

The most Recent Advance in INFANT FEEDING *a complete, perfected system*

THE "Veguva" System of Infant Feeding represents a noteworthy advance in pediatrics. Its introduction has been received with the keenest interest by specialists in infant nutrition throughout the country.

An examination of the "Veguva" System immediately demonstrates its advantages over the usual methods of feeding with modified milk foods. It comprises two foods which, together, constitute a complete system of feeding from birth.

"Veguva" No. 1.—Milk food containing vegetable and fruit juices—for infants from birth

"Veguva" No. 2.—Vegetable Adjuvant—for infants from four months.

Physiological tests show that "Veguva" Foods are rich in the vitamins, easily assimilable organic iron and other important mineral salts which are essential to normal development and well-being and the prophylaxis of deficiency disorders.

"Veguva" is packed by methods which effectively conserve the product and prevent any deterioration.

A Booklet

explaining in detail the "Veguva" System of Infant Feeding, together with clinical trial samples of "Veguva" Foods, will be sent on request.
