

An Important New Medical Work**THE THERAPEUTICS OF INTERNAL DISEASES**

Supervising Editor,
GEORGE BLUMER, M.D.

Associate Editor,
ALBERT J. SULLIVAN, M.D.

In this new work, consisting of four volumes, the important advances in practically every field of medicine and surgery render this publication indispensable to the practitioner.

It brings to the practitioner all of the new proven advances in medicine pertinent to a work that covers therapeutics as it exists to date.

In the field of chemotherapy, vast and important progress has been made, for instance: the use of sulphanilamide in the treatment of a variety of infections—streptococcal, gonococcal, meningococci, etc.; the sulphapyridine-serum treatment of pneumonia; the use of Vitamin K in the prevention and treatment of bleeding in jaundice; the protomine zinc insulin treatment of diabetes; and nicotinic acid in the treatment of pellagra.

Significant progress has taken place in other fields. In bacteriology and immunology the advances have been rapid: the improved methods for recognizing types of pneumococci, the serological grouping of streptococci; the chemical characterization of certain antigens; the preparation of antigens and antisera through the use of improved cultures; a correlation of knowledge of relationships among the types of typhus fever and spotted fevers; and others of equal importance.

A thoroughly modern reference to which the practitioner can turn with full confidence as new problems in therapeutics arise in his daily practice.

Vol. I. 912 pages, 137 Illustrations.

Vol. II. 1084 pages, NOW READY.

Each volume indexed and bound in sturdy blue binding.

VOLUMES III and IV

WILL BE ISSUED DURING THE EARLY AUTUMN OF 1940

THE SET, FOUR VOLUMES - £9

Detailed Prospectus and new Medical Catalogue on application.

CARDIOVASCULAR-RENAL DISEASE

By **LAWRENCE W. SMITH, M.D.,** and others. Owing to the importance of cardiovascular-renal disease as the chief cause of death this work correlates all the information available on this condition.

236 pp. 76 Illustrations, some in colour together with Charts. (Ready March 29). 20s

ESSENTIALS OF PATHOLOGY

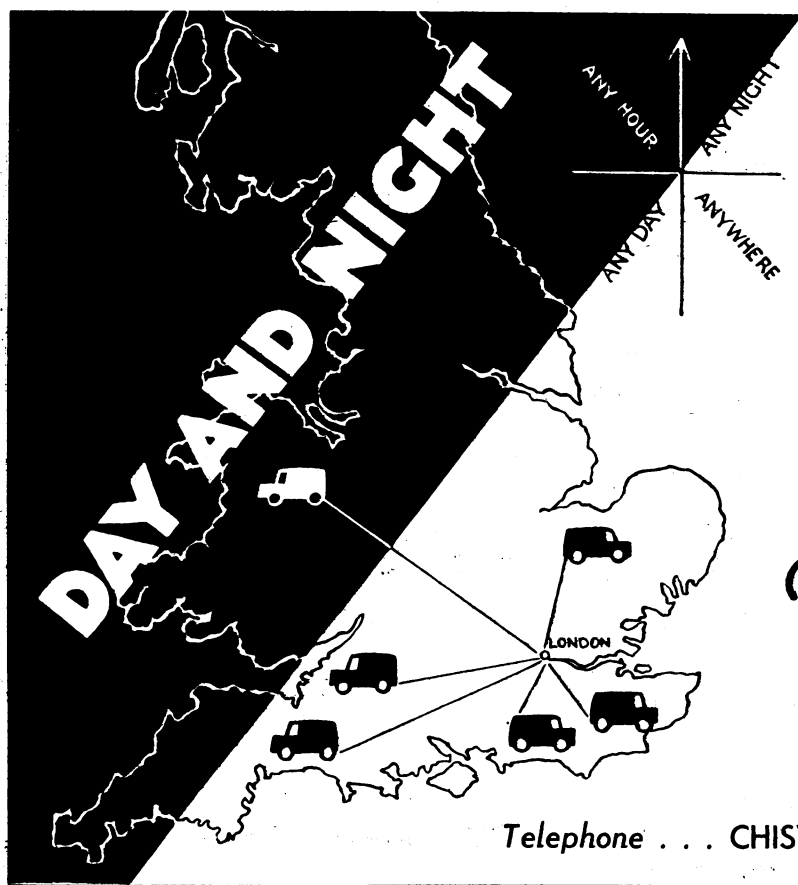

By **LAWRENCE W. SMITH, M.D.,** and **EDWIN S. GAULT, M.D.**

"... can be cordially recommended for its stimulating and refreshing style."
—Practitioner.

"The work is a really great production, authoritative and fully explanatory, and a careful explanation of its various chapters leaves the reader with a feeling of general satisfaction, as one finds in the various chapters material which should give the answer to even the most anxious inquirer."—Prescriber.

886 pages, 160 Full-page Plates, including 12 in Colour. 36s.
