

SALT'S ENTEROPTOSIS BELT . . .

MADE TO
THE DESIGN
OF A
MEDICAL
MAN

This Belt is of special interest to Practitioners who have lady patients requiring support for the lower abdomen in particular. The design is actually quite simple, which has much to do with the efficiency of this Appliance. Fastenings are reduced to a minimum, yet there are ample facilities for adjustment, as and when required. Shaping at sides holds the Belt well down, without perineal straps. Alternative Corset models are also available. We shall be glad to send SALT'S CORSET & BELT BOOK post free to any Doctor upon request. This Book details and illustrates the Saltair Belts and Corsets, and includes time-saving Measure/Order Forms.
