## PROPHYLAXIS and treatment of Naso-Pharyngeal infections

**ALBUCID** is the only sulphonamide that can be presented in a solution of pH 7.4. It is therefore not only neutral and hence non-irritating, but also is readily absorbed and of high chemotherapeutic activity.

**ALBUCID SOLUBLE NASO-PHARYNGEAL SOLUTION** has the low surface tension of 37 dynes per cm., thus ensuring rapid and even dispersal over the inflamed mucosa and it may be employed either as a spray or painted over the affected area.

For the prophylaxis and treatment of nasal and para-nasal infections secondary to influenza, it is ideal.

# KAYLENE

Kaylene brand of colloidal kaolin has an adsorptive and soothing action. By reason of its detoxicating and consolidating properties it is invaluable in the treatment of Food Poisoning, Tropical Diarrhoeas, Infantile Diarrhoea, Acute Colitis and Gastro-Enteritis. **KAYLENE-OL** should be given if, after the diarrhoea has been overcome, a mild laxative action is desired.

Formula :— Kaylene (Colloidal Kaolin) 100%

*Each Karsodrine Inhaler contains: Amphetamines 0.330 grm; Cineole 0.093 grm; Ol. Citronell. 0.026 grm; Methyl Salicyl 0.023 grm; Ol. Cedri 0.005 grm; Menthol 0.049 grm; Ol. Eucalypt. 0.089 grm.*

After personal use of the Karsodrine Inhaler by one medical man there came the statement: "*It is a modern 'talisman' against nasal infection.*" We invite you to investigate this enthusiastic statement by accepting, with our compliments, a Karsodrine Inhaler for your personal use. Reports have reached us of dramatic results achieved by Karsodrine in relieving congestive conditions of the nasal mucosa and sinuses. But your own experience of this modern volatile vasoconstrictor will be the best basis on which to form your opinion.
