SOLE MAKERS: THE COX-CAVENDISH ELECTRICAL CO. (1924) LTD.
105, Great Portland Street, London, W.1.

A fine product from the laboratories of E. SCHERING.

VERAMON

TRADE MARK

Frequently in everyday practice the physician is confronted with the choice between morphine (or other habit-forming hypnotic) and unrelieved pain, and wisely prefers the latter.

Here the new analgesic, Veramon, is a friend alike to the patient and the physician.

This preparation is a chemical compound of Barbitone and Amidopyrin, on Burgi's drug combination principle, whereby the analgetic effects of both components are enhanced, while the hypnotic effect is almost entirely eliminated. It is safe and non-habit forming.

Veramon is next only to morphia in pain-relieving properties, and its exhibition is unaccompanied by any associated ill-effect.

Original Packages—TABLETS: In tubes of 10 × 6 grs.
POWDER: In boxes of 1 oz.

Samples and literature on request from the Importers:
