of hæmorrhoids have to do in an important degree with failure of the bowels to move properly. Constipation looms large in the ethology of piles, and also in the treatment of piles.

Nujol prevents straining, ensures easy, thorough evacuation, is without medicinal action and effect—or after-effect. Nujol acts mechanically, maintains proper plasticity of the fæcal mass, promotes peristalsis, soothes irritation, prevents absorption of toxins, and may be continued indefinitely.

It exceeds all B.P. requirements.

The new volume of the *Medical Annual* is of unusual value and interest. The experiences gained by the war have produced advances in medical science and practice which, under ordinary conditions, would have required many years to reach.

This progress will be found chronicled in the *Annual*, and adapted in every way possible to the requirements of the practitioner.

Last year's volume was exhausted soon after publication, and to avoid disappointment, early application is advised for this issue.

DEAR SIRs,—“All my colleagues were so pleased with the Phonophore Stethoscope I bought in your house some days ago when in London that they have asked me to beg you to send some by post. Accordingly I send you cheque, £9 12s. 6d. for 11 similar to the one I bought.”—1st PORTUGUESE BASE HOSPITAL.

DEAR SIRs,—“I find that most certainly the chest sounds are rendered clearer and more distinct by your “Phonophore” than by any stethoscope I have used during over 30 years’ work.”—Yours, F.R.C.S.

DEAR SIRs,—“I may say I am very pleased with the Phonophore. It renders chest sounds more audible and more distinct than any instrument I have so far used.”—Yours faithfully.

DEAR SIRs,—“I have used the Phonophore for 20 years and have never come across a better stethoscope.”—Yours faithfully.

Extract from the “British Medical Journal.”—“Some years ago Messrs. Arnold & Sons, of Giltspur Street, E.C. brought out a Stethoscope which they named the ‘Phonophore.’ Its construction secured a considerably increased volume of sound, and the appliance gained favour among those dissatisfied on general grounds with ordinary stethoscopes, or whose needs, owing to some lack of aural acuity, were not adequately met thereby.

## “THE HOUSE FOR EVERYTHING ELECTRO-MEDICAL.”

# The Grevillite Therapeutic Incandescent Lamp

(PHOTOTHERAPY).

PRICE COMPLETE, £15. (Owing to prevailing conditions our prices are subject to fluctuation).

A really Universal Light and Heat Apparatus for the treatment of any part of the body.

Catalogues sent on request.

Manufactured by **THE MEDICAL SUPPLY ASSOCIATION,**

LIMITED, ELECTRO-MEDICAL INSTRUMENT MAKERS,

SHOWROOMS AND WORKS: 167-185, GRAY'S INN ROAD, LONDON, W.C. 1.

The following is an extract from the “Archives of the Roentgen Ray,” October, 1911:—

“The physiological effects of this form of photo-therapy may be summarised thus:

1. Dilation of superficial vessels and glands.
2. Removal of venous stasis and promotion of normal circulation.
3. A bactericidal action on superficial germs.

And as a practical result of these principles we get—

1. Relief of pain.
2. Restoration of functional activity both in the skin and in the deeper glands.

It will be easily seen how broad a field there is for the clinical application of the high-candle-power lamp, and how many indications there are for its use.

In the treatment of some skin diseases, notably acne, eczema, psoriasis, tinea, syphilis, and other ulcers, I have found this succeed where other treatment has only yielded disappointing results.

In the relief of pain I think this form of treatment stands pre-eminent in the armament of the modern electro-therapist. I venture to assert that where, after a scientifically applied exposure to this light no relief is obtained, it may be taken that the case should be promptly referred to the surgeon. And there are some cases where the light will cause the pain to become more acute; this differentiates those cases of retained, walled-in pus, which have gone beyond the power of phagocytes and opsonins, and which call for immediate operative interference.

The cases of pain which are more particularly benefited are rheumatic and rheumatoid disease, sciatica and other forms of neuritis, lumbago and the varying conditions which are classed under that generic term, and certain functional diseases of the digestive system, especially gastric irritability and pain.

In certain classes of neurasthenia and insomnia, the light passed up and down the spine for ten or twelve minutes, and then applied for a similar period to the abdomen, will produce a marked relief, and eventually a cessation of all symptoms.

In addition to its power of curing obstinate acne, the light will in many cases abort a bubo or carbuncle before the pus has formed in any great quantity. In those cases it is a great aid as a diagnostic agent, for if the pain be relieved within ten or twenty minutes it is certain that repeated applications will effect a cure; whereas if the pain becomes worse—and this will occur in the first few minutes—it is certain that nothing but the surgeon's knife will relieve the condition.

NOTE.—For further particulars see separate pamphlet.

## The Best Practice

known to modern engineering is embodied in the "Austin Twenty" and the coachwork is worthy of the wonderful chassis.

The car is at once distinctive and distinguished in appearance—points which are, to the doctor, almost as important as the reliability, economy and simplicity for which the Austin is so renowned.

## KOND'S EUONYMISED COCOA.

What is it?

A delicious Beverage, taking the place of Tea, Cocoa, or Coffee.

Why take it?

Its use is attended with a marked increase of appetite and rapidity of digestion: all feelings of heaviness after meals disappear; and an increase of the natural flow of bile takes place. It is not aperient, except in repeated doses, but the increased activity of the liver is valuable in removing constipation. It is used in stomach or liver disorders, alcoholism, slow digestion, overwork, depression, loss of appetite, in cases where tea and coffee are not desirable, sedentary habit of life, gout, rheumatism, and biliousness.

Euonymised Cocoa can be freely taken by those unable to take ordinary Cocoas.

The Euonymin is taken in the form of a hot infusion in a delicious beverage. Its action in this form is incomparably more direct and powerful than when taken in any other forms.

Highly recommended by the Medical Profession, from whom we have received hundreds of testimonials.

**Hypnotic and Sedative.****Advantages:**

- ¶ May be given with the greatest safety, being pure and free from harmful matter.
- ¶ No disagreeable after-effects follow its use.
- ¶ Never varies in strength.

The Medical Annual writes:

"Battley's Solution of Opium is a common word in the Practitioner's vocabulary. It has gained its reputation by its intrinsic value as a remedy which contains all that is sedative and anodyne in opium without its resinous constituents, which are, therapeutically speaking, impurities."

Strength—Twice that of Tinctura Opii B.P. Usual Dose—5 to 15 minims.

Issued in 2 oz., 4 oz., 8 oz. and 1 lb. bottles.

## Alcresta Tablets of Ipecac in Amebic Dysentery and in Endamebic Pyorrhea

The oral administration of the ipecac alkaloids is proving more advantageous than the hypodermatic injection of emetine, especially in the treatment of endamebic carriers and in the prevention of relapses.

### UNCOATED AND DISINTEGRATING—CAUSE NO NAUSEA

Each tablet contains the alkaloids (emetine and cephaeline) from ten grains of Ipecac, U. S. P., held in an adsorption compound with hydrated aluminum silicate. The tablets disintegrate but this adsorption compound passes through the acid contents of the stomach and releases the alkaloids only in the alkaline intestinal secretions—thus preventing gastric disturbances.

*Ten or twenty tablets, representing one hundred or two hundred grains of ipecac, may be given in a day without vomiting or nausea.*

Distributed through the Drug and Dental Trades in bottles containing 40 and 500 tablets. Further information on request.

and in all inflamed and irritated conditions of the skin the application of Emol-Keleet will be found to afford great comfort and relief.

Its marked efficacy in the local treatment of all skin affections is due to its recognised absorbent and sedative properties, its impalpable texture and its complete freedom from organic matter.

As a soothing agent following the injection of vaccines and in alleviating the distressing pruritis accompanying scarlet fever and measles, Emol-Keleet may be employed with most beneficial results.

## Cases of persons subsisting upon *BENGER'S FOOD*, mainly or entirely, for several years.

*There will be many medical men, who can, in their own experience, confirm the value of Benger's Food, as indicated in the following excerpts from genuine unsolicited and voluntary letters.*

PLUMSTEAD, KENT.

"I have been living entirely on Benger's Food for seven years, it being the *only* food I can get to suit me." Mrs. C——.

ROTTINGDEAN, near BRIGHTON.

"Having been a sufferer from gastric trouble for the past 8 years, and not being able to take any solid food, I am living on Benger's Food, and am now weighing 13 stone 2 lbs. My age is 71 years." J. M——.

GILLINGHAM, KENT.

"I have lived on Benger's Food alone for over 12 years. I have tried other foods, but cannot take them without feeling sick." M. A. G——.

BISHOPSTON.

"I have thought you would be interested to know that during the past eight years I have been living practically on Benger's Food. I cannot speak too highly of the good it has done me. It was ordered for me by my medical man." M. L——.

NEWCASTLE, STAFFS.

"I live on Benger's Food alone, and have done so for a number of years. Five years ago the doctor never thought I should be able to leave my bed." E. D——.

**Benger's Food is prepared with fresh new milk, with which it combines to form a delicate food cream, rich in all the elements necessary to sustain life.**

MARLBOROUGH

PRINCE EUGENE

TALLARD

BLENHEIM, fought in A.D. 1704, between the English under the Duke of Marlborough, with the Austrians under Prince Eugene on the one side, and the French under Marshal Tallard, with the Bavarians under Maximilian on the other, was the decisive battle in the War of the Spanish Succession. The ever-growing power of Louis XIV of France had become a menace to Europe, and culminated in his attempt to set his grandson as king over Spain.

At Blenheim the French army was almost annihilated. Had the result been reversed, "beyond all question, a universal despotic dominion would have been established over the bodies, a cruel spiritual thralldom over the minds, of men.....The destinies of the world would have been changed.....the colonial Empire of England would have withered away."

# The Allenburys' DIET

Invaluable in Sickness and Convalescence.

## TITLE IMPORTANT

The "Allenburys" DIET is a complete food chiefly intended for Adults, and is *quite distinct* from the "Allenburys" Foods for Infants. It is quickly prepared, exceptionally palatable, easily digested and wholly nourishing.

## COMPOSITION & PREPARATION

The "Allenburys" DIET is made from pure, rich, full-cream milk and whole wheat, both ingredients being partially pancreatised during the process of manufacture. It needs boiling water only to prepare it for use.

## ANALYSIS

Fat	...	...	...	15.4

## INDICATIONS FOR USE

In all Gastric conditions where it is found that curd is not digested, Gastritis, Gastro-Enteritis, Gastric Catarrh, Gastric Ulcer, Gastric Influenza, Obstinate Vomiting. In all Acute Disorders. Before and after Surgical Operations. In Convalescence, Gastric Dyspepsia, Insomnia, (taken last thing at night it promotes refreshing sleep and digestive rest). Neurasthenia. All forms of Tuberculosis. In Senile Disorders of the Digestion. When pure milk is not obtainable, viz., on Board Ship, in Tropical Countries or Distant Lands, or whenever a light nourishment is required. For the Invalid, Dyspeptic, and the Aged it is an essential nutrient.

## ADVANTAGES

Most invalids' foods require cow's milk to be used in their preparation; this involves much time and careful mixing to avoid the presence of burnt milk or lumpiness—common characteristics of foods so prepared. The "Allenburys" DIET does not require cow's milk to be added. By the simple addition of boiling water a complete food is produced that is smooth to the palate and pleasant to the taste. The "Allenburys" DIET can be taken for prolonged periods without any distaste arising. These distinct advantages are of immense service in the work of a busy hospital or understaffed sick-room.

HARROGATE LLANDRINDOD WELLS WOODHALL SPA

*Contain all the Spa needs of the Physician.*

These Spas have nothing to fear from Foreign Resorts. The patient can depend upon obtaining in a thorough manner the treatments prescribed.

**BATH.**—Hot Radio-active waters. Mild equable climate. The Summer climate of Bath being intermediate between that of the more exposed health resorts in this country and the far hotter Continental Watering Places is suited to a large class of patients who require warmth.

**CHELTENHAM.**—Waters are suitable for the ailments, the treatment of which has made the reputation of Carlsbad, Kissingen, Vichy, Marienbad.

This fashionable resort enjoys a beautiful situation, and among British inland towns has no rival in respect of sylvan beauty.

**HARROGATE.**—The dry bracing climate of Harrogate and moorland air is one of its chief assets which, combined with the great variety of mineral waters and the practice of every known treatment in the palatial bathing establishments justifies the claim of being the Finest Spa in Europe.

*The other 4 Spas will be briefly detailed next week.*

**ST. MILDRED'S HOTEL**  
**WESTGATE-ON-SEA.**

(UNDER ROYAL PATRONAGE.)

For patients who have reached the con-  
valescent stage and need but rest and good  
bracing air to recuperate their health and  
strength, no better recommendation or  
advice can be given than a sojourn in West-  
gate at St. Mildred's, a high-class Hotel in  
an exceptional position as regards climate.

St. Mildred's is conducted under the  
personal supervision of the proprietor, who  
has been connected with some of the  
best-known hotels in London.

The following is the opinion of the late Sir  
JAMES PAGET, BART., F.R.S., F.R.C.S., Eng.:

"No one could tell what it was in the air  
of Westgate, but practical experience has  
proved that none better could be found."

The late Sir Erasmus Wilson was so convin-  
ced of the great benefit to health in the West-  
gate air that he built himself a magnificent  
house there, called "The Bungalow," which,  
after his decease was purchased by its present  
occupier, Sir William Ingram, Bart.

Prices are strictly moderate.

**INCLUSIVE TERMS:** From 15/- per day  
(October to May).

Members of the Faculty may have every  
confidence in recommending patients who re-  
quire rest and quietness but no further pro-  
fessional attendance, to St. Mildred's whose  
visitors include Royalty and members of the  
Nobility.

Why not spend a restful holiday yourself  
at St. Mildred's?

**UNIVERSITY OF LONDON, UNIVERSITY COLLEGE**

Students who desire admission to Full-time UNDERGRADUATE COURSES in October next, should apply for admission immediately. Those who have just sat for Matriculation can make their applications contingent on success in that Examination. Owing to the large number of applications already received, it is unlikely that any application will be successful that is received later than Saturday, July 5th.
