

SPENCER SURGICAL SUPPORTS

Visceroptosis — Hernia
Post-operative Conditions

Spencer Supporting Corset shown open, revealing inner abdominal section.

Same Support closed. The concealed inner abdominal section is adjustable at several different points from the outside of the corset.

EACH SPENCER SUPPORT IS INDIVIDUALLY DESIGNED FOR THE PATIENT

When the doctor prescribes a Spencer Support he is assured that it will meet his specific requirements, because it will be individually designed, cut and made for the one patient who is to wear it.

For cases of enteroptosis, intestinal stasis and visceroptosis, a Spencer Support will reach under the abdomen and provide intra-abdominal uplift without compression.

For service at your surgery, the hospital, or the patient's home, see Local Telephone Directory or write direct to us.

Trained Certificated Spencer Surgical Fitters are resident throughout the United Kingdom.

MULTUM IN PARVO

The Dean Mobile Unit comprises all the essentials for Ward radiography and yet occupies very little space. It can be taken quickly to the patient's bedside and the whole unit is simple in operation. Illustrated literature describing the Dean Mobile Unit will be gladly sent upon receipt of your request.
