comprehension what is one of the most difficult subjects in the college curriculum. Moreover, Professor Sobotta's concise, yet clear style, so admirably maintained in the English translation, makes the work an ideal text-book for the student and an invaluable aid to the physician, surgeon, and the anatomist. Volume I. treats of bones, ligaments, joints, and muscles; Volume II. of the viscera, including the heart; Volume III. of the nervous system, circulatory system, and the organs of the senses. The editor, J. PLAYFAIR McMURRICH, has added quite a large amount of useful material throughout the text, increasing greatly the usefulness of the work. Three quarto volumes, each containing about 250 pages of text and over 300 illustrations, mostly in colours. By Prof. J. SOBOTTA, of Würzburg. Edited, with additions, by J. PLAYFAIR McMURRICH, A.M., Ph.D., Professor of Anatomy at the University of Michigan, Ann Arbor.

Per volume: Cloth, 25s. net.

HOWELL'S Text-book of Physiology

Just
Issued

Dr. HOWELL has had many years' experience as a teacher of physiology in several of the leading medical schools, and is therefore exceedingly well fitted to write a text-book on this subject. Main emphasis has been laid upon those facts and views which will be directly helpful in the practical branches of medicine. *The Edinburgh Medical Journal* says: "The author has included a large amount of material, but it is well explained and not unduly condensed. The book is one which can be thoroughly recommended." Original illustrations have been most freely used.

Octavo of 905 pages, with 272 new illustrations. By WILLIAM H. HOWELL, M.D., Professor of Physiology, Johns Hopkins University. Cloth, 18s. net.

SPRATLING On Epilepsy and its Treatment

Recently
Issued

In this work Dr. SPRATLING presents the results of ten years' practical experience in treating this disease. *The Lancet* says: "Dr. Spratling's work is written throughout in a clear and readable style. The plates and illustrations are useful and excellent; the former would be hard to surpass. The work is a mine of information on the whole subject of Epilepsy and its treatment, and should be in the hands of every alienist and physician who has the care of epileptics in farm colonies and similar institutions."

Octavo of 522 pages, fully illustrated. By WILLIAM P. SPRATLING, M.D., of the Craig Colony for Epileptics, at Sonyea, New York. Cloth, 18s. net.

HIRST'S Diseases of Women

Second
Revised Edition

The success of Dr. HIRST's "Diseases of Women" has been as immediate as that of his well-known text-book on "Obstetrics." Particular attention has been paid to diagnosis and treatment, these sections being illuminated with original photographs and water-colours of actual clinical cases. *The Dublin Journal of Medical Science* says: "Dr. Hirst enters into his subject with remarkable fullness, and consequently the book is a good reference volume." *The Edinburgh Medical Journal* says: "It is thoroughly modern, practical, and scientific, and is adapted in every way to the needs of the medical student, the practitioner, and the specialist."

Octavo of 741 pages, with 701 illustrations. By BARTON COOKE HIRST, M.D., of the University of Pennsylvania. Cloth, 21s. net.

DRAPER'S Legal Medicine

Recently
Issued

In this volume the author has not only cited illustrative cases from the standard treatises on forensic medicine, but these he has supplemented with details from his own exceptionally full experience—an experience gained during his service as Medical Examiner for the City of Boston for the past twenty-six years. *The Medical Press and Circular* says: "The author's manipulation of his subject displays throughout the unconscious ease which characterises the dictation of a past master of each and all of the topics on which he has undertaken to instruct the reader."

Octavo of 573 pages, illustrated. By FRANK WINTHROP DRAPER, M.D., Professor of Legal Medicine, Harvard University. Cloth, 18s. net.

ONLY ONE WEEK MORE

The International Library and its Handsome Oak Bookcase. Height about 3 ft. 2/6 down and 5/- a month.

A Library for All Time

The 20 big volumes of the International Library contain those great writings that never get out of date—the best of the best books of the thousand best authors of all countries and of all ages, and for all time. Only the greatest writers are included, and only the best of their writings. With encyclopedias and other works each year brings a deterioration, because of new facts, conditions, and discoveries; and new editions are required from time to time. It is not so with this superb Library. Every one of its 10,000 pages will be as fresh and enjoyable and as instructive a hundred years hence as now.

A World-Wide Scope

There is a comprehensiveness about The International Library which could only have been brought about by such an international editorial board as carried this undertaking through, Dr. Richard Garnett being the Editor-in-chief. In this great work all countries and all periods are represented by their best. Thus we have the world's best of fiction from Boccaccio to Hall Caine; of History, from Herodotus to Bryce; of Poetry, from Homer to Swinburne; of Plays, from Aristophanes to Maeterlinck and Ibsen; of Essays, from Lucian to Birrell; and so on through every other department of literature. As to countries, we begin in the remote and classic days of ancient Egypt, Greece, and Rome, and proceed onward through the centuries, gathering the best writings of France, Germany, Italy, Spain, Russia, Holland, Denmark, Persia, India, China, Japan, America, etc., etc., all the foreign writings being given in perfect English translations. In the same way every period is laid under contribution; the Classical, the Augustan, the Medieval, the Renaissance, the Elizabethan, the Queen Anne, the Georgian, the Victorian, on to the present Edwardian times.

At no price and on no terms—not for £1,000 cash—can you place your order with us for the International Library after the 9th July, 1906. That day will **end for ever** the sale of this great Library of 20 large volumes.

Never again, after that epoch-marking day in the history of books, will you be able to order a set, because immediately after the orders posted on the 9th July are filled the plates from which this unique Library has been printed will be melted down and destroyed.

This will render it impossible for any more sets to be produced at any future time by us or by anyone else.

Don't Wait until the Last Day

All orders will be filled strictly in rotation—first come, first served; therefore you must send your order at once to make sure of prompt delivery. If you telegraph to reserve you a set and send a regular signed order by the next post, your order will be treated as though received with the telegram, and will thus be executed before all those reaching us between the arrival of your telegram and the arrival of your order.

An Unparalleled Event

Never before have the plates of a great work of this class been destroyed in the very height of its success—when, in addition to the millions of volumes already sold, we could sell millions more at double the present price. But we are satisfied. Our object has been attained. We are neither book publishers nor booksellers, but newspaper proprietors. The reputation of "Lloyd's News" is far more precious to us than bookselling profits. We want to secure the utmost possible goodwill from our project of supplying the finest 20-volume Library ever got together at a price and on terms unique in the history of books. The success of the undertaking has been quite beyond our most sanguine expectations. Our enormous issue—the greatest ever known by far—is now nearly exhausted, and will all be gone before the 9th July. By destroying the plates we make sure that these splendid Libraries will be remembered as "Lloyd's Libraries" for years and years to come, and speak for our paper wherever they are seen. For this reason we prefer to prevent any subsequent issue of the Library rather than to double the price and go on.

A Remarkable Concession

By the destruction of the plates we practically make our purchasers a present of all our rights in the Library; it will thus be impossible to procure a set except from a private owner, and this should ensure a considerable increase in the value of your copy of the Library.

Our Big Free Book

Our big Free Book of 124 pages is nearly gone. This is your very last chance to secure a copy. It describes the International Library, and gives 40 specimen pages from it. If you write to-day we will send you a copy gratis and post free, but in a day or two we shall have none left to send.

Fiction of Varied Interest

Amongst the hundreds of writers of fiction here are Goldsmith, who, with the very simple material of country village life, wrote immortal works; Fielding and Smollett, of boisterous mirth; Sir Walter Scott, the father of the historical novel; Thackeray, the cynical; Dumas, the most prolific of all writers; Beckford, the millionaire, who chose to write in French, and whose fame was made by an anonymous translator; Sienkiewicz, who bounded into fame with "Quo Vadis?"; Izaak Walton, the linen draper and fisherman, who tried to justify the impaling of live frogs as the "gentlest of all arts"; Stevenson, Conan Doyle, Victor Hugo, Le Sage, Rousseau, Balzac, George Sand, Turgenev, Hawthorne, Cooper, Valdes, Manzoni, Tolstol, Clark Russell, Zola, Jules Verne, Lever, Heine, Oliver Wendell Holmes, Jane Austen, Thomas Hughes, George Eliot, Mrs. Humphrey Ward, Anstey, Barrie, and Disraeli, and all the other great story writers. And fiction is but one of the many features of the Library.

A Picture and a Bookcase

With each set of the 20 big volumes of The International Library we send a beautiful hand-coloured Photogravure of M. I. Dicksee's famous Royal Academy painting, "Swift and Stella," in a rich gilt frame, 2ft. 4in. wide by 2ft. high; and also a handsome fumed oak Bookcase.

Our Closing Offer

Our closing offer is on the same terms as before. We decline to avail ourselves of the advantage of the natural increase of value that arises from the melting of the plates. We want all advantage to go to purchasers. For

only 2/6 down

we send you carriage paid, the whole of the 20 volumes of the International Library, with the beautiful gilt-frame Picture and the fumed oak Bookcase. You have nothing more to pay for a full month after you have received all three. Then you pay 5s. a month until the purchase is completed, and altogether you will pay only half the regular price of the books alone.

Last Chance for Free Book

Unless you cut out this coupon and send it at once you will be too late for a copy of the 124-page Free Book. We shall not send to anyone who applies after this week.

 By WILLIAM BAIN, M.D., M.R.C.P.,
 AND

WILFRID EDGEcombe, M.D., F.R.C.S.,
 Physician to the Harrogate Infirmary.

British Medical Journal—"The book certainly deserves recognition not only as a modern medical guide.....but as a careful attempt to collect the known scientific data bearing on the subject, and to present them in such a way as to form an intelligible basis explaining the result of treatment."

Journal of Balneology and Climatol.—".....It is a disquisition on, and a very valuable addition to, the whole subject of natural mineral waters and climatic influences in the treatment of chronic disease.....Their contribution is of high scientific value.....It might, indeed, be considered.....as a text-book for practitioners at Spas generally....."
Medical Chronicle—"The authors are to be congratulated upon having done something towards placing spa treatment upon a more scientific basis of physiological experiment."

Medical Times and Hospital Gazette—"It supplies a long-felt want and fills up a gap in the literature of health resorts."

LOSS OF HAIR.

POMADE MAX

(UNG. CANTHARIDIN & HYDR. CO.)

possesses a marked action on the hair-producing structures. Its principal effects are:—

- (a) Benefits local circulation and nerve action.
- (b) Determines absorption of obstructive exudates.
- (c) Exercises penetrative parasitocidal action.

These partly explain the arrest of hair-fall and re-growth, which almost invariably allow its proper use. It contrasts with other formula in definite reliability and striking rapidity of effect.

POMADE MAX is indispensable in

The Advantages of Sugar as a Food.

"A large number of small commodities will be in every mind, but none probably having more time-honoured claim to consideration than CALLARD & BOWSER'S Butter-Scotch. We procured samples of this and subjected them to rigorous laboratory tests, and found them to contain:—

Moisture	8.33 per cent.
Fat	11.67 "
Sugar	79.26 "
Ash74 "

"In plain words, over 90 per cent. of this comestible is a splendid nutriment. The fat was proved by optical tests to be genuine butter fat.

"The ash was free from boric acid, indicating that the butter used in making the preparation was also free from that substance."

September 11th, 1905.

"The 'Butter-Scotch' of CALLARD & BOWSER, London, has been passed by the Examining Board of the Institute of Hygiene as fulfilling the Standard of purity and quality required by them. A Certificate has been granted in these terms, and the Executive Council have signed and affixed the Seal of the Institute thereon.

Lecturing at the Royal United Service Institution on "The Comfort of Troops on Active Service," Captain E. D. Swinton, D.S.O., said "what he noticed most among the troops in South Africa was the way that grown men hungered after sweets. The canteen connected with his regiment could not get Butter-Scotch fast enough to keep pace with the demand."

(During the whole period of the war CALLARD & BOWSER shipped their Butter-Scotch continuously to South Africa, and have letters from men in the field testifying to its valuable properties, especially where the water supply was inadequate and bad.)

SANATOGEN

MOST RELIABLE AND SCIENTIFIC OF ALL NUTRIENTS.

Composition: A soluble chemical combination of Glycero-phosphate of Sodium and Casein of Milk. Readily taken. Readily absorbed. Valuable for Nutrient Enemata.

Effects: Increases the Nutritive Proteids of the Blood. Stimulates the Appetite and Increases Weight. Maintains Healthy Action of the Digestive Organs. Promotes sleep. Shortens convalescence. In Nervous Diseases it has a well-nigh specific action.

Medical Experiences:

Direct experiment demonstrates that Sanatogen increases the albumen content of the blood to the amount of 200 mg. in 100 c.c.—*Birmingham Medical Review*, Sept., 1905.

The red corpuscles of the blood increase at the rate of about 10,000 per c.mm. daily in cases of Anæmia taking Sanatogen.—*Medical Press and Circular*, Nov. 2, 1904.

Conditions of great deficiency of Hemoglobin show improvement varying from 10 to 20 per cent. after a fortnight's use of Sanatogen.—*Wiener Klinische Wochenschrift*, 1900, No. 9.

The Bactericidal action of the blood and its natural protective powers against disease are developed by Sanatogen.—*Birmingham Medical Review*, Sept., 1905.

Sanatogen may be used with great advantage in the acute stages of all those maladies accompanied by high temperature, especially enteric fever.—PROFESSOR DR. EWALD, in *Dr. Leyden's Zeitschrift für diätetische und physikalische Therapie*, 1903-4, Vol. 7, No. 10.

The number of dentifrices is myriad, their names are legion,  
BUT in principle and in efficiency there is but one,

**CALOX**

**The Oxygen  
Tooth Powder**

Its principle is the evolution of oxygen. Its efficiency as a  
cleanser of the teeth is due to the oxygen which it generates  
when used.

It may seem that a dentifrice is a matter of little concern to the physician, but  
when we remember that the mouth is the greatest avenue of entrance for germs  
that harm, the physician should welcome an agent that will sterilize the mouth  
while it is cleaning the teeth.

## "Formolyptol" ITS BACTERIOLOGY

The crucial test of the efficacy of an antiseptic fluid is the bacteriological one. When we state that FORMOLYPTOL is equal in germicidal potency to a 1-1000 solution of Corrosive Sublimate, without the irritant or toxic properties of the latter drug, we base our claim upon the results of careful laboratory experimentation with the different varieties of germ life. Complete and conclusive reports from prominent bacteriologists sent upon request.

**ANDRUS & ANDRUS**  
46 Holborn Viaduct, London E. C.

Representing  
THE PALISADE MFG. CO., New York

FORMOLYPTOL is a palatable, fragrant, and slightly astringent formaldehyde preparation. It does not stain linen or clothes. Employed in Gynecology and Obstetrics, Rhino-Laryngology, Surgery and Dentistry. Also internally in the treatment of Typhoid Fever and in the gastro-intestinal disorders of children.

**Isoform** liberates active oxygen in the presence of animal tissues, pus, secretions, etc., and develops a powerful antiseptic action. Employed as: **Isoform-Powder** and **Isoform-Gauze** in all kinds of infected, purulent and ichorous wounds, ulcers, etc.

## ISOFORM-HOECHST

A new, non-poisonous, powerfully bactericidal  
Continuous Antiseptic and Deodorant  
tried at the Royal Surgical Clinic of Privy Councillor v. MIKULICZ RADECKI in Breslau.

**Isoform-Paste** for the reliable sterilization of the hands.

**Isoform-Capsules** (soft and hardened) containing 8 grains Isoform-Powder for the production of antiseptic action in the stomach and intestines.

For the same degree of anaesthesia **Novocaine** is at least six times less toxic than **Cocaine**, and two or three times less toxic than other substitutes. Employed in normal doses it does not effect the circulation, respiration or cardiac activity.

## NOVOCAINE

A new and absolutely non-irritant local anaesthetic.  
Best substitute for Cocaine.

**Novocaine** causes no mydriasis, no disturbance of the accommodation, and no increase of internal pressure of the eyes. Employed with **excellent results for medullary anaesthesia and in all forms of local anaesthesia.**

**Novocaine** is easily soluble in water, its solutions have a neutral reaction, are easily absorbed and can be sterilised by boiling.

**Valyl** is only brought into commerce in the form of capsules. Each capsule contains 2 grains Valyl-Hoechst. Dose 2 to 3 capsules twice or thrice daily. Esteemed as a remedy for **dysmenorrhoea**, and in troubles during **pregnancy** and during the **climacteric**, the so called **change of life**.

## VALYL-HOECHST

Valeryl-di-ethylamide,  
the active principle of valerian.

For nervous troubles of all kinds, as **hysteria**, **neurasthenia**, **migraine**, **neuralgia**, **hypochondriasis**, **traumatic** and **cardiac neuroses**, **sleeplessness**, etc. Valyl capsules should be taken during or directly after meals, or with a little milk, but never on an empty stomach.

Contains 15 per cent. silver in organic combination. Much cheaper in use than the argentiferous albumen compounds hitherto employed. Easily soluble in cold and hot water. **Non-irritant, absolutely reliable, powerful bactericidal action.**

## Albargin

Compound of Gelatose with Arg. nitric.  
The Best Antigonorrhoeic.

Tried in **acute** and **chronic gonorrhoea** of male and female patients, for **irrigations of the bladder**, and in **chronic empyema** of the maxillary sinus, in 0.1 to 0.2 up to 2 per cent. solutions; in form of enemas for **intestinal disease** (2 tablets in  $\frac{1}{2}$  pint water), in **ophthalmic practice**, etc.

As a prophylactic "Prophylactol" prepared with Albargin is recommended. To be obtained from KAISER FRIEDRICH, Apotheke, Berlin NW. Karlstr. 20a.

**Excellent Antipyretic and Antineuralgic**, employed against **fevers of all kinds**. Specific against **headaches**, **neuralgia**, especially **trigeminal neuralgia**, and the shooting pains of **tabes dorsalis**. **Pyramidon** is non-injurious to the functions of the heart.

## PYRAMIDON

Salicylate and Camphorate  
of Pyramidon.

Employed with success for relieving **asthmatic attacks** and against **menstrual troubles**. Dose of **Pyramidon** 5 to 8 grains.

**Pyramidon salicylate**, an excellent antineuralgic, given in **acute** and **chronic articular rheumatism**, **gout**, **neuralgia**, etc. Dose 8 to 12 grains.

The **Camphorates of Pyramidon** possess both **anti-hydrotic** and **anti-pyretic** action. Successfully employed for the troublesome **sweats of consumptives**. The anti-pyretic action predominates in the neutral camphorate of Pyramidon and the anti-hydrotic action in the acid camphorate. The dosage is: 8 to 12 grains **Neutral Camphorate of Pyramidon**; 12 to 15 grains **Acid Camphorate of Pyramidon**.

It is obtainable as a 1 per mille solution of **Suprareninum hydrochloricum** or **boricum chem. pur.** in bottles containing 25, 10 or 5 cc. Further it may be obtained as **Suprareninum boricum cryst.**, which will keep for any length of time and is easily soluble in water, in tubes containing 0.065 gramme corresponding to 0.05 gramme of the active principle of the adrenals.

## SUPRARENIN

(The active principle of the Adrenals)  
is the most powerful  
**ASTRINGENT AND HAEMOSTATIC**  
of the present time.

Employed in surgery for securing bloodless operations; furthermore in **Ophthalmology**, **Otorhino-Laryngology**, **Urology** and **Gynecology**.

The Solutions of **Suprareninum hydrochloricum** or **boricum** may be dispensed with **Cocaine**, **Atropine**, **Eserine** or **Zinc Sulphate** without decomposition.

A local anaesthetic having a very prolonged effect owing to its slight solubility. Especially indicated for internal administration in **syphilitic** and

## ORTHOFORM NEW

**tuberculous affections of the nose and throat**, in **cancer** and in **ulcerated stomach**, in doses of 8 to 15 grains several times daily on an empty stomach.

Has proved excellent in the **severest** cases of **migraine**, in **headaches** arising from **alcohol**, **nicotine** or **morphia intoxication**, **neurasthenia**, **influenza**, etc.

## Migrainine

Antipyretic and Antineuralgic.

**Migrainine**, in consequence of its contents of **caffeine**, also acts as an **analeptic** in cases of **threatening collapse**.

Average dose for adults  $16\frac{1}{2}$  grains, taken as powder or in solution once or more daily.

Easiest form of Dosage,  $5\frac{1}{2}$  grain tablets of **Migrainine Hoechst** in original bottles.

## Invalid Bovril

is quite distinct from ordinary Bovril, and more highly concentrated. For patients who object to Bovril on account of its salt flavour, Doctors might order INVALID BOVRIL, which is unseasoned, and can be obtained from any Chemist.

*THE LANCET*, writing of the comparative merits of Invalid Bovril and of a good home-made beef-tea, remarks that : "All things being equal, the Invalid Bovril yielded, according to the analysis from *THE LANCET* Laboratory, a much higher proportion of nutrient substance than the ordinary beef-tea."

AN IDEAL TONIC IN CONVALESCENCE.

*Byno-Hypophosphites*

AN ACTIVE AID TO THE  
DIGESTION OF FARINACEOUS FOODS.

Byno-Hypophosphites may be taken when the digestive organs are weak and impaired, and when ordinary tonics cannot be tolerated.

THE Constituents of Byno-Hypophosphites ensures the effectual combination required in a perfect tonic. This combination, though somewhat complex, is in practice most successful, and Byno-Hypophosphites will be found much superior to the official syrup of which it is the analogue. It stimulates the appetite whilst aiding digestion; it conserves and invigorates the nervous system.

PRACTICAL CLINICAL EXPERIENCE of many years has proved that what theoretically is expected of Byno-Hypophosphites by reason of its composition is fully justified. It is, as the *British Medical Journal* says, "One of the Most Popular Tonics of the Day."

### AN IMPORTANT CLASS OF MEDICINES.

SMALL DOSES FOR FREQUENT REPETITION.

MINIMUM DOSES FOR CHILDREN AND ADULTS.

# PARVULES (Registered).

**PARVULES** are small sugar-coated doses of pure drugs only for children or the aged. They are designed for frequent repetition, many physicians claiming to derive more effective results than from large doses at wider intervals. They are original with and prepared only by Wm. R. Warner & Co.

**PARVULES** are NON-HOMOEOPATHIC. Twenty-four doses in twenty-four hours is the maximum.

It will be seen that at this rate of administration, half a grain of Morphia would be taken in the twenty-four hours, and so on according to the contents of the Parvules, for the other drugs named.

PRICE 1s. PER BOTTLE OF 100 EACH.

Pocket-Cases with 20 Varieties, for the use of Practitioners, £1 1s. net. Ditto, containing 10 Varieties, 12s. net.

THE DOSE of any Parvule will vary from one to four, according to age, or the frequency of administration. For instance, one Parvule every hour, or two every two hours, or three every three hours, and so on for adults. For children, one three times a day is the minimum dose.

### Bromo Soda.

(Registered). Bromide of Sodium with Caffeine, in granular form. Very carefully and evenly made. Invaluable in Brain Fatigue arising from Overwork, &c. *The Lancet* (August 6th, 1887, p. 265) stated that "the sodium compound does, in fact, agree better (than the potassium salt) with some stomachs." Per bottle, 3s. 6d.

Warner's List contains also a very comprehensive selection of granular effervescent salts of stable and elegant composition.

### Ingluvin.

(From the Ventriculus Callosus Gallinaceus).

(Registered). A Powder. The essential principle of the gizzard, and bearing the same relation to poultry that pepsin does to the higher animals. Where pepsin refuses to act, and where, in severe cases, it has even been rejected by the stomach, **Ingluvin** has effected relief rapidly and with ease. Prescribed in same manner, doses, and combinations as pepsin with superior results. Dose.—Five to ten grains. A remedy for Vomiting in Pregnancy. Dose.—Ten to twenty grains. Also in Compressed Tablets. Per oz. bottle, 4s.

EMOL-KELEET is the most perfect of Dusting Powders; absorbent, emollient, just sufficiently astringent, and impalpably soft. Speedily dries and soothes in cases of moist or inflamed surfaces. In the eruptions of Scarlet Fever and Measles, as in Eczema and Acne, it is invaluable.

EMOL-KELEET is a purified natural product, somewhat allied to the superior kinds of Fuller's Earth. It is absolutely harmless, and acts as a natural soap, softening hard water. Contains a considerable percentage of Stearate, Silica, Alumina, and traces of Calcium Salt and Ferrous Oxide.

# A Cool Smoke for the Hot Weather. SLO-COM PIPE

Patented. (SLOW COMBUSTION). Trade Mark Registered.

Invaluable for men with Delicate Throat, Chest, or Weak Heart.  
Indispensable for Cyclists, Automobilists, and all Out-door Smokers. Men who could not smoke a pipe before can now enjoy the Slo-Com.

Sweet.  
Clean.  
Cool.  
Dry.

No dust.  
No nicotine.  
No clogging.  
No "bad ends."

The Slow Combustion Charge placed in cylinder X filters and cools the smoke.  
The Pipe draws equably and freely without burning the tongue, for the smoke has room to circulate before reaching the mouth.

## FRACTURED PATELLA.

A walking splint for use after union of the upper and lower fragments. The steel joints at the sides are so made that the degree of bending at the knee-joint can be gradually increased. In case of a slip the knee cannot bend more than is allowed by this adjustable stop, and thus prevents over-stretching of the newly-formed ligament. To assist extension of the limb a strong elastic band joins the upper and lower part of the splint. This also is adjustable, and greatly assists the weakened quadriceps muscles in walking; as used at Guy's, the Middlesex, and St. Bartholomew's Hospitals. In the usual form, for twelve months' use, the splint is about 12 inches long, £3 3s. to £4 5s. Directions for measurement forwarded on application.

## KNEE TRUSSES

Price £2 2s.

for Dislocated Internal or External Semilunar Cartilages, for Chronic dislocations of the patella, and relaxed internal or lateral ligaments. The best results are obtained by fitting the side plates to the patients knee, but if this be impracticable send circumference of joint over patella only with knee semi-naked. State which knee, and short description of the case. \*\* Used by professional footballers, tennis players, &c. The truss does not interfere with the free action of the knee, on flexion or extension. Has recently been improved to avoid pressure on the ham tendons.

# EMPIRE

**LINEN MESH  
UNDERWEAR.**

**Underclothing in accord with  
Modern Hygienic Knowledge!**

Extract from LANCET.

"This is an interesting material, intended for ordinary underwear, and made entirely, it is stated, from pure Irish linen yarn, a statement which is confirmed by a microscopic examination which we have made. Linen is a well-known clean and healthy material, but its use as underwear has been somewhat limited owing to the chilly feeling which is experienced when it is worn next the skin. The Empire Linen Underwear, however, is free from this disadvantage. It is a knitted elastic material which, while protecting the body from cold, freely allows of the escape of perspiration. It is particularly well suited for summer wear, cool, yet protective. Unlike woollen garments, it is not stained by the perspiration from the axilla, a proof that the perspiration passes freely through the material."

**Extract.**  
About 10 years ago I bought one of your Watches; it has kept most accurate time all these years. I have travelled nearly the world over and have never known it to be out of order. All intending Colonists would do well to purchase a Watch from you, as the prices and quality of watches sold out here will not compare with yours.  
T. W. INGLIS.

**Colonial Orders.**  
Medical Men resident in the Colonies or elsewhere may rely upon the greatest care being devoted to their orders. Colonial Practitioners thus enjoy the advantage of purchasing the very latest goods from the leading House at an incredible saving as compared with local prices, and, above all, an article of superlative quality.

The "Specialist" is the Ideal Doctor's Watch. It is elegant, it is substantial and, above all, entirely dependable. It has a fine quality Keyless Lever Movement, including a Real Chronometer Balance, adjusted for variations in temperatures, and Breguet Spring. Superbly out. Such is, in brief, the "Specialist"; specially manufactured for Medical Men and embodying all that the vast experience and resources of a great firm can suggest. It is the finest and cheapest "Doctor's Watch" obtainable. In Superb 18-ct. Gold Hunting or Half-Hunting Cases, £12 10s.; Crystal Front, £10 10s.—Mailed to any part of the World on receipt of remittance, at the Company's risk.

**Sent for your inspection.**  
No doctor, contemplating the purchase of a watch, should decide before seeing the "Specialist." It will be sent for inspection, without any obligation to purchase, for purposes of estimation, upon receipt of customary reference.

**A Booklet** Containing full particulars of the Company's Famous Specialities in Watches, Chains, Rings, etc., will be mailed Free anywhere to every Medical Man mentioning "B.M.J."

## Annotations

### 'HEMISINE'

'HEMISINE' presents the active principle of the medulla of the supra-renal gland, in a DRY, stable and soluble condition. Ready-made solutions are unsatisfactory, since they oxidise and lose their activity.

The vaso-constrictor, hæmostatic and astringent effects, for which supra-renal gland preparations are employed, are readily obtained by the use of 'Hemisine'.

8

'HEMISINE', given by the mouth, is a powerful agent in arresting gastric hæmorrhage, especially when the bleeding is due to ulceration. Such administration is indicated to produce a tonic effect in circulatory weakness, as is present in shock or after fevers. It is also employed in Addison's disease and in diphtheritic paralysis.

⊕

In emergencies—such as in cardiac failure when general anæsthesia is induced—'HEMISINE' is employed by intravenous injection as a circulatory stimulant, whilst, administered intramuscularly, in post partum hæmorrhage, it produces uterine contraction and stops the bleeding.

'HEMISINE' solutions of various strengths, suitable for local application as douches or sprays, are readily made. Inflammation and congestion of the mucous membranes of the nose, mouth and throat, or bleeding from these parts, are benefited by the local application of 'Hemisine'.

Hæmorrhage from the uterus or bladder is arrested by injections into the cavities. Solution may be employed hypodermically to produce local ischæmia and to facilitate operative procedure. 'Hemisine' may be combined with cocaine or eucaine to produce this blanching effect and secure local anæsthesia.

9

'HEMISINE' is a valuable aid to the ophthalmic surgeon. It renders the conjunctiva bloodless and relieves conjunctivitis.

'HEMISINE' reduces congestion of the rectal mucous membrane, arrests hæmorrhage and promotes healing, in fissure, fistula, ulcer and hæmorrhoids.

For list of 'HEMISINE' products and further details see 'Hemisine' booklet, which is sent to members of the medical profession only, on request.

### Bleeding from a vein in the leg

From an engraving of the XVII century

For the relief of sciatica, pain in the thighs and ankles, the chirurgians of the XVII century recommended the opening of a vein in the leg. A writer of the period states:—

"First the Chirurgian must be in a light place, either naturally or with candle. Also his own sight should be good as sayth Wyllye Gillis, and must have a ligatur about an inch broad. In like manner a little oyle to rub on the vaine to make it souple. Open the vaine afiswart. It is good for sciatickes, dolours in the thighs and ankles."
