

Just Issued—New (4th) Edition

Arey's Developmental Anatomy

From the Preface

The fourth edition is offered as essentially a new book. This has required more than two years of concentrated effort, and the replanning and rewriting have been so drastic that only fragments, at most, of previously existing pages have been salvaged and re-utilized. The extensiveness and intensiveness of the revision involve equally the text proper and the laboratory manual.

"This book should prove a very welcome addition to the medical student's library, and will be especially useful to those studying for a Science degree."—GLASGOW MEDICAL JOURNAL.

Developmental Anatomy. *A Textbook and Laboratory Manual of Embryology.* By LESLIE BRAINERD AREY, Ph.D., Robert Laughlin Rea Professor of Anatomy, Northwestern University. 612 pages, with 1385 illustrations on 588 figures, many in colours. 9½" x 6½". Cloth, 35s. net.

JUST READY

Pearl's Medical Biometry

NEW (3rd) EDITION

By RAYMOND PEARL, Professor of Biology in the School of Hygiene and Public Health, and in the Medical School, The Johns Hopkins University. 437 pages, 6" x 9½". Illustrated. Cloth, 35s. net.

This book is based on the author's many years' experience as an analyst of biological data. It is, therefore, a thoroughly sound and fully up-to-date presentation of to-day's methods of collecting, tabulating, adjusting and drawing practical conclusions from statistical data regarding human life. Dr. Pearl especially stresses the application of these methods to medicine, biology and hygiene. Simplicity and clarity characterize the entire work.

Frobisher's Fundamentals of Bacteriology

NEW (2nd)
EDITION

By MARTIN FROBISHER, JR., S.B., Sc.D., Associate in Bacteriology, The Johns Hopkins University. 633 pages, 6" x 8". Illustrated. Cloth, 20s. net.

"Within its scope it is one of the best introductions to general bacteriology we have seen, and it is just the kind of book which a student of medicine who has become interested in bacteriology for its own sake might profitably read."—THE LANCET (Review of previous edition).

SCALPEL BLADES

Still no increase in price

No scarcity...high quality maintained

With output increased we are still able to supply Scalpel Blades at pre-war prices.

In peace-time, the Swann Morton Scalpel Blade had already established itself in the face of the keenest foreign competition, because of its high quality. As a result, in May 1939 we were able to drastically reduce our price from 6/6 to 3/- per dozen. Today, when foreign competition is withdrawn, our policy remains unchanged—the highest quality possible...the lowest price possible.

SWANN MORTON ★
SCALPEL BLADES

3/- PER DOZEN 1-gross lots 33/- per gross. 5-gross lots 31/6 per gross. 10-gross lots and over 30/- per gross. Handles 3/- each (Nos. 3 and 4). Through all Surgical Instrument Manufacturers.
