

The men who know

The Radiologist

The Radiologist specifies Dupli-Tized Films because he wants, and gets, high quality, readable negatives of good contrast and long scale of gradation. He knows that the results are always dependable for correct interpretation—and he also knows that Dupli-Tized Films are easy to file, unbreakable and take up less space than plates.

The Radiographer

The Radiographer admires Dupli-Tized X-Ray Films, because he gets results that cannot be equalled by any other method ; and he never has to repeat—every exposure gives a clean, bright, fully-graded negative. The Kodak system of constants gives him the best possible result in the simplest possible way.

Both Radiologist and
Radiographer rely on

Eastman Dupli-Tized X-Ray Film

Kodak Limited, Kingsway, London, W.C. 2.
