

THE MACKENZIE-LEWIS POLYGRAPH

An improved form of the Mackenzie Polygraph designed by Sir T. Lewis. Among its advantages are:

1. Lag and distortion of wave form are minimized by the construction of the tambours and receiving chambers.
2. The glycerine pelotte is used as the receiving chamber.
3. The paper passes under the pens in a direction which assists the ink flow.
4. The instrument in its case is complete, ready for use—no connecting or disconnecting required.

Overall dimensions: 9 × 5½ × 5 inches.
Weight 4½ lbs.

SANTONIN. B.P.14.

THE ONLY SAFE RADICAL CURE FOR INTESTINAL WORMS

RECOGNIZED BY THE MEDICAL AND VETERINARY PROFESSIONS
THROUGHOUT THE WORLD FOR NEARLY A CENTURY.

**THE CHEAPEST ANTHELMINTIC IN PRACTICE. ABSOLUTELY
HARMLESS. 100% EFFECTIVE.**

Intestinal parasites play an important role in causing many diseases which hitherto have been attributed to other causes.

The medical profession can frequently prevent the development of grave diseases by an early diagnosis and removal of intestinal parasites.

When prescribing worm medicine it is important to consider only such drugs as will destroy the worms and yet not injure the host.

SANTONIN is the ideal anthelmintic, because it is maximally toxic to the parasite and minimally toxic to the host.
