ABDOMINAL OPERATIONS

By RODNEY MAINGOT, F.R.C.S.

Up to the minute references on work and research carried on by the ablest men in the profession are supplied in the text and supplemented with authoritative statements by the author on the strength of his vast and productive experience. The material is presented in a manner which makes it of prime value to the abdominal surgeon, the general surgeon, and the student studying for advancement in surgery.

The illustrations are an outstanding feature and were sketched at Mr. Maingot's side in the operating room by Pauline Larivière, pupil of Max Brödel. Twenty-three in colour. 795 figures on 298 plates. Two volumes. £5 the set.

D. APPLETON-CENTURY COMPANY, 34, BEDFORD STREET, LONDON

Gale's

'Morelix' is the ideal nutritious vitamin tonic. It is an elegant preparation of the principal constituents of Cod Liver Oil with Extract of Malt, Compound Hypophosphites, and an Aromatic Elixir of Virginian Prune. It does not derange delicate stomachs, but rather aids digestion. It is invaluable for strengthening the enfeebled constitution of convalescent, juvenile and aged patients.

SAMPLES AND PRICE LIST ON APPLICATION

'Morelix' is also supplied in combination with Guaiacol and Creosote if desired.

Containing the standard Gowlland Improved May Ophthalmoscope and Auriscope, this Set is small in size and of the simplest character.

All Gowlland Instruments are interchangeable and other components can be added if required. Bright parts are chromium plated.

Catalogue No. 3000 Improved May Ophthalmoscope, Auriscope with 3 specula, small Battery Handle and Spare Lamp complete in Case.

Made in England and obtainable from all electric diagnostic instruments
Surgical Supply Houses.

PRODUCT	DESCRIPTION	FORM	
ANTIVIRIN Antivirus preparations	Prepared in jelly and liquid forms from cultures of streptococcus, staphylococcus and other organisms. The jelly is for use from the tube in easily accessible infections; the liquid for irrigation of deeper-seated lesions. In the treatment of boils, sinuses, abscesses, carbuncles, running ear, infected wounds, etc., when direct contact between the lesion and the corresponding anti-virus is obtainable, antivirus therapy is dramatically effective.	The jellies in long nozzle or collapsible tubes, the liquid in 30 cc. bottles.	
FLAVOGEL Acriflavine Jelly	Flavogel presents acriflavine (1 in 1,000) in a water-soluble jelly base, smooth and soothing in action. Intimate contact between wound and tissue is achieved, with maximum bactericidal effect. For use on all wounds, whether infected or not. Flavogel does not cause pain, and minimises tendency of dressing to stick to the wound.	I⅓ oz. tubes, Ió oz. jars.	
GLUCODIN The reinforced Glucose	GlucoDin, the original preparation of glucose, vitamin D and calcium glycerophosphate, has long been successful for the prevention and treatment of ketogenic disorders such as travel-sickness and fat-intolerance, and for providing immediate energy without taxing the digestion. GlucoDin replenishes glycogen reserves, supplies the carbohydrate essential to fat metabolism and helps to normalise calcium and phosphorus metabolism.	I lb., 3 lb. and 7 lb tins.	
LEVU-CALCIN Calcium Levulinate	A sterile aqueous solution of calcium levulinate for parenteral use in all conditions needing urgent calcium therapy. The solution is stable. It has been used with marked success in pre- and post-operative treatment for preventing haemorrhage; inflammatory and allergic conditions with exudation; and hepatic insufficiency. For intra-venous or intra-muscular injection.	Boxes of 3 x 10 cc (10%) 6 x 2 cc. (15%	
MINADEX Mineral Vitamin Tonic	An enjoyable reconstructive tonic, composed of three groups of therapeutic agents. Each fluid ounce contains: Ferr. et Ammon. Cit. Vir. 13½ gr.; Mang. Glycerophosph. 1/25 gr.: Cupr. Sulph. 1/25 gr.: Pot. Glycerophosph. 1/5 gr.; Sod. Glycerophosph. 2 gr.: Pot. Glycerophosph. 1/5 gr.; Sod. Glycerophosph. 1/10 gr.; Vitamin A, 18,000 i.u.; Vitamin D, 3,000 i.u.	6 oz. and 12 oz bottles, and 80 oz winchesters.	
OSTERMILK Successful Infant Food	The successful dried milk food. The proportions of protein, carbohydrate and fat are carefully adjusted and standardised. The curd is light; extra vitamin D is added in stated quantity; the added iron content is three times that of milk. Ostermilk No. 1 is modified for the first three months. No. 2 full-cream is for the later months.	16 oz. tins.	
SOLANTOIN Anti-convulsant	For the treatment of severe, inveterate, unresponsive epilepsy. Solantoin is the Glaxo preparation of the anti-convulsant sodium diphenylhydantoinate. Non-depressant. To be given alone or with a nightly dose of the usual anti-convulsant. Dose is one to three 0.1 gram tablets daily.	Bottles of 25, 100 an 500.	
G.L. AMPOULES	The range of potent drugs available in G.L. ampoules covers a wide field. The ampoules have several advantages. They open quickly, cleanly and without splintering. A wide, smooth mouth is left for the entry of the syringe needle, and the ampoule stands firmly on its base. The prices are considerably below those usually prevailing.	Full list available or request.	

FOOD and VITAMINS

The regimenting of diet in wartime gives new and special significance to the fact that, apart from being the richest natural source of vitamin B₁, Bemax is a food of high protein and mineral value. The usual helping of Bemax (one tablespoonful) provides not only the protein equivalent of beef and the calorific value of cheese, but also the high vitamin content of approximately 200 I.U. vitamin B₁ (400 I.U. per oz.) which has given

Bemax its outstanding position as a dietary adjunct.

No other food is as rich in vitamins as Bemax.

To use Bemax as the first course at breakfast involves little, if any, increase in the household expenditure. In present circumstances the advantage of ensuring adequate vitamin B₁ in this way rather than by supplementary dosing with B₁ concentrates, is apparent.

The Vitamin and Nutritional Constituents of **BEMAX**

	1

Dental Disease —

a manifestation of dietary deficiency?

The remarkable correlation of the incidence and spread of dental disease with demonstrable deficiencies in the diet has been amply confirmed by recent nutritional surveys.

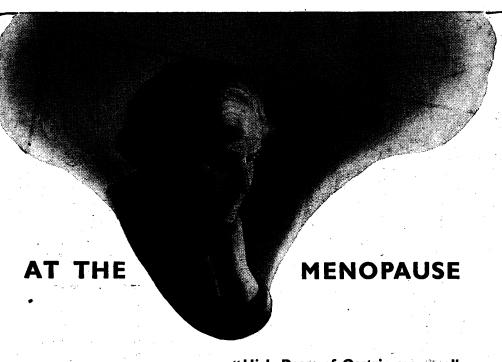

Deficiencies of vitamins and minerals are almost always multiple, which makes it particularly desirable, when prescribing dietary supplements, to achieve a proper balance between the various factors. Complevite provides, in tablet form, a *complete* dietary supplement scientifically balanced to compensate for the actual known

deficiencies in the average diet to-day, thus bringing the total intake of the important vitamins and minerals up to the optimum daily requirement of the human body.

COMPLEVITE

VITAMINS A, B₁, C and D CALCIUM, IRON, PHOSPHORUS AND TRACE MINERALS

Full particulars and complimentary bottle of tablets sent on request. Vitamins Ltd. (Dept. BCG 1), London, W.6.

"High Doses of Oestrin are usually unnecessary, at any rate for the commoner menopausal symptoms—such as vasomotor disturbances—and consequently oestrin injections are, fortunately, seldom required. It has been my practice to begin with doses of about 500 I.U. daily by mouth. If this does not control the symptoms the dose is raised to 1,000... this is usually completely effective. There are, of course, certain more severe sequelæ of the menopause, which demand much higher doses... Pruritis, Kraurosis, Leukoplakia vulvæ, fall into this class and, provided sufficiently high doses are given, the results are little short of miraculous."

There is a widely held belief that the cost of gold therapy is excessive.

The actual facts, however, do not support such a conclusion and there is no reason why this form of treatment should ever be withheld on the grounds of economy.

A course of

M Y O C R I S I N*

RHEUMATOID ARTHRITIS

costs approximately thirty-five shillings Ampoules of 0.01 Gm., 0.02 Gm., 0.05 Gm. and 0.10 Gm.

* TRADE MARK.

IS GOLD DANGEROUS?

Serious reactions encountered in the past have been largely due to excessive dosage.

If the recommended dosage is adhered to and the patient examined for contraindications, toxic manifestations rarely present a serious problem.
