AMBRINE

*(The only Authorised Preparation of Dr. Barthe de Sandfort.
Various Imitations compel us to make this statement.)*

**GOUT
NEURALGIA
CHILBLAINS
SCIATICA**

The most efficient means and method of ensuring active **Hyperthermal-Therapy** to the practical treatment of **Burns, Varicose Ulcers, Rheumatism, Gout, Arthritis, Neuralgia**, and similar affections.

Although the dressing with AMBRINE is occlusive and adhesive, it becomes after a short period non-adhesive, and can be removed without pain, hæmorrhage, or injury to the newly forming tissues. The healing takes place without leaving scars or contractions.

May be applied with a camels-hair brush, but the **Ambrina Spray** greatly facilitates the application.

**The BRITISH MEDICAL
JOURNAL,**
Sept. 2nd, 1916:—

Re AMBRINE TREATMENT.

"..... The primary and quite incontestable advantages of the treatment are two: it is agreeable to the patient, because entirely painless; it is convenient to the surgeon, because easily and quickly applied. It is possible that the treatment would be useful in dealing with ordinary ulcers, and in any case it is certain that the study of its application to the raw surfaces is worth pursuing....."

**THE VALUE OF AMBRINE IN
THE TREATMENT OF WOUNDS.**

"The Minister of War, in reply to the Deputy M. Mons as to why, in view of the marvellous results obtained by treating burns and frost bites with Ambrine at the Hôpital St. Nicholas, all the soldiers suffering from such wounds were not sent there, stated that this was being done as far as possible."

ABORTIVE TREATMENT OF GONORRHOEA.

Analgesic

Antiseptic

IODARGOL

Painless

Non-toxic

Colloidal Iodine suspended in sterilized oil with a hydro-carbon of the camphenic series.

It possesses simultaneously the properties appertaining to iodine and those which result from the colloidal state, hence its antiseptic and bactericidal power is enhanced, which has been proved by clinical research (several thousands of experiments). Owing to its great power of diffusion, it rapidly penetrates into the deepest ramifications without ever causing irritation, erythema, or burning. It is not only painless but actually analgesic.

FORMS: In Ampoules and Phials for Injection; also in **SOLUBLE BOUGIES** and **UTERO-TOPIQUE**.

Iodargol External for Wound dressing. More effective than Iodoform, Iodine solution, or Tincture of Iodine, but having none of their disadvantages.

DEAR SIR,—I am interested in Iodargol for use in the treatment of Gonorrhœa. Kindly send me on some ampoules, syringe, and a few bougies. I have a few cases here and would like to try them. I will send cheque as soon as I get your Bill.
