

**'Iodolysin' is a soluble compound of Thiosinamin with Iodine and contains 43 per cent. Thiosinamin and 47 per cent. of Iodine. The preparation has been very successfully used in the treatment of Rheumatoid Arthritis and Arthritis Deformans.**

### *A Striking Report*

"It may interest you to know that I have been using it ('Kapsol' 'Iodolysin') in a case of Rheumatoid Arthritis with very marked success. I saw the case first about a year ago when she had been a complete cripple for over six months. She was discharged from a hospital in ———as incurable. I found her suffering from *pyorrhæa alveolaris*, which I treated with an auto-vaccine and afterwards gave her the 'Iodolysin,' and that only, in varying doses. She can now walk into her garden, goes up and down stairs, dresses her own hair, and her joints are quite free from pain and deformity. She continues to take one 'Kapsol' daily. I think the result is most satisfactory."
