## Surgical After-Treatment

*Including Preparation of the Patient, Therapeutic Immunization, and Specific Sera.*

FROM OPERATING-ROOM TO BED—PATIENT PROPERLY ATTENDED.

The practitioner and surgeon have long needed this book. It tells how to manage all problems and emergencies of surgical convalescence from recovery room to discharge. All the details are given here, in this one book; it does not refer the reader to other works for information he needs at once. The elaborate chapter on Vaccine Therapy, Immunization by Inoculation and Specific Sera, written by Dr. George P. Sanborn, a leading disciple of Sir A. E. Wright, is undoubtedly the most complete exposition of these subjects yet published. There is also a chapter on preparation of the patient for operation. The original illustrations fix by the aid of the eye those points in technique less easily grasped from description alone.

Octavo of 800 pages, with 265 original illustrations. By L. R. G. CRANDON, M.D., Assistant in Surgery at Harvard Medical School. Cloth, 25s. net.

The One Decoration which excels all others for Hospitals, Convalescent Homes, Nursing Institutions, etc., is Hall's Distemper, because—

It is when first applied a thorough disinfectant destroying all vermin and microbes. It can be guaranteed to contain  $\frac{1}{2}$  per cent. of Cresylic Acid.

It is cheaply and easily applied with a white-wash brush, saving 40 per cent. of the cost of labour.

It is the quickest form of re-decoration, and while withstanding several years' wear is cheap enough to be frequently renewed.

Hall's Distemper sets hard as cement and never fades or changes colour. It is dust proof, and perfectly washable if lightly sponged with tepid water.

**Important Note.**—In all cases of infectious disease Hall's Distemper is not only the cheapest, but the most thoroughly effective disinfectant and artistic decoration to employ.

## KOND'S Euonymised Cocoa

What is it?

A delicious Beverage, taking the place of Tea, Cocoa, or Coffee.

Why take it?

Its use is attended with a marked increase of appetite and rapidity of digestion; all feelings of heaviness after meals disappear; and an increase of the natural flow of bile takes place. It is not aperient, except in repeated doses, but the increased activity of the liver is valuable in removing constipation. It is used in stomach or liver disorders, alcoholism, slow digestion, overwork, depression, loss of appetite, in cases where tea and coffee are not desirable, sedentary habit of life, gout, rheumatism, and biliousness.

Euonymised Cocoa can be freely taken by those unable to take ordinary Cocoas.

The Euonymin is taken in the form of a hot infusion in a delicious beverage. Its action in this form is incomparably more direct and powerful than when taken in any other forms.

AS TO THE THERAPEUTIC VALUE OF  
**"BISEDIA"**

A WELL-KNOWN SURGEON writes :—"I consider Bisedia an elegant and effective preparation for gastro-intestinal disturbance complicated with vomiting. In an experience of twenty years I have known no preparation to approach it in effect. It ought to be in the surgery of every practitioner."

THE BRITISH MEDICAL JOURNAL reports :—"A very attractive preparation, which can fairly be classed among the most elegant products of modern pharmacy."

THE LANCET says :—"We have employed this fluid in various cases of gastric derangement, simple and complicated. The preparation is decidedly elegant and possesses great therapeutic powers. In cases of gastric irritation the sedative effect is well marked."

This is no secret remedy, but a combination of Schacht's Pepsina Liquida (a really perfect Pepsine) with Schacht's Bismuth and Sedatives. Dose— $\frac{1}{2}$  to 1 drachm, diluted.

# Digestible Cocoa

Though of high nutritive value Cocoa in the ordinary form has the serious disadvantage of being difficult of digestion.

In Savory & Moore's preparation of Cocoa and Milk both the milk and the cocoa are partially peptonised, the various operations being carried out with extreme care by a highly skilled staff. Specially selected cocoa and pure, rich country milk alone are used. The result is a preparation of remarkable nutritive value and delicious flavour which can be taken and assimilated even by those who are quite unable to take cocoa in the ordinary form.

Savory & Moore's Cocoa and Milk is especially suitable for invalids, convalescents, and all whose digestive organs have been weakened by illness, overwork, study or other debilitating causes. Its use is highly beneficial in nervous

cases, and it may be taken at night without the least fear of causing digestive disturbance. A special point in its favour is that it requires only the addition of hot water, and can thus be prepared in a moment at any hour of the day or night.

Cafe Zylak is a similar preparation made by Savory & Moore, in which Coffee takes the place of cocoa. It is equally easy of digestion and is much appreciated by those who enjoy the fragrant aroma of freshly roasted coffee.

Savory & Moore's factory, where their various milk preparations are manufactured, is situated in the Vale of Aylesbury, one of the richest dairy districts in the world. The milk is obtained from farms in the neighbourhood, under their own control, and is subject to regular inspection.

# THE EVIAN-CACHAT WATER

*(Famous since the 18th Century)*

is strongly recommended by the highest medical authorities of France, Germany, and England because it is:

1. **Free from both natural and artificial carbonic gas.**
2. **The most aseptic water known.**
3. **The most effectively diuretic, and**
4. **The one easiest absorbed and most rapidly eliminated.**

The bottling process of this water, fully described by *The Times*, represents the maximum perfection attainable.

**Essentially the table water of the aristocracy**, the one most consumed at the Ritz, Savoy, and Carlton Restaurants, the annual sale, nevertheless, reaches nearly 11,000,000 bottles.

**Evian-les-Bains**, patronised both by the faculty and by the highest society, is probably the most beneficial of all watering places. For the treatment of **chronic gout, dyspepsia, neurasthenia, arterial hypertension, gall-stones, renal calculus**, and all kindred ailments its reputation is world-renowned.

The **Etablissement for all kinds of hydrotherapeutic treatment, massage, and electricity** ranks amongst the first in Europe.

The town of Evian boasts of offering its visitors the most comfortable and perfect accommodation in France. The "**Royal**" and "**Splendide**" Hotels are under the management of the **Carlton-Ritz Hotels** of London.

# BENGER'S

## BENGER'S Peptonised Beef Jelly

*In Patent Glass Jars, retail 2s. A delicately flavoured, concentrated, partially digested and solidified Beef Tea.*

It excels the various Extracts and Essences of Meat, or the most carefully made ordinary Beef Tea, inasmuch as it contains, besides the Salts and flavouring principles, much of the *fibrine*, or *flesh-forming* elements of the beef in a soluble form, fit for immediate absorption. On this account it constitutes an exceedingly valuable and delicious quick restorative.

The LANCET says—  
"It is a most valuable form of concentrated food."

The LONDON MEDICAL RECORD says—  
"We have found it invaluable for old people, whose digestive powers are feeble, and also in convalescence from acute diseases."

## BENGER'S Peptonised Chicken Jelly

*A Nutritive Jelly for Invalids. In Patent Glass Jars 2s. each*

It is prepared in a similar manner to the Peptonised Beef Jelly, and, like it, contains the nutritive constituents in a concentrated, partially digested, and solidified form.

The LANCET, in an article on Benger's Peptonised Chicken Jelly says—"Mr. Benger's Preparations are now so well known that all we need say of the sample before us is—that it is excellent. It has a delicate chicken flavour."

THE BRISTOL MEDICO-CHIRURGICAL JOURNAL says: "Benger's Peptonised Chicken Jelly is an elegant variety of food, physiologically similar to the Beef Jelly, but with a different flavour, and likely to be useful to patients who require frequent changes in their dietary."

Cow's Milk  
Undiluted

## The Relative Proportions of Casein and Milk-Albumin in Cow's Milk and Human Milk

Cow's Milk is greatly deficient in Milk-Albumin—a proteid quite distinct from Casein, and now recognised as the essential nutritive element in human milk. Albulactin supplies this deficiency.

Cow's Milk  
Diluted 1 in 3

Human Milk

Albulactin and  
Cow's Milk, 1 in 3

## **Albulactin + Cow's Milk = Human Milk**

Sebelien has shown that the chief difference between human milk and cow's milk consists in their different quantities of milk-albumin, of which *human milk contains three times as much as cow's milk*. Albulactin, added to prepared cow's milk, removes this deficiency by affording the right proportion of milk-albumin, thus making its composition identical with that of mother's milk. Albulactin, in fact, is simply milk-albumin as it exists in the natural milk, chemically pure and soluble in water.

The addition of Albulactin renders the curd soft and uniform; unlike the thick and dense curd of cow's milk, it puts no strain on the infant's digestion, but is absorbed into the tissues with the same ease and rapidity as the curd of human milk. Albulactin is manufactured by the proprietors of Sanatogen, Messrs. A. Wulff & Co., 12 Chenies Street, London, W.C., who will send free samples of Albulactin and literature on application from members of the Medical Profession.

## ***Diphtheria Prophylaxis.***

**A Medical Officer of Health writes in "The General Practitioner" (July 31st, '09):**

"Since adopting Formamint as a prophylactic, I have had 17 cases of Diphtheria reported, two treated at home, and the remaining 15 sent to the Isolation Hospital. There were many contacts in connection with these cases who were all given Formamint for use daily, and not a single case has occurred amongst them."

"I commend this line of prophylactic treatment with the utmost confidence, as being painless and pleasant, non-toxic, provedly anti-bactericidal, and easily carried out."

**A Medical Officer of Health writes in "The Practitioner" (Dec., '07):**

"I have never had sore throat myself since I began to use Formamint Tablets, although I suffered periodically before, and I always recommend their use to the nurses in the Scarlet Fever wards."

**N.B.**—The numerous imitations of Formamint are mechanical mixtures only. Formamint Wulfin is a new chemical compound, and its dissolution in the mouth liberates nascent Formaldehyde, in which condition the drug exerts its most potent action. Hitherto no really efficient means of preparing Lactic Acid Bacillus-Treated Milk has been obtainable at a reasonable cost.

The Trilactine Outfit is easily managed, and it is so regulated as to work in any climate.

It is very compact and portable. China jars, with special lids, to contain the Treated Milk are provided, which can be placed on the dining table if desired.

Either a quart or a pint and a quarter (or less) can be prepared at a time.

Trilactine-Treated Milk can be eaten alone, or with stewed fruit and cream and sugar, or either, according to taste.

Full and clear directions are issued with each apparatus.

**Price.**—With Pint Jar, **10/6**; or with Quart Jar only, **11/-**; or with Pint and Quart Jars, **13/-**. Post free in Great Britain, packed in Strong Box, **1/-** extra.

## An Ideal Tonic in Convalescence

# *"Byno" Hypophosphites*

AN ACTIVE AID TO THE  
DIGESTION OF FARINACEOUS FOODS.

**"Byno" Hypophosphites may be taken when the digestive organs are weak and impaired, and when ordinary tonics cannot be tolerated.**

THE constituents of "Byno" Hypophosphites ensure the effectual combination required in a perfect tonic. This combination, though somewhat complex, is in practice most successful, and "Byno" Hypophosphites will be found much superior to the official syrup of which it is the analogue. It stimulates the appetite whilst aiding digestion; it conserves and invigorates the nervous system.

PRACTICAL CLINICAL EXPERIENCE of many years has proved that what theoretically is expected of "Byno" Hypophosphites by reason of its composition is fully justified. It is, as the *British Medical Journal* says,

**"One of the Most Popular Tonics of the Day."**

“Soured” Milk  
treatment.

### Report on “Sauerin” Liquid Culture by an eminent Bacteriologist of one of the chief London Hospitals:

“Film preparations from the contents of these tubes showed enormous numbers of bacilli morphologically similar. Small quantities were transplanted from the original tubes into milk media. Within ten hours, in each instance, the milk was acidified and greatly thickened, and within twenty-four hours had undergone complete clotting. Film preparations from these tubes showed an organism similar to that mentioned above. Many cultivation experiments were made, and the only bacillus which was isolated was that known as the organism of Massol. These results can only be regarded as thoroughly satisfactory.”

Every issue of  
“Sauerin”  
is compared with  
standard  
control cultures,  
so that  
activity is  
assured.

“SAUERIN” is also issued in Tablet form, and a simple apparatus, specially designed for use in preparing the milk, either by the Tablets or Liquid Culture, is supplied.

## HOEFFTCKE'S EXTENSION APPLIANCES.

### Reports on

#### Cases of Fracture, Tuberculous and Arthritic Disease of Joints, etc., Treated with Extension Appliances Partly Invented or modified

By C. A. HOEFFTCKE, of C. A. HOEFFTCKE, Ltd., 21, Woodstock Street, London, W. By appointment to the Royal National Orthopaedic Hospital, Surgical Aid Society, &c.

THIS is the sixth monthly advertisement which we have arranged to publish in the BRITISH MEDICAL JOURNAL. The previous ones appeared January 29th, February 19th, March 19th, April 16th, and May 21st; and this series showing the special uses of our appliances will be continued in the issues of July 23rd, August 20th, September 17th, October 22nd, November 19th, and December 24th, on the advertisement page facing the front page of the JOURNAL.

The great difficulty experienced by the Surgeons in the treatment of deformity of the feet is to retain the improved position after wrenching or operation. The only way to obtain a firm hold of the foot is to make an instrument which is moulded on to a plaster cast of the foot taken in the corrected position. To obtain the best possible position of the foot for making the appliance, we take the plaster cast under an anæsthetic at the time the Surgeon wrenches the foot, and while the plaster is getting hard, we hold the foot in the corrected position.

The foot-piece consists of two parts, one for the heel, and one for the fore-foot, these are connected by a ratchet screw, so that the foot can be turned outwards. The elastic traction straps correct the equinus of the foot,

In the case of very young children, the feet can generally be wrenched without division of any tendons, and with children a little older, it generally suffices to divide the achilles tendon and the plantar fascia.

We have found that when the feet are properly wrenched, all the patient requires is, our little apparatus for the night, and a pair of boots with steel springs in between the inner and outer soles of the boots. These springs have to be hammered into the valgus position, and the boots have to fit closely to the foot. In that way a cumbersome instrument to the pelvis can be dispensed with.

In many cases of paralysis the position of the foot is not normal, and to a great extent this prevents the proper use of the leg; as the patient cannot find support in it, especially with calcaeno varus where the leg follows the movement of the foot, with the consequence that the patient cannot bear the weight of the leg on it. In some of these cases we have found that as soon as the position of the foot has been improved upon, the child is quite able to support the weight on the leg without having to use an appliance, shortening of the leg being made up by an elevator inside the boot, so as to hide the deformity, a small appliance for the night only being required to keep the foot in the corrected position.

Upon application we shall always be pleased to send a detailed description, with illustrations, of cases treated with our appliances, and also, if required, a list of the names of Surgeons who have used our appliances for their patients.

We adhere strictly to the rules of medical etiquette, and in no case do we make an appliance without medical supervision. Also for this reason we do not publish the names of the Surgeons who ordered our appliances for the following cases:—

**Miss E.G. (æt. 13)** suffering from congenital calcaeno varus. The right leg was longer and firmer than the left. The left foot was considerably inverted, the ankle joint rigid and immovable, the heel distorted and raised an inch, and the outer edge of the foot much thickened. The patient suffered much lameness and disability in walking. The treatment consisted in free division of the tendon achilles and plantar fascia, followed by wrenching and manipulation and fixing the foot in a firm plaster cast for 10 days, after a cast had been taken in the corrected position. During the day she is wearing a boot fitted with an elevator inside, and at night an appliance which keeps the foot in the corrected position. The young lady walks very well without the encumbrance of an instrument.

#### CASE OF PARTIAL PARALYSIS WITH EQUINO VARUS.

"You will think I am ungrateful in not writing earlier *re* my little boy's foot, but I wished our family doctor to see it first. Our people and he were greatly astonished to see the foot so perfectly straight after the operation (wrenching) and the doctor thought it would have to be cut. You are deserving of our gratitude for ever, which we hope you will accept. The little fellow now walks without an instrument of any kind, and we shall recommend your system strongly when opportunity occurs.—Yours very gratefully, R.T."

#### CASE OF CONGENITAL TALIPES VARUS.

W. B. (æt. 1 year and a half), St. Thomas's Hospital, 8th March, 1910—Plaster cast taken in corrected position; put in plaster directly afterwards. 31st March plaster taken off and Hoefftcke's night shoe substituted. 29th April, 1910, boot with sole hammered in valgus position fitted. Position of foot splendid, and the little boy begins to walk very well on it.

Before Treatment.

After Treatment.

Hoefftcke's Night Apparatus applied.

**W.C. (æt. 13)** Talipes equino varus.—Feet wrenched and free division of tendon achilles and plantar fascia; put up in plaster for three weeks. Feet wrenched again and plaster cast taken. Plaster taken off three weeks afterwards, and Hoefftcke's instrument applied with the above result:—

*The next Advertisement on lateral and angular curvature treated with Hoefftcke's appliances, will appear July 23rd, 1910.*

# CONDY'S FLUID

Has many uses to which ordinary disinfectants cannot be applied owing to their poisonous, odorous, and other objectionable qualities. *Ozone* oxygen, the active principle of *Condy's Fluid*, combines with decomposing organic matters and destroys them by a process called *ozonolysis*. It does not injure living tissue and all its incidental effects are beneficial to the animal economy.

## SOME OF THE USES OF CONDY'S FLUID:—

An antiseptic mouth wash and gargle, cleansing the throat and fauces, purifying the teeth and sweetening the breath; bracing the uvula and fortifying the voice.

A comforting deodorant disinfectant in the sick chamber.

A restorative bath for tender and perspiring feet, removing all offensive odour.

Purifying the air of apartments, schools, fish-mongers, chess-mongers, smoking-rooms, cabins, and all close places without leaving any odour.

Disinfecting and deodorising closets, stinks, urinals, drains, &c., and not merely substituting one smell for another.

Cleansing stables, kennels, cow houses, &c.

Purifying dairies and milk utensils.

The deodorant for post-mortems and dissections.

Removing taint from fish, meat, and game.

Testing water for organic impurities.

Purifying water for drinking and renovating filters.

A lotion or dressing for wounds, sores, burns, &c.

An antidote for dog, snake, and insect bites.

A safe injection or douche for the use of midwives.

An injection in gonorrhoea.

A valuable eye lotion. A prophylactic in ophthalmia neonatorum.

A cleansing deodorant antiseptic in ozona.

An antidote to opium, strychnine, oxalic and carbolic acids, and organic poisons.

The ozone bleach for linen, sponges, &c., and for preparing the hands for operating.

In veterinary practice:—*Horses*—A healing wash for sore backs, shoulders, raws and foul wounds. A detergent and cure for thrush, grease, cracked heels, sores and mud fever. *Dogs*—Relieves complications in distemper; heals sores, cuts, hot bites, smother, and remedies rank coat. Useful in many ailments of cattle, sheep, poultry, and all domestic animals; maintaining cleanliness, pure drinking water, and healthy conditions. Animals like it.

Owing to personal accidents and deaths (11 recent Coroner's Inquests) through the substitution of potash permang. for *Condy's Fluid*, medical men are warned against placing that chemical in inexperienced hands. *Condy's Fluid* contains none of the potash salt.

Specific directions for every use are attached to the Bottle.

## An ideal carriage for doctors

is formed by fitting our double-purpose  
body to a reliable, durable and economical

# De Dion Bouton

chassis. By adopting this combination the expense entailed by the medical man in cost and upkeep of an open car for country rounds and a landaulette for town work can be greatly reduced. It practically represents the two vehicles in one, each graceful and pleasing in outline.

As our double-purpose carriage body is much lighter than any other type of closed carriage, ample power is obtained from a chassis of low rating. Such a chassis costs less originally, is more economical on tyres, is more economical on petrol, whilst a saving is also effected in taxes, insurance, etc. There is also the great advantage that this body can easily be adapted in a few minutes to meet any weather conditions encountered during the professional round.

Special leaflets on our new two (as illustrated), three, four and five seated double-purpose bodies will be sent post free on application.

# The Control of your Car

Is ever dependent on the Carburetter which is fitted.  
Inferiority in this direction means constant trouble, and the reduction of the finest vehicle to a condition of a disappointing mediocrity.

Now the

## "The Ideal Doctor's Carriage!"

A medical man at Hanley, Staffs, writes, with reference to his Wolseley-Siddeley car:

"She has run 13,374 miles in two years, and only missed ten days' running—six in the first year and four in the second. We have never had a mechanical stoppage on the road in all this distance. For economy, reliability and efficiency I think she could not be beaten—in fact, she is an ideal doctor's car."

## PLAS-YN-DINAS, DINAS MAWDDWY, MERIONETH

(Licensed under Inebriates Acts).

FOR GENTLEMEN OF GOOD POSITION ONLY.

The Retreat is situated on a well-preserved property of 25,000 acres and affords sport all the year round, including shooting, fishing, golf, lawn tennis, &c. Every patient is treated individually and a special feature is made of the use of Electricity (Faradaic and High Pressure) in treating alcoholism and the abuse of drugs. References: Dr. SAVAGE, Dr. FERRIER, &c.

Dr. W. F. WALKER, J.P.

## NORWOOD (REMOVED TO BECKENHAM) SANATORIUM.

UNDER A COMMITTEE OF WELL-KNOWN MEDICAL MEN whose names will be supplied to any member of the profession on application to the Resident Medical Superintendent.

The object is to apply to the treatment of Alcoholism and Drug Inebriety all available knowledge, and by accurate observation and record of cases to extend that knowledge, and place the therapeutics of Inebriety upon a definite scientific basis. The treatment is of such a nature that the restrictions common to Retreats need not be enforced. In many cases a residence of six weeks is sufficient.

The Sanatorium consists of a large family mansion, recently redecorated, and brought up to date in all respects. It is situated in a large and beautifully wooded private park, in near proximity to London.

All information to be obtained from the Resident Medical Superintendent, Norwood Sanatorium, The Mansion, Beckenham Park. Consultations at 14, Stratford Place, W. (opposite Bond Street Tube Station), on Mondays and Thursdays by appointment.

Telegrams: "NOROTORIUM, LONDON."

Resident Medical Superintendent: FRANCIS HARE, M.D.

Telephone: 648 BROMLEY.

## THE ALCOHOL AND DRUG HABITS.

(Licensed under the Inebriates Acts)

## THE GHYLL RETREAT, NEAR COCKERMOUTH, CUMBERLAND.

For Gentlemen only.

Patients are treated individually, and on a sound scientific basis with the object of building up the health generally, strengthening the will power, and educating the mind to an adverse attitude towards the above habits.

The situation of the house in the heart of the Lake District, nine miles from the nearest town and railway station, is unique in its suitability for the work, and its isolation from temptation makes close confinement quite unnecessary in the vast majority of cases.

Outdoor and indoor sports and occupation of all kinds are provided. Trout-fishing (own private lake and streams). Rough shooting over 2000 acres, Golf (private 9-hole course), Tennis, &c. Poultry-keeping, Fish-culture, and Gardening may be indulged in, while a workshop and dark room are provided for joinery, woodcarving and photography. The house also containing a full-sized Billiard table. Terms from £3 3s. weekly, according to accommodation.

## Alcohol and Drug Inebriety and Neurasthenia.

## INVERNITH LODGE, COLINSBURGH, FIFE, SCOTLAND.

(Licensed under the Inebriates Acts.)

FOR GENTLEMEN ONLY.

Inebriety and Narcomania are treated on definite medical lines, and the most approved scientific means are employed in the curative treatment. Every effort is made to secure reliable therapeutic results, and careful records are kept. The Resident Medical Superintendent has each patient under his personal care and observation, and constant attention is given to inducing a proper attitude towards the exciting cause. The curative treatment is much aided by the healthy situation of the Sanatorium and by its isolation from temptation.

The Sanatorium stands 450 feet above the sea, faces south, and looks out over the Firth of Forth. The climate is dry and bracing. All outdoor and indoor sports. First-class private golf course. Shooting over 800 acres, fishing, tennis, gardening, carpentry, &c. Billiard room (two tables), music room, large private library.

## CHEADLE ROYAL.

HOSPITAL FOR MENTAL DISEASES, CHEADLE, CHESHIRE.

This Hospital is in a retired part of the country, nine miles from Manchester and two miles from Cheadle and Cheadle Hulme Stations, L. & N.W. Railway and Cheshire Lines.

The object of the Institution is to provide the most efficient means for the cure of mental diseases in those who belong to the upper and middle classes of society.

Many of the patients reside outside the Hospital in villas, in no way differing from ordinary dwelling houses in their internal arrangements and general surroundings, some of them being situated in the immediate neighbourhood and some on the Welsh Coast. These establishments give considerable opportunity for change of scene and locality, and the patients are in this way benefited in a very marked degree.

Voluntary Boarders are also admitted for treatment.

Arrangements are made when desired for patients to have private rooms or villas, and their own attendants, horses and carriages.

For terms and further information apply to the Medical Superintendent, W. SCOWCROFT, M.R.C.S., &c., at Cheadle, or he may be seen at 72, Bridge Street, Manchester, on Tuesdays, from 12 to 3, and Fridays, from 2 to 3.
