

THE THERAPY OF ASTHMA

The treatment of asthma resolves itself into a consideration of underlying factors and causes. Often in ASTHMA the underlying cause is not discoverable or changes from time to time—now irritant dusts, now bacterial infection, etc. The underlying factor is fortunately always the same—bronchospasm.

Thus sometimes causative agents can be removed or mitigated but always the underlying factor—bronchospasm—can be treated, successfully, with FELSOL.

Most cases of Asthma are chronic and demand patience in treatment—persistence with FELSOL will yield the highest possible percentage of successes.

BRITISH ANTI-MALARIAL DRUGS

'AVLON'

brand of

MEPACRINE

HYDROCHLORIDE B.P.

and

PAMAQUIN B.P.

The manufacture and supply of these vital and complex drugs in ever increasing quantities has been undertaken by I.C.I. since 1941. Hundreds of millions of tablets have now been supplied to the Fighting Forces of the United Nations all over the world. In addition large consignments of Mepacrine are being supplied for the relief of civilians.

The suppression and treatment of malaria remains one of the major problems of modern medicine.

Further information will be forwarded on request

**IMPERIAL CHEMICAL
[PHARMACEUTICALS] LTD.**

Commercial Department: 89 Oxford St., Manchester, 1

Ph.20e

Control of Head Lice

It is now possible to kill lice and nits in the head by the simple application of Semprolia Insecticide, a combination of Lethane 384 Special and a White Oil, faintly scented with Citronella.

**NO ODOUR DISTINCTIVE
OF THE TREATMENT**

Simple application by massaging into the scalp. No combing is required—indeed, it is contra-indicated except *after* treatment for removal of dead nits. Treatment is economical—individual application half to two drachms only.

Sample, details of packages for clinical use and home treatment and prices, on application.
