

Rheumatoid Arthritis

Tablets Thiodin Compound H H & Co.

Thiodin is a compound of Allyl-Thio-Urea.

Practitioners throughout the country have tried this compound in conjunction with our Capsules Colloidal Iodine and Salol (Keratin-Coated) for the treatment of RHEUMATOID ARTHRITIS and ARTHRITIS DEFORMANS with excellent results. They state that this method is a distinct advance on anything they have yet tried.

In cases of long standing, the mode of treatment has been the administration of one Tablet and two Capsules *ter in die*. The pain is greatly diminished with the first few doses, and very satisfactory results show themselves within a week. For this we have the authority and enthusiastic testimony of Medical Men of the highest reputation.
