

Prescribed by the Medical Profession for 35 years.

The MEDICAL PRESS & CIRCULAR (London, Eng.) says: "Few modern improvements in pharmacy have done so much as Bengers' Preparations to assist the physician in his treatment of the sick."

For feeding difficult cases—Benger's Food.

Patients, with digestions debilitated from pain, accident, illness, or excess,—slow to respond to treatment, frequently benefit from a course of Benger's Food.

When Benger's is prepared, fresh new milk is used. The dormant digestive elements with which the food is combined, then become active, and reduce the tough casein curd of the milk, as well as the food itself, to an easily assimilated condition. This self-digestion can be regulated as desired. Benger's should not be confused with pre-digested foods, from which it is quite distinct.

BENGER'S FOOD

promotes a high state of bodily nutrition with little or much digestive effort, as may be prescribed by the physician.

Full particulars will be sent post free on application, to any member of the medical profession.

for INFANTS, INVALIDS,
AND AGED PERSONS,

is quite distinct from every other food obtainable, and is sold throughout the World by Chemists, &c., in sealed tins:
