

ANTI-GONOCOCCI.

A Rapid, Convenient, Safe and Effectual Treatment for **GONORRHOEA** in all its stages and complications.

**RHEANTINE** consists of a perfectly anhydrous, stable, vaccinal powder containing about 50 millions gonococci bacilli per milligramme made up into Spherules, coated with Keratine and administered by the mouth, it does not become active until the Rheantine has passed through the stomach.

**RHEANTINE** has had very extensive clinical trials by Army Surgeons, hospital doctors, and other medical men dealing with large numbers of cases and well-established its undoubted efficacy.

#### INDICATIONS :

**Cystitis, Pyelitis, Pyelo-Nephritis, Rheumatism, Orchitis, Conjunctivitis & Septicæmia** where the origin of these complaints is Gonorrhœa.

Rheantine is put up in metal boxes of 28 Spherules.  
Dose: 4 per day.

## HEMOPLASE

(LUMIERE).

**Hemoglobin in its Natural State.—Iron in most assimilable form.**

**HEMOPLASE** is a protoplasmic extract from the blood corpuscles of healthy animals. It has had a very extensive and exhaustive clinical trial in a large number of cases (Dr. Gelibert alone reported to the International Tuberculosis Congress the results of 1250 injections) and given consistently excellent results.

#### INDICATIONS :

**MALARIA                      ANÆMIA**  
**TUBERCULOUS AFFECTIONS**  
**HÆMORRHAGE, &c.**

#### Forms :

In Ampoules for Intramuscular or Hypodermic injection; also in Pills for Internal Administration. This HEMOPLASE in the dry state contains all the active principles of the liquid form.

LITERATURE AND CLINICAL REPORTS ON REQUEST.

'Phone: HOLBORN 1311.

(late M. BRESILLON & Co.),

Telegrams: "AMPSALVAS, LONDON."

The **SCIENTIFIC TREATMENT** of HAY  
FEVER and allied ailments.

## KINECTINE

According to Dr. Mouneyrat the discoverer of Galyl and Hectine (the widely adopted Salvarsan Substitutes).

#### FORMULA :

Chlorhydrate of Quinine c. Hectine—i.e., Benzo-sulfone-para-amino-phenyl-arsenate of Quinine.

**Non-toxic—Produces no ill-effects.**

**Easily taken (tablets) and well tolerated.**

#### Highly satisfactory clinical results :

**As a Prophylactic against Hay Fever, &c.**

**Rapid Abortive Action in the Initial Stages.**

**Curative Action in the Advanced and Chronic Conditions.**

**Medical Treatment of  
CANCER.**

## CUPRASE

Cuprase is a colloidal Copper hydroxide which is obtained chemically by the reduction of Salts of Copper in the presence of Albumosic Acid.

This treatment has passed far beyond the experimental stage. The numerous clinical reports from Doctors of repute in various countries give cases of a great variety. In all of these **pain has been eliminated**, and in a good percentage **cures are claimed**, and in no instance **any undesirable effects**.

*Extract from Proceedings of the Royal Society of Medicine, February, 1913.*

Dr. George Herschell, comparing electric and chemical colloid copper, stated: "..... **Chemical colloid appears to give the best results.** In the following cases chemically prepared colloid was used. Experimentally it has been proved: (1) That particles of colloid copper can be demonstrated in the granulations of cancerous growths after two or three injections of the colloid; and clinically (2) **There is invariably great relief from pain**; (3) Appetite and strength return and the patient puts on flesh; (4) There is in many cases a diminution in the size of the tumour; (5) **The injections are absolutely non-toxic**, although in many cases an inflammatory reaction is manifested in the cancerous growths.

"As regards my own personal experience in the use of this method of treatment in addition to my own cases, I have had an opportunity of observing the effects in the practice of some of my medical friends, and in nearly all cases the progress of the disease appeared to be arrested."
