

Prescribed by the Medical Profession or 35 years.

The MEDICAL PRESS & CIRCULAR (London, Eng.) says:

"Few modern improvements in pharmacy have done so much as Benger's Preparations to assist the physician in his treatment of the sick."

"AN OUTSTANDING FOOD."

Everywhere Benger's is the Food relied upon by the British medical profession, in the prostration of illness, after severe operations, and in cases of difficult feeding.

Benger's is the One Food which contains the active enzymes of natural digestion (the amylolytic and tryptic ferments), and because of these, *it is the One Food* which is self-digestive to any extent the physician may prescribe.

It is a safe food to give in sickness and in severe digestive derangement, and is usually retained when all other foods are rejected.

BENGER'S FOOD (which is to be prepared with fresh new milk) is enjoyed by invalids who are unable to assimilate milk alone or milk and water.

for INFANTS, INVALIDS, AND THE AGED,
is sold throughout the World by Chemists, &c., in sealed tins

Full particulars will be sent post free on application, to any member of the medical profession.

depôts throughout Canada.

N.B.—BENGER'S FOOD is the direct outcome of the pioneer work on digestive ferments, by the late Sir William Roberts, M.D., F.R.S., and the late Mr. F. Baden Benger, F.I.C., F.C.S., in 1880, since when it has been the premier dietetic preparation of its kind in the British Empire.
