

# NYLON SUTURES (non-absorbable)

have all these  
advantages —

Toughness

Elasticity

Strength

Do not become soggy in  
water

Uniformly even and  
smooth—therefore more  
easily withdrawn than  
natural silkworm gut

Non-capillary

Not injured by water or  
steam at highest temper-  
atures used for sterilizing

Will withstand steriliza-  
tion 3 or 4 times

**Special note.** Nylon sutures are unharmed  
by any of the commonly used antiseptic solvents  
with the exception of phenol and strong mineral  
acids.
