AN X-RAY ATLAS OF SILICOSIS

By

ARTHUR J. AMOR, M.D., M.Sc.

The Legends Translated into French by

ROBERT E. HORNE, M.A.With a Foreword by **SIR WILSON JAMESON, M.A., M.D., F.R.C.P.**

This Atlas illustrates typical X-ray appearances at all stages of the disease in various industries. The text which faces each plate gives brief notes on the case illustrated, both in English and French.

6½ x 9½ in. 1292 pp. 632 illustrations (many in colour) 75s. net; postage 1s. 1d.

MALIGNANT DISEASE AND ITS TREATMENT BY RADIUMBy **STANFORD CADE, F.R.C.S.**

6 x 9 in. 1060 pp. 690 illustrations (many in colour). 63s. net; postage 9d.

THE SURGERY OF THE ALIMENTARY TRACTBy **SIR HUGH DEVINE, M.S., F.R.A.C.S., F.R.C.S.**

BRISTOL: JOHN WRIGHT & SONS LTD.
LONDON: SIMPKIN MARSHALL LTD.

W. H. BAILEY & SON, LTD.
SPINAL APPLIANCESFig. 5.—**LIGHT STEEL APPARATUS for POSTERIOR CURVATURE.**

This simple apparatus is extremely satisfactory in cases of slight posterior curvature where the usual braces are inadequate. The double spring back lever is shaped with the convexity towards the spine, to which are attached arm crutches which reach well up in front and tend to pull the shoulders back, whilst the lever exerts pressure in the opposite direction.

Price **£6-10-0**

Ditto, made in Duralumin, very light. Price **£7-15-0**

**"EQUINUS" SHOES AND BOOTS**

giving the feet a normal appearance.

In acting as an
Executor or Trustee

the Westminster Bank aims at putting itself in the position of a private trustee. It is therefore its practice to employ the family solicitor, if there is one, or any other solicitor the client may name; by such means the Bank succeeds in combining domestic tradition with business efficiency. A book showing the advantages of corporate executorship and the terms of appointment may be had at any branch or at the Branch situated in B.M.A. House, Tavistock Square, W.C.1

KARSODRINE
The Volatile Vasoconstrictor

in the New Type Inhaler with only **ONE** Cap to remove

"It is a modern 'talismán' against 'nasal infection'! That is how one medical man described the Karsodrine Inhaler. A shade over-enthusiastic? Possibly!—but not really so very far from the truth. The Karsodrine Inhaler is a highly active local volatile vaso-constrictor and anodyne. It affords immediate and prolonged contraction of congested nasal mucosa with local analgesic action. Packed in a hygienic moulded plastic inhaler, with no metal parts and only one cap to remove. A British production throughout and obtainable from all Chemists at the reasonable price of 1/6d. per inhaler, including purchase tax.
