INCIDENT IN THE SIEGE OF THE RAJPUT CAPITAL, CHITOR.

The historian accompanying the Imperial army before Chitor tells us that "gallant spirits of the army were continually rushing upon it and daringly attacking it. But as terrestrials cannot reach celestials, so their efforts were abortive. Accordingly an order was issued that proper spots should be selected and that there the walls and bastions of the fort should be mined and that then the mines should be filled with gunpowder and set on fire." A covered way or "path of safety" beneath which Akbar's sappers worked at laying the mines is here shown. This illustration is reproduced from an Indo-Persian manuscript.

Date, A.D. 1557.
