*(The only Authorised Preparation of Dr. Barthe de Sandfort.  
Various Imitations compel us to make this statement.)*

**GOUT  
NEURALGIA  
CHILBLAINS  
SCIATICA**

The most efficient means and method of ensuring active **Hyperthermal-Therapy** to the practical treatment of **Burns, Varicose Ulcers, Rheumatism, Gout, Arthritis, Neuralgia**, and similar affections.

Although the dressing with AMBRINE is occlusive and adhesive, it becomes after a short period non-adhesive, and can be removed without pain, hæmorrhage, or injury to the newly forming tissues. The healing takes place without leaving scars or contractions.

May be applied with camel-hair brush, but our specially designed spray greatly facilitates the application of Ambrine, especially in the case of deep wounds or extensive surfaces.

**The BRITISH MEDICAL  
JOURNAL,**  
Sept. 2nd, 1916:—

**Re AMBRINE TREATMENT.**

"..... The primary and quite incontestable advantages of the treatment are two: it is agreeable to the patient, because entirely painless; it is convenient to the surgeon, because easily and quickly applied. .... It is possible that the treatment would be useful in dealing with ordinary ulcers, and in any case it is certain that the study of its application to the raw surfaces is worth pursuing."

DEAR SIR, — I thank you for the Ambrine. I found it very effective in a chronic and very painful varicose ulceration of leg.

Please send some more Ambrine, about 5s. worth.

**THE LANCET,**

June 10th, 1916:—

**THE VALUE OF AMBRINE IN  
THE TREATMENT OF WOUNDS.**

"The Minister of War, in reply to the Deputy M. Mons as to why, in view of the marvellous results obtained by treating burns and frost bites with Ambrine, at the Hôpital St. Nicholas, all the soldiers suffering from such wounds were not sent there, stated that this was being done as far as possible. ...."

DEAR SIR,  
Kindly send 1 gr. tablets Ambrine. I am using it for varicose ulcers which defied usual treatment, but are now doing splendidly.  
Yours truly,  
A. C. B.

**The Treatment of CARBUNCLES, BOILS, ANTHRAX, ACNE, STYES, and Diseases arising from Staphylococcus.**

# STANNOXYL

(ROBERT & CARRIÈRE, PARIS).

**(An Oxide of Tin and Tin Metal Free from Lead).**

A scientific production the value of which has been studied very closely. The effect is very prompt; from the second day of treatment the pain is relieved, the carbuncles begin to dry up, and those which are just opening are stopped in their course; the core is not expelled but reabsorbed.

In the majority of cases definite results are obtained within five or six days; it is seldom necessary to take the full ten days' treatment, and relapses are unknown.—*Vide LANCET*, Jan. 19th, 1918, pp. 99, 109.

The daily dose for Adults is 4 to 8 tablets; Children 2 to 4 tablets.

*Supplied in vials of 80 tablets.*
