

Cox-Cavendish Announcements in Radiology and Electrotherapy.

The POTTER-BUCKY DIAPHRAGM

The latest apparatus for improving RADIOGRAPHIC TECHNIQUE.
BRITISH MADE.

This remarkable apparatus is indispensable for the production of radiographs showing perfect detail. It is designed to absorb the scattered radiations emerging from the patient, thus giving wonderful definition and detail and completely eliminating that "foggy" appearance and distortion so often met with. This "cleaning up" effect is particularly marked in radiography of the chest, abdomen and pelvis.

PRICE
£55

**Cheapest
and
Best**
