## Medical Diseases of War

By Sir ARTHUR HURST, M.A., D.M. (Oxon.), F.R.C.P., Lt.-Col., late R.A.M.C., Consulting Physician to Guy's Hospital. viii+328 pages. 28 illus. and 4 plates. Ready April 18. 16s. net. Sir Arthur Hurst's exceptionally wide experience in 1914-18 produced a book which became a classic work on war diseases; this is an entirely new work on the same lines, incorporating the latest information and views on treatment.

Edited by A. NINIAN BRUCE

### Kinnier Wilson's Neurology

Two vols. lxiv+1840 pages. 332 illus. 16 plates (4 coloured). £4 4s. net.

The posthumous *magnum opus* of a great neurologist. Carefully edited and equipped with the latest references, it is a monumental survey of all the clinical aspects of the subject.

TEN TEACHERS

### Diseases of Women

Edited by CLIFFORD WHITE, Sir COMYNS BERKELEY and FRANK COOK.

Sixth Edition. xii+492 pages. 159 illus. 7 plates. 18s. net.

"An invaluable classic."—*The Practitioner*.

"This volume will carry still further the fame of the earlier editions. The doubts are removed; it is a Sir Galahad."—*Jnl. of Obstetrics and Gynaecology*.

EDWARD ARNOLD & CO.

LONDON: 41 & 43, MADDOX STREET, W.1

## Psychology and Psychotherapy

By WILLIAM BROWN, D.M., D.Sc., F.R.C.P., Director of the Institute of Experimental Psychology, Oxford University.

Fourth Edition. viii+250 pages. 12s. 6d. net.

A revised version of one of the most widely-read general surveys of the subject; with important new chapters on psychology in public affairs and in the problems of later life. There is also some account of War Neuroses.

HUGH MORRIS

### Physiotherapy in Medical Practice

viii+276 pages. 102 illus. 12s. 6d. net.

"Dr. Morris has included an amazing amount of practical information. The book deserves a place on the shelves of every practitioner and of every electrotherapeutic department."—*The Lancet*.

SIR LEONARD HILL & PHILIP ELLMAN (Eds.)

### The Rheumatic Diseases

By the Medical Staff of the St. John Clinic.

280 pages. 8 plates. 36 diagrams. 10s. 6d. net.

"Every doctor interested in rheumatism—and what doctor is not?—should not only have this book but should refer to it constantly in the treatment of his cases."—*Post-Graduate Medical Jnl.*

## A GERMAN-ENGLISH SCIENCE DICTIONARY

By LOUIS DE VRIES

473 pages. 7 x 5 ins. Flexible Binding. 19/9 net

THIS unique dictionary contains 48,000 terms (German-English) pertaining to bacteriology; botany and zoology, including anatomy, embryology, pathology, physiology, entomology, genetics, chemistry, physics, and mathematics.

It is the first to combine fully the agricultural and biological terms with those of the physical sciences. Many common idioms are included, and past tenses and past participles are translated, making the dictionary unusually helpful either to advanced or elementary students.

"Scientific men will indeed be grateful to Prof. de Vries. . . . No attempt has been made to include all the names of animals, plants, chemical compounds, etc., since each subject would need a dictionary of its own. But since research in the various departments of science now extends into complicated inter-departmental problems, the author has included terms which enter into the chemical, physical and biological sciences. The book is strongly and attractively bound, but still remains a very convenient size for purposes of frequent reference."—*Nature*.
