

CUPRASE

For the Medical Treatment of **CANCER**.

Clinical facts carry greater weight than theoretical deductions. Doctors of repute in various countries give cases of great variety. "In all of these **pain has been eliminated**, and in a good percentage **cures are claimed**, without in any instance **undesirable effects**. It should be remarked that all or nearly all the observations refer to inoperable cases in which the prognosis was unfavourable at an early date. It is needless to emphasize the practical importance of a preparation capable of yielding such results, even relative, in the worst stages of a disease which has always been regarded as absolutely resisting the action of all internal remedies.

Nothing has been found which can compare with the effects produced by means of Cuprase.

Its **easy application** (intramuscular injections) places it within the reach of all practitioners. **It is not toxic.**

Cuprase is a colloidal Copper hydroxide obtained by the reduction of Salts of Copper in the presence of Albumosic Acid.

2nd April, 1918.

GENTLEMEN,—I am pleased to say that the Cuprase which you supplied has already shown beneficial results in a chronic case of oesophageal carcinoma, and the patient is naturally very pleased with the change.

Yours faithfully,
Dr. —.

WARWICKSHIRE,

July 1st, 1917.

DEAR SIR,—Will you please send me another box of Cuprase ampoules. The previous lot effected a most remarkable cure in an elderly lady suffering from cervical cancer—the cauliflower-like growth has disappeared with its offensive discharge.

This case was given three months' life by a Specialist, being inoperable.

Yours faithfully,
(Signed)
—, M.R.C.S., L.R.C.P.

Dr. GAUBE DU GERS' Cuprase is administered by intramuscular injection made *very slowly* in the gluteal region, with a needle of about 0.03 cm. The dose is one ampoule every four days, which should be continued in the same manner as long as necessary. These punctures are not generally painful and do not produce any local reaction.

The **SCIENTIFIC TREATMENT** of
HAY FEVER and allied ailments.

KINECTINE

According to Dr. MOUNEYRAT, the discoverer of Galyl and Hectine (the widely adopted Salvarsan Substitutes).

FORMULA:

Chlorhydrate of Quinine c. Hectine—i.e., Benzo-sulfone-para-amino-phenyl-arsenate of Quinine.

Non-toxic, produces no ill-effects.

Easily taken (tablets) and well tolerated.

Not only a Prophylactic against, but, a specific in

Catarrh, HAY FEVER, Coryza, Influenza, Malaria, &c.

Rapid Abortive Action in the Initial Stages.

Curative Action in the Advanced and Chronic Conditions.

DEAR SIR,

For the first time for 18 years I have escaped my annual attack of Influenza, thanks to Kinectine. Please send me further supply. I enclose cheque 30s.—Yours faithfully,

G

Lancs, 11th May, 1918.

M.D.

Adult Dose: 1 tablet three times a day for three days, then 2 tablets every other day until 18 tablets have been taken. Half doses for Children.

THE **SCIENTIFIC SULPHUR MEDICATION.**

BIOSULFOL

(Assimilable Colloidal Sulphur.)

A GREAT ADVANCE IN SULPHUR TREATMENT.

Sulphur administered in this form by the digestive tract is **entirely absorbed** (90% in worst cases and 100% in others).

Biosulfol gives beneficial results, with which ordinary Sulphur medication, owing to its being only in a small part assimilated, cannot compare.

INDICATIONS:

Skin Diseases.

Chronic Affections of the Pharyngeal and Bronchial Mucous Membrane.

Chronic Affections of the Genital Mucous Membrane.

Chronic Rheumatism (Polyarthritis deformans).

Various Affections of the Joints.

Intestinal Intoxication.

Mercurial and Lead Poisoning, &c.

DOSAGE:

Biosulfol is prescribed in a one-teaspoonful dose, to be taken during each of the two principal meals, pure or in water or milk. It is quite palatable.

Further Literature sent to the Medical Profession on application.
