VOLUME I. JUST READY

Kelly and Noble's Gynecology and Abdominal Surgery.

Some Exclusive Features

This is the first practical recognition of the intimate association of gynecology with abdominal surgery—a union long since recognised in actual practice by the daily work of the gynecologist and the abdominal surgeon. This gives this work a two-fold value; for not only the gynecologist and general practitioner will find it an exhaustive and working treatise, but the general surgeon also has here presented to him the latest technic of the various abdominal operations, described and illustrated in a way never before attempted. In order to make the work of more practical value, the field of Obstetrics has also been invaded, and those operations included which are performed by the gynecologist and the abdominal surgeon.

ITS TWO-FOLD VALUE

There is a chapter of over one hundred pages devoted entirely to medical gynecology, prepared especially for the general practitioner and treated from his point of view instead of from that of the gynecologist. Heretofore the practitioner was compelled to search through an entire book in order to obtain the information desired; but in this one chapter has been gathered all the information so much needed by the practitioner in his daily work. It treats those subjects with which every general practitioner must deal, and gives just the information he needs to enable him to treat his gynecologic patients intelligently.

MEDICAL GYNECOLOGY

This work is further separated from all others upon gynecology by the manner in which it treats the bacteriology and the pathology of gynecology. There is a separate chapter devoted exclusively to each of these subjects, dealing fully with the scientific basis of gynecology. In no other work can this information, prepared by specialists, be found as separate chapters, convenient for study and quick reference. This is a feature of much practical value to the modern physician and surgeon, who wishes to know the underlying causes and changes of the conditions he is called upon to treat.

BACTERIOLOGY and PATHOLOGY

That part of the work treating of abdominal surgery proper, as distinct from gynecology, expresses in every way the most advanced practice of the world's leading operators. It embraces operations upon the stomach, upon the intestines, upon the liver and the bile-ducts, upon the pancreas and the spleen, upon the kidney, the ureter and the bladder, and upon the peritoneum. Recognising existing decided differences of opinion concerning the relative advantages of the abdominal and of the vaginal route for the performance of various operations, a leading advocate of each side has been chosen to present the claims of the two schools from the affirmative point of view. The one purpose throughout has been to produce a work of the greatest possible service.

ABDOMINAL SURGERY

Special attention has been devoted to modern surgical technic, describing fully and clearly those details and procedures that are in most books neglected entirely or only casually mentioned. The operations are described step by step, and so graphically illustrated that this treatise really provides the operator with a practical working guide on surgical technic that may be used in the operating room. This feature will commend the work to all those practising gynecology and abdominal surgery. The chapter on the technic of preliminary preparation and sterilisation is the best and most elaborate presentation of this important subject yet attempted.

MODERN TECHNIC

Notwithstanding the elaborate illustrating of recent works on surgery and gynecology, this treatise without question—in the number, the beauty, and the practical usefulness of its illustrations—surpasses any work heretofore published. Every illustration has been specially made by Mr. Hermann Becker and Mr. Max Brödel, of the Johns Hopkins Hospital, whose beautiful and anatomically accurate illustrations have yet to seek their equal. They number about six hundred and fifty, many of them being in colours. It is the most handsomely illustrated work on the subject.

UNSURPASSED ILLUSTRATIONS

A HANDBOOK OF CLIMATIC TREATMENT INCLUDING BALNEOLOGY.

By WILLIAM R. HUGGARD, M.A., M.D., F.R.C.P. 8vo, 12s. 6d. net.

JOURNAL OF BALNEOLOGY AND CLIMATOLOGY.—"This is unquestionably the best book which has appeared on this subject in the English language.....A work which fully deserves all the praise which can be bestowed upon it. There is, so far as we know, nothing in the English language which can compare to Dr. Huggard's book in completeness, in lucidity, and simplicity."

GENERAL PRACTITIONER.—"For the first time, and, thanks to Dr. Huggard's plan, a complete classification of climates throughout the world is now made possible. Nor, and it had better be stated again to avoid misconception, does the thoroughness of the investigation lead to dullness. Far from it, for the whole book is interesting and in many parts actually fascinating.....Of the actual material presented to us under this heading [Physiology of Climate] it is difficult to write without the use of superlatives.....for whether in the consideration of the results of temperature on metabolism, muscle, nerve, respiration, &c., or in dealing with the effects of pressure on circulation or red blood cells, the author is equally learned, lucid, and happy.....One of the most scientific, interesting, and useful books it has been our good fortune to handle."

BIRMINGHAM MEDICAL REVIEW.—"The book is a really admirable addition to medical literature, and should be widely appreciated."

THE LANCET.—"We may congratulate Dr. Huggard upon the success which has attended his treatment of his subjects, for the result has been to produce a volume which is a mine of useful information, written in a manner most convenient for reference and in interesting style.....He is always clear in his statements and practical in his recommendations."

BRITISH MEDICAL JOURNAL.—"This is no hastily put together compilation, but the outcome of much study, consideration, and personal observation, on which both the author and his readers are to be congratulated."

BRISTOL MEDICO-CHIRURGICAL JOURNAL.—"The writer.....has had exceptional opportunities of working at the subject, and has collected materials steadily during many years. He has accordingly produced, as he might be expected to do, a standard work founded greatly on personal experience.....His book may be taken as a trusty guide by all those who seek information on climatic and balneological questions."

THE TIMES.—"The book is carefully and clearly written, and is creditably free from any tendency to exaggerate the effects with which it deals."

MÜNCHENER MEDIZINISCHE WOCHENSCHRIFT.—"Alles in Allem: Auf verhältnismässig kleinem Raum, 536 Seiten, ein reicher Inhalt, das Ergebnis vieljähriger Arbeit."

TREATMENT OF DISEASE

By REYNOLD WEBB WILCOX, M.A., M.D., LL.D.,
Professor of Med. at the N.Y. Post-Graduate Med. School
and Hospital, &c.

While etiology is important, pathology is interesting and a sound basis, and diagnosis is essential, it is from a thorough and broad knowledge of therapeutics in its larger sense that the practitioner will achieve his greatest success. With these facts in view this book has been written.

One Royal 8vo. 371 pp. With 178 Illustrations
(16 coloured). Cloth, price 20/- net.

SURGICAL DISEASES OF THE CHEST

By CARL BECK, M.D.,

Professor of Surgery in the N.Y. Post-Graduate Med. School
and Hospital, &c.

The enormous possibilities of Bacteriology, Asepsis, and the Roentgen method in the Thoracic Region have been properly considered. Stress has been laid on diagnostic points, and by accentuating the borderline character of the work the book has been rendered of especial value to the General Practitioner.

One Crown 8vo. 135 pp. With 16 Illustrations. Cloth, price 2/- net.

HYGIENE OF THE LUNG
IN HEALTH AND DISEASE.

By Professor Dr. LEOPOLD von SCHRÖTTER.

Translated by H. W. ARMIT, M.R.C.S., L.R.C.P.

Hygiene is essentially a social science and the Author has been happy in his selection of the limits necessary for lay instruction.

MACMILLAN & CO., Ltd., LONDON.

THE GREATEST MEDICAL and PHILOSOPHICAL WORK of the DAY.

The unanimous medical teaching of 2,200 years in a nutshell.

MEDICAL PHILOSOPHY:

Man's Peculiarities, Weaknesses, Diseases, Degeneration, and Remedies.
Showing the simplicity of the Science of Health and Disease, as taught by the best writers in all ages, in all parts of the world.

By **W. RUSSELL.**

The author found it difficult to reconcile the medical teaching of 2,000 years that disease arises from morbid humour or putrefaction with the modern theory that disease is caused by microbes until he read the following extracts. He now proposes that "putrefaction" and "bacteria" are synonymous. If this be proved, it harmonizes the principal medical theories from the time of Hippocrates to the present day.

Extracts from the Presidential Address at the 66th Annual Meeting of the British Association, by Sir Joseph Lister, Bart., D.C.L., LL.D., F.R.S.:-

"..... Pasteur had shown that putrefaction was a fermentation caused by the growth of microbes Putrefaction of microbe origin."

WRIGHT'S

LIQUOR CARBONIS DETERGENS

This speciality has been prescribed by the medical profession for upwards of 40 years, and its value as a specific in certain skin diseases is such that many imitations have been placed before the medical profession, and the Compilers of the British Pharmacopoeia of 1898 have even introduced a "competitive article." The official preparation does not correspond with Wright's

"LIQUOR CARBONIS DETERGENS,"

and disappointing results are inevitable from the use of the Pharmacopoeia preparation in place of Wright's Original Liquor.

Emol-Keleet

The Natural Dusting Powder.

For the irritating, eruptive stages of measles and scarlet fever, in eczema, acne, and all affections in which the cuticle becomes moist or sensitive, the use of Emol-Keleet is authoritatively recommended. Emol-Keleet has superseded the older forms of dusting powders by reason of its softness, harmlessness, and very mildly astringent action, together with its value in drying,

allaying and soothing. It contains Steatite, Alumina, and traces of Calcium Salts and Ferrous Oxide. Samples and particulars may be obtained free and post free by any member of the Medical Profession. Emol-Keleet Toilet Soap—combining Emol-Keleet with the purest saponaceous ingredients—is the ideal soap for sensitive skins.

THE LANCET says:—"On account of its remarkable velvety smoothness it should possess a unique value in the treatment of cutaneous diseases, etc., and for allaying irritation. We have not examined a more unctuous earth."

IMPORTANT TO THE MEDICAL PROFESSION.
THE ORIGIN OF
GRANULAR EFFERVESCENT PREPARATIONS.

We were the inventors and original makers of
GRANULAR EFFERVESCENT PREPARATIONS.

BISHOP'S CITRATE OF MAGNESIA,
which was made by Mr. Alfred Bishop in 1857, and then placed on the market,
was the first preparation of the kind.

Bishop's Citrate of Magnesia was followed by numerous other granular effervescent preparations, until to-day our list comprises all the medicaments which it is possible or reasonable to exhibit in this soluble form. All our products may be absolutely relied upon as constant in composition and therapeutic effect, and it is only necessary to compare them with imitations to realise their superiority. To obtain the most effective results medical men should make a point of specifying **BISHOP'S** in their prescriptions.

Many of our Granular Effervescent preparations are put up in the form of effervescent tablets known as **BISHOP'S VARALETTES.**

CITRATE OF PIPERAZINE.

If you have an obstinate case of Gout under treatment, give our Gran. Eff. Citrate of Piperazine a trial. It is most successful as a remedy in obscure Gouty cases as well as in those of an ordinary type, including Lumbago and Sciatica.

We shall be pleased to send **SAMPLES** of our preparations, together with descriptive Literature and Price List, post free to all Medical men in the United Kingdom who apply.

PHYTIN

THE ONLY NATURAL ORGANIC PHOSPHORUS SALT

which enables for the first time a rational system of Phosphorus Therapeutics. Phytin contains 22.8 per cent. of assimilable Phosphorus, which stimulates cell metabolism and the general nutrition of the organism to increased activity. Supplied in capsules containing 4.2 grains each (the dose of the drug), and in 1 and 4 oz. bottles.

INDICATIONS:

1. Faulty assimilation of food or excessive waste of phosphorus by the organism, under the influence of pathological processes.
2. Pathological phenomena due to imperfect metabolism, or to general malnutrition.

THERAPEUTIC EFFECTS:

- Improvement of the appetite (in three to four days).
- Increase of the body weight.
- Increase of strength, as shown by the dynamometer.
- Improvement of the condition of the blood.

FORTOSSAN (Phytin combined with lactose), for children under 2 years of age.

QUININE PHYTIN neutralises by its specific action on metabolism, the depressing effects which quinine exerts on metabolism.

Extract from **THE LANCET.**

LONDON, SATURDAY, MARCH 16, 1907.

PP. 120-121.

There is no mystery about CEREBOS SALT. It is simply salt to which has been added a definite proportion of phosphates. This addition serves two important ends—first, it prevents the salt from becoming wet and from caking; and, secondly, it adds substances of distinct dietetic importance. The added phosphates convert the deliquescent magnesium chloride present into dry magnesium phosphate

and so CEREBOS SALT indefinitely preserves its fine dry and powdery state. It is therefore both culinary and a dietetic improvement. We are sometimes asked by correspondents as to whether there is anything harmful in CEREBOS SALT, the question having been prompted probably by the fact that in water it yields a turbid fluid due to insoluble phosphates of lime and magnesia. To this we can reply in the negative.

In Wasting Diseases of Children.

It has often been cause for wonderment how quickly pale, flabby, weakly infants and children gain flesh, strength, and vitality when they are given Angier's Emulsion systematically. Whereas before the use of the Emulsion, a sensitive, irritable stomach and intestines precluded proper nourishment, these organs now become pacified and retentive, digestion is strengthened, and the assimilation of food is normal and complete. There is no objection by the child to the taste of Angier's Emulsion, he almost invariably likes it. We confidently urge its trial in marasmus, scrofulosis, inherited tuberculosis, anæmia, and in the malnutrition and exhaustion consequent upon acute infectious diseases.

BUTTER-SCOTCH

Prominent Members of the Medical Profession recognise the value of Butter-Scotch in the treatment of Tuberculosis and many other diseases; the Sugar and Butter contained in it, as shown by the accompanying analysis, supply nutriment in a most palatable and easily digested form, and as a demulcent it effectually alleviates throat irritation.

As a favourite confection it has long held a world-wide reputation, but its many uses as a valuable nutrient and therapeutic agent for the sick adult and the delicate child are worthy of more attention.

The above announcement is based upon many letters written by Members of the Medical Profession to CALLARD & BOWSER, who are specialists in this article, having devoted half a century to its careful preparation.

ANALYSIS.

NON ACID

Sozodont

NON ACID.

ALKALINE

— ANTISEPTIC —

— ASTRINGENT

Here are at least three reasons why **SOZODONT** Liquid should be an essential part of every toilet table:

First—Because it is a liquid. It penetrates all the little interstices of the teeth, even those that cannot be reached by the tooth brush, and **because it is an alkaline preparation, it neutralizes any abnormally acid condition of the mouth.**

Second—Because it is an excellent antiseptic. It not only thoroughly cleanses and purifies the whole oral cavity, but at the same time puts it in a most healthy condition.

Third—It is just sufficiently astringent to keep the teeth tight in the gums and render the latter strong and hardy and well.

These are, indeed, three important things to know about **SOZODONT**, but you should also know that its delicious and lasting fragrance will not only give tone to the mouth, but make the patient feel thoroughly refreshed. You cannot know the delights of **SOZODONT** until you have tried it. Should your patient prefer a powder or paste, **SOZODONT** Tooth Powder or **SOZODONT** Tooth Paste may be safely recommended in preference to many other and even well-known preparations that are on the market to-day, for these **SOZODONT** preparations are fully guaranteed upon our honour and reputation of sixty years' long standing, to be absolutely free from acids or gritty substances, such as pumice, powdered quartz, charcoal and the like, nor are there any bleaching preparations in any of the **SOZODONT** articles. The **SOZODONT** Powder and Paste have all the abrasive properties necessary, but without the grit, and are especially recommended where the enamel of the patient's teeth is soft.

SOZODONT Liquid, Powder and Paste on sale everywhere or by post, free, for the price, 1/- and 2/6.

Our pamphlet, "The Care of the Teeth," will interest those who have good teeth and wish to keep them so. Will be sent free to any of your patients.

HALL & RUCKEL, 46, HOLBORN VIADUCT, LONDON.

In all disorders of the respiratory tract in which inflammation or cough is a conspicuous factor, incomparably beneficial results can be secured by the administration of

Glyco-Heroin (Smith)

The preparation instantly diminishes cough, augments expulsion of secretions, dispels oppressive sense of suffocation, restores regular, pain-free respiration and subdues inflammation of the air passages.

The marked analgesic, antispasmodic, balsamic, expectorant, mucus-modifying and inflammation-allaying properties of GLYCO-HEROIN (SMITH) explain the curative action of the Preparation in the treatment of

Coughs, Bronchitis, Pneumonia, Laryngitis, Pulmonary Phthisis, Asthma, Whooping Cough and the various disorders of the breathing passages.

GLYCO-HEROIN (SMITH) is admittedly the ideal heroin product. It is superior to preparations containing codeine or morphine, in that it is vastly more potent and does not beget the bye-effects common to those drugs.

DOSE.—The adult dose is one teaspoonful, repeated every two or three hours. For children of more than three years of age, the dose is from five to ten drops.

Samples and exhaustive literature bearing upon the preparation will be sent, post paid, on request.

It is a well-known fact that milk is deficient in iron.

"Hemaboloide" supplies the very substances in which milk is so vitally deficient. It is thus indicated in Bright's Disease and other chronic conditions in which milk is depended upon as the nutritive mainstay.

Dose:—One tablespoonful 3 or 4 times a day.

Supplied in 12 ounce bottles.

ARABELLA

—A Natural Mineral Water.

ARABELLA WATER is, in the opinion of many medical men, an ideal treatment for chronic constipation, sluggish liver, gout and gall-stones, and of especial value in the treatment of kidney affections. The analysis indicates a proportion of salts which meets the unqualified approval of specialists. ARABELLA WATER is a pure, natural mineral water, tasteless and wonderfully effective. It is bottled at the Springs, at Kelenfold, near Budapest, Hungary, and is readily obtainable anywhere in Great Britain.

AN INVITATION TO MEDICAL MEN.

If you have never employed ARABELLA WATER either personally or by prescription, we shall be glad to supply a Sample Bottle, gratis and post free, with analysis and data, to any Medical Men in practice. We confidently commend this grand water to your notice, knowing that a trial will readily demonstrate its superiority.

BENGER'S

PREPARATIONS

Benger's Peptonised Beef Jelly.

In Patent Glass Jars, retail 2s. A delicately flavoured, concentrated, partially digested and solidified Beef Tea.

It excels the various Extracts and Essences of Meat, or the most carefully made ordinary Beef Tea, inasmuch as it contains, besides the Salts and flavouring principles, much of the *fibrine* or *flesh-forming* elements of the beef in a soluble form, fit for immediate absorption. On this account it constitutes an exceedingly valuable and delicious quick restorative.

The LANCET says—

"It is a most valuable form of concentrated food."

The LONDON MEDICAL RECORD says—

"We have found it invaluable for old people, whose digestive powers are feeble, and also in convalescence from acute diseases."

To be obtained of Chemists, etc., or of
BENGER'S FOOD, Ltd., Otter Works, Manchester.

Benger's Peptonised Chicken Jelly.

*A Nutritive Jelly for Invalids.
In Patent Glass Jars, 2s. each.*

It is prepared in a similar manner to the PEPTONISED BEEF JELLY, and, like it, contains the nutritive constituents in a concentrated, partially digested, and solidified form.

The LANCET, in an article on Benger's Peptonised Chicken Jelly, says—

"Mr. BENGER'S Preparations are now so well known that all we need say of the sample before us is—that it is excellent. It has a delicate chicken flavour."

The BRISTOL MEDICO-CHIRURGICAL JOURNAL says—

"BENGER'S 'Peptonised Chicken Jelly' is an elegant variety of food, physiologically similar to the Beef Jelly, but with a different flavour, and likely to be useful to patients who require frequent changes in their dietetic programme."

To be obtained of Chemists, etc., or of
BENGER'S FOOD, Ltd., Otter Works, Manchester.

Phosphate Preparations.

SQUIRE & SONS may certainly claim to be the pioneers in the manufacture of **PHOSPHATE** preparations on a large scale.

Their compound Phosphate Syrup **FEROCAL** (Chemical Food) is known all the world over, and has recently been supplemented by a condensed product, **FEROCALETES**.

The **GLYPHOCAL** series is described in SECTION B, page 77 of the **SECOND APPENDIX** to **SQUIRE'S POCKET COMPANION**. A copy of this **APPENDIX** and Samples of the under-mentioned preparations will be presented gratis to any member of the medical profession on application.

GLYPHOCAL.

SQUIRE'S GLYCEROPHOSPHATE SYRUP.

This syrup is delicately flavoured and palatable, and makes an excellent tonic which will not distress the most delicate stomach.

INVALUABLE IN NEURASTHENIA.

DOSE.—One to two fl. dr. = 3·6 to 7·1 c.c.

GLYPHOCAL ELIXIR.

An elegant Elixir of the Glycerophosphates, delicately flavoured and partaking of the nature of a Glycerophosphate Wine.

DOSE.—One to two fl. dr. = 3·6 to 7·1 c.c.

Ferruginous Fluids.

The necessity for organic Iron in the treatment of anæmic conditions has been clearly demonstrated. The ferruginous preparations mentioned below are fully described in the **SECOND APPENDIX** to **SQUIRE'S POCKET COMPANION**, SECTION B, pp. 74 and 88. A copy of this **APPENDIX** and Samples of the under-mentioned preparations, will be presented gratis to any member of the medical profession on application.

FERMANGLOBIN

ORGANIC IRON AND MANGANESE.

A Fluid Preparation containing
HÆMOGLOBIN.

DOSE.—A dessertspoonful to a tablespoonful three or four times a day.

MALTOGLOBIN

THE ORGANIC IRON OF FERMANGLOBIN
WITH

MALT EXTRACT.

DOSE.—A dessertspoonful to a tablespoonful.

MALTOGLOBIN WITH ARSENIO.

One dessertspoonful = $\frac{1}{10}$ grain Arsenious Acid.

Active Aromatic Aperients.

These preparations are described in SECTION B, pp. 87 and 93, of the **SECOND APPENDIX** to **SQUIRE'S POCKET COMPANION**. A copy of this **APPENDIX** and Samples of the undermentioned preparations, will be presented gratis to any member of the medical profession on application.

KASAK ELIXIR.

A palatable and efficient preparation of **CASCARA BARK** free from the objectionable bitterness which is so common to preparations of Cascara.

DOSE.—For a Child, one or two teaspoonfuls (according to age); for an Adult, one tablespoonful.

KASENA.

KASAK WITH SENNA.

A very useful combination.

DOSE.—For Children, one teaspoonful. Adults, one dessertspoonful.

SENNINE.

A palatable Syrup made from the very finest quality of Senna.

DOSE.—Half to two teaspoonfuls.

Formate Formulas.

The literature of the **FORMATE** salts to the end of October, 1906, is reviewed in the **SECOND APPENDIX** to **SQUIRE'S POCKET COMPANION** SECTION A, p. 5; the preparations are described in SECTION B, p. 79. A copy of this **APPENDIX** and samples of the under-mentioned preparations will be presented gratis to any member of the medical profession on application.

SYRUPUS FORMATIS CO. (SQUIRE).

A clear, palatable, delicately-flavoured Syrup containing Lithium, Potassium, and Sodium Formates.

A reliable and permanent preparation of the Formates. Useful as a muscular tonic.

DOSE.—One to two fl. dr. = 3·6 to 7·1 c.c.

GLYPHOCAL WITH FORMATES.

A compound Elixir of the Glycerophosphates with the Formates. Palatable and permanent.

It possesses the full nerve-tonic properties of the former, with the muscular tonic properties of the latter.

DOSE.—One to two fl. dr. = 3·6 to 7·1 c.c.

AN IDEAL TONIC IN CONVALESCENCE.

Byno-Hypophosphites

AN ACTIVE AID TO THE
DIGESTION OF FARINACEOUS FOODS.

Byno-Hypophosphites may be taken when the digestive organs are weak and impaired, and when ordinary tonics cannot be tolerated.

THE Constituents of Byno-Hypophosphites ensures the effectual combination required in a perfect tonic. This combination, though somewhat complex, is in practice most successful, and Byno-Hypophosphites will be found much superior to the official syrup of which it is the analogue. It stimulates the appetite whilst aiding digestion; it conserves and invigorates the nervous system.

PRACTICAL CLINICAL EXPERIENCE of many years has proved that what theoretically is expected of Byno-Hypophosphites by reason of its composition is fully justified. It is, as the *British Medical Journal* says, "One of the Most Popular Tonics of the Day."

A Pancreatized Food that can be made in a minute, the addition of boiling water only being necessary.

'Allenburys' *The* **DIET**

By the use of the "Allenburys" Diet all trouble of peptonising milk and farinaceous foods is overcome. In the sick room it is invaluable, as the food is easily digested and assimilated, and only the exact quantity required need be prepared at a time.

The "Allenburys" Diet is made from pure full cream milk and whole wheat, both ingredients being partially pre-digested during manufacture. It can be taken by those who cannot digest cow's milk, and provides a light and very nourishing diet for Invalids, Dyspeptics and the Aged.

For travellers by sea or land this complete food will be found exceedingly valuable.

TRYPSIN IN CANCER

Reports which have recently appeared in the various medical journals with reference to cases of inoperable cancer, treated by the aid of pancreatic ferments, are of sufficient interest and importance to the medical profession to warrant the introduction of a preparation of Trypsin of definite strength.

We therefore offer

GLYCEROLE TRYPSIN (ARMOUR)

a ten per cent. permanent solution, suitable for both topical and internal medication.

The utility of a solution of definite strength will be readily appreciated on account of the ease with which it can be adapted for the preparation of solutions of lower strengths, required for hypodermic medication

For internal administration GLYCEROLE TRYPSIN is miscible with aqueous or alcoholic solutions.

WRIGHT'S GOAL TAR INHALER AND VAPORIZER.

For Whooping Cough, Croup,
Bronchitis, Influenza, and all
complaints of the Respiratory
Tract.

The "Lancet" says:

"This is a simple and effective device
for obtaining the steady vaporization of
antiseptic tar vapour or eucalyptus or
pine oils for inhalation purposes. The
source of heat is an ordinary night-light.
Above this light is placed a hollow
absorbent block which is saturated with
the antiseptic oil before the night-light is
lighted. The method is satisfactory; the
apparatus occupies a conveniently small
space and gives off a stream of antiseptic
vapour, the output of which can be readily
regulated."

The "Practitioner" says:

"An exceedingly simple and ingenious
plan for the preparation and diffusion of
Coal Tar Vapour in diseases of the re-
spiratory system."

A Doctors TWO YEARS WITH A GRÉGOIRE

April 24th, 1907.

"I take the present opportunity of saying that I consider the 8 h.p. Gregoire a first-rate car. I bought mine second-hand, as you know, and it has been running now almost CONTINUOUSLY FOR TWO YEARS. During the time I have had it (over a year), it has never failed to get home once. In fact, though it, like all cars, occasionally runs badly, it never refuses to run at all. It always gets there, and I have put it to some very hard work on occasions. It ran to Brighton and back the other day, with two up, and no stop (except for a puncture), though it had not been overhauled thoroughly since it was made. The engine bearings have never been touched till now, and only require a very little setting up, though the car has had exceptionally hard work. I do not think there is any more reliable car to be obtained for the money, and for doctor's work it is strongly to be recommended.

(Original letter can be seen at our office.)

"The car
(6 h. p. De Dion) started
work in November, 1903, in
the hands of a friend, who ran it till
November, 1905, when he sold it to me.
The car had then done 5,000 miles without
the engine or gear-box being touched, I drove
it 3,000 miles without doing anything except
replacing the cardan blocks, cost £1. I sold it
in July, 1906, and as far as I could see it was
good for another 5,000 or 6,000 miles before
any adjustments would be needed, there
being nothing loose anywhere. Now, I
do not think these performances are by
any means exceptional for a first
class car."—Mr. G. H. Drew, in

INEBRIETY & NARCOMANIA.

INVERNITH LODGE RETREAT,

COLINSBURGH, FIFE.

(Licensed under the Inebriate Acts).

FOR GENTLEMEN ONLY.

In this Retreat the treatment of the alcohol and drug habits is based on a sound scientific basis, and consists of freedom from temptation, the mental faculties educated to an adverse attitude to the habit, and the will-power and physical health built up. Drugs as a specific are not used, but merely as adjuvants. Experience has proved treatment by drugs to be ineffective to attain a permanent cure.

The house is situated 450 feet above sea-level. There are three smoking rooms, library, billiard room, recreation hall, 45 good bedrooms and every convenience. The grounds are 150 acres in extent, in which there are a nine hole golf course, tennis, Badminton, and bowling greens.

References can be given by the leading medical men in the United Kingdom. Terms and particulars on application to JOHN Q. DONALD, L.R.C.P., L.R.C.S. (Edin.), Proprietor and Resident Physician.

Telegraphic Address: "SALUBRIOUS," Upper Largo.
 Telephone: "No. 8 Upper Largo" (P.O. system).

MENTAL and NERVOUS INVALIDS of BOTH SEXES

are received in essentially home-like conditions for treatment, under experienced Physicians and Nurses, at

MALLING PLACE, WEST MALLING, KENT,
which is easy of access from London by road or r.r., and in the favourite vicinity of sevenoaks, Tunbridge Wells, Maidstone and Rochester. It is also easy of access by road or rail from the South Coast towns of Kent and Sussex.

Limited numbers only are received, and this admits of the important element of individual care being given full scope to, and exercised by its strong and experienced resident and Consulting Staff from the London Hospitals.

Malling Place stands in its own well-wooded grounds, and is beautifully situated in one of the most picturesque and healthy localities in the Garden of England. It combines cheerfulness with retirement, and is warmed throughout by hot water radiators.

It has recently been entirely reconstructed and remodelled upon the most modern systems for treatment—light, air, and cheerfulness in the surroundings being the essential elements throughout. There are also arrangements for the full exercise of Open-Air Treatment when this is indicated.

Patients may be visited by their own medical man, who is always welcome.

Full particulars on application to Resident Physicians, either at Malling or at 26, Harley Street, London, W., where one of them may be seen daily.

CARMICHAEL PRIZE ESSAY.

The late RICHARD CARMICHAEL, Esq., having bequeathed to the College a sum of money for the purpose of founding prizes for essays upon certain subjects specified by him, the President and Council hereby give notice that on the first Thursday in November in the year 1908, they will proceed to adjudge a prize of One Hundred and Twenty Pounds for the best Essay that may be presented to them in accordance with the following instructions prescribed by Mr. CARMICHAEL.

1st. "The state of the medical profession in its different departments of Physic, Surgery, and Pharmacy, in Great Britain and Ireland, at the time of the writing of these prize essays."

2nd. "The state of the Hospitals and Schools of Medicine, Surgery, and Pharmacy."

3rd. "The state and mode of examination or of testing the qualifications of candidates of the different Licensing Colleges or Corporations of Medicine, Surgery, and Pharmacy."

"Under these heads the authors will be pleased to make such suggestions as may occur to them respecting the improvement of the profession, with the view of rendering it more useful to the public and a more respectable body than it is at present. In these suggestions the authors will be pleased to consider the preliminary and moral education of Medical and Surgical Students, as well as the mode of conducting their professional studies."

"In considering the third head, or mode of testing the qualifications of candidates by the licensing bodies, the authors will please to consider the most practical mode of rendering the examination as demonstrative as possible—i.e., in Anatomy, by having the dead subject placed before the candidate; in Chemistry, Botany, and Pharmacy, specimens of minerals, plants, and pharmaceutical preparations placed before him; and in the practice of Physic and Surgery, the candidate to be placed before the patients in the wards of an hospital, as the testator is certain that this will afford the most certain and only true mode of ascertaining the qualifications of candidates."

Each Essay is to be distinguished by a device or motto, and accompanied by a sealed packet, containing the name and address of the author, also distinguished by the same device or motto. The Essays are to be lodged at the College on or before the first day of July, 1908.

No Essay shall exceed 65,000 words in length and all quotations and extracts from any published work, pamphlet, or paper shall be by reference merely to the volume and page on which the passage desired to be quoted is to be found.

The President and Council will not consider themselves bound to award the prizes should any of the essays not appear to them to possess sufficient merit.

By order of the Council,

ALAXA

MARK

AN AROMATIC LIQUEUR
OF CASCARA SAGRADA

'ALAXA' presents a fluid cascara of the same high therapeutic standard as 'TABLOID' CASCARA.

'ALAXA' is the result of specialised study and research, and embodies the nearest approach to the isolation of the pure active principle of Cascara Sagrada yet obtained.

Its laxative action is supplemented by stomachic and carminative constituents.

'ALAXA' is so palatable that it may be given as an aperient *apéritif* or a laxative *liqueur*.

Careful clinical tests have confirmed its certainty of action and its superiority to extracts treated with excess of alkali, and often inactive in consequence.

One fluid drachm contains the equivalent of twenty-four minims of Liquid Extract of Cascara Sagrada, B.P.

SPECIAL NOTE

Cordials and Elixirs are so loaded with syrup and flavouring matter that a large dose is required.

The full dose of 'ALAXA' is 2 fluid drachms.

Supplied to the medical profession, in 4-oz. bottles, at 2/- per bottle
