Circular sent, post free, on receipt of application, accompanied by name and address.—Limbs Re-Adjusted.—Spring and other Crutches.
 58, BOLSOVER STREET, GREAT PORTLAND STREET, W. (facing Portland Road Station.)—Established Feb. 1863.

DR. BLY'S AMERICAN ARTIFICIAL LEG.

(PATENTED.)

This beautiful invention has gained a great reputation in America, where, during the recent war, constant opportunities occurred for testing its efficiency.

Unlike the Anglesey Leg used in England, it possesses rotative and lateral action at the ankle-joint, thus permitting the body of the wearer to be sustained in easy equilibrium during walking or standing—a point hitherto entirely overlooked in the construction of Artificial Limbs.

Instead of an ugly wooden structure, it presents a form resembling in colour and action the human limb, and can be readily washed when needed.

Dr. Bly has placed his invention in the hands of **Mr. HEATHER BIGG, 56, Wimpole Street,** from whom alone it can be obtained. — * * * A descriptive Pamphlet sent post free on application.

PANCREATIC EMULSION.—THE NEW REMEDY.

Palatable and more Permanent in its effects than Cod Liver Oil.
