## GALYL

### FRAMBÆSIA AND SLEEPING SICKNESS

Practical work with GALYL in the shape of

**60,000 INTRAVENOUS** (Dilute and Concentrated) and **INTRAMUSCULAR INJECTIONS** administered in Military, Naval, and the principal General Hospitals throughout the United Kingdom, has demonstrated that this preparation is **more rapid and less toxic** in action than any compound of the "606" group, which accounts for the **consistently excellent clinical results without any undesirable by-effects.**

The other advantages of GALYL are:

- 1.—Distilled water only necessary for making the solution.
- 2.—GALYL can be injected in the dilute or concentrated form—**intravenously**—or in oily emulsion—**intramuscularly**.
- 3.—GALYL is a true Anti-syphilitic, as shown by the results of the Wassermann test, but contains a smaller percentage of Arsenic than any of the compounds of the "606" group.
