The Value of Lubrication in Coloptosia

A gastroenterologist of wide reputation calls attention to the efficacy of Paraffinum Liquidum in ptosis of the intestines. He points out that it is not only a means of healing superficial lesions of the intestinal tract and softening the fæces, but that it also inhibits bacterial growth.

NUJOL offers invaluable aid in the treatment of coloptosis and resulting stasis. Its correct viscosity, high uniform quality and absolute purity are due to the unsurpassed equipment and resources of its makers.

In determining a viscosity for Nujol best adapted to general requirements, consistencies were tried ranging from a water-like fluid to a jelly. The viscosity of Nujol was fixed upon after exhaustive clinical test and research, and is in accord with the highest medical opinion.

That the value of Nujol to the medical profession is generally recognized is attested by its use by physicians and in hospitals the world over.

Sample and authoritative literature dealing with the general and special uses of Nujol will be sent gratis upon request.
